MOTOROLA $RA\mathbb{Z}R^{\mathbb{Z}}$

LIFE. M POWERED.

Introducing your new MOTOROLA RAZR™ V, the slim, fast, and intelligent phone. It has tons of advanced features for everything you want to do-web browsing, multimedia, and more.

Use this guide to get started, then see "WANT MORE?" to get all the help you need.

Note: Certain apps and features may not be available in all

Note: To avoid SIM card damage, turn off your phone before you insert or remove the SIM card.

Caution: Before assembling, charging, or using your phone for the first time, please read the important safety, regulatory and legal information provided with your product.

Note: This product uses a non-removable battery.

SET UP & GO

Contact your service provider for details.

Complete initial setup steps.

Create or log in to a Google™ account to get access to all of your Google services, like Gmail™, Google Play™, Google Maps™, and more. Registration is secure and only

takes a few minutes. Note: This phone supports apps and services that use a lot of data, so make sure your data plan meets your needs.

Your two main phone screens—Home and Apps. The home screen is what you see when you turn on the phone or touch Home from a menu. To see all of your apps, just touch Apps (:::).

Drag this bar down to see details.

Flick left or right to see more panels

Touch Apps (:::) to see all your apps

of widgets & shortcuts.

Back ♣, Home ♠ &

& widgets.

Want more? No problem. To download more apps from the Google Play™ Store, touch Apps (::) > Play Store.

SMART ACTIONS

Tired of doing the same tasks over and over again? Let smart actions do them for you. You can create rules to do things, like set your ringer to vibrate at work, or send auto-reply messages when you're busy.

To learn more, touch Apps (iii) > Fart Actions > Menu

WANT MORE?

This product meets the applicable limit for exposure to radio waves (known as SAR) of 1.6 W/kg (FCC & IC). The limits and guidelines include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The highest SAR values measured for this device are listed in the regulatory information packaged with your product.

Note: When using the product while worn on your body, either use an approved accessory, such as a holster or otherwise maintain a distance of 2.5 cm (1 inch) from the body to ensure compliance with SAR requirements. Note that the product may be transmitting even if you are not making a phone call.

Regulatory Information

For Your Safety

Before assembling, charging or using your mobile device for the first time, please read the important product safety and legal information provided with your product.

Specific Absorption Rate (FCC & IC)

YOUR MOBILE DEVICE MEETS FCC AND IC LIMITS FOR EXPOSUR RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) adopted by the Federal Communications Commission (FCC) and Industry Canada (IC). These limits include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 1.6 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the FCC and IC guidelines for your device model are listed below:

Head SAR	GSM 850, Wi-Fi, Bluetooth	0.68 W/kg
Body-worn SAR	GSM 850, Wi-Fi, Bluetooth	0.62 W/kg

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value. If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the head and body. Additional information can be found at www.motorola.com/rfhealth.

European Union Directives Conformance

The following CE compliance information is applicable to Motorola mobile devices that carry one of the following CE marks:

IMEI: 350034/40/394721/9

Type: MC2-41H14 ____

Only Indoor Use Allowed In France

for Bluetooth and/or Wi-Fil

Hereby, Motorola declares that this product is in compliance with:

The following gives an example of a typical Product Approval Number:

 The essential requirements and other relevant provisions of Directive 1999/5/EC All other relevant EU Directives

ou can view your product's Declaration of Conformity (DoC) to Directive 1999/5/FC (to R&TTF)

Directive) at www.motorola.com/rtte (in English only). To find your DoC, enter the

Product Approval Number from your product's label in the "Search" bar on the website.

- Increase the separation between the equipment and the receiver. For products that support Wi-Fi 802.11a (as defined in your product information): This device is Connect the equipment to an outlet on a circuit different from that to which the receiver restricted to indoor use when operating in the 5.15 to 5.25 GHz (802.11a) Wi-Fi frequency band. is connected.
 - . Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(a)(3).

The following statement applies to all products that bear the FCC logo on the product

This equipment has been tested and found to comply with the limits for a Class B digital device,

equipment generates, uses and can radiate radio frequency energy and, if not installed and used

in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no quarantee that interference will not occur in a particular installation. If this

pursuant to part 15 of the FCC Rules. See 47 CFR Sec. 15.105(b). These limits are designed to

provide reasonable protection against harmful interference in a residential installation. This

equipment does cause harmful interference to radio or television reception, which can be

determined by turning the equipment off and on, the user is encouraged to try to correct the

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21. For products that support Wi-Fi 802.11a (as defined in your product information): This device is restricted to indoor use when operating in the 5.15 to 5.25 GHz (802.11a) Wi-Fi frequency band.

Industry Canada Notice to Users

interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

FCC Notice to Users

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference and (2) This device must accept any interference, including interference that may cause undesired operation of the device. See RSS-GEN 7.1.5. This Class B digital apparatus complies with Canadian ICES-003.

Software Notices

Warning against unlocking the bootloader or altering a product's operating system software: Motorola strongly recommends against altering a product's operating system, which

includes unlocking the bootloader, rooting a device or running any operating software other than for details. the approved versions issued by Motorola and its partners. Such alterations may permanently damage your product, cause your product to be unsafe and/or cause your product to malfunction. In such cases, neither the product nor any damage resulting therefrom will be covered by

Important FCC information: You must not make or enable any changes to the product that will impact its FCC grant of equipment authorization. The FCC grant is based on the product's emission, modulation, and transmission characteristics, including: power levels, operating frequencies and bandwidths, SAR levels, duty-cycle, transmission modes (e.g., CDMA, GSM), and intended method of using the product (e.g., how the product is held or used in proximity to the body). A change to any of these factors will invalidate the FCC grant. It is illegal to operate a transmitting product without a valid grant.
