Safety Precautions

For correct operation and better performance, please read and abide by:

- Keep your device and accessories out of reach of children or animals in case of being swallowed by mistake.
- Avoid exposing your device in extremely high or low temperature(below 0℃ or above 45℃). Extreme temperature may affect the functions of this product and shorten its service life.
- Do not put it near high magnetic fields or electric fields.
- Do not get it wet. Liquids will make it work abnormally.
- Please classify and discard the waste package, batteries and electronic parts properly.

Technical Specifications

BT standard: V5.0

Transmission distance: 10m

Output power: 3W

Frequency response: 150Hz ~ 20KHz

Speaker specification: φ45mm

Input voltage: DC 5V

Impedance: 4Ω

Battery voltage: DC3.7V

Battery capacity: 400mAh

Charging time: 1~2 hours

FCC Warning

This device complies with Part 15 of the FCC Rules, Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: --Reorient or relocate the receiving antenna. --Increase the separation between the equipment and receiver. -- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. --Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
