TheTalkyOne

TheTalkyOne is ready to use and designed perfectly for your car and your office.

It talks in many different languages and it fits perfectly into your car. You can make handsfree calls and stream music while in your car. You can clip it onto the sun visor, place it in the dashboard car holder, and use it as a speakerphone in the office.

accessories

To complete the concept of style, elegance and convenience, **TheTalkyOne** comes with a sun visor clip, a dashboard car holder and 3 Velcro® pads – one on the holder and 2 spares.

Both the sun visor clip and dashboard car holder place your speakerphone in arm's reach.

charging TheTalkyOne

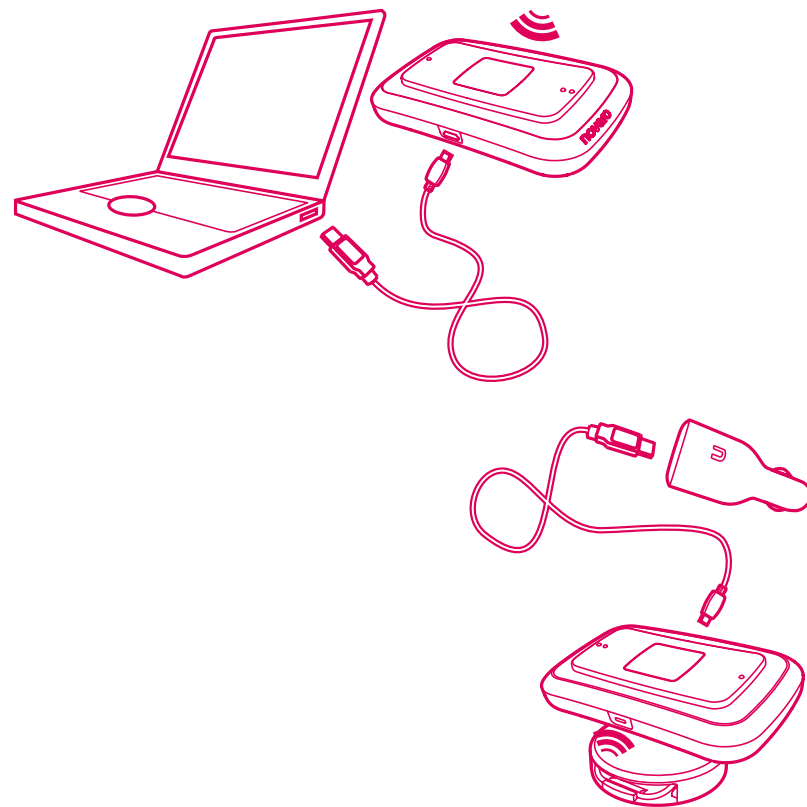

Before you can use **TheTalkyOne**, you must charge it. Please use only original novero charging devices. The following charging options are possible:

- **Car charger (DC):** Connect the car charger to the USB cable and to the DC outlet in your car. Connect the USB cable to the speakerphone.
- **PC via USB cable:** Connect your PC and the speakerphone with the USB cable.

charging signals

[_read more](#)

turning TheTalkyOne on/off

- **To turn the speakerphone on**, press and hold (2 sec) the multi-function button.
- **To turn the speakerphone off**, press and hold (2 sec) the multi-function button.

If your speakerphone is already paired with a device, it will automatically attempt to connect with this device when turned on.

power signals

[_read more](#)

pairing TheTalkyOne

If **TheTalkyOne** is not already paired with a Bluetooth device, it will automatically enter pairing mode when you turn it on.

- **To pair the speakerphone with your mobile device,** activate the Bluetooth feature of your mobile device and search for **TheTalkyOne**. See the user guide of your mobile device for instructions.

When your mobile device finds **TheTalkyOne**, select it and confirm your choice with the pass code or PIN=0000. Your device will confirm when pairing is complete.

Enable an automatic connection to prevent having to repeat this procedure every time. This device will now function as your primary device.

Pairing mode will time out after 10 minutes and **TheTalkyOne** will automatically turn off. If pairing has not been completed by then, simply turn the speakerphone back on to re-enter pairing mode.

- **To pair the speakerphone with a second mobile device,** simply repeat the pairing instructions with the second device. This device will function as your secondary device.

TheTalkyOne supports and gives you easy access to the voice recognition features on your mobile phone – from voice dialing to more advanced features such as voice-controlled SMS or e-mail.

- **To activate voice dialing** (if supported by the primary device), press the multi-function button.
- **To activate advanced voice features** (if supported by the primary device), press the multi-function button – depending on the mobile phone, you will hear a recognition tone.

The number of voice recognition features depends on your mobile phone – please check the user guide for your mobile phone for more information about voice dialing and advanced voice features.

With multipoint (multiple connections), you can connect **TheTalkyOne** with two mobile devices at the same time. With the primary device, you can access all advanced functions, and with the secondary device you can access the basic call functions.

- **To assign the primary status to a specific device,** connect this device to your speakerphone first. The next device will automatically be assigned secondary status.
- **During an active call,** only one phone can be connected to **TheTalkyOne**. When an active call is connected to your speakerphone, and the second connected phone receives a call, your current call will not be interrupted. After you have ended your call, **TheTalkyOne** will reconnect to the second phone so that they both are reachable again.

- **If you make an outgoing call from the secondary device,** it will become the primary device for the duration of the call.
- **To change the priority of the primary and secondary device,** you must reset the pairing list. To do so, press and hold (4 sec) the multi-function button and volume up (••) at the same time. Then re-connect the devices to your speakerphone, starting with the one you want as your primary device.

When the speakerphone is turned on for the first time, it will automatically set the language to English. After you have paired your mobile device with your speakerphone, it will automatically check the language of your mobile device. If the language is available, the speakerphone will automatically switch to this language.

- **To change the language of the speakerphone,** press the multi-function button and volume down (•) once to hear the current language read aloud. Press the combination again for the next language. Repeat until you hear the language you wish to select. – Then simply stop to activate the next language.
- **To turn text-to-speech off,** press the multi-function button and volume down (•) at the same time.

- **To change the installed languages,** please visit www.novero.com and check the service section. The novero software update tool allows software updates with different languages.

You can also change the text-to-speech language with the novero software update tool.

dashboard car holder

TheTalkyOne comes with a dashboard car holder, which allows you to charge it via your car charger.

- **To install the dashboard car holder in the right place**, first check that the microphone points towards you. If you want to charge while driving, you should also connect the car charger to the DC outlet in your car. Then fasten the dashboard car holder to the dashboard in a place where:
 - 1) The dashboard car holder is not close to an airbag or area where it could harm you in case of a collision.
 - 2) It will hold your speakerphone in arm's reach from the driver's seat, and the microphone points towards you.
 - 3) You can easily detach the speakerphone when leaving the car.

You can use the spare Velcro® pads to change the positioning in the car.

care

- Store **TheTalkyOne** with the power off and safely protected when not in use. To avoid the risk of theft, do not leave your speakerphone or sun visor clip visible in the car.
- Store the speakerphone out of direct sunlight and extreme temperatures (above 40°C/113°F or below -10°C/14°F), as this may shorten the battery life, affect the operation or reduce the performance of your speakerphone. Do not leave your speakerphone in your glove box, as the temperature could be too high.
- Store the speakerphone away from magnetic strips (e.g. on credit cards) and electronic medical devices.
- Handle your speakerphone with care. – Do not drop, knock or shake it, or expose it to heavy dust, dirt, moisture, rain or other liquids.
- Dispose of all product parts in accordance with local standards and regulations to protect the environment and promote sustainability.

support

Please check the following suggestions if you experience any problems with **TheTalkyOne**.

- **If there is no sound in your speakerphone:**
 - Check that the volume is adjusted correctly.
 - Check that your speakerphone is paired with your device.
 - Check that your speakerphone and device are turned on. You should then hear a sound from your speakerphone.
 - Check that your speakerphone and device are charged.
- **If you cannot pair your speakerphone:**
 - Check that the speakerphone is not already paired with your device. If not, then repeat the pairing procedure, or reset the list of paired devices, by pressing and holding (4 sec) the multi-function button and volume up (••) at the same time.

- **If you hear static or noise in your speakerphone:**
 - Check that the speakerphone is close to your mobile device and that the microphone is pointing towards you. If not, move the speakerphone closer to the device.
- **If you cannot redial, voice dial, or reject a call with your speakerphone:**
 - Check that these features are supported by the connected mobile device.
- **If the speakerphone is not functioning properly,**
 - You may need to reset the hardware. To reset the speakerphone hardware, press and hold (10 sec) the multi-function button and volume up (••) at the same time.

1. Preparing TheTalkyOne

- Make sure that, if installed, the dashboard car holder is fastened to the dashboard in a place where
 - 1) The USB cable can reach from the car charger to the dashboard car holder
 - 2) The dashboard car holder is not close to an airbag or area where it could harm you in case of a collision
 - 3) It will hold your speakerphone in arm's reach from the driver's seat.

2. Using TheTalkyOne

- Be cautious about using your speakerphone while engaging in any activity that requires your full attention. The lights on **TheTalkyOne** can be bright and may disturb you while driving. Please turn off your speakerphone to keep you from being distracted and avoid accidents.
- Do not play music at the maximum level, as this may disturb you while driving. Please adjust the volume to an appropriate level so that it does not prevent you from hearing traffic, or interfere with your driving in any way.
- Do not leave **TheTalkyOne** visible in your car to avoid the risk of theft or exposure to excessive heat, which may shorten the battery life.
- Using your speakerphone while operating a motor vehicle, motorcycle, watercraft or bicycle may be dangerous and is illegal in some jurisdictions. Please respect local laws.
- If you use a pacemaker, hearing aid or other electronic medical device, please consult your physician before using the speakerphone.
- Never try to dismantle the product yourself. None of the internal components can be replaced or repaired by users. – Only authorized dealers or service centers may open the product. If any parts of your product require replacement for any reason, including normal wear and tear or breakage, contact your dealer.
- Do not charge **TheTalkyOne** while it is attached to the sun visor.

3. Keep out of reach of children

- The speakerphone and packaging contain small parts and are not toys for children. They may cause choking if ingested.

4. ACA TSoz8 – ignition of flammable atmospheres

- Do not use your speakerphone in environments with risk of ignition of flammable gases.

5. Disposing of TheTalkyOne

- Do not attempt to replace the built-in battery in your speakerphone.
- Dispose of all product parts in accordance with local regulations. If in doubt, please consult your local authorities.
- The crossed-out wheeled bin means that within the European Union the product must be taken to a separate collection facility at the product's end-of-life. Do not dispose of these products as unsorted municipal waste.

6. Warranty

- novero offers a limited manufacturer's warranty of 12 months from the date of purchase. In some cases/countries the warranty time can be extended to 24 months. Please visit www.novero.com to find more details on warranty extension and warranty return options.

The reproduction, transfer, distribution or storage of part or all of the contents in this document in any form without the prior written permission of novero is prohibited. novero® is a registered trademark. AzDP is a Bluetooth profile that allows you to stream music in stereo quality from your mobile phone to your speakerphone.

Bluetooth is a radio technology that connects devices, such as mobile phones and speakerphones, without wires or cables over a short distance (approx. 33 feet). Bluetooth is safe to use and secure, too. Once two Bluetooth devices have been paired, no one can listen in and no other Bluetooth devices can interfere. Get more information at www.bluetooth.com

Idle (not paired) is the mode where your speakerphone is turned on but not paired to a Bluetooth-enabled mobile phone.

LED is short for light-emitting diode and refers to the light indicator of your speakerphone that sends different red or blue signals depending on specific actions, events or modes.

Multipoint allows two mobile phones to be connected to your speakerphone. The first connected user is the main user, who can use all features. The second user can only use the basic functions, such as receiving calls.

Pairing creates a unique and encrypted connection between two Bluetooth devices. Bluetooth devices will not work together if they have not been paired.

Pass code or PIN is the code required to pair a Bluetooth device (e.g. a mobile phone) with your speakerphone.

Standby is the mode where your speakerphone is turned on, paired and ready for outgoing or incoming calls. When a call is ended, the speakerphone automatically returns to standby mode.

Software update allows you to change the software of your speakerphone. This should only be done if there are compatibility issues with your mobile device. Please check for more information on www.novero.com under services.

Text-to-speech means that the speakerphone reads information aloud, such as the caller ID and important status. Text-to-speech is available in different languages.

Voice dial means that you can dial a number by saying a name out loud, instead of entering a number manually or choosing it from the phone book. With speaker-independent voice recognition, no recording is required. The name can be spoken by anyone, and the phone will automatically match the spoken name with the closest name entered in the phone book.
