Start talking when the other party answers.

* [Swap]: Calls up another function such as Phonebook. →P226

* to : Sends push signals (DTMF).

Talking screen
3 to terminate the call

Note

* If you hear the Caller ID Display Request service voice prompt, make a call again sending the Caller ID.

■ **To correct an entered phone number**
To delete an entered digit, use to move the cursor to the right of the digit and press .
To add a digit, use to move the cursor to the position and enter the digit with the dial keys.

■ **Screen display during dialing**
The other party's name appears if the party is saved in the Phonebook. However, when a call is made to a party that has been saved as secret by setting "Secret Data" to "Hide", the phone number is displayed. (Checking the specifications)
The Function Menu on the Phone Number Entry Screen

1 Phone number entry screen (P54) ▶ [Function] ▶ Perform the following operations

Attach Number
Enter the phone number referring to the phonebook or Dialed/Received Calls.

Phonebook	:	Select the phonebook entry and press [Select].
Dialed Calls	:	Select a history and press [Select].
Received Calls	:	Select a history and press [Select].

Insert
Enters "p", "w", or "n" at the cursor location. →P59

Caller ID
Makes a call after setting to show/hide the Caller ID. →P58

Video Call
Makes a video call to the entered phone number.

Send Message
The entered phone number becomes the destination.
Compose and send a mail. →P172

Multi Number
Select a number to use for Caller ID when making calls. →P251

Add Intl Access No.
Adds an international access number at the beginning of the entered phone number. →P61

Add Country Code
Adds a country code at the beginning of the entered phone number. →P270

Insert
(Checking the specifications)

Editing Function
Uses the edit functions. →P261

Cancel Entry
Cancels storing. (Checking the specifications)

Note

Attach Number
• Selecting "New Call" from the function menu during a call will bring up the phone number entry screen with "Browse" displayed. (Checking the specifications)

Video Call
• Selecting "New Call" from the function menu during a call to make a video call, will display a confirmation whether to dial after disconnecting the current call. Pressing [ ] [Yes] terminates the current call and makes a video call to the newly dialed phone number.

The Function Menu on the Talking Screen

1 Talking screen (P54) ▶ [Function] ▶ Perform the following operations

Mute
Turns off the sound.

Unmute
Cancels Mute.

Spkrphone On
Switches the sound source to the speaker to perform a Handsfree call.

Spkrphone Off
Cancels the Handsfree call.

My Personal Info
Displays your phone number.

Hold
Places the call on hold.

Use Bluetooth
• Searches and connects to a registered Bluetooth headset, etc. (Checking the specifications)

New Call
Places the active call on hold and makes another call. →P248

Dialed Calls
Calling the Same Party Again

Up to XX entries can be saved in the Dialed Calls for both voice calls and video calls. A phone number, dialed date and time, ringing duration, and show/hide Caller ID are saved in the Dialed Calls.

• If there are more than XX entries, the oldest entries will be overwritten first.

• Calling the same phone number overwrites the entry of the latest called date and time.
1 ⌒

• The other party's name appears if the party is saved in the Phonebook.

Showing/Hiding Caller ID for the Next Call

You can set to show/hide the Caller ID for the next call in advance. (Checking the specifications)

1 ●▶ $★$ (Settings) ▶ "In-Call Setup" ▶ "Caller ID Notification" ▶ "Next Call Only" ▶ "Show"/"Hide"
Sending Push Signals Quickly

Enter "p"/"w"/"n" and a number after the phone number to send number after the alphabetic character as push signals (DTMF).

• Signals may not be received depending on the device on the receiving side.

Entering "p"
A call can be made with a "p" and a number after the phone number. After the number before "p" is connected, the number after "p" is sent in DTMF about three seconds later. This function is convenient for dialing an extension after a phone number is connected.
1 **Enter a phone number** ▶ ⌨ **[Function]** ▶ **"Insert"** ▶ **"Pause"** ▶ **enter a number to send** ▶ ◄/●

After the call is connected, the number after "p" is sent automatically.

Entering "w"

A call can be made entering a "w" and a number after the phone number. When the number before "w" is connected, the number after "w" is keyed in waiting to be sent in DTMF. This function is convenient for sending a message to a pager, reserving tickets, or checking the balance of your bank account over the phone.

1 **Enter a phone number** ▶ ⌨ **[Function]** ▶ **"Insert"** ▶ **"Wait"** ▶ **Enter a number to send** ▶ ◄/●

2 ⌨ **[OK]**

The number after "w" is sent.

Entering "n"

You can make a call entering "n" after a phone number and entering a number to be sent instead of "n". After the number before "n" is connected, the number entered for "n" is sent in DTMF. This function is convenient to make an international credit card call that is connected using the access number and then requires a credit card number, PIN number or a phone number.

*: From January, 2001, the DoCoMo pager service changed its name to QUICKCAST.

1 **Enter a phone number** ➧ 📱 **[Function]** ➧ **"Insert"** ➧ **"n"** ➧ **Enter a number to send** ➧ 📞/●

The entry screen of the number to be sent instead of "n" is displayed.

2 **Enter "n" value** ➧ 📧 **[OK]**

When the call is connected, the entered number is sent instead of "n".

WORLD CALL

Making International Calls

WORLD CALL is an international calling service available from a DoCoMo mobile phone. FOMA service subscribers are also signed up for WORLD CALL at the time of initial subscription (except subscribers explicitly declining this service).

- You can make calls to about 220 countries and regions around the world.

- Charges for "WORLD CALL" are added to the monthly FOMA service call charges.

- No initial fee and no fixed monthly charges apply.

- This service is not available with some billing plans.

- For details on WORLD CALL, contact the "DoCoMo Information Center" on the back of this manual.

- When using international carriers other than DoCoMo, contact the prospective carrier directly.

Changes to the International Call Dialing Procedure

The "MY LINE" service is not applicable to mobile phone communications, including WORLD CALL service. Along with the introduction of the "MY LINE" service, the dialing procedure for international communications using a mobile phone has been changed. Consequently, the previous dialing procedure (Step 1 in "Making an International Call" (P37) without the prefix "010") can no longer be used.

An "International Video Call" to an overseas party with a specific 3G mobile phone can be made by pressing
📷 after the following dialing procedures.
• For information about the countries where connection can be made and telecommunications carriers, refer
to the DoCoMo's Web site.
• For details, contact the "DoCoMo Information Center" on the back of this manual.

Making an International Call by Entering a Phone Number

Enter the phone number in the following format:

1 **Enter "009130-010-Country Code-Area Code (City Code)-Phone Number"**
- Exclude the leading "0" (zero) from the area code (city code) (in some countries or regions such as Italy, the leading "0" may be required)

2 📞/●

■ **To make a video call**
Press 📷.

Making an International Call Using "+"

Enter "+" at the beginning of a phone number and dial to replace "+" with an international access code automatically. Press ⎡ ᵒʷᵏ ⎤ for 1+ seconds to enter "+".

• Set "Auto-Assist Settings" of "International Access Code" to "On" before making a call. →P62

• The automatically added International Access Code is set to WORLD CALL (009130010) by default. →P62

1 ⎡ ᵒʷᵏ ⎤ **(for 1+ seconds) ▶ Enter "Country Code - Area Code (City Code) - Phone Number"**

    • Exclude the leading "0" (zero) from the area code (city code) (in some countries or regions such as Italy, the leading "0" may be required).

2 ⎡ ⎤**/** ⎡ ● ⎤

    The confirmation to dial is displayed.

    • The phone number with the International Access Code added is displayed on the confirmation to dial screen.

    ■ **To make a video call**
    Press ⎡ ⎤.

3 ⎡ ᶜʰ ⎤ **[Yes]**

Note

• This option is available only inside the FOMA network service area.

• If the phone number has "+81" as its prefix, "+" will not be converted into the International Access Code.

Making an International Call Using a Function Menu

You can select an international access code from the function menu and add it to the phone number.

1 **Enter "Country Code - Area Code (City Code) - Phone Number"**

    • Exclude the leading "0" (zero) from the area code (city code) (in some countries or regions such as Italy, the leading "0" may be required).

2 ⎡ ᶜʰ ⎤ **[Function] ▶ "Add International Access No." ▶ Select a number ▶ ⎡ ᶜʰ ⎤ [Select]**

    The international access code is added at the beginning of the phone number.

3 ⎡ ⎤**/** ⎡ ● ⎤

    ■ **To make a video call**
    Press ⎡ ⎤.

Note

• WORLD CALL is set as the international access code by default. International access codes can be added. →P62

Making an International Call Easily

Setting to Add the International Access Code Automatically

Default	Auto Assist: Off Access Code: World Call (0091300101)

You can set whether to add an international access code automatically instead of "+" when you make a call by entering "+" at the beginning of the phone number. Also, you can specify the international access code to be added automatically.

1 ●⟩ $★$ (Settings) ❥ "In-Call Setup" ❥ "Intl Dial Settings" ❥ "Intl Access Code" ❥ "Auto-Assist Settings" ❥ Perform the following operations

Edit
You can correct the selected international access code. Go to Step 2 of "Storing International Access Code" (P62).

Delete
The selected international access code will be deleted.

New
Go to Step 2 of "Storing International Access Code" (P62).

Edit
- The pre-installed "World Call" number can also be edited.

Delete
- The international access number set as Auto-Assist cannot be deleted.

Sub Address

Making a Call by Specifying a Sub Address

Default	(Checking the specifications)

You can set whether digits after "*" of a phone number with "*" inserted are identified as a sub-address. A sub-address is used to call up a specific device connected to an ISDN line or to select contents on "V live".

1 ● ▶ **\$★\$ (Settings)** ▶ **"In-Call Setup"** ▶ **"Sub Address"** ▶ **"On"/ "Off"**

- "*" is not identified as a delimiter of a sub-address if: (Checking the specifications)
  - "*" is entered at the beginning of the phone number
  - A specific number such as "184" or "186" is entered at the beginning of the phone number
  - "*" is entered right after "p" or "w"

In-Call Timer

Warning with Display and Alarm when a Set Period Elapses during a Call

Default	Display: Off Beep: Off

You can set to warn by displaying information about a call on the screen and sounding an alarm if the set period of time elapses during the call. (Checking the specifications)

1 ⬤▶ (Settings) ▶ "In-Call Setup" ▶ "In-Call Timer" ▶ Perform the following operations

---

Display

Time　　　　　:　Shows the duration of the call.

Credit Available :　Shows the available remaining amount to the amount set under "Credit Limit".

Off　　　　　　:　Nothing is displayed.

Beep
Enter an interval between Beeps of the range from 1 second to 999 seconds.

　▶ **"60 Seconds"/"Off"** ▶ **Enter Beep interval** ▶ ⌨ **[OK]**
　• The alarm setting completes if you select "Off".

Note

• The following operations are available by pressing ⌨ [Function] on the alarm interval entry screen:
　- Select "Editing Function" to edit text. →P261
　- Select "Cancel Entry" to cancel saving.

Display

• If "Credit Available" is set, it is impossible to make a call and the counter is reset when exceeding the "Credit Limit".

Talking Using Handsfree

You can set to hear the other party's voice from the speaker.

1 Talking screen (P54) ▶ ⌨ [Function] ▶ "Spkrphone On"

■ **To cancel a handsfree talking**
Press ⌨ [Function] and select "Spkrphone Off". (Checking the specifications)

Note

• Keep a distance of at least XX cm between the handset and your ear during a Handsfree call.
• To operate during a video call →P83

In-Car Handsfree

Talking in a Car, Hands Free

Connecting the handset to a handsfree device, such as an in-car handsfree kit 01 (optional) or a car navigation system, allows you to make or receive a voice call from a handsfree device.

For operations of a handsfree device, refer to the user manual of the device. To use an in-car handsfree kit 01 (optional) via USB, a FOMA in-car handsfree cable 01 (optional) is necessary.

Note

- If you connect the handset with a Bluetooth handsfree device via a Bluetooth connection, register the device before connecting.
- To use a handsfree device via USB connection, set "USB Mode Settings" to "Data Connection".
- Screen display for incoming or a ringtone are in accord with the settings on the handset.
- When you switch to handsfree, a ringtone sounds from the handsfree device even if Manner Mode is set or "Ring Volume" is set to "0" for the handset.
- The incoming call actions with Public Mode (Drive Mode) activated is in accord with Public Mode (Drive Mode) settings.
- The ring actions with Answering Machine activated is in accord with the "Record Message" settings.
- Folding the handset during a call does not affect the call. (Checking the specifications)

Talking via Bluetooth

You can talk connecting the handset to a commercially available Bluetooth device such as a Bluetooth headset.

- Register the Bluetooth device before connecting it to the handset. →P239
- For operations of a Bluetooth device, refer to the user manual of the device.

1   Make/Receive a Call using a Bluetooth device

Note

- $★$ appears when the handset is connected to a Bluetooth device.

■**To switch to a Bluetooth device during a call**
(Checking the specifications)

Receiving a Call

The ringtone sounds and the incoming call lamp blinks.

- : Stops the ringtone or vibration.

2   / [Answer]
Answer the call.

3   to terminate the call

To be inserted

Incoming call screen
■**Display of the Incoming call screen (with Caller ID)**
If the caller is saved in the Phonebook, the name and phone number are displayed. If an image is saved in the Phonebook, the specified image is displayed. (Checking the specifications)
- If an image is saved for a group, the image for the group takes precedence to be displayed. (Checking the specifications)
- When the "Secret Data" is set to "Hide", "Private ID" is displayed when a call arrives from a caller saved as secret in the Phonebook.

- If a call arrives to an additional number of Multi Number, the ringtone set in "Multi Number" sounds and the following icon appears on the incoming screen:
  $★$/$★$: Incoming voice call
  $★$/$★$: Incoming video call
  $★$/$★$: Incoming data

■ **Display on the Incoming call screen (without Caller ID)**
  The reason for no Caller ID is displayed instead of a phone number. →P127

Note

- The incoming call actions such as a ringtone, vibration or screen display vary depending on the settings in "Style". →P106, P108
- When Manner Mode is set, the ringtone does not sound. When Public Mode (Drive Mode) is set, the ringtone does not sound and the incoming call lamp does not blink.
- When "Multi-key" is set, you can answer the call by pressing a key other than the key in Step 2.
- When "Open to Answer" is set, you can answer a call by opening the handset.
- If you subscribe to the Voicemail, Call Waiting or Call Forwarding service, when "Incoming Call Mgmt" is set to "Answer Call" and "Incoming Call Setting" is enabled, a busy tone during a call sounds if a call arrives during another call, If a busy tone during a call sounds, each service is available. →P251
- You can set "Ring Delay" to delay the incoming call action for a call made from a party not saved in the Phonebook.
- Use the following functions to reject incoming calls from a caller not saved in Contacts/specific caller.
  - Set "Not in Phonebook" to "Reject".
  - Set "Reject Calls" of Phonebook to "Yes".

The Function Menu on the Incoming Call Screen

1 Incoming call screen (P65) ▶ ⌨ [Function] ▶ Perform the following operations

Answer
Answer the ringing call.

End Active Call & Answer
Terminate an active voice call to answer a ringing call.

End Held Call & Answer
Terminates a call on answer hold to answer another call. (Checking the specifications)

Reject Call
Reject an incoming call and hang up.

Response Hold
Places the call on hold.

Voicemail
Connects a call to the Voicemail center.

Call Forwarding
Transfers an incoming call to the specified number.

Note

<u>Voicemail</u>

- This option is not available unless you subscribe to the Voicemail service.

<u>Call Forwarding</u>

- This option is not available unless you subscribe to the Call Forwarding service and you specify a forwarding destination.
Multi-key

Answering a Call by Pressing a Dial Key

Default	On

You can set to answer a voice call by pressing a key other than [Answer], , (for 1+ seconds). (Checking the specifications)

1 ⬤▶ $★$ (Settings) ▶ "In-Call Setup" ▶ "Answer Function" ▶ "Multi-key" ▶ "On"/"Off"

Note

• After setting, the following keys can be used to answer a call.
  , , to , , , ⬤,
• This function is not available when a video call arrives.

Open to Answer

Answering a Call by Opening the Handset

Default	On

You can set to answer a voice or video call by simply opening the handset when a call arrives while the handset is folded.

1 ⬤▶ $★$ (Settings) ▶ "In-Call Setup" ▶ "Answer Function" ▶ "Open to Answer" ▶ "On"/"Off"

Note

• When "Open to Answer" is set, answer hold operations or function menu of the incoming call screen are unavailable.

Received Calls

Using Received Calls

Up to 20 incoming voice or video call entries are saved in Received Calls. A phone number, received date and time, ringing duration, and show/hide Caller ID are saved in the entries.

• If there are more than 20 entries, the oldest entries will be overwritten first.
• Receiving a call from the same phone number overwrites the entry of the latest received date and time.

1 ▶ "Received Calls"

• The caller's name appears if the caller is saved in the Phonebook.

(Checking the specifications)

Using Public Mode (Drive Mode)

Public Mode is an automatic response service to assist in observing manners in public locations. When Public Mode is set, a voice prompt is played to the caller indicating that you are driving or at a place where you cannot talk (such as on a train, bus, or in a movie theater) and cannot answer the call, and the call is disconnected.

• You can set or cancel Public Mode only in Standby (and when $★$ is displayed).

• This option is not available during data communication.

1 **(for 1+ seconds)**

When a call arrives, a voice prompt is played indicating that "you are either driving or at a place where you cannot use the handset and cannot answer the call. Please call again later.".

■ **To cancel Public Mode (Drive Mode)**
Press (for 1+ seconds) on the wallpaper screen.

■ **When Public Mode (Drive Mode) is set**
Even when a call arrives to your handset, the ringtone does not sound. "X Missed Calls" is displayed on the screen and the call is stored in Received Calls.
A voice prompt indicating that you are driving or you are at a location where you cannot use the handset is played to the caller, and the call is disconnected.

Note

• $★$ appears at the top of the screen when Public Mode is set.
• Even when Public Mode is set, you can make calls as usual.
• If a call with "Private Calling" arrives when Caller ID Display Request Service is set, a voice prompt of Caller ID Display Request service is played (instead of Public Mode voice prompt).
• If Manner Mode is set concurrently, Public Mode (Drive Mode) settings take precedence.
• No tones from FOMA handset sound when Public Mode (Drive Mode) is set.

Incoming Call Actions When a Network Service and Public Mode (Drive Mode) are Set

Actions performed when Public Mode and a Network Service are set concurrently.

Service	Incoming Actions for a Voice Call	Incoming Actions for a Video Call
Voicemail service	After the Public Mode voice prompt is played, the call is connected to the Voicemail Center.*	The Public Mode image prompt does not appear, and the call is connected to the Voicemail Center.
Call Waiting service	After the Public Mode voice prompt is played, the call is terminated.	After the Public Mode image prompt is shown, the call is terminated.

Service	Incoming Actions for a Voice Call	Incoming Actions for a Video Call
Call Forwarding service	After the Public Mode voice prompt is played, the call is forwarded to the forwarding destination.* Whether the Public Mode voice prompt is played varies depending on the settings of Call Forwarding service voice prompt option.	The Public Mode image prompt does not appear, and the call is forwarded to the forwarding destination. If the forwarding destination cannot handle video calls, the call is terminated.
Nuisance Call Barring service	If the caller is saved to reject a nuisance call, the reject call voice prompt is played and the call is terminated. In a case other than the above, the Public Mode voice prompt is played and the call is terminated.	If the caller is saved to reject a nuisance call, the reject call image prompt is shown and the call is terminated. In a case other than the above, the Public Mode image prompt is shown and the call is terminated.
Caller ID Display Request service	If the caller does not send the Caller ID, the Caller ID display request voice prompt is played and the call is terminated. If the caller sends the Caller ID, the Public Mode voice prompt is played and the call is terminated.	If the caller does not send the Caller ID, the Caller ID display request voice prompt is played and the call is terminated. If the caller sends the Caller ID, the Public Mode image prompt is shown and the call is terminated.

*: If the ring time for a Network Service is set to 0 (zero) seconds, the Public Mode voice prompt is not played, and the call is not recorded in Received Calls.

Public Mode (Power Off)

Using Public Mode (Power Off)

Public Mode (Power Off) is an automatic response service to assist with observing manners in public locations. When Public Mode (Power Off) is set, when a call arrives while the power is turned off, a voice prompt is played to the caller indicating that you are at a place where the device must be turned off (such as in hospitals, in aircraft, or near priority seats on a train) and cannot answer the call, and the call is disconnected.

1 Enter "*25251" ▶ 📞

Public Mode (Power Off) is set (the stand-by display appears the same).
After Public Mode (Power Off) is set, when a call arrives while the power is turned off, a voice prompt is played indicating that "you are at a place where you must turn the device off and cannot answer the call. Please call again later".

■ **To cancel Public Mode (Power Off)**
Enter "*25250" and press 📞.

■ **To check the status of Public Mode (Power Off)**
Enter "*25259" and press 📞.

■ **After setting Public Mode (Power Off)**
Public Mode (Power Off) is activated until it is cancelled by dialing "*25250". Turning the power On does not cancel the mode.
The Public Mode (Power Off) voice prompt is played even when you are out of the service area or where no signals are received. A voice prompt indicating that you are at a location where you must turn the device off is played to the caller, and the call is disconnected.

Incoming Call Actions When a Network Service and Public Mode (Power Off) are Set

Actions performed when Public Mode and a Network Service are set concurrently.

| Service	Incoming Actions for a Voice Call	Incoming Actions for a Video Call
Voicemail service	After the Public Mode (Power Off) voice prompt is played, the call is connected to the Voicemail Center.*	The Public Mode (Power Off) voice prompt is not played, and the call is connected to the Voicemail Center.
Call Forwarding service	After the Public Mode (Power Off) voice prompt is played, the call is connected to the forwarding destination.* Whether the Public Mode voice prompt is played is according to the settings of Call Forwarding service voice prompt option.	The Public Mode (Power Off) image prompt does not appear, and the call is forwarded to the forwarding destination. If the forwarding destination cannot handle video calls, the call is terminated.
Nuisance Call Barring service	If the caller is saved to reject a nuisance call, the reject call voice prompt is played and the call is terminated. In a case other than the above, the Public Mode (Power Off) voice prompt is played and the call is terminated.	If the caller is saved to reject a nuisance call, a message indicating that the call was not connected and the call is terminated. In a case other than the above, the Public Mode (Power Off) image prompt is shown and the call is terminated.
Caller ID Display Request service	If the caller does not send the Caller ID, the Caller ID display request voice prompt is played and the call is terminated. If the caller sends the Caller ID, the Public Mode (Power Off) voice prompt is played and the call is terminated.	If the caller does not send the Caller ID, the Caller ID display request voice prompt is played and the call is terminated. If the caller sends the Caller ID, the Public Mode (Power Off) image prompt is shown and the call is terminated.

*: If the ring time for a Network Service is set to 0 (zero) seconds, the Public Mode (Power Off) voice prompt is not played, and the call is not recorded in Received Calls.
Checking Missed Calls

If you could not answer a call, the Missed call notification screen is displayed on the wallpaper screen. From the Missed call notification screen, you can check the caller.

1 An incoming call terminates

The number of missed calls is displayed.

• ⓘ [Exit]: The Missed call notification screen is closed.

Missed call notification screen

2 📞 [View]

The Received list screen opens. $★$ appears for a Missed Call.

3 Select a missed call entry ▶ ●

The Received Calls list detail screen opens.

- After checking a missed call, the notification screen will not open.
- When "Show in Call Logs" is set to "No", the Missed call notification screen for a call that is hung up within the time set in "Ring Delay" is not displayed.

Answering Machine

Recording of Voice/Video-clip Message from a Caller when You Cannot Answer a Call

Even if you do not subscribe to the Voicemail service, a response message indicating that you cannot answer the call can be played, and your handset can record the voice/image message.

Making/Answering Video Calls

Video Calls

Video calls are available between DoCoMo video-phones.

- DoCoMo video-phones comply with "3G-324M*1, an international standard for 3GPP*2". The handset cannot connect to a video phone that uses a different system from DoCoMo video-phones.
- *1: 3G-324M
    This is an international standard for the third generation of mobile video-phones.
- *2: 3GPP (3rd Generation Partnership Project)
    This is a regional standards organization for developing common technological specifications for the third generation mobile communication system (IMT-2000).

Phone number entry screen

2 🔲

Start talking when the other party answers.

- Digital communication charges apply from the time the Connecting screen is displayed.
- 🔘: Enlarge or shrink the camera image.
- 🔲 to 🔲: Sends push signals (DTMF).

Connecting screen   **Video call screen**

3 📵 to terminate the call

Note

- If an image requests the Caller ID, make the video call again sending the Caller ID.
- International video calls are available using "WORLD CALL", DoCoMo's international telephone service. →P60
- The connection cannot be established if the call is made to a non video-phone or even if the other party has a video-phone, when the handset power is turned off or outside of the service area. If you made a call to non video-phone, the call is cancelled and a confirmation to call again is displayed. (Checking the specifications) Select "Reconnect as Voice Call" to call again as a voice call. However, this may not occur if the destination is ISDN synchronous 64K or PIAFS, ISDN video-phone that does not handle 3G-324M (as of XX 2006), or wrong number was dialed. Communication charges may apply.
- If an emergency call such as 110, 119 or 118 was made from the FOMA handset via video-phone and the other party does not have a video-phone, call again using a voice call.
- i-mode mail or Message R/F arriving during a video call is stored at the i-mode center. SMS can be received even during a video call.
- Digital communication charges apply even if you send the alternative image.
- If the handset is not set to "DTMF ON", push signals cannot be sent by pressing dial keys during a Chara-den video call. →P82

■ When video calls are not connected

The following error messages indicate the reason:
- The message displayed may not accurately describe the actual situation depending on the other party's handset or subscription to Network Services.

Error Message	Reason
Video Call Failed Check number, then redial.	The dialed phone number is no longer in use.
Number Busy	The line is busy or using packet communication. • Select "Reconnect as Voice Call" to switch to a voice call. • Select "Redial Video Call" to try a video call again. • Select "Send Message" to create and send mail with the entered phone number as an address.
Video Call Failed Out of the Service Area/Power Off. Send a Message?	The other party is in a location where no signals are received or the phone is turned off. • Press [Yes] to create and send SMS with the entered phone number as an address.
Video Call Failed. Public Mode (Drive Mode). Create a Message?	The other party has set Public Mode (Drive Mode). • Press [Yes] to create and send mail with the entered phone number as an address.
Video Call Failed Set Caller ID to ON. Send a Message?	The other party's phone is set to reject no Caller ID calls and you did not send the Caller ID, or you dialed to V-Live or Visual Net. (Checking the specifications) • Press [Yes] to create and send mail with the entered phone number as an address.
Video call failed	Appears for the reason other than the above. • Select "Reconnect as Voice Call" to switch to a voice call. • Select "Redial Video Call" to try a video call again. • Select "Send Message" to create and send mail with the entered phone number as an address.

• You can use the UIM Phonebook entries if you insert the UIM into another FOMA handset.

■ **Notice**
• It is recommended that you write down the contents of the Phonebooks and store it in a separate location. You can connect the handset to a PC using data link software and a FOMA USB cable (optional) and save Phonebook entries to the PC.
• It may not be possible to copy the data you have saved on your FOMA handset to a new model depending on the specifications. Check with a DoCoMo shop.
• DoCoMo is not responsible for lost data due to failure or repair of the FOMA handset.

• If "Store To" is set to "UIM", only "Cancel" is displayed.

Saving Contacts to the Phonebook from Received Calls or Dialed Calls

You can save entries to a Phonebook from the list or detail screens of calls, mail, SMS, bookmarks, or screen memos that contains a phone number, mail address or URL. Also, you can save a phone number currently being entered/displayed on the phone number entry screen, compose mail screen, or Web site.
<Example: Saving an entry from Dialed Calls list to the FOMA handset phonebook>

1 **Dialed Calls list screen (P56) ▶ Select an entry ▶ [ch] [Function] ▶ "Register"**

■ **To save from the phone number entry screen**
Press [i] [Save].

■ **To save from other screens**
Select an item or phone number and press [ch] [Function], then select "Add to Phonebook".

2 Select a saving method ▶ 📷 [Select]

- An item to overwrite appears as "Replace Email", "Replace URL" or "Replace Picture" depending on the selected item or display under Step 1.

**Create New Contact** : Save a new entry to a Phonebook. Go to Step 5.

Add to Contact : Add items to an existing Phonebook entry. The phonebook selection screen appears.

Replace Number : Overwrites an existing Phonebook entry. The phonebook selection screen appears.

3 Select a Phonebook entry to save ▶ ⦿
- Go to Step 5 if you select "Add to Contact".

4 Select a phone number to overwrite ▶ 📷 [Select]

- Select an Email address if selecting "Overwrite Email", and a URL if selecting "Overwrite URL" in Step 2.
- If "Replace Picture" is selected in Step 2, a confirmation to overwrite appears. Press 📷 [Yes] and go to Step 5.

5 Save/edit the Phonebook entry ▶ 📷 [Complete]

- For saving a Contact, see Step 2 in "Saving to the Phonebook" (P91).

Note

- To save an item from the Barcode reader scanned result screen, select "Add to Phonebook" and select "Add to Phonebook" on the Function menu screen. If the Scanned result screen contains a phone number, select the phone number and press ⦿ and select "Add to Phonebook" on the Function menu screen.
- The following operations are available by pressing 📷 [Function] on the Contact selection screen:
  - Select "Search" to find a Contact. →P97
  - Select the order of "View" ▶ "Phone & UIM Card"/"UIM Card"/"Phone Contacts" to select a Contact type (phone or UIM).
  - Select "Cancel" to cancel the operation.

Edit Category/UIM Category

Saving/Editing a Category Name

Category names can be saved/edited/managed for both the FOMA handset phonebook and the UIM phonebook. Up to 10 categories can be saved in each Phonebook.

- The pre-installed "General" cannot be edited or deleted.
- Only the category names and members can be saved/edited on the UIM phonebook.

1 Phonebook list (P98)/Phonebook detail screen (P98) ▶ 📷 [Function] ▶ "Manage Contacts" ▶ "Edit Phone Categories"/"Edit UIM Categories"
