about this guide

This guide shows how to locate a menu feature as follows:

Find it: Press ⊟ > Recent Calls > Dialed Calls

This example shows that, from the home screen, you press ⊟ to open the menu, highlight and select 🔁 **Recent Calls**, then highlight and select **Dialed Calls**.

Press ⋅Ợ⋅ to scroll to and highlight a menu feature. Press the *center key* ⋅♦⋅ to select the highlighted menu feature.

| **symbols**	
🐾	This means a feature is network/subscription dependent and may not be available in all areas. Contact your service provider for more information.
🐾	This means a feature requires an optional accessory.

SIM card

Your *Subscriber Identity Module* (SIM) card contains personal information like your phone number and address book entries.
To insert and use a memory card, see page 26.

Caution: Don't bend or scratch your SIM card. Keep it away from static electricity, water, and dirt.

## battery charging

New batteries are not fully charged. Plug the travel charger into your phone and an electrical outlet. Your phone display shows **Charge Complete** when finished.

Tip: Relax, you can't overcharge your phone battery. It will perform best after you fully charge and discharge it a few times.

You can charge your phone battery by connecting a cable from your phone's mini-USB port to a USB port on a computer. Both your phone and the computer must be turned on, and your computer must have the correct software drivers installed. Cables and software drivers are available in Motorola Original data kits, sold separately.

If your phone battery is completely drained, a PC USB charger will not charge it. Use the travel charger.

battery tips

Battery life depends on the network, signal strength, temperature, features, and accessories you use.

- Always use Motorola Original batteries and chargers. The warranty does not cover damage caused by non-Motorola batteries and/or chargers.

- New batteries or batteries stored for a long time may take more time to charge.

- When charging your battery, keep it near room temperature.

- When storing your battery, keep it uncharged in a cool, dark, dry place.

- Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F). Always take your phone with you when you leave your vehicle.

- It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Contact your local recycling center for proper battery disposal.

Warning: Never dispose batteries in a fire because they may explode.

Before using your phone, read the battery safety information in the "Safety and General Information" section included in this guide.

turn it on & off

To turn on your phone, press and hold 🔘 for a few seconds or until the display turns on. If prompted, enter your 4-digit unlock code.
Caution: If you enter an incorrect PIN code 3 times in a row, your SIM card is disabled and your display shows **SIM Blocked**. Contact your service provider.
To turn off your phone, press and hold 🔘 for 2 seconds.

make a call

Enter a phone number and press 🔘 to make a call.

To "hang up," press 🔘.

To maintain high audio quality during calls, please note the location of the phone's microphone (as indicated by the arrow) and keep this area free of obstruction while in use.

answer a call

When your phone rings and/or vibrates, just press 🔘 to answer.

To "hang up," press 🔘.

your phone number

From the home screen, press □ # to see your number.

Tip: Want to see your phone number while you're on a call? Press □ > **My Tel. Numbers**.

You can edit the name and phone number stored on your SIM card. From the home screen, press □ #, select an entry, press **View** (the right soft key) and then the **Edit** key. If you don't know your phone number, contact your service provider.

main attractions

You can do much more with your phone than make and receive calls!

use iTunes®

You can use iTunes desktop to buy and download music to your computer from the Internet, listen to CDs and digital music, and create playlists of your favorite songs. You can then transfer music to your phone that you've bought online or from CDs and play them through iTunes on your phone.

Note: iTunes supports MIDI, MP3, AAC and WAV song formats.

Tip: iTunes requires Windows 2000 or MAC OS X 10.3.6 or later.

installing iTunes on your computer

Before you can download songs to your phone, you must install iTunes on your computer. To install iTunes on your computer:

1 Place the iTunes CD-ROM (provided in the box with your phone) into your computer's CD-ROM drive or visit www.itunes.com on your computer to download the latest iTunes desktop software.

2 Follow the prompts to install the software.

3 When the installation finishes, you will receive an Installation Successful notice, click Finish, double-click the iTunes icon ☺ on your desktop to open iTunes.

For more information about the iTunes desktop software see www.itunes.com.

using the iTunes Music Store

Using iTunes, you can hear, buy, and download your favorite songs from the iTunes Music Store (available only in some countries). There are over a million songs available in most stores for purchase. You can use an Apple account to purchase songs from the music store.

To browse for and buy music:

1 Open iTunes and click Music Store in the Source List.

2 Click the Sign In button and follow the on screen instructions to set up an account or enter your existing Apple account information.

3 When logged into your account, browse and buy music.

   Tip: When you buy a song the name displays in the Purchased Music playlist. You can drag and drop these songs into playlists you create or directly onto your phone (see transferring music below).

For more information about the iTunes Music Store, open iTunes and select Help > iTunes and Music Store Help.

transferring music

To transfer music from the iTunes computer software to your phone:

1 First, set up the phone to use the memory card as the default USB connection.

   On your phone: Press $\boxdot$ > **Settings** > **Connection** > **USB Settings** > **Memory Card**.

2 On your computer, open iTunes.

3 Using the USB cable, connect your phone to your computer.

   Note: It may take up to one minute for your phone to appear in the source list.

4 When the phone displays as an icon in the iTunes software, drag and drop music files onto your phone.

   Note: Each song might may take 45 seconds or longer to transfer from your computer to your phone.

Note: When iTunes is finished transferring music to your phone, the phone screen displays **OK to Disconnect**. Then you can remove the USB cable. To do this, press the large button on the cable and disconnect it from your phone. If your phone does not display the **OK to Disconnect** message, you must Eject the device (using a Mac) or Remove the USB device (on a PC).

Tip: Your phone does not support music transfer via Bluetooth, nor can you use a downloaded/transferred song from iTunes as a ringtone.

opening iTunes

Tip: You must have a memory card installed (see page 26) in the phone and the iTunes software installed on your computer (see page 13) before you can transfer songs to your phone's memory card and songs will appear in the iTunes playlist on the phone.

Press **iTunes** to see the iTunes display

Note: It may take a few seconds for iTunes to appear on your display.

playing songs

Tip: You must have a memory card installed in your phone (see page 26), and have installed the iTunes Desktop software on your computer to purchase,transfer, and then play songs on your phone (see page 13).

To play a **song**, press $\cdot \hat{\mathbb{Q}} \cdot$ down to scroll to **Songs** > song name and press the **PLAY** key.

To play **all the songs in a list**, press $\cdot \hat{\mathbb{Q}} \cdot$ down to scroll to **Albums**, **Artists**, or **Playlist**. Then press $\cdot \hat{\mathbb{Q}} \cdot$ right to select **All** and press the **PLAY** key.

Tip: Don't forget to disconnect your phone from your computer to play songs. But don't disconnect while you transfer music.

Note: You cannot listen to music through most Bluetooth headsets.

iTunes controls

| features |
| --- |
| **turn iTunes on & off** |
| To turn iTunes on, press **iTunes**. To turn iTunes off, press the ⊙ key. |
| **select a menu item** |
| Press ·Ò· to scroll to menu items, and select by pressing right. |
| To return to a previous item, press ·Ò· left. |
| **Tip:** You can use the left and right soft keys to **PLAY** songs or **EXIT** menus. |
| **pause a song** |
| From the iTunes idle display, press the **PAUSE** key. |
| **adjust volume** |
| Use the **Volume** keys on the side of the phone or from the iTunes idle display, press ·Ò· up or down to increase or decrease volume. |
| **start a song over** |
| Press ·Ò· left to **Rewind** and start over or press ·Ò· right and it will go to the next song. |

features
play the previous song
Press ·Ȯ· left twice.
rewind
Press ·Ȯ· left.
shuffle songs
Press **iTunes** to display the iTunes menu. Press ·Ȯ· down to scroll to **Shuffle Songs**, and then press **PLAY**.
hide iTunes
To hide the iTunes while playing music:
Press ⊟ and select **HIDE**.

create a playlist

You create playlists on your computer and transfer them to your phone. To create a playlist, on your computer:

1 Open iTunes.

2 When it's open, click the **Add** (+) button.

3 Type a name for the playlist.

4 In the iTunes software, drag songs from your music library to your playlist.

5 Using the USB cable, connect your phone to your computer.

6 When the phone displays as a source, drag and drop music files onto your phone.

Tip: Your phone must be disconnected from your computer to play songs through the phone. Don't disconnect your phone while music is being transferred. If you want to listen to music during the transfer, you can play music through the iTunes desktop software.

add artwork to your songs

Want to view or add album cover art or pictures to your iTunes songs? First make sure you can see if any artwork exits:

1 If you don't see artwork in the lower left of the iTunes desktop on your computer click the View Artwork icon (lower left fourth icon). A artwork window is displayed.

2 If you want to add or change artwork, drag a picture file to the artwork window.

upgrading iTunes desktop software

For more information about being able to store more music in iTunes on your phone, go to http://www.itunes.com or visit: http://www.hellomoto.com.

re-installing your music

If you ever reset your phone to its initial settings or send it for service, you will need to take out your memory card which stores your iTunes music. To re-inistall your music you will need to:

1 First, re-install the memory card into its internal compartment (see page 26).

On your phone: Press ⊟ > **Settings** > **Connection** > **USB Settings** > **Memory Card**.

2 Reconnect your phone to the computer with your USB cable.

**Note:** It may take up to one minute for your phone to appear in the source list.

3 On your computer, open the iTunes software. When the phone displays as an icon in the iTunes software source list,your phone and computer will automatically re-synchronize and you should see your saved music.

Note: Each song might may take 45 seconds or longer to transfer from your computer to your phone. Also, the first time you re-synchronize it may take longer than normal.

Note: If your music does not display properly after the intial re-synchronization, re-synchronize the phone and computer software again.

take & send a photo

Press the 🔲 > My Stuff > Camera to see the camera viewfinder:

Press 🔅 up or down to zoom in or out.

Press 🔅 left or right to change exposure.

IMAGE AREA

Photo Viewfinder
100 Remaining

Back | ☰ | Capture

Remaining photos you can capture.

Take a photo.

Press 🔲 to open Pictures menu.

Return to previous screen.

1 Point the camera lens at the photo subject.

You can press 🔲 to open the Pictures Menu. See the table after this procedure.

2 Press the center key 🔸 or Capture key to take a photo.

- To delete the photo and return to the active viewfinder, press the Discard key.

- To store or send the photo, press the Store key.

When the viewfinder is active, press 🔲 to open the Pictures Menu:

options	
Go To Pictures	See stored pictures and photos.
Switch Storage Device	Choose to store and see pictures on your phone or memory card.
Auto-Timed Capture	Set a timer for the camera to take a photo.
Pictures Setup	Open the setup menu to adjust photo settings.
View Free Space	See how much memory remains.

record video

Press ⊡ > My Stuff > Video Camera to see the video viewfinder.

Press ·Ò· up or down to zoom in or out.

VIDEO CLIP AREA

Video Viewfinder
10 Remaining

Remaining clips you can capture

Start video capture.

Back   ☰   Capture

Press ⊡ to open Videos Menu.

Return to previous screen.
If you want to send your video in an MMS message, the video length must be set to MMS. To set length, open Videos Menu by pressing ⊡ > Videos Setup > Video Length.

Point the camera lens at the video subject, then:

1 Press the center key $\cdot \hat{\bullet} \cdot$ or Capture key to start the video.

2 Press the Stop key to stop the video.

3 Press Store to store the video. In the Store Options menu you can choose Send In Message to send the video in a Multimedia Message or Store Only to store the video on your phone or memory card.

or

Press the Discard key to delete the video and return to the active viewfinder.

Press $\boxminus$ to open the Videos Menu when the viewfinder is active. The menu can include the following options:

options	
Go To Videos	Watch videos stored on your phone.
Switch Storage Devices	Choose to store and see videos on your phone or memory card.
Videos Setup	Open the setup menu to adjust video settings.
	Note: Set Video Length to MMS if you want to send your video in an MMS message. Set Video Length to Maximum to record longer clips you can store on your phone.

options	
View Free Space	See how much memory remains.
	Note: Your phone stores any content that you add, like ring tones or games, in *user memory*. Your service provider may store some content in user memory before you receive the phone.

sounds

Find it: Press ☐ > My Stuff > Sounds

Note: You can only listen to ringtones, alerts, and alarm s that reside on your phone or memory card.

Press ·Ọ· up or down to highlight a sound and then press Play.

sound options

In the Sounds menu, Press ☐ to view sound options. Press ·Ọ· up or down to highlight an option:

options	
Switch Storage Devices	Choose to store and see videos on your phone or memory card.
New Categories	Create a new sound category.
Shop Ringtones	Connect to your web browser and shop for new ringtones and alerts.
Sounds Setup	Set your phone to play sounds on auto repeat.

options	
View Free	View space information for your phone or memory card.

To download songs to your phone, see page 73. To copy files between your phone and a computer, see page 27.

Note: Your phone cannot play MP3 files that have a bit rate higher than 192 kbps. If you try to download or play one of these files, your phone might show you an error or ask you to delete the file.

cable connections

Note: Motorola Original USB data cable and supporting software may be sold together with the phone or separately. Check your computer or hand-held device to determine the type of cable you need. To **transfer data** between your phone and computer, you must install the software included with the Motorola Original data kit. See the data kit user's guide for more information. To make **data and fax calls** through a connected computer, see page 69.

Your phone has a mini-USB port so you can connect it to a computer to transfer data.
memory card

You can use a removable memory card with your phone to store and retrieve multimedia objects (such as photos and sounds).

Note: If you download a copyrighted file and store it on your memory card, you can use the file only while your memory card is inserted in your phone. You cannot send, copy, or change copyrighted files.

install a memory card

Push the card in until it clicks into place.

Do not remove your memory card while your phone is using it or writing files on it.
see and change memory card information

Find it: Press $\boxminus$ > Settings > Phone Status > Storage Devices

1 Press $\cdot \hat{\mathbf{Q}} \cdot$ to highlight the memory card.

2 Press the **Details** key to see the memory card information

  or

  Press $\boxminus$ to see the **Storage Device** menu, which lets you **Format** or **Rename** the memory card.

To see memory card files, open a file list (such as Pictures or Sounds) and press ⊟ > **Memory Card**. To see files stored on your phone again, press ⊟ > **Phone Memory**.

reformatting your memory card

You can reformat your memory card to erase files.

Note: When you reformat your memory card, all files stored on the card (music, pictures, videos) will be permanently deleted.

1 Press ⊟ > **Settings** > **Phone Status** > **Storage Devices**.

2 Highlight the memory card.

3 Press ⊟ > **Format.**

connect the memory card to a computer

You can access your phone's memory card with a PC.

Note: When your phone is connected to a computer, you can only access the memory card through the computer.

On your phone:

Press ⊟ > **Settings** > **Connection** > **USB Settings** > **Memory Card**.

This directs the USB connection to your memory card. Attach the Motorola Original USB cable to the accessory port on your phone and to an available USB port on your computer. Then follow these steps:

On your computer:

1 Open your "My Computer" window, where your phone's memory card shows as a "Removable Disk" icon.

2 Click on the "Removable Disk" icon to access the files on your phone's memory card.

3 To store the desired files onto the memory card, drag and drop them as follows: **MP3 files:** > mobile > audio
screen savers: > mobile > picture
wallpapers: > mobile > picture
video clips: > mobile > video

4 When you finish, remove the device by selecting the "Safely Remove Hardware" icon in the system tray at the bottom of your computer screen. Then select "USB Mass Storage Devices" and "Stop".

5 Select "USB Mass Storage Device" then "OK".

On your phone:

To return to **Data Fax** as your USB default connection, press
$\square$ > Settings > Connection > USB Settings > Data/Fax Connection.

Bluetooth® wireless

Your phone supports Bluetooth wireless *pairing* (also called *linking* or *bonding*). You can pair your phone with a Bluetooth headset or car kit, or pair your phone with a computer to exchange and synchronize files.

Note: The use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

turn Bluetooth power on or off

Find it: Press ⊡ > Settings > Conntection > Bluetooth Link > Setup > Power > On

If Bluetooth **Power** is **On**, your phone can automatically pair with the handsfree device you have used before. Just turn on the device or move it near the phone.

Note: To extend battery life, use the above procedure and set Bluetooth **Power** to **Off** when not in use. Your phone will not pair with devices until you set Bluetooth **Power** back to **On** and pair your phone with the devices again.

pair with a headset or handsfree device

Before you try to pair your phone with a device, make sure your phone's Bluetooth power is **on** and the device is **on** and **ready** in *pairing* or *bonding* mode (see the user's guide for the device). You can pair your phone with only one device at a time.

Find it: Press ⊡ > Settings> Connection > Bluetooth Link > Handsfree > [Look For Devices]

Your phone lists the devices it finds within range.

1 Highlight a device in the list and press the **Select** key.

2 If necessary, enter the device passkey (such as 0000) and press the **Ok** key.

When your phone is paired, the Bluetooth indicator 🚱 shows in the home screen.

Tip: For information about your headset or handsfree device, refer to the instructions that came with it.

copy objects to another device

You can use Bluetooth pairing to copy a media object, address book entry, datebook event, or bookmark from your phone to a computer or other device.

Note: Preloaded multimedia objects cannot be copied.

1 Highlight the object on your phone that you want to copy to the other device.

2 Press 🔲 > **Mark** (or press **0** to mark objects) and then press 🔲 > **Copy Marked Files** (for media objects), **Send** (for datebook events), or **Share Phonebook Entry** (for address book entries).

3 Select a recognized device name, or **[Look For Devices]** to search for the device where you want to copy the object.

advanced Bluetooth features

Tip: WANT TO BE LOUD IN YOUR MESSAGE? Press $\boxed{0}$ in a text entry view to change text case to all capital letters (**ABC**), next letter capital (**Abc**), or no capitals (**abc**).

iTAP® mode

Press $\boxed{\#}$ in a text entry view to switch to iTAP mode. If you don't see $\boxplus$ or $\boxplus$, press $\boxed{-}$ > **Entry Setup** to set iTAP mode as your primary or secondary text entry mode.

iTAP mode lets you enter words using one key press per letter. The iTAP software combines your key presses into common words, and predicts each word as you enter it.

For example, if you press $\boxed{7}$ $\boxed{7}$ $\boxed{6}$ $\boxed{4}$, your display shows:

Press **⦁Ö⦁** up to accept **Program**.

Press **⦁Ö⦁** right to highlight another combination. Press $\boxed{*}$ to enter **Prog** and a space.

Press **Delete** key to delete last letter.

Press **Select** key to lock highlighted combination.

• If you want a different word (such as **Progress**), continue pressing keypad keys to enter the remaining letters.

- To enter numbers quickly, press and hold a number key to temporarily switch to numeric mode. Press the number keys to enter the numbers you want. Enter a space to change back to iTAP mode.

- Press ⊡ to enter punctuation or other characters.

tap mode

Press ⊞ in a text entry view to switch to tap mode. If you don't see **Abc1** or **Abc2**, press ⊟ > **Entry Setup** to set tap mode as your primary or secondary text entry mode.

To enter text in tap mode, press a keypad key repeatedly to cycle through the letters and number on the key. Repeat this step to enter each letter.

For example, if you press ⑧ one time, your display shows:

Character displays at insertion point.

After 2 seconds, character is accepted and cursor moves to next position.

Press the **Delete** key to delete character to left of insertion point.

After you enter text, press the **Send To** key to enter recipients.
When you enter three or more characters in a row, your phone may guess the rest of the word. For example, if you enter **prog** your display might show:

Character displays at insertion point.

```
┌─────────────────────────┐
│ ▼ﾏﾏ           ⚠›) ▯▯▯ │
│ abc1 ⌄ Msg        443 │
│ Prog ram             │
│   ⌁⌁                  │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ Delete    ☰    Send To │
└─────────────────────────┘
```

Press `·Ọ·` right to accept **Program**, or press ✳ to reject it and enter a space after **Prog**.

- The first character of every sentence is capitalized. If necessary, press `·Ọ·` down to change the character to lowercase before the cursor moves to the next position.

- Press `·Ọ·` to move the flashing cursor to enter or edit message text.

- If you don't want to save your text or text edits, press ☊ to exit without saving.

- *Tap extended* mode cycles through additional special characters and symbols as you repeatedly press a keypad key.

numeric mode

Press ⌗ in a text entry view until you see **123**. Press the number keys to enter the numbers you want.

symbol mode

Press $\boxed{\#}$ in a text entry view until you see @. Press a keypad key to show its symbols at the bottom of the display. Highlight the symbol you want, then press the **Select** key.

volume

Press the volume keys to:

- turn off an incoming call alert (press the down volume key)

- change the earpiece volume during calls

- change the ringer volume from the home screen
Tip: Sometimes silence really is golden. That's why you can quickly set your ringer to **Vibrate** by pressing and holding down the $\boxed{\#}$ key. To set your audio style back to **Loud**, just press and hold the $\boxed{\#}$ key again.

navigation key

Press the *navigation key* $\cdot\dot{\mathrm{Q}}\cdot$ up, down, left, or right to scroll and highlight items in the display. When you highlight something, press the *center key* $\cdot\dot{\bullet}\cdot$ to select it. The center key usually performs the same function as the right soft key.

handsfree speaker

You can use your phone's handsfree speaker to make calls without holding the phone to your ear.

During a call, press the **Speaker** key to turn the handsfree speaker on. Your display shows **Spkrphone On** until you turn it off or end the call.

Note: The handsfree speaker won't work when your phone is connected to a handsfree car kit or headset.

codes & passwords

Your phone's 4-digit **unlock code** is originally set to **1234**. The 6-digit **security code** is originally set to **000000**. If your service provider didn't change these codes, you should change them:

Find it: Press $\boxminus$ > Settings > Security > New Passwords

If you forget your unlock code: At the Enter Unlock Code prompt, try entering 1234 or the last four digits of your phone number. If that doesn't work, press $\boxminus$ and enter your 6-digit security code instead.

If you forget other codes: If you forget your security code, SIM PIN code, or PIN2 code contact your service provider.

lock & unlock phone

You can lock your phone to keep others from using it. To lock or unlock your phone, you need the 4-digit unlock code.

To **manually lock** your phone: Press $\boxdot$ > Settings > Security > Phone Lock > Lock Now.

To **automatically lock** your phone whenever you turn it off: Press $\boxdot$ > Settings > Security > Phone Lock > Automatic Lock > On.

Note: You can make emergency calls on a locked phone (see page 53). A locked phone still rings or vibrates for incoming calls or messages, **but you need to unlock it to answer**.

lock & unlock keypad

You can lock your keypad to prevent accidental key presses. Press $\boxdot$ $\circledast$ to lock or unlock the keypad.

airplane mode

You can put your phone in airplane mode to safely access your address book, games, camera, and music in areas where cellular network access is prohibited (i.e. during airline flights and in hospitals). You can lock your keypad to prevent accidental key presses.

To turn airplane mode on or off: Press $\boxdot$ > Settings > Airplane Mode > Airplane Mode > On or Off.

customize

audio profile

Each audio profile uses a different set of sounds or vibrations for incoming calls and other events. Here are the profiles you can choose:

♪⁾ Loud	⁑█ Vibrate	♪ᶻ Silent
♪⁾ Soft	⁑△ Vibe Then Ring	

The audio profile's indicator shows at the top of your home screen. To choose your profile:

Find it: Press ☐ > Settings > Audio > Style: *style name*

change audio alerts

You can change the alerts for incoming calls and other events. Your changes are saved in the current audio profile.

Find it: Press ☐ > Settings > Audio > *Style* Detail

Note: *Style* represents the current auido style. You can't set an alert for the Silent audio style setting.

1 Highlight Calls and then press the Change key to change it.

2 Highlight the alert you want, then press the Select key.

3 Press the Back key to save the alert setting.

time & date

Your phone needs the time and date for the datebook.

To synchronize the time and date with the network:
Press ⊟ > Settings > Initial Setup > Time and Date > Autoupdate
> On

To set the time and date: Press ⊟ > Settings > Initial Setup
> Time and Date > *time* or *date*.

Note: To manually set the date and time you must turn
Autoupdate off.

To choose an **analog or digital** clock for your home screen,
press ⊟ > Settings > Personalize > Home Screen > Clock > Analog or
Digital.

wallpaper

Set a photo, picture, or animation as a wallpaper (background)
image in your home screen.

Find it: Press ⊟ > Settings > Personalize > Wallpaper

options	
Picture	Select an image for your wallpaper, or None for no wallpaper.
Layout	Select Center to center the image in the display, Tile to repeat the image across the display, or Fit-to-screen to stretch the image across the display.

screen saver

Set a photo, picture, or animation as a screen saver. The screen saver shows when no activity is detected for a specified time.

Tip: This feature helps save your screen, but not your battery. To extend battery life, turn off the screen saver.

Find it: Press ⊟ > Settings > Personalize > Screen Saver

options	
Picture	Select an image for your screen saver, or None for no screen saver.
Delay	Select the length of inactivity before the screen saver shows.

display appearance

To choose a phone **skin** that sets the look and feel of your phone's display: Press ⊟ > Settings > Personalize > Skin.

To set your display **brightness**: Press ⊟ > Settings > Initial Setup > Brightness.

To save battery life, your **backlight** turns off when you're not using your phone. The backlight turns back on when you press a key. To set how long your phone waits before the backlight turns off:

Press ⊟ > Settings > Initial Setup > Backlight.

To save battery life, the **display** can turn off when you're not using your phone. The display turns back on when you press

a key. To set how long your phone waits before the display turns off:

Press $\boxminus$ > Settings > Initial Setup > Display Timeout.

answer options

You can use additional, alternative methods to answer an incoming call. To activate or deactivate an answer option:

Find it: Press $\boxminus$ > Settings > In-Call Setup > Answer Options > Multi-key > On or Off

calls

To make and answer calls, see page 11.

turn off a call alert

You can press the volume keys to turn off a call alert before answering the call.

recent calls

Your phone keeps lists of incoming and outgoing calls, even for calls that didn't connect. The most recent calls are listed first. The oldest calls are deleted as new calls are added.

Shortcut: Press ⓞ from the home screen to see the dialed calls list.

Find it: Press ⊟ > Recent Calls

1 Highlight Received Calls or Dialed Calls, then press the Select key.

2 Highlight a call. A ✓ next to a call means the call connected.

  • To call the number, press ⓞ.

  • To see call details (like time and date), press the View key.

  • To see the Last Calls Menu, press ⊟. This menu can include:

options	
Store	Create a address book entry with the number in the No. field. Store does not appear if the number is already stored.
Delete	Delete the entry.
Delete All	Delete all entries in the list.
Hide ID/Show ID	Hide or show your caller ID for the next call.
Send Message	Open a new text message with the number in the To field.
Add Digits	Add digits after the number.
Attach Number	Attach a number from the address book or recent calls lists.
Send Tones	Send the number to the network as DTMF tones.
	While on a call press $\boxminus$ > Address Book > *Entry* or enter the phone number > press $\boxminus$ > Send Tones.
Talk then Fax	Talk and then send a fax in the same call (see page 69). 😗

redial

1 Press $\textcircled{\tiny\raisebox{0pt}{☎}}$ from the home screen to see the dialed calls list.

2 Highlight the entry you want to call, then press $\textcircled{\tiny\raisebox{0pt}{☎}}$.

If you hear a **busy signal** and you see
Call Failed, Number Busy, you can press ⊙ or the Retry key to
redial the number. When the call goes through, your phone
rings or vibrates one time, shows Redial Successful, and connects
the call.

return a call

Your phone keeps a record of your unanswered calls, and
shows X Missed Calls, where X is the number of missed calls.

1 Press the View key to see the received calls list.

2 Highlight the call you want to return, then press ⊙.

notepad

The last set of digits entered on the keypad are stored in
notepad memory. This can be the last phone number you
called, or a number that you "jot down" during a call for later
use. To see the number stored in the notepad:

Find it: Press ⊟ > Recent Calls > Notepad

- To call the number, press ⊙.

- To create a address book entry with the number in the
  No. field, press the Store key.

- To open the Dialing Menu to attach a number or insert a
  special character, press ⊟.

hold or mute a call

Press $\boxdot$ > **Hold** to put all active calls on hold.

Press the **Mute** key to put all active calls on mute.

call waiting

When you're on a call, you'll hear an alert if you receive a second call.

Press $\boxed{\textcircled{}}$ to answer the new call.

- To switch between calls, press the **Switch** key.
- To connect the two calls, press the **Link** key.
- To end the call on hold, press $\boxdot$ > **End Call On Hold**.

To turn the call waiting feature on or off:

Find it: Press $\boxdot$ > **Settings** > **In-Call Setup** > **Call Waiting**

caller ID

Calling line identification (caller ID) shows the phone number for an incoming call in your display.

Your phone shows the caller's name and picture when they're stored in your address book, or **Incoming Call** when caller ID information isn't available.

You can set your phone to play a different ringer ID for an entry stored in your address book (see page 59).

To show or hide **your phone number** from the next person you call, enter the phone number and press
□ > Hide ID/Show ID.

emergency calls

Your service provider programs one or more emergency phone numbers, such as 911 or 112, that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.

Note: Emergency numbers vary by country. Your phone's preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

1 Press the keypad keys to dial the emergency number.

2 Press ⊙ to call the emergency number.

international calls

If your phone service includes international dialing, press and hold ⓪ to insert your local international access code (indicated by +). Then, press the keypad keys to dial the country code and phone number.

1-touch dial

To call address book entries 1 through 9, press and hold the single-digit speed dial number for one second.

You can set 1-touch dial to call the entries in your phone's memory address book, your SIM card's address book, or your Fixed Dial list:

Find it: Press ▭ > Settings > Initial Setup > 1 Touch Dial > Phone, SIM, or Fixed Dial

To add a new address book entry, see page 57. To edit the Speed No. for a address book entry, press ▭ > address book, highlight the entry, and press ▭ > Edit.

voicemail

Your network stores the voicemail messages you receive. To listen to your messages, call your voicemail number.

Note: Your service provider may include additional information about using this feature.

When you **receive** a voicemail message, your phone shows the voicemail message indicator ▭» and New Voicemail. Press the CALL key to listen to the message.

To **check** voicemail messages:

Find it: Press ▭ > Messaging > Voicemail

Your phone may prompt you to store your voicemail phone number. If you don't know your voicemail number, contact your service provider.

Note: You can't store a **p** (pause), **w** (wait), or **n** (number) character in this number. If you want to store a voicemail number with these characters, create a address book entry for it. Then, you can use the entry to call your voicemail.

other features

advanced calling

features		
conference call	During a call:	🄐
	Dial next number, press Ⓒ, press the Link key.	
attach a phone number	Dial an area code or prefix for a address book number, then:	🄐
	⊟ > Attach Number	
speed dial	Speed dial a address book entry:	🄐
	Enter the speed dial number, press #, then press Ⓒ.	
	To add a address book entry, see page 57.	
	Tip: If you forget Aunt Mildred's speed dial number, press ⊟ > address book, highlight her entry, and press the View key.	
call forwarding	Set up or cancel call forwarding:	🄐
	⊟ > Settings > Call Forward	
restrict calls	Restrict outgoing or incoming calls:	🄐

download game or application	You can download a Java™ game or application the same way you download pictures or other objects: ⊟ > **MEdia Net**, go to the page that links to the file, highlight the link, and select it. **Note:** Normal airtime and/or carrier usage charges apply.
start game or application	Start a Java™ game or application: ⊟ > **Games & Apps**, highlight the game or application, press the **Select** key **Note:** To install and run games stored on your memory card, press ⊟ > **Games & Apps** > [Install New].

service and repairs

If you have questions or need assistance, we're here to help.

Go to www.motorola.com/consumer/support, where you can select from a number of customer care options. You can also contact the Motorola Customer Support Center at 1-800-657-5778 or 1-888-390-6456 (TTY/TDD for hearing impaired).

Specific Absorption Rate Data

The model wireless phone meets the government's requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg.[1] Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output..

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested

for use at the ear is **1.58** W/kg, and when worn on the body, as described in this user guide, is **0.76** W/kg. The SAR value for this product in its data transmission mode (body-worn use) is **0.61** W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).[2]

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:

`http://www.phonefacts.net`.

or the Canadian Wireless Telecommunications Association (CWTA) Web site:

`http://www.cwta.ca`.

1. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

2. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

MOTOROLA

*IMPORTANT SAFETY AND
LEGAL INFORMATION >*

Contents

Safety and General Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.*

Exposure To Radio Frequency (RF) Energy

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits.

Your Motorola mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions

For optimal mobile device performance and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

External Antenna Care

If your mobile device has an external antenna, use only a Motorola-supplied or approved replacement antenna. Use of unauthorized antennas, modifications, or attachments could damage the mobile device and/or may result in your device not complying with local regulatory requirements in your country.

---

* The information provided in this document supersedes the general safety information in user's guides published prior to September 1, 2005.

DO NOT hold the external antenna when the mobile device is IN USE. Holding the external antenna affects call quality and may cause the mobile device to operate at a higher power level than needed.

Product Operation

When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting.

When using any data feature of the mobile device, with or without an accessory cable, position the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body.

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our website at www.motorola.com.

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Follow Instructions to Avoid Interference Problems

Turn off your mobile device in any location where posted notices instruct you to do so. These locations include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Pacemakers

If you have a pacemaker, consult your physician before using this device.

Persons with pacemakers should observe the following precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from your pacemaker when the mobile device is turned ON.

- DO NOT carry the mobile device in the breast pocket.

- Use the ear opposite the pacemaker to minimize the potential for interference.

- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Hearing Aids

Some digital mobile devices may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer or physician to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult your physician or the manufacturer of your device to determine if it is adequately shielded from RF energy.

Driving Precautions

Check the laws and regulations on the use of mobile devices in the area where you drive. Always obey them.

When using your mobile device while driving, please:

- Give full attention to driving and to the road. Using a mobile device may be distracting. Discontinue a call if you can't concentrate on driving.

- Use handsfree operation, if available.

- Pull off the road and park before making or answering a call if driving conditions so require.

Responsible driving practices can be found in the "Smart Practices While Driving" section at the end of this guide and/or at the Motorola website: www.motorola.com/callsmart.

Operational Warnings

Obey all posted signs when using mobile devices in public areas, such as health care facilities or blasting areas.

Automobile Air Bags

Do not place a mobile device in the air bag deployment area.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often but not always posted, and can include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

When you are in such an area, turn off your mobile device, and do not remove, install, or charge batteries. In such areas, sparks can occur and cause an explosion or fire.

Damaged Products
If your mobile device or battery has been submerged in water, punctured, or subjected to a severe fall, do not use it until you take it to a Motorola Authorized Service Center. Do not attempt to dry it with an external heat source, such as a microwave oven.

Batteries and Chargers

If jewelry, keys, beaded chains, or other conductive materials touch exposed battery terminals, this could complete an electrical circuit (short circuit), become very hot, and could cause damage or injury. Be careful when handling a charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects. **Use only Motorola Original ™ batteries and chargers.**

Caution: To avoid risk of personal injury, do not dispose of your battery in a fire.

Your battery, charger, or mobile device may contain symbols, defined as follows:

Symbol	Definition
⚠	Important safety information follows.
⊗	Do not dispose of your battery or mobile device in a fire.
♻	Your battery or mobile device may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.
⊠	Do not throw your battery or mobile device in the trash.
⊖ Li Ion BATT ⊕	Your mobile device contains an internal lithium ion battery.

Choking Hazards

Your mobile device or its accessories may include detachable parts, which may present a choking hazard to small children. Keep your mobile device and its accessories away from small children.

Glass Parts

Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are very tired.

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you

continue to have discomfort during or after such use, stop use and see a physician.

Motorola Limited Warranty for the United States and Canada

What Does this Warranty Cover?

Subject to the exclusions contained below, Motorola, Inc. warrants its telephones, pagers, messaging devices, and consumer and professional two-way radios (excluding commercial, government or industrial radios) that operate via Family Radio Service or General Mobile Radio Service, Motorola-branded or certified accessories sold for use with these Products ("Accessories") and Motorola software contained on CD-ROMs or other tangible media and sold for use with these Products ("Software") to be free from defects in materials and workmanship under normal consumer usage for the period(s) outlined below. This limited warranty is a consumer's exclusive remedy, and applies as follows to new Motorola Products, Accessories and Software purchased by consumers in the United States or Canada, which are accompanied by this written warranty:

Products and Accessories

Products Covered	Length of Coverage
Products and Accessories as defined above, unless otherwise provided for below.	**One (1) year** from the date of purchase by the first consumer purchaser of the product unless otherwise provided for below.
Decorative Accessories and Cases. Decorative covers, bezels, PhoneWrap™ covers and cases.	**Limited lifetime warranty** for the lifetime of ownership by the first consumer purchaser of the product.

Products Covered	Length of Coverage
Monaural Headsets. Ear buds and boom headsets that transmit mono sound through a wired connection.	**Limited lifetime warranty** for the lifetime of ownership by the first consumer purchaser of the product.
Consumer and Professional Two-Way Radio Accessories.	**Ninety (90) days** from the date of purchase by the first consumer purchaser of the product.
Products and Accessories that are Repaired or Replaced.	**The balance of the original warranty or for ninety (90) days** from the date returned to the consumer, whichever is longer.

Exclusions

Normal Wear and Tear. Periodic maintenance, repair and replacement of parts due to normal wear and tear are excluded from coverage.

Batteries. Only batteries whose fully charged capacity falls below 80% of their rated capacity and batteries that leak are covered by this limited warranty.

Abuse & Misuse. Defects or damage that result from: (a) improper operation, storage, misuse or abuse, accident or neglect, such as physical damage (cracks, scratches, etc.) to the surface of the product resulting from misuse; (b) contact with liquid, water, rain, extreme humidity or heavy perspiration, sand, dirt or the like, extreme heat, or food; (c) use of the Products or Accessories for commercial purposes or subjecting the Product or Accessory to abnormal usage or conditions; or (d) other acts which are not the fault of Motorola, are excluded from coverage.

Use of Non-Motorola Products and Accessories. Defects or damage that result from the use of Non-Motorola branded or certified Products, Accessories, Software or other peripheral equipment are excluded from coverage.

Unauthorized Service or Modification. Defects or damages resulting from service, testing, adjustment, installation, maintenance, alteration, or modification in any way by someone other than Motorola, or its authorized service centers, are excluded from coverage.

Altered Products. Products or Accessories with (a) serial numbers or date tags that have been removed, altered or obliterated; (b) broken seals or that show evidence of tampering; (c) mismatched board serial numbers; or (d) nonconforming or non-Motorola housings, or parts, are excluded from coverage.

Communication Services. Defects, damages, or the failure of Products, Accessories or Software due to any communication service or signal you may subscribe to or use with the Products Accessories or Software is excluded from coverage.

Software

Products Covered	Length of Coverage
Software. Applies only to physical defects in the media that embodies the copy of the software (e.g. CD-ROM, or floppy disk).	**Ninety (90) days** from the date of purchase.

Exclusions

Software Embodied in Physical Media. No warranty is made that the software will meet your requirements or will work in combination with any hardware or software applications provided by third parties, that the operation of the software products will be uninterrupted or error free, or that all defects in the software products will be corrected.

Software NOT Embodied in Physical Media. Software that is not embodied in physical media (e.g. software that is downloaded from the internet), is provided "as is" and without warranty.

Who Is Covered?

This warranty extends only to the first consumer purchaser, and is not transferable.

What Will Motorola Do?

Motorola, at its option, will at no charge repair, replace or refund the purchase price of any Products, Accessories or Software that does not conform to this warranty. We may use functionally equivalent reconditioned/refurbished/pre-owned or new Products, Accessories or parts. No data, software or applications added to your Product, Accessory or Software, including but not limited to personal contacts, games and ringer tones, will be reinstalled. To avoid losing such data, software and applications please create a back up prior to requesting service.

How to Obtain Warranty Service or Other Information

USA	**Phones**
	1-800-331-6456
	Pagers
	1-800-548-9954
	Two-Way Radios and Messaging Devices
	1-800-353-2729
Canada	**All Products**
	1-800-461-4575
TTY	1-888-390-6456
For **Accessories** and **Software**, please call the telephone number designated above for the product with which they are used.	

You will receive instructions on how to ship the Products, Accessories or Software, at your expense, to a Motorola Authorized Repair Center. To obtain service, you must include: (a) a copy of your receipt, bill of sale or other comparable proof of purchase; (b) a written description of the problem; (c) the name of your service provider, if applicable; (d) the name and location of the installation facility (if applicable) and, most importantly; (e) your address and telephone number.

What Other Limitations Are There?

ANY IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY, OTHERWISE THE REPAIR, REPLACEMENT, OR REFUND AS PROVIDED UNDER THIS EXPRESS LIMITED WARRANTY IS THE EXCLUSIVE REMEDY OF THE CONSUMER, AND IS PROVIDED IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED. IN NO EVENT SHALL MOTOROLA BE LIABLE, WHETHER IN CONTRACT OR TORT (INCLUDING NEGLIGENCE) FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, ACCESSORY OR SOFTWARE, OR FOR ANY INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR LOSS OF REVENUE OR PROFITS, LOSS OF BUSINESS, LOSS OF INFORMATION OR DATA, SOFTWARE OR APPLICATIONS OR OTHER FINANCIAL LOSS ARISING OUT OF OR IN CONNECTION WITH THE ABILITY OR INABILITY TO USE THE PRODUCTS, ACCESSORIES OR SOFTWARE TO THE FULL EXTENT THESE DAMAGES MAY BE DISCLAIMED BY LAW.

Some states and jurisdictions do not allow the limitation or exclusion of incidental or consequential damages, or limitation on the length of an implied warranty, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state or from one jurisdiction to another.

Laws in the United States and other countries preserve for Motorola certain exclusive rights for copyrighted Motorola software such as the exclusive rights to reproduce and distribute copies of the Motorola software. Motorola software may only be copied into, used in, and redistributed with, the Products associated with such Motorola software. No other use, including without limitation disassembly of such Motorola software or exercise of the exclusive rights reserved for Motorola, is permitted.

Hearing Aid Compatibility with Mobile Phones

Some Motorola phones are measured for compatibility with hearing aids. If the box for your particular model has "Rated for Hearing Aids" printed on it, the following explanation applies.

When some mobile phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed ratings for some of their mobile phones, to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Hearing devices may also be measured for immunity to this type of interference. Your hearing device manufacturer or hearing health

professional may help you find results for your hearing device. The more immune your hearing aid is, the less likely you are to experience interference noise from mobile phones.

Information from the World Health Organization

Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If you are concerned, you may want to limit your own or your children's RF exposure by limiting the length of calls or by using handsfree devices to keep mobile phones away from your head and body.

Product Registration

Online Product Registration:

`http://www.motorola.com/warranty`

Product registration is an important step toward enjoying your new Motorola product. Registering helps us facilitate warranty service, and permits us to contact you should your product require an update or other service. Registration is for U.S. residents only and is not required for warranty coverage.

Please retain your original dated sales receipt for your records. For warranty service of your Motorola Personal Communications Product you will need to provide a copy of your dated sales receipt to confirm warranty status.

Thank you for choosing a Motorola product.

Export Law Assurances

This product is controlled under the export regulations of the United States of America and Canada. The Governments of the United States of America and Canada may restrict the exportation or re-exportation of this product to certain destinations. For further information contact the U.S. Department of Commerce or the Canadian Department of Foreign Affairs and International Trade.

Wireless: The New Recyclable

Your wireless phone can be recycled. Recycling your wireless phone reduces the amount of waste disposed in landfills and allows recycled materials to be incorporated into new products.

The Cellular Telecommunications Industry Association (CTIA) and its members encourage consumers to recycle their phones and have taken steps to promote the collection and environmentally sound recycling of end-of-life wireless devices.

As a wireless phone user, you have an important role in ensuring that this phone is recycled properly. When it comes time to give this phone up or trade it in for a new one, please remember that the phone, the charger, and many of its accessories can be recycled. It's easy. To learn more about CTIA's Recycling Program for Used Wireless Devices, please visit us at
`http://promo.motorola.com/recycle/phones/whyrecycle.html`

Smart Practices While Driving

Drive Safe, Call Smart SM

Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas. Contact www.motorola.com/callsmart for more information.

Your mobile device lets you communicate by voice and data—almost anywhere, anytime, wherever wireless service is available and safe conditions allow. When driving a car, driving is your first responsibility. If you choose to use your mobile device while driving, remember the following tips:

- **Get to know your Motorola mobile device and its features such as speed dial and redial.** If available, these features help you to place your call without taking your attention off the road.

- **When available, use a handsfree device.** If possible, add an additional layer of convenience to your mobile device with one of the many Motorola Original™ handsfree accessories available today.

- **Position your mobile device within easy reach.** Be able to access your mobile device without removing your eyes from the road. If you receive an incoming call at an inconvenient time, if possible, let your voice mail answer it for you.

- **Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions.** Rain, sleet, snow, ice, and even heavy traffic can be hazardous.

- **Do not take notes or look up phone numbers while driving.** Jotting down a "to do" list or going through your address book

takes attention away from your primary responsibility—driving safely.

- **Dial sensibly and assess the traffic; if possible, place calls when your car is not moving or before pulling into traffic.** If you must make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

- **Do not engage in stressful or emotional conversations that may be distracting.** Make people you are talking with aware you are driving and suspend conversations that can divert your attention away from the road.

- **Use your mobile device to call for help.** Dial 911 or other local emergency number in the case of fire, traffic accident, or medical emergencies.*

- **Use your mobile device to help others in emergencies.** If you see an auto accident, crime in progress, or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.*

- **Call roadside assistance or a special non-emergency wireless assistance number when necessary.** If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.*

---

* Wherever wireless phone service is available.
