

# VL-35K 35 Watt LED Studio Light Kit

## Remote Control Instructions

- ① Main ON Switch
- ② Main OFF Switch
- ③ Brightness+
- ④ Brightness-
- ⑤ ON
- ⑥ OFF
- ⑦ Filter

## Group matching

Step 1: While the socket is in the off position, press the (5) button for 5 seconds. Continue to press while going to Step 2..

Step 2: Switch the lamp socket to the on "ON" position. If the LED bulb flashes, it has been successfully paired with the remote control. Remove finger from the (5) button. The (5) button will now be the "ON" switch for that bulb and the (6) switch will be the "OFF" switch

Step 3: Repeat the above steps with the second LED bulb using the buttons marked "Group 2" in the above illustration.

Step 4: The remote control can also be used to pair up to 2 extra bulbs sold separately.

---

## Unpairing LED bulb

To unpair, repeat the above "Group matching" steps with a paired bulb.

---

## Operation

Step 1: Use button (5) to turn on the paired bulb.

Step 2: After the light has been selected and turned on, use button (3) to brighten and button (4) to dim the bulb.

Step 3: After the light has been turned off using the remote control, the bulbs fan will remain running. Turn the switch on the lamp socket to the "OFF" position to turn the fan off. No cool down time is necessary.

Step 4: To remove the clear dome, screw counterclockwise until the dome separates from the bulb. If you prefer a warmer light, add the orange dome by screwing to the front of the bulb in a clockwise direction until snug. Add the blue dome to add blue special effect.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
