Message

If your network supports and you have subscribed to messaging services such as the SMS (Short Messaging Services) or MMS (Multimedia Messaging Services), you will be able to send, save and receive messages to and from other compatible mobile phones. The memory capacity of incoming and outgoing messages depends on the SIM memory capacity. The phone memory can store up to 100 SMS messages, while MMS messages capacity depends on the size of MMS messages you saved. If the storage capacity is full, the message icon flashes and you will not be able to receive or save any new messages.
Use the Up/Down navigation keys to scroll through the menu options, the ⌐ key to select an option, the ⌐ key to go back one step.

Write Messages
Select Write Messages from the Messages menu.

-SMS
Select SMS from the Write Messages menu. You will be able to compose text messages. Short press the ✶▣ key to shift between input methods; long press the ✶▣ key to shift between lower and upper case; short press the ✶▣ key to access the symbols table, use the navigation keys to go to the desired symbol, and press the ⌐ key (OK) to insert the symbol. Press the ⌐ key (Options) during or after composing the message will allow you to:
- **Send:** Send the message by entering the recipient number. You will have options to directly send; add another recipient; delete a recipient; edit a number; Send options or save the message to SIM or phone.
- **ABC Mode:** Select letter input.
