You can use this setting only in international roaming.

Press (Left) ▶ Press ▶ Press ▶ Press

- You can edit/change network setting to use the phone in the foreign contry.
- You can have difficulties of using the phone regarding of phone call services if you change it within your own discretion.

3. NATE Settings

You can change NATE preferences.

Press **Menu** (Left) ▶ Press **9** ▶ Press **3**

NATE Setting Menu

Home URL : You can set the initial access address for wireless internet.

Proxy : If the service provider extends the proxy, and adds or deletes address, you can set the proxy at your own discretion.

Reset : If you correct Home URL and Proxy, you can recover them to the factory-set default.

Note

- Proxy is the server located between the user and the service server to speed up data transmission. When the user request a specific data, the data in the proxy, rather than the concerned server, are sent to the user.

4. USIM Setting

To prevent loss of information when lost or stolen the phone, you can set lock and PIN.

Press **Menu** (Left) ▶ Press **9** ▶ Press **4**

PIN Lock : You can set PIN code when turning on/off the mobile phone.

Change PIN Code : You can change PIN code.
(Set PIN lock to use this function)

Menu Access : You can lock the menu when USIM card is not mounted in the phone.
(Set PIN lock to use this function)

Another USIM Lock : You can lock and restrict the another USIM access.

Note

- If you have entered in wrong PIN code for 3 times, it turns to PIN unlock code (PUK). If you have entered in wrong PUK code 10 times, you have to replace USIM card.
 - PIN(Personal Identification Number) Code : This is to prevent others from using your phone.
(Upon purchasing the product, the password is '0000'.)
 - PUK(PIN Unlock Key) Code : This code is 8 digit number to reset USIM code, if you have entered in wrong PIN code for 3 times. This number can be found on the USIM card envelope or card holder.
- If you have lost PIN/PUK code, visit SKT retail center to reset the password.

5. Set Time

You can set current time in the phone.

Press **Menu** (Left) ▶ Press **9** ▶ Press **5**

- If you set to manual, you have to input the time or select city info and summer time(DST).

Auto : Set the time automatically from service provider.

Manual : The user inputs the information manually.

6. Lock/Password

You can set the password of the phone to prevent unapproved use. (The default password is '0000')

Phone Lock

All the phone functions are locked. (except receiving the call)

Press **⏏** (Left) ▶ Press **9** ▶ Press **6** ▶
Password ▶ Press **1**

- You can set phone lock by pressing and holding **⏏** on the standby screen.
-You can still receive the call even when the phone is locked.
- The phone maintains the lock even if you switch on/off the phone.
- You can still place the emergency calls (111, 112, 113, 119, 125, 127) or use the Speed Dial 1 and 9 (Mobile Security) even when phone is locked.

- When you receive a call, the lock mode is released temporarily, and the phone returns to the lock mode after the call.
- In order to release the lock mode completely, press and hold **⏏** and enter the password, or select 'Unlock' in the Phone Lock menu.

Privacy Lock

You can select the menu and set lock.

Press **⏏** (Left) ▶ Press **9** ▶ Press **6** ▶
Password ▶ Press **2**

- If you set lock for a menu, you need to enter the password to use the selected function. This will protect your privacy.
- Press **⏏** (Left) to select all and lock all menu. In order to unlock the menu press **⏏** (Left) again.
- Press **⏏** (Right) to select and lock several menu. In order to unlock the menu press **⏏** (Right) again.
- If you select 'Hide Phonebook Name', sender names stored in phonebook are not displayed. However the calling number is displayed. (When a message is received, the 'Hide Phonebook Name' function is not applied.)

Service Key Lock

When connecting to wireless internet, you have to input the password.

Press **⏏** (Left) ▶ Press **9** ▶ Press **6** ▶
Password ▶ Press **3**

- You need to enter the password to use the one-touch dial button (NATE, W, T MAP, GXG, @Playon, etc). This will protect your privacy, and prevent from paying additional fee for unwanted wireless internet service.

Restrict Call

You can restrict origination to overseas of 700/060 numbers.

Press **⏏** (Left) ▶ Press **9** ▶ Press **6** ▶
Password ▶ Press **4**

Change Password

You can change the password.

Press **⏏** (Left) ▶ Press **9** ▶ Press **6** ▶
Password ▶ Press **5**

- Be sure not to forget your password.
- If you lose your password, you have to visit the service center in person with the ID card.
- Motorola takes no responsibility for any damage caused by leakage of password.

7. 언어/Language

You can select the language to be used in the phone.
(Language : Korean/English)

Press **⏏** (Left) ▶ Press **9** ▶ Press **7**

- Even if you select English, some functions are displayed in Korean.

8. Reset

You can reset the phone to default setting.

Press **⬇** (Left) ▶ Press **9** ▶ Press **8**

- To reset the phone, you need to input the password.
- The phone gets automatically switched off and rebooted.
- If the phone fails to reboot, press **⬆** to turn on the power.
- You can view function description of the item you wish to reset by pressing **⬇** (Left).

9. Motorola Service Center

You can receive the service guide about the phone.

Call Center

Representative number and business hours of Motorola Customer Call Center is displayed.

Press **⬇** (Left) ▶ Press **9** ▶ Press **9** ▶ Press **1**

- Press **Ⓜ** to place a call to the customer center.

Search Service Center

You can check the local customer center number and how to get there.

Press **⬇** (Left) ▶ Press **9** ▶ Press **9** ▶ Press **2**

- Press **Ⓜ** to place a call to the customer center.
- Press **⬇** (Left) to save the local customer center number.

Self A/S

You can check the solution against phone failure.

Press **⬇** (Left) ▶ Press **9** ▶ Press **9** ▶ Press **3**

10. S/W Version

You can check the S/W version of the phone.

Press **⬇** (Left) ▶ Press **9** ▶ Press **0**

S/W upgrade

If you wish to upgrade the software to the recent version, or if you need to upgrade software due to a bug, you can visit Motorola homepage (www.mymotorola.co.kr) and easily upgrade it with the Moto Upgrade program without having to visit a Motorola service center.

- Visit the Motorola homepage, sign up and log in.
- Select 'MOTOPRODUCT INFORMATION' and click Version Upgrade.
- Before starting the Moto Upgrade program, make sure to read 'Prerequisites', and run the program in accordance with the procedure. (Some software versions require you to visit the service center for free Moto Upgrade.

Contact the Motorola Customer Center (1588-6633) for details.

1. Accessories

You can purchase optional items at the nearest Motorola service center or accessory shop. Contact the service provider or visit Motorola homepage (www.mymotorola.co.kr) for details.

2. Troubleshooting

Nothing is displayed on the screen

- Check the battery.

No antenna bar is displayed on the screen

- Move to other place and then attempt a call again.

It sounds 'Toot-Toot' when a call is placed

- There is no communication channel available or your phone has failed in communicating with a base station. Press  to clear the call and press  to redial the number.

The charging lamp of the charger blinks in red

- Check the battery position or clean the terminals before reattempting charging. If the lamp keeps blinking, contact the nearest service center.

Battery operating time does not comply with the User Manual

- The battery operating time reduces slowly as the battery repeats charging and discharging. The operating time reduces rapidly if the battery is left in a cold or hot place for a long time.

Malfunction or failure to power On

- Remove the battery and reinstall it, and then turn the power on.

3. Spec and Feature

	Wireless communications service
Transmit frequency	1942.8~1977.2MHz
Receive frequency	2132.8~2167.2MHz
TX power	200mW
Number of channel	8CH
Type of emission	G7W
Modulation system	QPSK
Communication mode	duplex operation system
Transformer	PLL
Power	DC 3.7V
Exterior, weight	Standard battery : 49.5mmX105mmX15.9mm, 126g
Relative humidity	-20°C~+50°C, 0%~95%

4. Authentication label

1. Name of the model : Wireless communications service device
2. Authentication number : MOT-W-VE70-0808
3. Authentication Trade name : Motorola Korea Inc.
4. The date of manufacture: 2008. . .
5. Manufacturer/country : Motorola Korea Inc. / China

5. Specific Absorption Rate Data

This model wireless phone meets the government's requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 w/kg.¹ Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use

only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada.

The highest SAR value for this model phone when tested for use at the ear is 1.12 W/kg, and when worn on the body, as described in this user guide, is 0.79 W/kg. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).²

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

6. Collecting wasted-mobile phones

The collected wasted-mobile phones are utilized as resources and the residues are treated ecologically. Motorola is willing to do its best to protect environment not only today but in the future also. We kindly inviting you to participate in this movement for the protection of environment.

Motorola phone collecting centers

Recycling of wasted-mobile phone

- Return the old one to the distributor when you purchase a new phone.
- Visit a near-by representative of the manufacturer or A/S center.
- Return your mobile phone to a representative of mobile service provider.
- Utilize a collecting bag with no charger (arranged in provincial office, distributor, representative)

Guidelines for collecting discarded Motorola mobile phones

Please think of environment when you discard your phones and accessories. Do not discard old mobile phones or accessories such as battery pack, battery charger, etc. together with household waste. In some countries and areas, they have established a system to treat useless electronic and electrical products and batteries. Please contact your area for more information. If there is no appropriate system available, please send useless mobile phone and accessories to a near-by Motorola service center.

FCC Notice to User

The following statement applies to all products that have received FCC approval. Applicable products bear the FCC logo, and/or an FCC ID in the format FCC-ID:IHDP6JH1 on the product label.

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

European Union Directives Conformance Statement

Hereby, Motorola declares that this product is in compliance with:

- The essential requirements and other relevant provisions of Directive 1999/5/EC.
- All other relevant EU Directives

The above gives an example of a typical Product Approval Number. You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (to R&TTE Directive) at www.motorola.com/rtte. To find your DoC, enter the product Approval Number from your product's label in the "Search" bar on the web site.

Warranty Policy

Thank you for purchasing a Motorola product. This product has passed a strict quality control and inspection of the Motorola Technology Team. If a defect is found in your product during the warranty period, it will be repaired free of charge at a Motorola Service Center.

Warranty Period

- Terminal Equipment : 1 year
- Lithium ion battery : 6 months
- Other Accessories : 1 year

Free Warranty Service

Free warranty service will be provided for one year (warranty period) after purchasing.

Type of defects or trouble	Compensation		
	Under warranty	After expiry of warranty	
Critical repair service request resulting from performance and function failures occurred in normal operation within 10 days after purchasing	Exchange or refund	N/A	
Critical repair service request resulting from performance and function failures occurred in normal operation within 1 month after purchasing	Exchange or repair

Paid Service

- Reasons other than defects
Service requests for symptoms other than defects will be charged after expiry of the warranty period. Carefully read the User's Manual before you visit a service center.
- Defects resulting from user's errors
 - Defects caused by careless handling (soaking, impact) or improper repairing and remodeling.
 - Defects caused by using improper power supply.
 - Defects caused by repairs done at a place other than the Motorola Service Centers.
 - Defects caused by using accessories not provided by Motorola. (hands free, quick charger, charger, battery, stereo headset, battery cover, etc.)
 - Defects or damages resulting from dropping while moving the product.
- Others
 - Defects resulting from natural disasters such as fire, earthquake, flood, etc.
 - Expiry of life time of consumables (battery, stereo headset, external memory, antenna, and various accessories)

Safety and General Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Energy

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits.

Your Motorola mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions

For optimal mobile device performance, and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

Product Operation

When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting.

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our Web site at: www.motorola.com.

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.
