**Manual**

This keyless entry system operates on a radio frequency subject to Federal Communication Commission (FCC) rules and Industry Canada rules.
This device complies with Part 15 of the FCC Rules.  Operation is subject to the following two conditions.
   (1)  This device may not cause harmful interference, and
   (2)  This device must accept any interference received, including interference that may cause undesired operation of the device.

Complies with RSS-210 of Canada.

FCC Warning:  Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Manual Page 2.

The Owner's manual is not available at the time of certification.

The transmitters will be available with buttons in seven positions.  Basic functions include Lock, Unlock and Panic.  Some models may include an Open Trunk, Open Liftgate, and Open Glass.  Some models may also include a Remote Engine Start and Stop button.

Most of these functions can be activated by pressing that particular button momentarily. Other functions may require a double tap of the same button or pressing and holding of a button for duration of approximately two seconds.
Remote start is activated by first pressing the Lock button and then pressing and holding the Remote start button for two seconds.
