Safety and General Information

This section contains important information on the safe and efficient operation of your mobile device. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Energy

Your mobile device contains a transmitter and receiver. When it is ON, it receives and transmits RF energy. When you communicate with your mobile device, the system handling your call controls the power level at which your mobile device transmits.

Your Motorola mobile device is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Note: The information provided in this document supersedes the general, safety information in user's guides published prior to April 2008.

Operational Precautions

For optimal mobile device performance and to be sure that human exposure to RF energy does not exceed the guidelines set forth in the relevant standards, always follow these instructions and precautions.

External Antenna Care

If your mobile device has an external antenna, use only a Motorola-supplied or approved replacement antenna. Use of unauthorized antennas, modifications, or attachments could damage the mobile device and/or may result in your device not complying with local regulatory requirements in your country. DO NOT hold the external antenna when the mobile device is IN USE. Holding the external antenna affects call quality and may cause the mobile device to operate at a higher power level than needed.

Product Operation

When placing or receiving a phone call, hold your mobile device just like you would a landline phone.

If you wear the mobile device on your body, always place the mobile device in a Motorola-supplied or approved clip, holder, holster, case, or body harness. If you do not use a body-worn accessory supplied or approved by Motorola, keep the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body when transmitting.

When using any data feature of the mobile device, with or without an accessory cable, position the mobile device and its antenna at least 2.5 centimeters (1 inch) from your body.

Using accessories not supplied or approved by Motorola may cause your mobile device to exceed RF energy exposure guidelines. For a list of Motorola-supplied or approved accessories, visit our Web site at: www.motorola.com.

RF Energy Interference/Compatibility

Nearly every electronic device is subject to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your mobile device may cause interference with other devices.

Follow Instructions to Avoid

Interference Problems

Turn off your mobile device in any location where posted notices instruct you to do so. These locations include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight.

Pacemakers

If you have a pacemaker, consult your physician before using this device.

Persons with pacemakers should observe the following

precautions:

- ALWAYS keep the mobile device more than 20 centimeters (8 inches) from your pacemaker when the mobile device is turned ON.
- DO NOT carry the mobile device in the breast pocket.
- Use the ear opposite the pacemaker to minimize the potential for interference.
- Turn OFF the mobile device immediately if you have any reason to suspect that interference is taking place.

Hearing Aids

Some mobile devices may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer or physician to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult your physician or the manufacturer of your device to determine if it is adequately shielded from RF energy.

Driving Precautions

Check the laws and regulations on the use of mobile devices in the area where you drive. Always obey them.

When using your mobile device while driving, please:

- Give full attention to driving and to the road. Using a mobile device may be distracting. Discontinue a call if you can't concentrate on driving.
- Use handsfree operation, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.

Responsible driving practices can be found in the "Smart Practices While Driving" section at the end of this guide and/or at the Motorola Web site: www.motorola.com/callsmart.

Operational Warnings

obey all posted signs when using mobile devices in public areas,

such as health care facilities or blasting areas.

Automobile Air Bags

Do not place a mobile device in the air bag deployment area.

Potentially Explosive Atmospheres

Areas with potentially explosive atmospheres are often but not always posted, and can include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, or areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

When you are in such an area, turn off your mobile device, and do not remove, install, or charge batteries. In such areas, sparks can occur and cause an explosion or fire.

Damaged Products

If your mobile device or battery has been submerged in water, punctured, or subjected to a severe fall, do not use it until you take it to a Motorola Authorized Service Center. Do not attempt to dry it with an external heat source, such as a microwave oven.

Batteries and Chargers

If jewelry, keys, beaded chains, or other conductive materials touch exposed battery terminals, this could complete an electrical circuit (short circuit), become very hot, and could cause damage or injury. Be careful when handling a charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects. **Use only Motorola Original batteries and chargers.**

Caution: To avoid risk of personal injury, do not dispose of your battery in a fire.

Your battery, charger, or mobile device may contain symbols, defined as follows:

Symbol	Definition
	Important safety information follows.
	Do not dispose of your battery or mobile device in a fire.
	Your battery or mobile device may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.
	Do not throw your battery or mobile device in the trash.
	Your mobile device contains an internal lithium ion battery.
	Do not let your battery, charger, or mobile device get wet.
	Listening at full volume to music or voice through a headset may damage your hearing.

Choking Hazards

Your mobile device or its accessories may include detachable parts, which may present a choking hazard to small children. Keep your mobile device and its accessories away from small children.

Glass Parts

Some parts of your mobile device may be made of glass. This glass could break if the product is dropped on a hard surface or

receives a substantial impact. If glass breaks, do not touch or attempt to remove. Stop using your mobile device until the glass is replaced by a qualified service center.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when playing video games. These may occur even if a person has never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your physician before playing video games or enabling a flashing-lights feature (if available) on your mobile device.

Discontinue use and consult a physician if any of the following symptoms occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation. It is always a good idea to hold the screen away from your eyes, leave the lights on in the room, take a 15-minute break every hour, and stop use if you are very tired.

Caution About High Volume Usage

Listening at full volume to music or voice through a headset may damage your hearing.

Repetitive Motion

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. If you continue to have discomfort during or after such use, stop use and see a physician.

FCC Notice To Users

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(3).

If your mobile device or accessory has a USB connector, or is otherwise considered a computer peripheral device whereby it can be connected to a computer for purposes of transferring data, then it is considered a Class B device and the following statement applies:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions,

may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Use and Care

To care for your Motorola phone, please keep it away from:

liquids of any kind

Don't expose your phone to water, rain, extreme humidity, sweat, or other moisture.

the ground

Don't drop your phone.

extreme heat or cold

Avoid temperatures below -10°C/14°F or above 45°C/113°F.

microwaves

Don't try to dry your phone in a microwave oven.

dust and dirt

Don't expose your phone to dust, dirt, sand, food, or other inappropriate materials.

cleaning solutions

To clean your phone, use only a dry soft cloth. Don't use alcohol or other cleaning solutions.

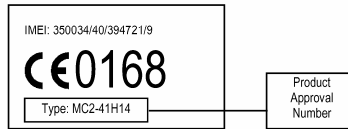

European Union Directives Conformance Statement

European Union Directives Conformance Statement

Hereby, Motorola declares that this product is in compliance with

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant EU Directives

The above gives an example of a typical Product Approval Number.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at www.motorola.com/rtte - to find your DoC, enter the Product Approval Number from your product's label in the "Search" bar on the Web site.

The above gives an example of a typical Product Approval Number. You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (to R&TTE Directive) at www.motorola.com/rtte. To find your DoC, enter the product Approval Number from your product's label in the "Search" bar on the Web site.

Caring for the Environment by Recycling

This symbol on a Motorola product means the product should not be disposed of with household waste.

Disposal of your Mobile Telephone and Accessories

Please do not dispose of mobile telephones or electrical accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems have been set up to handle waste electrical and electronic items. Please contact your regional authorities for more details. If no suitable scheme exists, you may return unwanted mobile telephones and electrical accessories to any Motorola Approved Service Centre in your region.

Essentials

About this guide

This guide describes the basic features of your Motorola wireless phone.

Symbol	Definition
	This means a feature is network, SIM card, or subscription dependent and may not be available in all areas. Contact your service provider for more information.
	This means a feature requires an optional accessory.

SIM card

Your *Subscriber Identity Module* (SIM) card contains personal information like your phone number and contacts list.

Caution: Don't bend or scratch your SIM card. Keep it away from static electricity, water, and dirt. Turn off your phone and remove the battery before you install or remove the SIM card.

1 Press the bottom of the battery door and slide it down to remove the door.

2 Hold the SIM card with the notch in the lower left corner and the gold plate facing down. Slide the SIM card under the metal tabs and into the card slot.

Battery

Battery installation

Caution: Always turn off your phone before you remove the battery.

1 Slide the battery door down and lift it off of the phone.

2 Insert the battery under the tab at the top of the battery compartment. Push the battery up under the tab and lower it into the battery compartment.

3 Slide the battery down toward the bottom of the battery compartment to lock it in place.

4 Place the battery door on the phone and slide it up to lock shut.

Battery charging

New batteries are not fully charged. Open the protective cover on your phone's USB port, then plug the battery charger into the phone. Plug the other end into an electrical outlet. Your phone might take several seconds to start charging the battery, and might require several hours to charge fully. The display shows Charge completed when finished.

Tip: Relax, you can't overcharge your battery. It will perform best after you fully charge and discharge it a few times.

Note: You can charge the battery when the phone is off or the battery is completely discharged.

Note: You can charge your battery by connecting a cable from your phone's mini-USB port to a USB port on a computer. Both your phone and the computer must be turned on, and your computer must have the correct software drivers installed. Cables and software drivers are available in Motorola Original data kits, sold separately.

Battery tips

Battery life depends on the network, signal strength, temperature, features, and accessories you use.

- Always use Motorola Original batteries and chargers. The warranty does not cover damage caused by non-Motorola batteries. and/or chargers.

- New batteries or batteries stored for a long time may take more time to charge.
- When charging your battery, keep it near room temperature.
- When storing your battery, keep it uncharged in a cool, dark, dry place.
- Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F). Always take your phone with you when you leave your vehicle.
- It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Contact your local recycling center for proper battery disposal.

Warning: Never dispose of batteries in a fire because they may explode.

Before using your phone, read the battery safety information in the "Safety and General Information" section included in this guide.

Turn it on & off

Caution: On power up, the phone may prompt you to enter your SIM card PIN code to unlock the SIM card. If you enter an incorrect PIN code three times before the correct code, your SIM card is disabled and your display shows SIM blocked. Contact your service provider.

To turn on your phone, press and hold the

Power key. If prompted, enter your SIM card PIN code.

If you don't insert a SIM card, your phone shows Emergency only.

You can turn off the phone's **Airplane Mode** where wireless phone use is prohibited, or when you just want to use the phone's

non-calling features (games, personal

organizer, multimedia player). In standby screen, press OK to enter main menu, press Airplane Mode from Settings to select On or Off.

To turn off your phone, press and hold power key.

Make a call

1 In standby screen, press number keys to enter phone number.

2 Press Voice Call from Options or Send1 key to make a voice call, or press Video Call from Options or Send2 key to make a video call.

3 When you have finished, press End key to end the call.

Tip: 1. In standby screen, press number key and # key to get phone number in corresponding position of SIM card, then press Send1 key or press Voice Call from Options to make a voice call, or press Send2 key or press Video Call from Options to make a video call.

2 In contact list of Phonebook, select one contact, press Send1 key to make a voice call or Send2 key to make a video call.

3. In standby screen, hold down number key 2-9 to make quick dial (need setting).

4. In a list of answered calls, missed calls or dialed calls, press Send1 key to make a voice call or Send2 key to make a video call.

Answer a call

When you receive a call, your phone rings and/or vibrates and shows an incoming call message.

Press Answer or Send key to answer the call, and press Reject to hang up the call.

Tip: You can press the volume keys shortly to mute the ringer before answering the call, or hold down the volume key to hangup the call.

Tip: If you prefer not to answer the call, you can press Reject to hang up on the caller and transmit a busy tone signal to the caller.

Your phone number

To **view** your phone number:

1. In standby screen, press OK key to enter main menu screen.
2. In main menu screen, hold down number 0 key to enter My Number screen.
3. Press Phonebook. In contact list of Phonebook, press Options and then My Number to view own phone number.

To **store** or edit your name and phone number on your SIM card:

1. In standby screen, press OK key to enter main menu screen.
2. In main menu, hold down number 0 key to enter My Number screen; or in contact list of Phonebook, Press My Number from Options to enter my number screen.
3. Press Edit to enter number editor.
4. Enter your phone number and press OK to store the information.

If you don't know your phone number, contact your service provider.

Basics

Indicator bar

In standby screen, you can get status of your mobile from indicator bar.

It includes the following indicators:

- 1 Signal strength** – Vertical bars show the strength of the network connection. You can't make or receive calls when the no signal indicator  shows.
- 2 TD-SCDMA/GPRS** – The indicator T shows when your phone is using a high-speed TD-SCDMA network connection. Alternatively, the indicator G shows when your phone is using a high-speed GPRS network connection.
- 3 Bluetooth** – Shows the status of Bluetooth.
- 4 Battery level** – Vertical bars show the battery charge level. Recharge the battery when your phone shows Low battery.
- 5 Roam** – Shows that you are out of your network coverage.
- 6 Ring style** – Shows the ring style setting.
- 7 Reminder** – Shows reminder icon when you set an alarm, or an alert for a calendar event.
- 8 Message** – Shows new message.

Note: The indicator is up to the status of your mobile.

Navigation key

Press the navigation key up, down, left, or right to scroll to items in the display. When you scroll to an item, press the center key to select it.

Text entry

Multiple text entry methods make it easy for you to enter names, numbers, and messages. The method you select remains active until you select another method.

In text entry, press # key to switch input methods and press * key to

enter symbol input method.

There are following input method in your phone:

- PINYIN input method;
- Stroke input method;
- Number input method;
- English smart initial input method;
- English smart lowercase input method ;
- English capitalization input method;
- English lowercase input method;

PINYIN input method

The icon is as follows:

With this input method, press the number key with the letter and input the spelling letters of Chinese characters. Press left or right key to move focus and then center key to enter candidate area. In candidate area, press left key or right key to move focus left or right, up or down key to go to previous or next page. After move focus to the character you desire, press OK to finish.

Stroke input method

The icon is as follows:

With this input method, you can input the Chinese character according to its stroke on the number 1-9 key.

Number input method

The icon is as follows:

With this input method, you can input number by pressing number 0-9 keys.

English smart initial input method

The icon is as follows:

Press number keys 2-9 to input the corresponding letter. In candidate area, press left key or right key to move focus left/right, or up key or down key to go to previous/next page. Press center key to finish selecting.

English smart lowercase input method

The icon is as follows:

This input method is similar with English smart initial input method. The difference is that all inputted letters are lowercase.

English capitalization input method

The icon is as follows:

This input method is similar with English smart initial input method. The difference is that all inputted letters are capital.

English lowercase input method

The icon is as follows:

This input method is similar with English capitalization input method. The difference is that all inputted letters are lowercase.

Symbol input method

In text entry area, press * key to enter symbol input method.

Press left, right, up, down key to select the symbol you desire and then press center key to confirm.

5-way navigation key

Press the five-way navigation key up, down, left, or right to scroll to and highlight menu items. When you highlight something, press center key to select it.

Unlock keypad

When Auto Key Lock function is enabled, your phone automatically locks the side phone keys after a period of inactivity, to prevent

accidental keypresses (for example, when carrying the phone in a purse or pocket). To unlock the phone keys, press center key and * key one by one to unlock.

Speakerphone

When you activate your phone's handsfree speakerphone, you can talk to the other party without holding the phone to your ear. During a call, press Handfree to turn the handsfree speakerphone on. The handsfree speakerphone remains on until you press Speaker or turn the phone off.

The handsfree speakerphone may be disabled when you connect your phone to a handsfree headset accessory.

Volume key

Press the volume keys to:

- press the volume keys shortly to turn off an incoming call alert or event alert and hold down to reject the call
- change the earpiece or speakerphone volume during a call
- change the speaker volume when playing a song or video clip

Codes & passwords

Your phone's four-digit **unlock code** is originally set to **1234**. The six-digit **security code** is originally set to **000000**. If your service provider didn't change these codes, you should change them. You can also change your **SIM PIN** password.

To change a code or password,

1. In standby screen, press center key to enter main menu;
2. Press Settings.
3. Press Security
4. Press SIM PIN and then PIN1 or PIN2
5. Press Change PIN to change PIN code.

You can also change your **initial** password.

1. In standby screen, press center key to enter main menu;
2. Press Settings.

3. Press Security.
4. Press Change Initial Password.

If you forget your security code, SIM PIN code, PIN2 code, or call barring password, contact your service provider.

Lock & unlock phone

You can lock your phone to keep others from using it. To lock or unlock your phone, you need the speaker verification passphrase or four-digit unlock code.

1. In standby screen, press center key to enter main menu;
2. Press Settings.
3. Press Security.
4. Press Phone lock.
5. Press Activate to enable or disable the phone lock. Press Change Password to change the phone lock password.

Tip: Your phone's unlock code is originally set to 1234.

Note: You can make emergency calls on a locked phone.

Share information

You can share information with another phone, PC, or hand-held device. You can share phonebook contacts, calendar events, notepad, voice records, pictures, photos, and sound files by sending or receiving the data through a Bluetooth wireless connection, or in an MMS.

Send data

- 1** Locate the data you want to share (such as contact details, or a list of files in Multimedia).
- 2** Press Options and then Send MMS or Send via Bluetooth to send the data via MMS or Bluetooth.
- 3** Complete the setup procedure for the transfer method you selected.
- 4** Press OK key to send the data via Bluetooth, or press Send key to send the data by MMS.

Receive data

The sending device must establish a transmission link with your phone through a Bluetooth or MMS connection. If necessary, turn on Bluetooth power on your phone to let the other device establish a wireless link.

Your phone alerts you when it receives a data transfer request from the other device.

Customize

Profiles

You can quickly change your phone's ring alert profile to match your activity, environment, or personal requirements. Each profile uses a different set of sounds or vibrations for incoming calls and other events. The Silent profile silences your phone until you set another profile. Here are the profiles you can choose:

Loud;

Soft;

Vibrate;

Vibe & Ring;

Vibe Then Ring

Silent

The profile indicator shows in the indicator bar of the standby screen.

Set the ring alert profile

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Ring Styles
4. Move up/down key to select the profile and press center key to enable it.

Edit a ring alert profile

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Ring Styles
4. Move up/down key to select the profile and press Edit to adjust alert settings to personalize the profile. You can change the alerts used to notify you of incoming calls and messages, info Svcs, datebook and anniversary, and adjust alert volume, and ring volume.

Home screen

You can set home keys and layout:

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Personalize
4. Press Home Screen
5. Press Icons to show or hide icon; press Layout to adjust the layout

Main menu

Set the show style of main menu.

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Personalize
4. Press Main Menu and then View to set whether to display the main menu by icon or list.

Themes

Set the theme of mobile.

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Personalize
4. Press Themes and select the theme you like.

Note: This feature changes the look and feel of the phone's user interface.

Wallpaper

Set a photo or picture as a wallpaper (background) image in your phone's display.

1. In standby screen, press center key to enter main menu.
2. Press Settings
3. Press Personalize
4. Press Wallpaper and select the picture you like. Press center key to preview and then press Set to set it as wallpaper.

Set time & date

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Time&Date to set time, time format and date.

Auto key lock

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Auto Key Lock to enable or disable this function.

Backlight time

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Backlight Time to adjust backlight time.

Note: Your phone's display is visible only when the display backlight is on, or when the display is viewed in direct sunlight. To extend battery life, the backlight turns off automatically when no activity is detected for a period of time. The backlight turns back on when you tap the screen or press any key.

Language

Set the language.

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Language to set the language.

Master reset

Reset all default phone settings **except** for the lifetime timer:

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Master Reset.

You need to input correct security code.

Master clear

Master clear **erases all information you have entered** (including phonebook and calendar entries) **and content you have downloaded** (including photos and sounds) stored in your phone's memory. After you erase the information, you can't recover it. Clear all settings and entries you made **except** SIM card information, erase downloaded pictures and sound files, and reset all options **except** for the lifetime timer:

- 1 In standby screen, press center key to enter main menu.
 - 2 Press Settings
 - 3 Press Initial Setup and then Master Clear.
- You need to input correct security code.

Airplane mode

After airplane mode is enabled, you just want to use the phone's non-calling features (games, personal organizer, multimedia player).

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Initial Setup and then Airplane Mode to enable or disable the mode.

Lock application

Protect the application you desire.

- 1 In standby screen, press center key to enter main menu.
- 2 Press Settings
- 3 Press Security and then Lock Application to enable/disable the function and set the application you want to protect.

Network settings

View and set the network settings.

1. In standby screen, press center key to enter main menu screen.

2. Press Settings and then Network.
3. Press Operator Selection to select the operator by auto or manual or set preferred network; press Network Mode to make corresponding setting; press Connection Settings to set the connection profile.

1. In standby screen, press centerkey to enter main menu and then press Settings.
2. Press Open Source to learn information about it.

Calls

Redial

With this function, if you dial a call and hear a busy signal and you see call failed, number busy, the mobile will automatically redial the number.

To set redial function:

1. In standby screen, press center key to enter main menu screen.
2. Press Settings and then In-Call-Setup.
3. Press Auto Redial to enable or disable this function.

Cancel incoming call

While the phone is ringing or vibrating, press Reject to cancel the incoming call.

Depending on your phone settings and/or service subscription, the call may be forwarded to another number, or the caller may hear a busy signal.

Close incoming call message

If there is an incoming call message, hold down volume keys to close the message.

Adjust volume during call

During the call, press the volume keys to adjust the volume.

Hold or mute a call

To put all active calls on hold, press Hold from Options. Press Active to resume the call.

To turn off your phone's microphone during a call, press Mute from Options. Press Unmute to resume the call.

Emergency calls

Your service provider programs one or more emergency phone numbers, such as 911 or 112, that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.

Note: Emergency numbers vary by country.

Your phone's preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

1. In standby screen, press number key to enter phone number.
2. Press Send key to make the call.

International calls

In standby screen, hold down 0 key to input +. Then, press the keypad keys to dial the country code and phone number.

Dial extension number directly

1. In standby screen, press number key to open dial pad.
2. Hold * key to enter P at the cursor location.
3. Enter the extension number.
4. Press Send1key or Voice Call from Options to make a voice call; press Send2 key or Video Call from Options to make a video call.

Your phone dials the phone number, waits for the call to connect, then dials the remaining digits.

Dial extension number during a call

1. Press number key to enter extension number.
2. Press Back to the in-call screen.

Recent calls

Your phone keeps lists of answered, missed and dialed calls. The most recent calls are listed first. The oldest calls are replaced by new calls.

Shortcut: In standby screen, press the send1 or send2 key to go to the recent call list. Press the five-way navigation key to scroll to a number, then press Send1 or Send2 key to call it.

To **dial** a number in the recent calls list:

1. In standby screen, press center key to enter main menu screen.
2. Press Call History.
3. Press Answered Calls, Missed Calls, or Dialed Calls to select a call list.
4. Press an entry.
5. Press Send1 key to make a voice call and press Send2 key to make a video call.
6. Press center key to view detail like time, date and duration.
7. Press Options to open the menu as follows:

Options	Definition
Go To	Switch between missed, dialed and answered calls.
Store	Stored the number to phonebook contact.
Send SMS	Open a new SMS with the number in the To field.
Send MMS	Open a new MMS with the number in the To field.
Voice Call	Make a voice call to the entry.

Video Call	Make a video call to the entry.
IP Dial	Make an IP call to the entry.
Delete	Delete the entry.
Delete All	Delete all entries.

Turbo dial

You can store up to nine phone numbers in the turbo dial list, then dial the numbers by holding a single keypad number key.

To **set up** the turbo dial numbers list:

1. In standby screen, press center key to enter main menu screen.
2. Press Settings and then Initial Setup.
3. Press Speed Dial to open the turbo dial list. Press 5-way navigation to select one number and then center key to enter number editor. After enter the number, press OK to finish bonding. Press Delete to cancel bonding.

Call waiting

To set the call waiting:

1. In standby screen, press center key to enter main menu screen.
2. Press Settings and then In-Call-Setup.
3. Press Call Waiting to enable or disable the function.

IP code

To set IP code:

1. In standby screen, press center key to enter main menu screen.
4. Press Settings and then Initial Setup.

5. Press IP Code to open IP code editor. After enter the number, press OK to finish.

Dial new call during the call

During the call, you can make a new call:

1. Press number key to enter number; press New Call from Options and enter phone number.
2. Press OK to dial the call. The first call will be on hold.

Conference call

During the call, press number key to enter phone number and press Send1 key to make a new call. When the call connects, press Conference to link these two calls.

Repeat to add additional parties to the call.

Record a voice call

Note: Recording of phone calls is subject to varying national laws regarding privacy and recording of phone conversations. Always obey the laws and regulations on the use of this feature.

You can record a voice call as a voice record.

During a voice call:

1. Press Record from Options to start recording.
2. Press Stop Recording from Options to stop recording the call and store the voice record.

The recording stops automatically if the call ends, holds or you reach your memory limit.

To view the voice record:

1. In standby screen, press center key to enter main menu.
2. Press Multimedia and then Ring Tone.
3. Press Sounds and then Voice Memo.

Video calls

If you call someone who has a 3G video phone, you can see each other while you talk. If your phone is roaming on a non-3G network, video calls will not work.

Make a video call

1 Enter a phone number, then press Send2 key to make the call. During the call, press Options to carry out function as follows: Brightness, Zoom, Camera On/Off, Camera Switch, Screen Mode, Mute, Applications.

When there is an incoming video call message, press Send1 key to change the video call to voice call and press Send2 key to answer the video call.

Video conference

You can use the handset to make video and voice call of multi-party. You can dial specific number to join video conference. During the conference, you can adjust brightness, zoom and so on.

Call forwarding

Set up or cancel call forwarding:

1. In standby screen, press center key to enter main menu screen.
2. Press Settings and then Call Forward.
3. Press Voice Calls to setup call forwarding of voice call.
4. Press Video Call to setup forwarding of video call.
5. Press Cancel All to cancel all call forwarding.
6. Press Forward Status to get information of forward status.

Caller ID

Calling line identification (caller ID) shows the phone number for an incoming call in your phone's display.

To show or **hide your phone number** for the calls that you make:

1. In standby screen, press center key to enter main menu screen.
2. Press Settings and then In-Call-Setup.
3. Press My Caller ID to make corresponding setting.

Call barring

Restrict outgoing or incoming calls:

1. In standby screen, press center key to enter main menu.
2. Press Settings and then Security.
3. Press Call Barring to set up incoming voice call, incoming video calls, outgoing voice calls, outgoing video calls, cancel voice call barring, cancel video call barring and modify password.

Fixed dial

When you turn on fixed dialing, you can call only numbers stored in the fixed dial list.

Turn fixed dialing on or off:

1. In standby screen, press center key to enter main menu.
2. Press Settings and then Security.
3. Press Fixed Dial to enable or disable it.

Call times & costs

The amount of network connection time you track on your resettable timer may not equal the amount of time for which you are billed by your service provider. For **billing information, contact your service provider.**

1. In standby screen, press center key to enter main menu.
2. Press Call History and then Call Times to view call time of last call, dialed call, received call and total time. Press Clear to reset the timer.

Use handsfree device

Note: The use of wireless phones while driving may cause distraction. Discontinue a call if you can't concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

Auto answer

When the handset connects to earphone, handsfree device or other external device, you can set the handset to answer the call in few seconds.

1. In standby screen, press center key to enter main menu.
2. Press Settings and then Car Settings.
3. Press Auto answer to enable or disable this function.

Voice mail

Your network stores the voicemail messages you receive. To listen to your messages, call your voicemail number.

Note: Your service provider may include additional information about using this feature.

To check voicemail messages:

1. In standby screen, press center key to enter main menu.
2. Press Messages and then Voice Mail.

Shortcuts: In standby screen, hold number 1 key to enter voice mail screen.

Phonebook

You can store a contact list of names, phone numbers, and email addresses in your phone's electronic address book.

Contact list

Shortcut: In standby screen, press down key to enter contact list.

1. In standby screen, press center key to enter main menu.

The timer counts down from several seconds, and then takes a photo.

Video camera

Shortcut: In standby screen, press the camera key to activate the

camera. Press Switch to Video Camera to enter video camera. Press the camera key again to start recording.

1. In standby screen, press center key to enter main menu.
2. Press Multimedia and then Video Camera. Press center key or camera key to start recording and press center key or camera key again to stop recording.

Voice recorder

You can record personal messages and phone calls on your phone.

Note: Recording of phone calls is subject to varying State and Federal laws regarding privacy and recording of phone conversations.

Always obey the laws and regulations on the use of this feature.

Make a recording

1. In standby screen, press center key to enter main menu.
2. Press Multimedia and then Voice Recorder.
3. Press center key or REC from Options to start recording.
4. Press Stop or center key to stop recording. Then press center key to save the voice record. Press Options to do as follows: press Preview to listen to the record; press Save to store the record.

Play a recording

1. In standby screen, press center key to enter main menu.
2. Press Multimedia and then Voice Recorder.
3. Press Options and then Recorder List.
4. In recorder list, press one record to play it. Press option to play or rename the record.

Extra applications

Sync between and mobile

You can use a USB cable connection to transfer and synchronize data between your phone and a PC.

Note: You may use Sync to synchronize contacts, schedule, SMS and other data between your phone and PC. Not all devices are compatible with a cable connection. Check your PC to determine the type of cable you need. If use sync function, you should activate modem mode as follows:

1. In standby screen, press center key to enter main menu.
2. Press Connect and then USB Mode to enable or disable Modem Mode.

Modem

You can use your phone as a modem, to connect your PC to the Internet or transfer data to/from the PC. To use the phone as a modem, you must connect it to the PC using a Bluetooth wireless connection or USB cable connection.

Bluetooth™ wireless

Your phone supports Bluetooth wireless *pairing* (also called *linking* or *bonding*).

You can pair your phone with a Bluetooth headset to make handsfree calls, or pair your phone with a phone or computer that supports Bluetooth connections to exchange files.

Effective distance of Bluetooth is ten meters.

Note: The use of wireless phones while driving may cause distraction. Discontinue a call if you can't concentrate on driving.

Additionally, the use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

For maximum Bluetooth security, you should always pair Bluetooth devices in a safe, private environment.

Bluetooth visibility

1. In standby screen, enter into main menu by pressing center key and then select Bluetooth in Connection application.
2. Press Visibility to turn on or off visibility of phone. If you forget to disable the visibility, your phone will close the visibility in 3 minutes.

Device manage

If your phone has paired with other Bluetooth, it will display device list.

1. Press center key in standby screen to enter into main menu.
 2. Press Connection to select Bluetooth. If necessary, turn on Bluetooth.
 3. Press My Devices to view device list.
 4. Press Add to search new device if it is not paired with other device; Press Search More in Option to search new device if it is connected with device
 5. Your phone shows a list of device(s) located within range of the phone.
 6. User can select a device to pair.
- To connect to a device, select it from the list and press Pair. The device may request permission to bond with your phone. Enter the correct PIN code to create a secure connection with the device. Paired Bluetooth must be stay in standby, BT Data Exchange and Modem screen.

Setup

1. Press center key in standby screen to enter into main menu.
2. Press Connection to select Bluetooth.
3. Press Setup to launcher related setup.
4. Press Activation on/off to open and close Bluetooth function.
5. Press My Phone's Info to set Phone's Name, Phone's Address and Bluetooth Services.

BT Data Exchange

1. Press center key in standby screen to enter into main menu.
2. Press Connection to select Bluetooth.
3. Press BT Data Exchange to enter into data exchange screen.

Exchange files with another device

You can exchange multimedia files and electronic file by Bluetooth wireless connection with other devices (Phone, Computer and so on). At this time, your phone must be stayed in BT data exchange screen.

Send files to another device

1. Press file you want and then press Options to select Send via Bluetooth.
2. Display device list.
3. Press device name that you want in list, or you can search new device by pressing Search More in Options.
4. Press center key to send the file after pair successfully. If necessary, input correct password to create secure connection with device.

Receive files from another device

When receiving request that ask to transfer files from other device, the phone will prompt. Press center key to receive files. If necessary, input correct password to create secure connection with device.

Connect Bluetooth stereo earphone

1.  First make Bluetooth stereo earphone stay in pair mode when you want to use Bluetooth stereo earphone and use search device function to find Bluetooth stereo earphone.
2. Press Bluetooth stereo earphone name you want in device list and then press Pair to bond with Bluetooth stereo earphone. At this time, your phone will auto bond using default password.

Tips: User can view details of the earphone by pressing name of Bluetooth stereo earphone

3. After bonding, it will pop up menu, press center key to connect the earphone. .

Note: Please use description about detailed operation step.

Service and repairs

If you have questions or need assistance, we're here to help.

Go to

www.motorola.com/consumer/support, where you can select from a number of customer care options. You can also contact the Motorola Customer Support Center at 1-800-331-6456 (United States), 1-888-390-6456 (TTY/TDD United States for hearing impaired), or 1-800-461-4575 (Canada).

Specific Absorption Rate Data

This model wireless phone meets the government's requirements for exposure to radio waves.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government and by the Canadian regulatory authorities. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age or health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC and by the Canadian regulatory authorities is 1.6 W/kg.¹ Tests for SAR are conducted using standard operating positions accepted by the FCC and by Industry Canada with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR

level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station, the lower the power output.

Before a phone model is available for sale to the public in the U.S. and Canada, it must be tested and certified to the FCC and Industry Canada that it does not exceed the limit established by each government for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) reported to the FCC and available for review by Industry Canada. The highest SAR value for this model phone when tested for use at the ear is **1.26 W/kg**, and when worn on the body, as described in this user guide, is **0.41 W/kg**. (Body-worn measurements differ among phone models, depending upon available accessories and regulatory requirements).²

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

Information from the World Health Organization

Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If you are concerned, you may want to limit your own or your children's RF exposure by limiting the length of calls or by using handsfree devices to keep mobile phones away from your head and body.
