Installing the SIM cards

Your Subscriber/Universal Identity Module (SIM) card identifies you to the wireless network. Your phone will not work without the SIM card.

To install a SIM card, do the following:

1. Detach your SIM card.
2. Open the battery cover on the back of your phone.
3. Lift the battery up and out of your phone.
4. Align the SIM Cards metal contactors with those of the phone.

Inserting the battery

1. Open the battery cover on the back of your phone.
2. Align the battery's contact points with those of the phone and gently press the battery down into place.
3. Replace the battery cover clicking it back into position.

Charging the battery

1. Connect the charger to your phone, and plug it into a socket.
2. The battery indicator in the corner of the screen will scroll to show you it's charging.
3. When fully charged, the battery indicator will stop scrolling.
4. Disconnect the charger from your mobile, and unplug it.

Inserting the Storage card

1. Remove the back cover.
2. Insert the Micro-SD card into the slot with its gold contacts facing down and push it into its place.

Turning on your phone

Once you've installed your battery, you can turn on your phone and start using it. To turn on your phone Press the POWER button.

Turning off your phone

Unlock your phone if the Lock screen is displayed.

Press and hold the POWER button for a few seconds.
When the Phone options menu appears, tap Power off.

Home

Home screens

Home screens display the status of your phone and provide you with access to applications. By default, the main Home screen is displayed whenever you turn on your phone or press the Home button.

Extended Home screen

There are five Home screens. Tap a blank area on the screen and slide your finger left or right horizontally to view the other Home screens.

You can customize the five Home screens to meet your personal preferences. For example, you can add or remove widgets or applications shortcuts, change the wallpaper and so on.

2. Tap an item from the main menu. The submenu for the item is displayed.

Warning

Specific Absorption Rate (SAR) information SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in

general, the closer you are to a wireless base station

antenna, the lower the power output. Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required

by the FCC. For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1)

This device may not cause harmful interference, and (2)

this device must accept any interference received,

including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by

the party responsible for compliance could void the user's

authority to operate the equipment.

Note: This equipment has been tested and found to

comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning

the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.
