

## Quick Guide to Using the Nokia 6250 with Carbon Copy 5.0

### SETTING UP YOUR NOKIA 6250 TO WORK WITH CARBON COPY 5.0 AS A FAXMODEM

If you haven't yet installed Carbon Copy 5.0 please do so before continuing and check also that you have the Nokia 6250 installed and that it works.

1. Connect your mobile phone via a cable to your computer and start Carbon Copy 5.0
2. Now go to **Options – Communications** and preferably select the **Nokia 6250 Cable** (Nokia 6250 IrDA can also be selected) as one of your connection types, so that you are able to receive data calls from another computer using Carbon Copy (Figure 1).

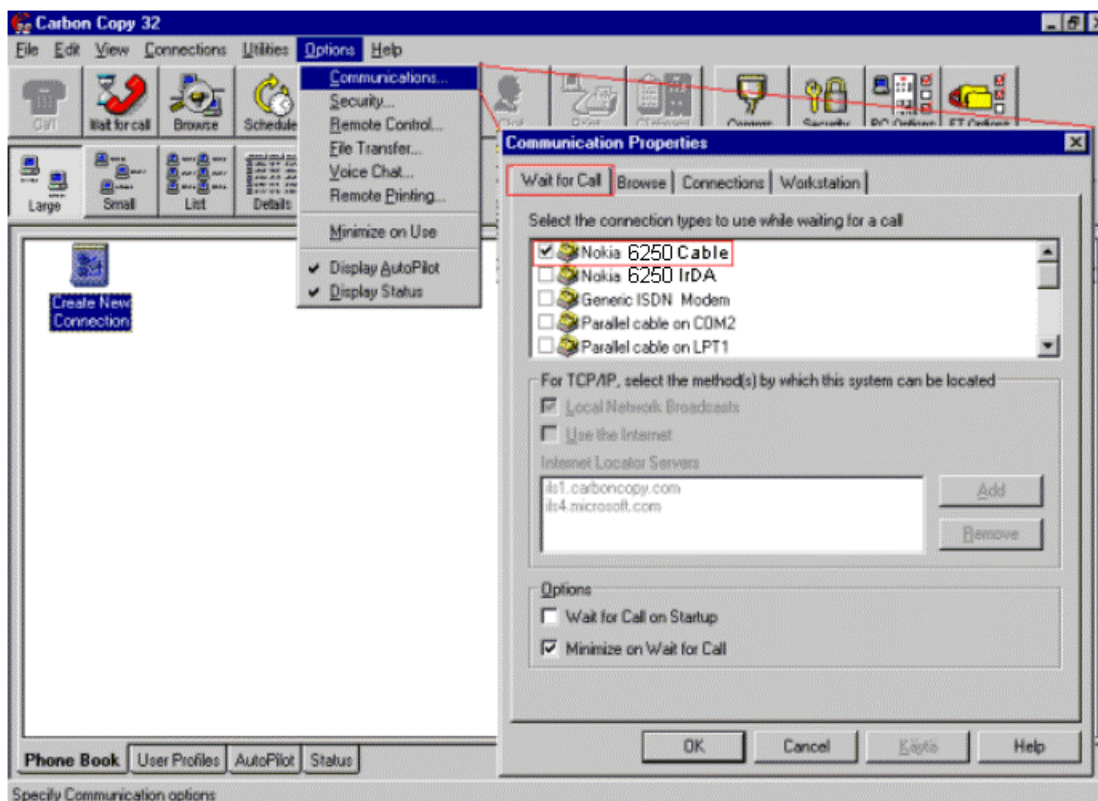

Figure 1. Accessing the program's setup and selecting the appropriate modem.

3. Double-click on **Create New Connection**, click to select the connection type that you will be using and after that click on **Next** (Figure 2).

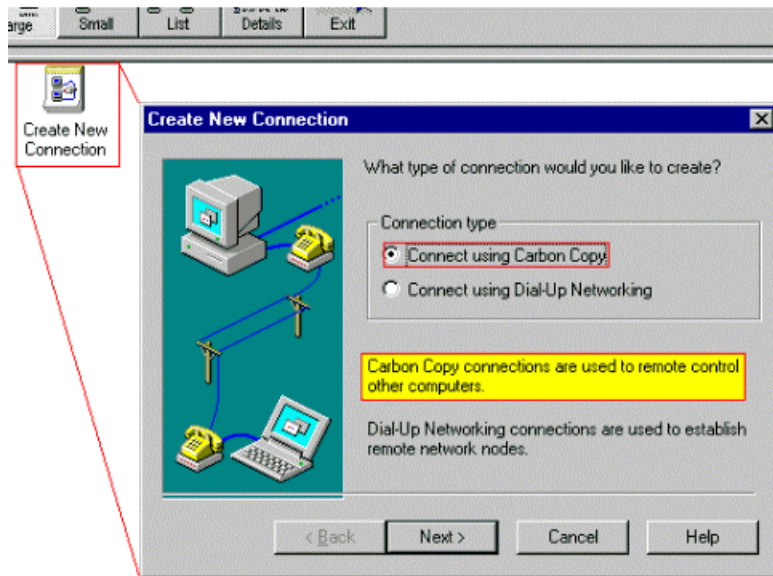

Figure 2. Creating a new connection.

- Carbon Copy will now configure your Nokia phone to work as a faxmodem. Just fill in the required fields and remember to select the correct modem (Figure 3).

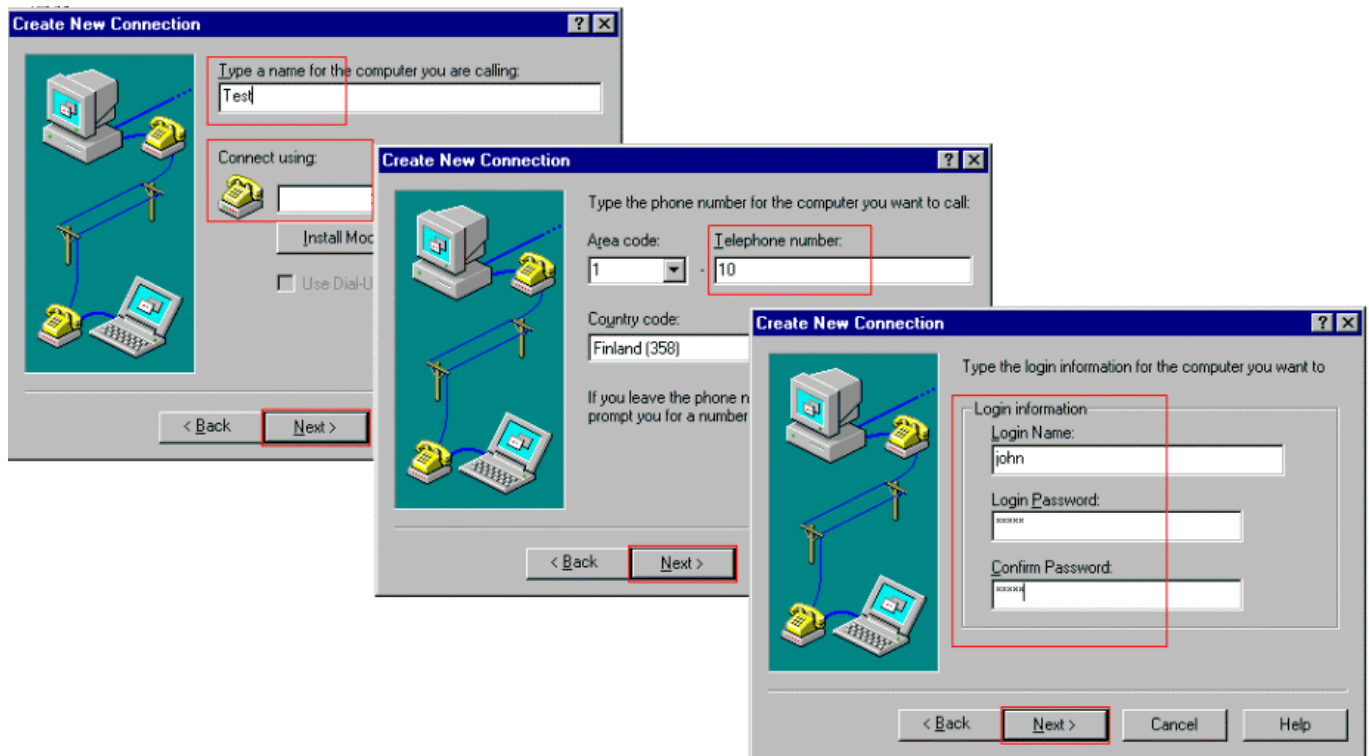

Figure 3. The first three steps towards creating a new connection.

- The final two steps to completing your new connection are as follows: in the first dialog box you are asked to select the utilities to start when a connection to a remote computer is established and in the last one just click **Finish** (Figure 4).

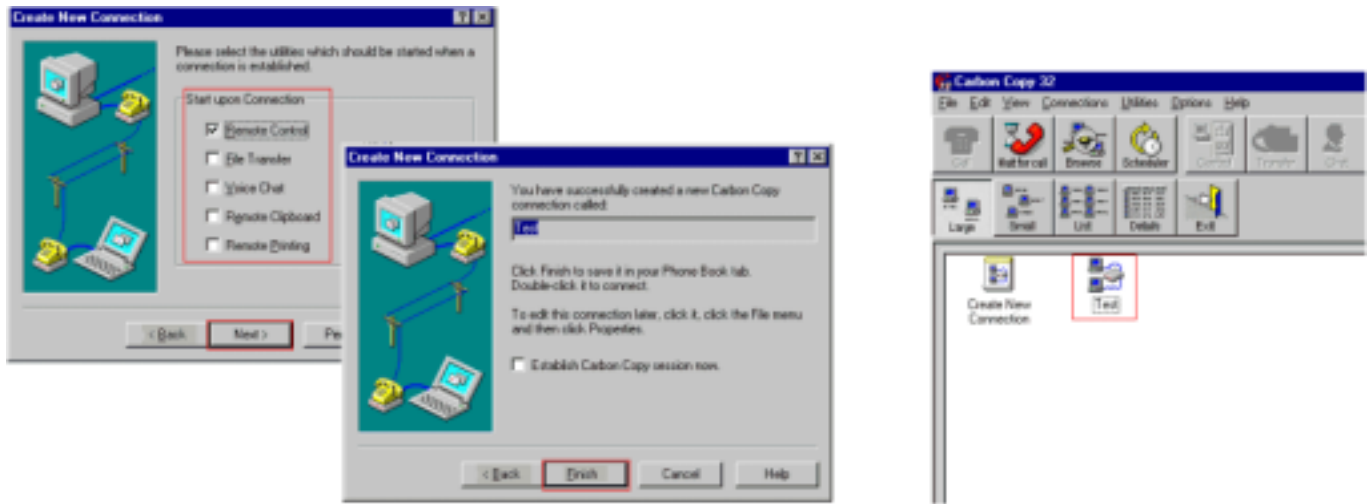

Figure 4. Going through the two last steps to get a new connection ready for use.

- To test your new connection just double-click on its icon and check that the **Login Information** and the **Connection Information** are correct. After you have checked these, you can click **Connect** and you should get a dialogue box similar to that shown in the figure (Figure 5).
