1.3 Status bar

For dual SIM model, status icons referring to either SIM1 or SIM2 will be identified by a color which you have defined.

When a new notification comes, the corresponding icon will appear on the status bar, and it won't disappear, until you have done something with the notification.

If the status bar is full, some icons will be hidden.

Notification panel

Touch and drag down the Status bar to open the notification panel.

Touch and drag up to close it. From the Notification panel, you can open items and other reminders indicated by notification icons or view wireless service information.

1.4 Getting started

1.4.1 Set-up

Removing or installing the back cover

Drag the status bar down to open the Notification

Installing or removing the battery

Please power off your phone before removing the battery. Insert and click the battery into place, then close the phone cover. Unclip the cover, then remove the battery.

Inserting or removing the SIM card

1. You must insert your SIM card to make phone calls. Please power off

your phone and remove battery before inserting or removing the SIM card.

2. To install, place the SIM card with SIM1 and SIM2 chip facing downwards, and then slide it into its slot. Make sure that it is correctly inserted. To remove the card, press and slide it out.

For dual SIM model, while the SIM1 and SIM2 slot can only support a 2G network.

Installing and removing the microSD card

1. Insert the external microSD card into the slot with the gold contact facing down. To remove the external microSD card, gently press and slide it out.

2. Before removing the microSD card, you should ensure the phone is off, to protect it from corruption or damage. In addition, regularly removing or inserting the SD card may cause the phone to restart.

Charging the battery

Connect the battery charger to your phone, then the charge indicator at the center of screen will light. The charging status bar will not float if your battery is extra consumed.

To reduce power consumption and energy waste, when battery is fully charged, disconnect you charger from the plug; switch off Wi-Fi, Bluetooth or background-running applications when not in use; reduce the backlight time, etc.

1.4.2 Power on/off your phone

Power on your phone

Hold down the **Power** key until the phone powers on. It will take some seconds before the screen lights up.

Power off your phone

Hold down the **Power** key from the Home screen until the Phone options appear, select **Power off**, and touch **OK** to confirm.

1.5 Home screen

You can bring all the items (Folder, Widgets, Shortcuts and Wallpaper) you love or use most frequently to your Home screen for quick access. Touch the **Home** key to switch to Home screen.

Home screen is provided in an extended format to allow more space for adding applications, shortcuts etc. Slide the Home screen horizontally left and right to get a complete view of the Home screen. Blue line at the lower left and right of the screen indicate which screen you are viewing.

1.5.1 Using the touchscreen

Touch : To access an application, touch it with your finger.

Touch and Hold: Touch and hold the home screen to access the available options for setting the wallpaper.

Drag :Place your finger on any item to drag it to another location.

Slide/Swipe: Slide the screen to scroll up and down the applications, images, web pages at your convenience.

Flick: Similar to swiping, but flicking makes it move quicker.

Pinch/Spread : Place your fingers of one hand on the screen surface and draw them apart or together to scale an element on the screen.

Rotate: Automatically change the screen orientation from portrait to landscape by turning the phone sideways to have a better view.

1.5.2 Personalize your Home screen

Add

Touch the Main menu icon, touch and hold an application or a widget to activate the Move mode, and drag the item to any Home screen as you prefer.

Reposition

Touch and hold the item to be repositioned to activate the Move mode, drag the item to the desired position and then release. You can move items both on the Home screen and the Favorite tray. Hold the icon on the left or right edge of the screen to drag the item to another Home screen.

Remove

Touch and hold the item to be removed to activate the Move mode, drag the item up to the top of **Remove** icon, and release after the item turns red.

Create folders

To improve the organization of items (shortcuts or applications) on the Home screen and the Favorite tray, you can add them to a folder by stacking one item on top of another. To rename a folder, open it, touch the folder's title bar to input the new name.

Wallpaper customization

Touch and hold an empty area then touch the prompt on the Home screen to customize wallpaper.

1.5.3 Main menu icon

Touch Main menu icon from the Home screen to enter applications list. To return to the Home screen, touch the **Home** key.

Consult recently-used applications : To consult recently-used

applications, you can touch and hold the **Home** key. Touch a thumbnail in the window to open the related application.

1.5.4 Applications and widgets list

The list contains all pre-embedded and newly installed applications and widgets. To access the list, touch WIDGETS tab from the Main menu.

2 Text input

10. Factory data reset

To activate factory data reset:

Touch Main menu icon from the Home screen then select **Settings** > **Backup & reset**.

. Touch **Factory data reset**

Phone reset will erase all of your personal data from internal phone storage, including information about your Email Account, any other accounts, your system and application settings, and any downloaded applications. Resetting the phone does not erase any system software updates you have downloaded or any files on your SD card, such as music or photos. If you reset the phone in this way, you are prompted to re-enter the same kind of information as when you first started Android.

11. For your safety

Read these simple guideline. Not following them may be dangerous or illegal. Read the complete user manual for further information.

	Do not switch your phone on when the use of wireless devices is prohibited or when the wireless device may cause interference or danger.
	Do not use your phone while driving.
	Follow relevant rules or regulations in hospitals and health care facilities. Switch your phone off near medical devices.
	Switch your phone off in aircraft. The radio signal from it may cause interference in signals of the aircraft.
	Switch your phone off near high-precision electronic devices. It may affect the performance of these devices.
	Do not attempt to disassemble your phone or its accessories. Only qualified personnel may service or repair the phone.
	Do not place your phone and its accessories in containers with strong electromagnetic field.
	Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
	Do not put your phone in a high-temperature place or use it in a place with flammable gas such as a petrol pumps.
	Keep your phone and its accessories away from children. Do not allow children to use your phone without guidance.
	Observe any laws or regulations on the use of phone. Respect others' privacy and legal rights when using your phone.

Warning

Specific Absorption Rate (SAR) information SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output. Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for

this product or when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment

generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.
