

INSTRUCTION MANUALS

The instruction and service manuals for this base radio are not available at this time. Upon request, manuals will be sent to the commission and/or telecommunication certification body (TCB) as soon as they become available. All of the descriptions and schematics in this filing are up to date and will be included in the instruction and/or service manuals.

TUNE-UP PROCEDURE

There is no field tune-up procedure. All adjustments are software controlled and are pre-set at the factory. Certain station operating parameters can be changed via radio service software (RSS) within predetermined limits. Examples include transmit / receiver operating frequencies and power level.
