This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Package Content

- A: LED Light Panel Studio
- B: Tent
- C: Power Supply
- D: User Manual
- E: Light Diffuser
- F: 4 Colored Backdrops
- G: Controller

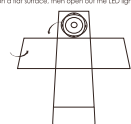

- 01 -

Instructions to Set Up

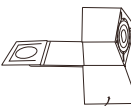

Step 1:
Open the box and make sure all parts are available.

Step 2:
Start by laying the tent on a flat surface, then open out the LED light tent.

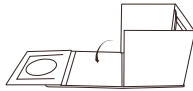

Step 3:
Unfold the panels of the light tent, then attach the Velcro edges together to form a cube.

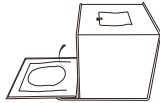

- 02 -

Step 4:
Now fold the first three panels over, to attach it to the bottom panel.

Step 5:
Finally fold the front panel of the tent up, and then attach it to the rest of the light tent using the Velcro edges.

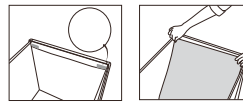

Step 6:
Roll up the flaps covering the front shooting window, and attach it to the Velcro at the top of the LED light tent. You can also shoot from the top of the light tent. Simply open the flap covering the top shooting window.

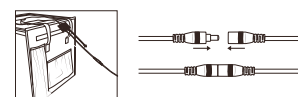

- 03 -

Step 7:
To use one of the four coloured backdrops, open the top of the light tent, and then slide in your backdrop of choice into place. Attach the backdrops to the back of the tent using the Velcro tabs located at the top left and right hand corners of the light tent. Tuck the bottom edge of the backdrop into the pocket located at the front of the tent.

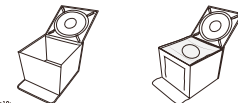

Step 8:
However, when connecting, please place the controller/sensor head outside the shed, do not put it inside in case the sensitivity of the operation is affected.

- 04 -

Step 9:
Also comes with diffusion material to further diffuse light from the LED. To use the diffusion material, open the top of the light tent, and attach the material to the left and right sides, and then close the top again.

Step 10:
Adjustable Brightness: You can adjust brightness gradually and precisely with the dimmer switch, which helps you to take professional pictures and photos of small to large sized objects.

Tip: this controller does not support APP external microphone function (music rhythm) for the time being, it is recommended not to use it!

Step 11:
1. Android mobile phone: directly scan the QR code to automatically identify and play local music.

2. Apple system mobile phone:
① Connect the apple mobile phone with the computer through the data cable, and open the computer's iTunes software (the apple computer comes with, and the PC or Microsoft system needs to download through the apple official website's technical support - Music - Windows version of iTunes);

- 05 -

② Under the menu of file database import play list, select the directory of the downloaded songs and select the songs you want to import;

③ After selecting the music you want to import, click the mobile phone icon in the menu bar to enter the mobile phone menu interface, then click to enter the "music" menu, click "synchronize" in the lower right corner of the menu, wait for the synchronization process to end, and click "finish" in the way, the songs are imported into the mobile phone;

④ After the songs are imported, re open the mobile app, click to enter the music interface, and you can see that the songs just imported have been synchronized to the mobile phone. At this time, you can play the local music normally.

Step 12:
The color of this product is rich, you can set it to any lighting effect you want. Whether it's an SLR or a smart phone, you can take photos with more satisfaction.

Instructions to Take Down

1. Unplug the power cord, disconnect the light panel and power adapter, take out the backdrops and light diffuser.

2. Follow the steps as shown in figures, fold down the tent step by step.

3. Put the adapter, light diffuser and backdrops in the pouches, now you can take your light box everywhere you want to go!
