Certain mobile phone features are dependent on the capabilities and settings of your service provider's network. Additionally, certain features may not be activated by your service provider, and/or the provider's network settings may limit the feature's functionality.

Always contact your service provider about feature availability and functionality. All features, functionality, and other product specifications, as well as the information contained in this user's guide are based upon the latest available information and are believed to be accurate at the time of printing. Motorola reserves the right to change or modify any information or specifications without notice or obligation.

Contents

Getting Started

CAUTION: Before using the phone for the first time, read the *Important Safety and Legal Information* included in the gray-edged pages at the back of this guide.

About This Guide

This guide describes the basic features of your Motorola wireless phone.

Optional Features

This label identifies an optional network or subscription-dependent feature that may not be offered by all service providers in all

geographical areas. Contact your service provider for more information.

Optional Accessories

This label identifies a feature that requires an optional Motorola Original™ accessory.

Installing the Battery

1.

2.

3.

4.
Battery Tips

Battery life depends on the network, signal strength, temperature, features, and accessories you use.

Always use Motorola Original™ batteries and chargers. The warranty does not cover damage caused by non-Motorola batteries and/or chargers.

New batteries or batteries stored for a long time may take more time to charge.

When charging your battery, keep it near room temperature.

When storing your battery, keep it uncharged in a cool, dark, dry place, such as a refrigerator.

Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F).

Always take your phone with you when you leave your vehicle.

It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

♲ Contact your local recycling center for proper battery disposal.

Warning: Never dispose of batteries in a fire because they may explode.

Before using your phone, read the battery safety information in the "Safety and General Information" section included in this guide.

Charging the Battery

New batteries are shipped partially charged. Before you can use your phone, you need to install and charge the battery as described

below. Some batteries perform best after several full charge/discharge cycles.

1 Insert the charger into the USB connector on your phone as shown.

2 Plug the other end of the charger into the appropriate electrical outlet.

3 When your phone indicates **Charge Complete**, remove the charger.
Tip: You can safely leave the charger connected to the phone after charging is complete. This will **not** damage the battery.

Note: When you charge the battery, the battery level indicator in the upper right corner of the display shows how much of the charging process is complete. At least 1

segment of the battery level indicator must be visible to ensure full phone functionality while charging.

Turning On Your Phone

1 Open your phone.

2 Press and hold the power key for 3 seconds.

The phone may require several seconds to power on.

3 If necessary, enter your 4-digit unlock code (the last 4 digits of your phone number) and press the **OK** key to unlock the phone.

Adjusting Volume

Press the up or down volume keys to:

- increase or decrease earpiece volume during a call

- increase or decrease ringer volume setting when the home screen is visible (phone must not be in a call and flip must be open)

- silence an incoming call alert
Making a Call

1 Dial the number.

Tip: If you make a mistake, press the clear key **CLR** to delete the last digit. Press and hold **CLR** to clear all digits.

2 Press ◎ to make the call.

3 Press ◎ to end the call.

Tip: Closing the flip also ends the call unless you are using the speakerphone feature (see page 36).

Note: You must dial the phone number from the home screen. See page 24.

Answering a Call

When you receive a call, your phone rings and/or vibrates and displays an incoming call message.

1 Press ◎ to answer.

2 Press ◎ to end the call.

Tip: You can set the phone to answer calls when you open the flip. (To activate, press MENU (·◆·) ▶ ✎ SETTINGS & TOOLS ▼ Call Settings ▼ In-Call Setup ▼ Answer Options ▼ Open to Answer.)

Note: If the phone is locked, you must first enter your 4-digit unlock code to answer the call.

Changing the Call Alert

Phone Flip Open

In the home screen, press the down volume key to switch to lower call alert volume, then switch to vibrate and, finally, silent alert. Press the up volume key to cycle back from silent alert to vibrate and then to the lowest alert volume setting.
Phone Flip Closed

Press the up
or down
volume key,
then press the
speakerphone

Volume Keys

Speakerphone Key
key to scroll through the alert styles: Loud, Soft, Vibrate, Vibe & Ring, and Silent. The alert styles are shown on the external display.

After scrolling to the desired alert style, press the up or down volume key to save the setting and return to the home screen.

Viewing Your Phone Number

To view your phone number from the home screen, press Œ #.

While you are on a call, press the **Options** key, then select **My Tel. Numbers**.

Highlight Features

You can do much more with your phone than make and receive calls! This section describes some of your phone's highlights.

Recording and Playing Video Clips

You can record a video clip with your phone, and send it to other wireless phone users in a multimedia message.

Recording a Video Clip

To activate your phone's video camera:

1 Press Ò left to open the **GET PIX & FLIX** menu.

2 Scroll to **Take FLIX** and press **OK** (·Ŝ·).

Tip: You can also activate the video camera viewfinder by pressing and holding the camera key █.

The active viewfinder image appears on your display.

Press left soft key to view **My FLIX**. Press ·Ŝ· to begin recording. Press right soft key to view **Options** menu.
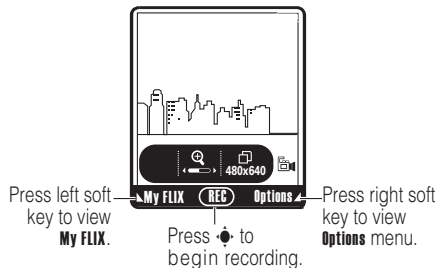

Point the camera lens at the video subject, then:

1 Press **REC** (·Ŝ·) to begin recording.

Press $\cdot\dot{\diamond}\cdot$ up and down to zoom in and out. Press $\cdot\dot{\diamond}\cdot$ left and right to control brightness.

Press the **Pause** key to temporarily stop recording, then the **Resume** key to continue.

2 Press **Stop** ($\cdot\dot{\bullet}\cdot$) to stop recording.

3 Press the **Save** key to save the video.

   or

Press **SEND** ($\cdot\dot{\bullet}\cdot$) to save the video and go to the **CREATE PIX MESSAGE** screen.

   or

Press the **Erase** key to delete the photo and return to active viewfinder.

Adjusting Video Recording Settings

When the video camera is active, press **Options** to open the **OPTIONS** menu, which can include the following options:

Option
Brightness
Adjust image brightness.
White Balance
Adjust for different lighting.
Duration
Specify standard lengths of video clips of 5, 10, or 15 seconds.
Color Effects
Select **Normal**, **Sepia**, **Black & White**, or **Negative**.

Playing a Video Clip

To play a video clip stored on your phone:

1 Press $\cdot\dot{\diamondsuit}\cdot$ left to open the **GET PIX & FLIX** menu.

2 Scroll to **My FLIX** and press **OK** ($\cdot\dot{\clubsuit}\cdot$).

3 Scroll to the clip you want to view and press **PLAY** ($\cdot\dot{\clubsuit}\cdot$).

Press the **Mute** key while the video clip is playing to mute the video clip sound. Press **Mute** again to turn sound on again.

Taking and Sending a Photo

From the home screen, press the camera key 📷 to activate your phone's camera.

The active viewfinder image appears on your phone's display.
Point the camera lens at the photo subject, then:

1 Press **TAKE** ($\cdot\dot{\clubsuit}\cdot$) to take a photo.

Press $\cdot\dot{\diamondsuit}\cdot$ up and down to zoom in and out. Press $\cdot\dot{\diamondsuit}\cdot$ left and right to increase and decrease brightness.

2 Press the **Save** key to save the photo.

or

Press **SEND** ($\cdot\dot{\clubsuit}\cdot$) to save the photo and go to the **Create Pix Msg** screen.

or

Press left soft key to view **My PIX**. Press $\cdot\dot{\clubsuit}\cdot$ to **Take** photo. Press right soft key to view **Options** menu.

Press the **Erase** key to delete the photo and return to active viewfinder.

Adjusting Camera Settings

When the camera is active, press **Options** to open the **OPTIONS** menu, which can include the following options:

Option
Resolution
Set resolution to **High (1280x1024)**, **Medium (640x480)**, **Low (320x240)**, or **Thumbnail (160x120)**.
Self timer
Set a timer for the camera to take a photo.
Brightness
Adjust image brightness.
White Balance
Adjust for different lighting.

Option
Image Quality
Select **Fine**, **Normal**, or **Economy**.
Shutter Sound
Activate a tone that plays when you take a photo.
Color Effects
Select **Normal**, **Sepia**, **Black & White**, or **Negative**.
Multishot
Fun Frame
Go to **Fun Frames** to select an amusing frame for your photo.

Sending a Picture Message

A *picture message* contains embedded media objects (possibly including photos, pictures, animations, sounds, voice records).You can send a picture message to other Verizon Wireless picture messaging-capable phones and to other email addresses.

Find the Feature   MENU ($\cdot\hat{\bullet}\cdot$) ▸ ☐ MESSAGING ▾ New Pix Msg

1 Press keypad keys, then **OK** ($\cdot\hat{\bullet}\cdot$), to enter a phone number.

or

Press **Add** ▾ **Contacts**, then **OK** ($\cdot\hat{\bullet}\cdot$). For each **Contacts** entry you want to add, highlight the entry and press **OK** ($\cdot\hat{\bullet}\cdot$). Press **Done** when finished adding **Contacts** entries.

or

Press **Add** ▾ **Recent Calls**, then **OK** ($\cdot\hat{\bullet}\cdot$). For each call you want to add, highlight the entry and press **OK** ($\cdot\hat{\bullet}\cdot$). Press **Done** when finished adding entries from **Recent Calls**.

2 Scroll to **Text**.

3 Press keypad keys to enter message text.

4 Scroll to **Pix** and press the **Gallery** key.

5 Scroll to highlight a picture to insert, and press **OK** ($\cdot\hat{\bullet}\cdot$).

6 Scroll to **Sound** and press the **Sounds** key.

7 Scroll to highlight a sound to insert, and press **OK** ($\cdot\hat{\bullet}\cdot$).

8 Scroll to **Subject**.

9 Press keypad keys, then OK (·$\hat{\bullet}$·), to enter the message subject.

or

Press Options, scroll to Add Quick Text, then press OK (·$\hat{\bullet}$·), to select a Quick Text item as the message subject.

10 Press SEND (·$\hat{\bullet}$·) to send the message.

or

Press Options to send the message later, save the message in the drafts folder, set priority, or specify how long the message is valid for delivery.

Receiving a Picture Message

When you receive a picture message, your phone displays the

✉ (message waiting) indicator and a New Message notification, and sounds an alert.

Open the flip and select to view the message immediately or to save it in your Inbox for viewing later.

To view messages in your Inbox:

Find the Feature   MENU (·$\hat{\bullet}$·) ▸ ⌕ MESSAGING
                     ▾ Inbox

1 Scroll to the desired message.

2 Press Open to open the message. Your phone first displays the picture, then the message.

Picture messages that you receive can contain different media objects:

- Photos, pictures, and animations are displayed as you read the message.

- A sound file begins playing when its slide is displayed. Use the volume keys

to adjust the volume as the sound file plays.

• Attached files are appended to the message. To open the attachment, highlight the file indicator/filename and press **VIEW** (image file type), **PLAY** (sound file), or **OPEN** (vObject such as a **Contacts** or datebook entry, or unknown file type).

Bluetooth Connections

Your phone supports Bluetooth® connections. You can connect your phone to a Bluetooth headset or car kit, or connect to another device to exchange and synchronize files.

Your phone currently supports the following Bluetooth profiles:

• headset (optional Motorola Original™ accessory)

• Handsfree Car Kit (optional Motorola Original accessory)

For more information about Bluetooth wireless connections supported by this device, go to FAQs www.verizonwireless.com/bluetooth.

For information on vehicle compatibility, go to www.verizonwireless.com/bluetoothchart to view the Bluetooth compatibility chart.

Note: The phone does not support Bluetooth (OBEX) profiles or dial-up networking.

Note: All multimedia (video player, audio player, shutter tones, VCAST) will play from the speakerphone when your phone is connected to another Bluetooth device.

Turn Bluetooth Power On or Off

Find the Feature
MENU (•●•) » ⚖ SETTINGS & TOOLS
▾ Connections ▾ Bluetooth
▾ Setup ▾ Power ▾ On

Note: To extend battery life, use the above procedure and set Bluetooth power to Off when not in use. If you turn Bluetooth power Off, your phone will not connect to accessories until you turn Bluetooth power On and reconnect to the accessories.

Pairing with a Headset, Handsfree Device, or PC

Before you try to connect to another Bluetooth device, make sure your phone's Bluetooth power is On and the device is in *pairing mode* (see the user guide for the device you

are attempting to pair with). You cannot perform pairing while your phone is connected to another device.

To pair your phone to a headset accessory, handsfree car kit, or PC that supports Bluetooth wireless connections:

Find the Feature
MENU (•●•) » ⚖ SETTINGS & TOOLS
▾ Connections ▾ Bluetooth
▾ Handsfree
▾ [Look For Devices]

Your phone displays a list of device(s) located within range of the phone. If your phone is already connected to a device, your phone lists that device and identifies it with a ✓ (in-use indicator). Once a connection is established with a device, no other device can connect to your phone until the currently connected device is disconnected.

1 Highlight a device in the list of devices your phone found.

2 Press the **Select** key to connect the device.

3 If the device requests permission to bond with your phone, select **YES** and enter the device PIN code to create a secure connection with the device.

Note: The default PIN code is 0000.

When the connection is made, the 📶 (Bluetooth) indicator or a **Bluetooth** message displays in the home screen.

Tip: For specific information about an accessory, refer to the instructions that came with it.

Synchronize Data

Use a Bluetooth wireless connection or a USB cable connection to transfer and synchronize data between your phone and a PC.

To transfer data between your phone and PC, you must install the Motorola Mobile PhoneTools software included with the Motorola Original™ data kit. See the data kit user's guide for more information.

Motorola Mobile PhoneTools software is designed to synchronize with basic features of many popular Personal Information Management (PIM) software and hardware products. Use Motorola Mobile PhoneTools software to synchronize data between your phone and PC.

To synchronize data between your phone and PC, select the **Sync** option from the Motorola Mobile PhoneTools software running on the PC. See the Mobile PhoneTools user's guide for more information.

TTY Operation

You can use an optional TTY device with your phone to send and receive calls. You must plug the TTY device into the phone's headset jack and set the phone to operate in 1 of 3 TTY modes.

Note: Use a TSB-121 compliant cable (provided by the TTY manufacturer) to connect the TTY device to your phone.

Note: Set the phone to level 4 (middle setting) for proper operation. If you experience a high number of incorrect characters, adjust the volume as needed to minimize the error rate.

Note: For optimal performance, your phone should be at least 12 inches (30 centimeters) from the TTY device. Placing the phone too close to the TTY device may cause high error rates.

Setting TTY Mode

▣ When you set your phone to a TTY mode, it operates in that mode whenever the TTY device is connected.

Find the Feature MENU (·●·) ▸ ⚒ SETTINGS & TOOLS ▾ Initial Setup ▾ TTY Setup

TTY Mode can include the following options:

Option
Voice
Return to standard voice mode.
TTY
Transmit and receive TTY characters.
VCO
Receive TTY characters but transmit by speaking into microphone.

Option
HCO
Transmit TTY characters but receive by listening to earpiece.

When your phone is in a TTY mode, the international TTY mode, the international TTY symbol, and the mode setting display during an active TTY call.
Returning to Voice Mode

To return to standard voice mode, select **Voice** from the **TTY Setup** menu.

Learning to Use Your Phone

See page 1 for a basic phone diagram.

Using the Display

The *home screen* is displayed when you are **not** on a call or using the menu. You must be in the home screen to dial a phone number.

Date & Time

Left Soft Key Label

Right Soft Key Label

Note: Your home screen may look different than the display shown above.

The **MENU** label in the bottom center of the display shows that you can press the $\cdot\hat{\bullet}\cdot$ key to enter the main menu.

Labels at the bottom corners of the display show the current soft key functions. Press the left or right soft key to perform the function indicated by the left or right soft key label.

Your phone displays indicators in 2 areas:

System Status Indicators

Service Alerts & Settings Indicators
Indicators are described below.

System Status Indicators

Alert/Indicator
Ψ.ιl Signal Strength Indicator
Vertical bars show the strength of the network connection.
▲ Roaming Indicator
Indicates phone is in digital coverage area.
Ξ 1x-EVDO Indicator
Indicates phone is in 1x-EVDO coverage area (necessary for VCAST services).
1X 1X Indicator
Indicates phone is in 1x-RTT coverage area.
Ⓢ SSL Indicator
Indicates application verification is via SSL during a download session.

◀ **Speakerphone**
Indicates speakerphone is on.
⌐ **Missed Call**
Indicates a missed call.
✉ **Message Indicator**
Shows when you receive a new message.
▦ **Calendar Appointment**
Shows number of calendar appointments.

Alert/Indicator
≗" Voicemail
Shows number of voicemail messages received.
⌛ Alarm On
Shows when an alarm has been set.

Using the 5-Way Navigation Key

Use the 5-way navigation key (·Ô·) to scroll up, down, left, or right through the menu system. Press the center key ·●· select a highlighted menu item.

Using Menus

From the home screen, press **MENU** (·●·) to enter the main menu.

Left Soft Key
Perform left function.

Right Soft Key
Perform right function.

5-Way Navigation Key
Scroll through menus & lists. From home screen, press center key to open main menu.
Press ·Ô· to scroll down to a menu feature icon in the main menu. The following icons represent features that may appear in the

main menu, depending on your service provider and service subscription options.

Menu Features		
🏹	GET IT NOW*	🖋 MESSAGING
🎞	CONTACTS	⌨ RECENT CALLS
✖	SETTINGS & TOOLS	

* Optional network/subscription dependent feature

Menu Shortcuts

Your phone displays 4 menu icons in the middle of the home screen.
Press ·Ô· left, right, up, or down to open the menu represented by the icon you select. You can change the menu icons that appear in the home screen, or set your phone not to display icons in the home screen (see "Show or Hide Menu Icons" on page 61).

Selecting a Menu Option

This guide uses the following format to show you how to select a menu feature, starting from the home screen.

Find the Feature   MENU (·●·) ▸ ⌨ RECENT CALLS ▾ Dialed

This example shows that from the home screen, you must press MENU (·●·), scroll across to RECENT CALLS on the main menu, then scroll down to and select Dialed. Press ·Ô· to scroll across and down, and the center select key ·●· to select a menu option.

Tip: From the main menu, you can quickly select a menu feature by pressing the number key associated with that feature. For example, from the **SETTINGS & TOOLS** menu, press 4 to select **Display**.

Selecting a Feature Option

When you select certain features, your phone displays a list of items or options that you can select. For example, when you view the dialed calls list, you can select an entry and perform additional tasks on that entry:

Press left soft key to open **Messaging** menu.

Press • to open item to view item details.

DIALED CALLS

- Jonathan
  Tue Jul 19, 4:43pm
- 212-345-4566
  Mon Jul 18, 3:08pm
- Mindy
  Mon Jul 18, 10:46am

Message | OPEN | Options

Press right soft key to open **Options** sub-menu.
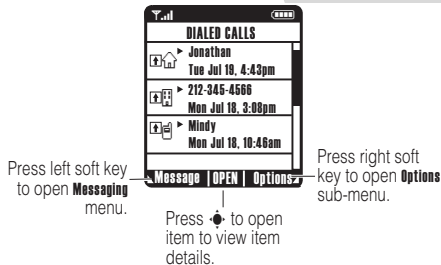

- Press Ò to scroll up or down to highlight the option you want.

- In a numbered list, press a number key to highlight the option.

- In an alphabetized list, press a key repeatedly to cycle through the letters on the key and highlight the closest matching list option

- When an option has a list of possible values, press Ò left or right to scroll through and select a value.

- When an option has a list of possible numeric values, press a number key to set the value.

Entering Text

Some features require you to enter information. The following is a sample of a screen for **Contacts** entry information.

Highlighted Option

EDIT CONTACT

Name — Abc
John Smi|

📱 Mobile 1

🏠 Home

Abc | SAVE |

Press left soft key to change entry mode.

Press · Ô· to scroll to more options.

Press · ● · to save entry information.
The message center lets you compose and send text messages.

Flashing cursor indicates insertion point.

CREATE TXT MESSAGE

4.

Add | OK | Options

Press left soft key to view **Add** sub-menu.

Press right soft key to view **Options** sub-menu.

Press · ● · to send message.
Choosing a Text Entry Mode

Multiple text entry mode make it easy for you to enter names, numbers, and messages. The mode you select remains active until you select another mode.

Press the left soft key in any text entry screen to select 1 of the following entry modes:

iTAP English	Let the phone predict each word (in English) as you press keys.
iTAP Spanish	Let the phone predict each word (in Spanish) as you press keys.
Abc	Enter letters and numbers by pressing a key 1 or more times, 1st character in in uppercase.
ABC	Enter letters and numbers by pressing a key 1 or more times, all characters in in uppercase.
123	Enter numbers only.
Symbols	Enter symbols.

Capitalization and Numbers

Press $\circledast$ in any text entry screen to cycle through entry methods:

abc = no capital letters	123 = all numbers
ABC = all capital letters	Abc = capitalize next letter only
iTAP = predictive text entry	

Using Tap Mode

From a text entry screen, specify Tap mode by pressing the Abc key, then selecting Abc or ABC.

This is the standard method for entering text on your phone. Regular Tap mode cycles through the letters and numbers of the key you press, as shown in the "Character Chart" on page 33.

1 Press a keypad key 1 or more times to select a letter, number, or symbol.

2 Enter the remaining characters.

Tip: Press ·Ŏ· right to accept a word completion, or 🔳 to insert a space.

3 Press the **OK** key to store the text.

When you enter text with Tap mode, the soft key functions change.

Character displays at insertion point.

Press left soft key to add message recipients from **Contacts** or **Recent Calls** lists, or add multimedia objects or Quick Text.

After 2 seconds, character is accepted & cursor moves to next position.

Press right soft key to open **Options** menu.

Press ·●· to send message.
When you enter 3 or more characters in a row, your phone may guess the rest of the word. For example, if you enter **prog**, you might see:

Press ·Ŏ· up to accept **program**, or press clear key ➔ to reject it & enter a space after **prog**.

If you want a different word (such as **progress**), continue pressing keypad keys to enter the remaining characters.

Character Chart

Use this chart as a guide for entering characters with Tap mode .

Keys/Characters	
1	**2**
. @ ? ! - , & : _ / ; 1	a b c 2
3	**4**
d e f 3	g h i 4
5	**6**
j k l 5	m n o 6
7	**8**
p q r s 7	t u v 8
9	**0**
w x y z 9	*change text case, for capital letters*

Keys/Characters	
＊	**＃**
change text entry method (hold for default)	*enter space*

Note: This chart shows lowercase letters, which are produced in ABC mode. Select ABC mode to produce the capitalized versions of the letters shown.

Note: This chart may not reflect the exact character set available on your phone. In a URL editor, **1** first shows common characters for that editor.

Tap Mode Text Entry Rules

• Press a keypad key repeatedly to cycle through its characters.

- Press S left or right to move the flashing cursor to the left or right in a text message.

- The first character of every sentence is capitalized. If necessary, press S down to force the character to lowercase before the cursor moves to the next position.

- If you enter or edit information and do not want to save the changes, press O to exit without saving.

Using iTAP Mode

From a text entry screen, specify iTap mode by pressing the Abc key, then selecting **iTAP English** or **iTAP Spanish**.

iTAP software provides a predictive text entry method that lets you enter a word using 1 key press per letter. This can be faster than Tap

mode, because your phone combines the key presses into common words.

For example, if you press 7 7 6 4, you see the letters **Program**. If you want a different word (such as **Progress**), continue pressing keypad keys to enter the remaining characters.

Entering Words

1 Press keypad keys (1 press per letter) to show possible letter combinations at the bottom of the display.

2 Scroll left or right to highlight the combination you want.

3 Press the **SELECT** key to lock a highlighted combination. You can press keypad keys to add more letters to the end of the combination.

   or

Press $\cdot\dot{\bigcirc}\cdot$ up to enter the highlighted combination when it spells a word. A space is automatically inserted after the word.

If you enter a word your phone does not recognize, the phone stores it to use as 1 of your word options. When you fill memory space for unrecognized words, your phone deletes the oldest words to add new words.

Using Numeric Mode

From a text entry screen, specify Numeric mode by pressing the **Abc** key, then selecting **123**.

Press keypad keys to enter the numbers you want. When you finish entering numbers, press **⚹** to switch to another entry method.

Using Symbol Mode

From a text entry screen, specify Symbols mode by pressing the **Abc** key, then selecting **Symbols**.

Scroll to the desired symbol on the **SYMBOLS** screen, then press **OK** ($\cdot\spadesuit\cdot$) to select it.

Press the **Next** key on the **SYMBOLS** screen to page down to the next set of symbols, and press the **Prev** key to page up to the previous set.

Deleting Letters and Words

Place the cursor to the right of the text you want to delete, and then:

- Press 🔙 to delete 1 letter at a time.
- Hold 🔙 to delete the entire message.

Using the Handsfree Speaker

Note: You must open your phone's flip to activate the speakerphone.

Your phone's integrated handsfree speaker allows you to talk to another party without holding the phone to your ear.

Turning Handsfree Speaker On/Off

Speakerphone Key

Volume Keys

To activate the speakerphone during a call, press and hold the speakerphone key.

Your will see **Spkrphone On**, and the speakerphone indicator 🔊, and hear a soft audio alert.
To end the call, press and hold the speakerphone key again. You will see **Call Ended** and hear a soft audio alert.

You can set your phone so that the speakerphone remains on until you press the speakerphone key again or turn off the phone.

You can also set your phone to turn off the speakerphone automatically after 20 seconds of inactivity:

Find the Feature MENU (✦) › ✆ SETTINGS & TOOLS
    ⌄ Initial Setup ⌄ Speakerphone
    ⌄ 20 sec timeout

Note: Closing the flip while using the speakerphone does not end the call. To end the call, press 🔚 (with the flip open).

Note: The handsfree speaker is disabled when you connect your phone to a handsfree car kit or headset accessory.

Using Handsfree Speaker with Flip Closed

1 Open your phone's flip.

2 Press and hold the speakerphone key to turn on the speakerphone.

3 Enter the number you wish to call and press $\circledS$.

4 When the call is connected, close the flip, and continue your conversation.

5 To end the call, press and hold the speakerphone key. You will see Call Ended and hear a soft audio alert.

Using the External Display

When the flip is closed, you can use the external display for the following:

- View time, date, and phone status information.

- View message notifications.

Turning On Airplane Mode

Note: Consult airline staff about the use of Airplane Mode in flight. Turn off your phone whenever instructed to do so by airline staff.

Airplane Mode allows you to disable your phone's radio frequency functions and still use other applications (such as the calculator or datebook functions). This may enable you to use these applications while on an airplane.

Find the Feature   MENU ($\cdot\bullet\cdot$) ▸   SETTINGS & TOOLS
   ▾ Airplane Mode

Changing a Code, PIN, or Password

Your phone's 4-digit unlock code is originally set to the last 4 digits of your phone number, and the 6-digit security code is originally set to 000000. Your service provider may reset these codes before you receive your phone.

If your service provider has **not** reset these codes, we recommend that you change them to prevent others from accessing your personal information. The unlock code must contain 4 digits, and the security code must contain 6 digits.

To change a code or password:

Find the Feature   MENU (⬤) ▸ ⚏ SETTINGS & TOOLS
  ▾ System ▾ Security
  ▾ New Passwords

Select the type of code you wish to change, enter the old code when prompted, then enter the new code.

Locking and Unlocking Your Keypad

You can lock your phone's keypad to prevent accidental key presses.

Press ⌫ ✳ to lock/unlock the keypad.

Locking and Unlocking Your Phone

You can lock your phone manually or set the phone to lock automatically whenever you turn it off.

To use a locked phone, you must enter the unlock code. A locked phone still rings or

vibrates for incoming calls or messages, **but you must unlock it to answer**.

You can make emergency calls on your phone even when it is locked (see page 47).

Locking Your Phone

Find the Feature   MENU (**⬤**) ▸ 💀 SETTINGS & TOOLS
- System ▾ Security
- Phone Lock
- Lock Now or Automatic Lock

Both **Phone Lock** options require you to enter the unlock code before completing your selection.

Unlocking Your Phone

At the **Enter Unlock Code** prompt, enter your unlock code and press **OK** (**⬤**) to unlock your phone.

If You Forget a Code, PIN, or Password

Note: Your phone's 4-digit unlock code is originally set to the last 4 digits of your phone number, and the 6-digit security code is originally set to 000000.

If you forget your security code, contact your service provider.

Learning to Use Your Phone   **39**

Setting Up Your Phone

Setting Time and Date

Find the Feature   MENU (·◆·) ▸ ✎ SETTINGS & TOOLS ▾ Initial Setup ▾ Time and Date

Setting Call Sounds and Alert Styles

Your phone rings and/or vibrates to notify you of an incoming call or to signal certain other events.

Setting Call Sounds

Find the Feature   MENU (·◆·) ▸ ✎ SETTINGS & TOOLS ▾ Sounds Setting ▾ Ringstyles

1 If necessary, set **Style:** to **Master Volume**: Scroll to **Style:** and press **Change**, then scroll to **Master Volume** and press **Select**.

2 Scroll to **Master Volume Detail** and press **Change**.

3 Scroll to **Calls** and press **Change** to select it.

4 Scroll to the desired detail setting and press **Select**.

Note: Your phone plays a sample of each highlighted setting as you scroll through the settings.

If you set **Call Vibrate** to **On**, the phone vibrates to indicate an incoming call. (If you also set **Calls** to a sound, the phone vibrates **and** rings to indicate an incoming call.)

Setting Alerts

Your phone includes alerts for **Calls**, **Inbox**, **Voicemail**, **Alarms**, **Data Calls**, **Fax Calls**, and **Reminders**.

You can specify a detailed setting for each type of alert:

Find the Feature   MENU (◈) ▸ ℘ SETTINGS & TOOLS
      ▾ Sounds Setting ▾ Ringstyles

1 If necessary, set **Style:** to **Master Volume**: Scroll to **Style:** and press **Change**, then scroll to **Master Volume** and press **Select**.

2 Scroll to **Master Volume Detail** and press **Change**.

3 Scroll to the desired alert type and press **Change**.

4 Scroll to the desired detail setting and press **Select**.

Note: Your phone plays a sample of each highlighted setting as you scroll through the settings.

Setting Answer Options

You can use these alternative methods to answer an incoming call.

Multi-key	answer by pressing any key
Open To Answer	answer by opening the flip

To activate or deactivate an answer option:

Find the Feature   MENU (◈) ▸ ℘ SETTINGS & TOOLS
      ▾ Call Settings ▾ In-Call Setup
      ▾ Answer Options

Setting a Wallpaper Image

Set a photo, picture, or animation as a wallpaper (background) image in your phone's home screen.

Find the Feature MENU ($\cdot\hat{\bullet}\cdot$) ▶ ✎ SETTINGS & TOOLS ▾ Display ▾ Wallpaper

To select a picture to use as wallpaper:

1 Highlight **Picture** and press the **Change** key to view available pictures.

2 Scroll to the picture you want, and press **OK** ($\cdot\hat{\bullet}\cdot$).

To change how your wallpaper is displayed:

1 Highlight **Layout** and press the **Change** key.

2 Scroll to **Center**, **Tile**, or **Fit-to-screen**, and press the **Select** key.

Setting a Screen Saver Image

Set a photo, picture, or animation as a screen saver image.

The screen saver image displays when the flip is open and no activity is detected for a specified time period. The image shrinks to fill the display, if necessary. An animation repeats for 1 minute, then the first frame of the animation displays.

Tip: Turn off the screen saver to extend battery life.

Find the Feature MENU ($\cdot\hat{\bullet}\cdot$) ▶ ✎ SETTINGS & TOOLS ▾ Display ▾ Screen Saver

Adjusting the Backlight

Set the amount of time that the display and keypad backlights remain on, or turn off backlights to extend battery life.

Find the Feature   MENU ($\dot{\bullet}$) > $\textcircled{\tiny\$}$ SETTINGS & TOOLS > Initial Setup > Backlight

Hiding or Showing Location Information

Your phone can use the *automatic location information* (ALI) feature to tell the network where you are physically located.

When ALI is set to Location On, your phone displays the $\oplus$) (ALI on) indicator. Services may use your known location to provide useful information (for example, driving directions, or the location of the nearest bank). Your phone prompts you when the network or a service asks for your location. You can refuse at this point.

When ALI is set to 911 Only, your phone displays the $\oplus$ (ALI off) indicator, and the phone does not send location information unless you call the emergency phone number (such as 911).

Find the Feature   MENU ($\dot{\bullet}$) > $\textcircled{\tiny\$}$ SETTINGS & TOOLS > System > Location

1   When prompted, enter the location code.
2   Scroll to Location On or E911 Only.
3   Press OK ($\dot{\bullet}$) to select the setting.

Limitations of AGPS

Sometimes adequate signals from multiple satellites are unavailable, usually because your AGPS phone's antenna cannot establish a view of a wide area of open sky. In these

cases, the AGPS feature **will not work**. Such situations include, but are not limited to, the following:

- in underground locations

- inside of buildings, trains, or other covered vehicles

- under any other metal or concrete roof or structure

- between tall buildings or under dense tree cover

- near a powerful radio or television tower

- when your AGPS antenna is covered (for example, by your hand or other object) or facing the ground

- when there are temperature extremes outside the operating limits of the phone

Even where location information can be calculated in such situations, it may take more time than usual, and your location estimate may not be as accurate.

Even where adequate signals from multiple satellites are available, your AGPS feature will provide only an approximate location, often within 150 feet (45 meters) but sometimes much farther from your actual location.

The satellites used by your phone's AGPS feature are controlled by the U.S. government and are subject to changes implemented in accordance with the Department of Defense AGPS user policy and the Federal Radio Navigation Plan. These changes may affect the performance of your phone's AGPS feature.

Conserving Battery Power

Your phone includes an ambient light sensor and battery save setting to extend battery life. When this feature is activated, it automatically turns off the keypad backlight when it detects that enough ambient light is available. Inhibiting or covering the sensor can cause intermittent backlighting.

Find the Feature   MENU ($\cdot\hat{\bullet}\cdot$) ▸ ⚒ SETTINGS & TOOLS
▾ Initial Setup ▾ Battery Save

Calling Features

For basic instructions on how to make and answer calls, see page 10.

Changing the Active Line

Change the active phone line to make and receive calls from your other phone number.

Find the Feature   MENU (·●·) ▶ ⚘ SETTINGS & TOOLS
    ▾ System ▾ Device Info
    ▾ Active Line

Redialing a Number

1 Press ⊙ to view the dialed calls list.

2 Scroll to the entry you want to call.

3 Press ⊙ to redial the number.

Using Automatic Redial

When you receive a busy signal, your phone displays **Call Failed, Number Busy**.

With automatic redial, your phone automatically redials the number for 4 minutes. When the call goes through, your phone rings or vibrates 1 time, displays **Redial Successful**, and then connects the call.

You must turn on automatic redial to use the feature. To turn automatic redial on or off:

Find the Feature MENU ($\cdot\dot{\oplus}\cdot$) > $\otimes$ SETTINGS & TOOLS > Initial Setup > Auto Redial

When automatic redial is turned off, you can manually activate the feature to redial a phone number. When you hear a fast busy signal and see Call Failed:

Press $\odot$ or the RETRY key to activate automatic redial.

Silencing a Call Alert

You can silence the alert for an incoming call before answering the call.

Press the volume key up or down to silence the alert for the incoming call.

Calling an Emergency Number

Your service provider programs 1 or more emergency phone numbers, such as 911, that you can call under any circumstances, even when your phone is locked.

Note: Emergency numbers vary by country. Your phone's preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

1 Enter the emergency number.

2 Press $\odot$ to call the emergency number.

Using AGPS During an Emergency Call

When you make an emergency call, your phone's assisted-Global Positioning System (AGPS) feature can calculate your approximate location and help emergency service personnel find you.

Notes:

- This feature can work only if the emergency response center can receive and process location information. If you are concerned about whether your local emergency response center can receive AGPS location information, contact your local authorities.

- In order for the AGPS feature to work when making emergency calls, the service must be turned on. See page 43.

For best results, you should be located where your phone's antenna can establish a clear view of the open sky. This allows your phone to access AGPS satellite signals. Even under good conditions, it may take 30 seconds or more to determine your approximate location. This time increases and the accuracy of the results decreases with reduced access to satellite signals.

If your phone does not have adequate access to AGPS satellite signals, the location of the nearest cell tower in contact with your phone is automatically provided to the emergency response center.

Because of the limitations of the AGPS feature, always provide your best knowledge of your location to the emergency response center, just as you would when using a phone without AGPS capabilities. Also, remain on

the phone for as long as the emergency response center instructs you.

Viewing Recent Calls

Your phone keeps lists of the calls you recently received and dialed, even if the calls did not connect. The lists are sorted from newest to oldest entries. The oldest entries are deleted as new entries are added.

Shortcut: Press ⊙ from the home screen to view the **All Calls** list.

Find the Feature   MENU (⬦) > ☞ RECENT CALLS

1 Scroll to **Missed**, **Received**, **Dialed**, or **All**.

2 Press **OK** (⬦) to select the list.

3 Scroll to an entry.

4 Press ⊙ to call the entry's number.

    or

Press the **Message** key to send a message to the entry's number.

    or

Press **OPEN** (⬦) to view entry details.

    or

Press the **Options** key to open the **Options** menu to perform various operations on the entry.

The **Options** menu can include the following options:

Option
Save
Create a **Contacts** entry with the number in the **No.** field.

Option
Erase
Delete the selected entry (if the entry has not been locked).
Erase All
Delete all unlocked entries.
View Timers
Go to the **View Timers** screen.

Returning an Unanswered Call

Your phone keeps a record of your unanswered calls, and displays:

- the ⁙ (missed call) indicator
- **X Missed Calls**, where **X** is the number of missed calls

1 Press the **VIEW** key to see the received calls list.

2 Scroll to the call you want to return.

3 Press ⊙ to make the call.

Attaching a Number

While dialing (with digits visible in the display), press **Options** (⬩), then scroll to and select **Attach Number,** attach a number from **Contacts** or the recent calls list.

Calling with Speed Dial

Each entry you store in **Contacts** is assigned a unique *speed dial* number.

Tip: To see an entry's speed dial number, press **MENU** (⬩) ▶ ⬚ **CONTACTS** ▾ **Contact List**, scroll to the entry, and press **View**.

To speed dial a **Contacts** entry:

1 Enter the speed dial number for the entry you want to call.

2 Press $\boxed{\#}$ to submit the number.

3 Press $\textcircled{\scriptsize\odot}$ to call the entry.

Calling with 1-Touch Dial

To call **Contacts** entries 1 through 9, press and hold the single-digit speed dial number for 1 second.

Using Voicemail

Voicemail messages that you receive are stored on the network. To listen to your messages, you must call your voicemail phone number.

Note: Your service provider may include additional information about using this feature.

Listening to Voicemail Messages

Find the Feature   MENU ($\cdot\hat{\bullet}\cdot$) ▸ φ MESSAGING ▾ VoiceMail

Press $\textcircled{\scriptsize\odot}$ (send key) to call your voicemail phone number.

If no voicemail number is stored, your phone prompts you to store a number.

Personalizing Features

Using Voice Commands

You can place calls and perform other tasks by
speaking commands to your phone.

1 Press and release the voice button on the
right side of the phone.

Your phone displays and speaks **Say a
command**, followed by a list of voice
commands.

2 Say one of the commands listed in the
table in the next section.

Your phone performs the corresponding
action.

Voice Commands

Voice Commands

Call *Name* or *#*

Place a call to:

- a phone number you speak

  or

- a **Contacts** entry whose *Name* you
  speak

Voice Commands
Send Picture *Name* or *#*
Send a multimedia message to:
• a phone number you speak
or
• a **Contacts** entry whose *Name* you speak
(See page 15 for instructions on sending a picture in a message.)

Voice Commands
Send Text *Name* or *#*
Send a text message to:
• a phone number you speak
or
• a **Contacts** entry whose *Name* you speak

Voice Commands
Lookup *Name*
Look up a **Contacts** entry by speaking the entry's *Name*.
Go To *App*
Use a voice shortcut to access the phone *App* (application) you specify:
Voicemail, **Camera**, **Redial**, **Received Calls**

Tip: When speaking the name of a **Contacts** entry, you must say the name exactly as it is listed in the entry. For example, to call the mobile number for a **Contacts** entry named Bill Smith, you would say "Call Bill Smith mobile." (If the entry included only one number for Bill Smith, you would simply say "Call Bill Smith.")

Tip: Speak numbers at a normal speed and volume, pronouncing each digit distinctly. Avoid pausing between digits.

Voice Service Setup

You can modify several voice command settings:

1 Press and release the voice button on the right side of the phone.

2 Press the **Settings** key.

3 Scroll to **Choice Lists**, **Sensitivity**, **Digit Dialing**, or **Sound**, and press the **Select** key.

To access **Help** information for the setting you selected, press the **Help** key.

Tip: You can also access the same voice command settings by pressing
MENU (·◆·) ▸ ⚙ SETTINGS & TOOLS
▾ Talking Phone Settings ▾ Ringstyles ▾ Keypad Digits or
▾ Contact List Entries.

Download a Get It Now game or application:

MENU ($\dot{\bullet}$) ▶ $\mathbf{\blacktriangleright}^{\bullet}$ GET IT NOW

Select category, application, and pricing option. Normal airtime and/or carrier usage charges apply.

Manage Pictures

From the idle display, press $\dot{Q}$ left to select GET PIX & FLIX. Scroll to My PIX and press OK ($\dot{\bullet}$) to view a list of pictures.

To view a picture, scroll to the picture title and press VIEW ($\dot{\bullet}$).

To access the OPTIONS menu for MY PIX, press the Options key. Scroll to and select the desired option: Set As, Rename, Lock, Erase, Erase All, or PIX Info.

Features
Manage Video Clips From the idle display, press $\dot{\mathbf{\hat{\phi}}}$ left to select **GET PIX & FLIX**. Scroll to **My FLIX** and press **OK** ($\cdot\hat{\bullet}\cdot$) to view a list of pictures. To play a video clip, scroll to the video clip title and press **PLAY** ($\cdot\hat{\bullet}\cdot$). To access the **OPTIONS** menu for **MY PIX**, press the **Options** key. Scroll to and select the desired option: **Send**, **To PIX Place**, **Get New**, **Rename**, **Lock**, **Erase**, **Erase All**, **Flix Info**.
Web Sessions Select or create a Web session: From the idle display, press $\dot{\mathbf{\hat{\phi}}}$ up to select **OPENWAVE**.

Service & Repairs

If you have questions or need assistance, we're here to help. Go to
www.motorola.com/consumer/support, where you can select from a number of customer
care options. You can also contact the Motorola Customer Support Center at 1-800-331-6456
(United States), 1-888-390-6456 (TTY/TDD United States for hearing impaired), or 1-800-461-4575
(Canada).

Specific Absorption Rate Data

The model wireless phone meets the government's requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg.[1] Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government

for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is 1.14 W/kg, and when worn on the body, as described in this user guide, is 1.56 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).[2]

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site:

http://www.phonefacts.net

or the Canadian Wireless Telecommunications Association (CWTA) Web site:

http://www.cwta.ca

1. In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

2. The SAR information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.
