Procedure to Install the Unit

No computer software applications or drivers are required to complete installation.

❶ Connect the power cord and power adapter together.

❷ Plug the power adapter into the power connector on the back of the unit.

❸ Plug the power cord into an AC outlet. The unit will turn on.

❹ Plug one end of the Ethernet cable into the Ethernet connector on the back of the unit.

❺ Plug the other end of the Ethernet cable into the Ethernet connector of your computer.

*❻ Plug one end of the phone line into an activated phone line connector on the back of the unit. Phone line activation is dependent upon your service contract.

*❼ Plug the other end of the phone line into the phone line connector of your telephone.

❽ At your computer, open your browser and enter http://mywimax. (with a dot at the end) into the address field and press the Enter key. A wizard will start up to guide you through the installation.

❾ Follow the directions in the wizard to complete the installation. When using the wizard for the first time, use the default value provided by the wizard as the password.
