

Quick Guide to Using the Nokia 7110 with Winfax Pro 9

SETTING UP YOUR WINFAX PRO 9 TO SEND AND RECEIVE FAXES WITH THE NOKIA 7110

If you haven't yet installed Winfax Pro 9.0x on your PC, please do so before continuing and also check that you have the Nokia 7110 installed and that it works. If you want to automatically receive faxes you must have your mobile phone connected via a cable to your computer during boot-up because Winfax Pro checks if there is a phone connected and enables automatic receive; otherwise you have to manually pick up incoming fax calls.

1. Connect your Nokia 7110 to your computer using a cable and start Winfax Pro 9.0x.
2. Go to **Tools – Setup – Program Setup** (Figure 1).

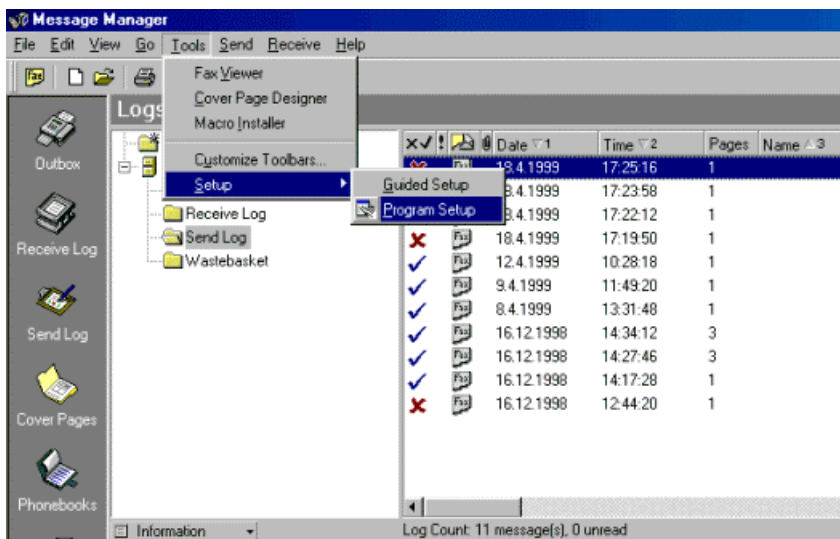

Figure 1. Accessing program setup dialog.

3. Click once on **Modems and Other Fax Devices** and then click the **Properties** button. Select the **Nokia 7110** as your Connection device from the **Connection Device** list by ticking the box on the right (Figure 2).

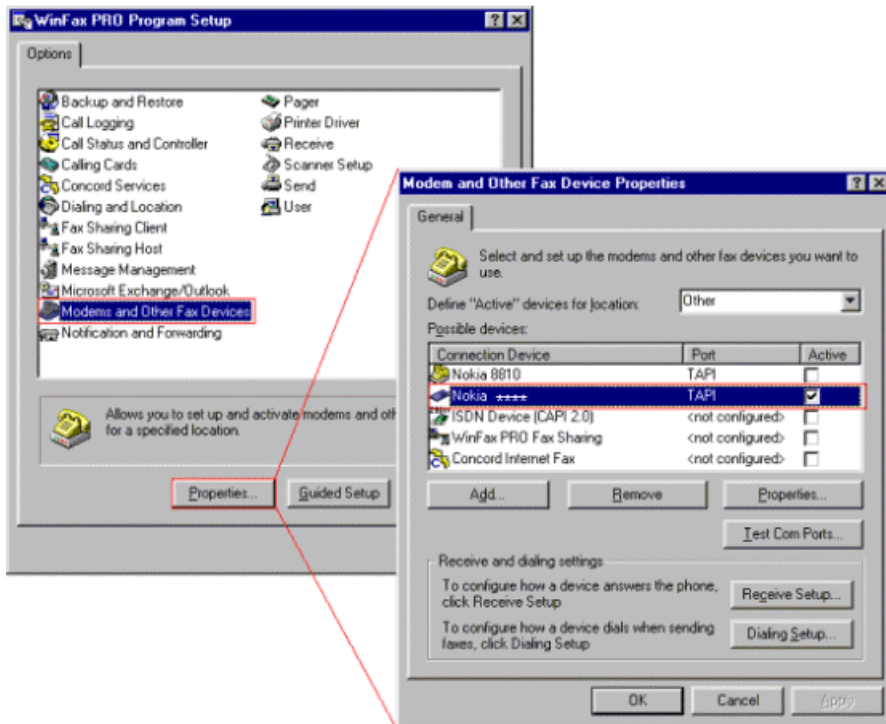

Figure 2. Adding a new modem in Winfax Pro 9.0x.

- Winfax Pro 9.0x will now configure your Nokia 7110 to work as a faxmodem. First click the **Yes** button and then click the **Next** button; now wait until Winfax has tested your modem. After that click the **Next** button (Figure 3).

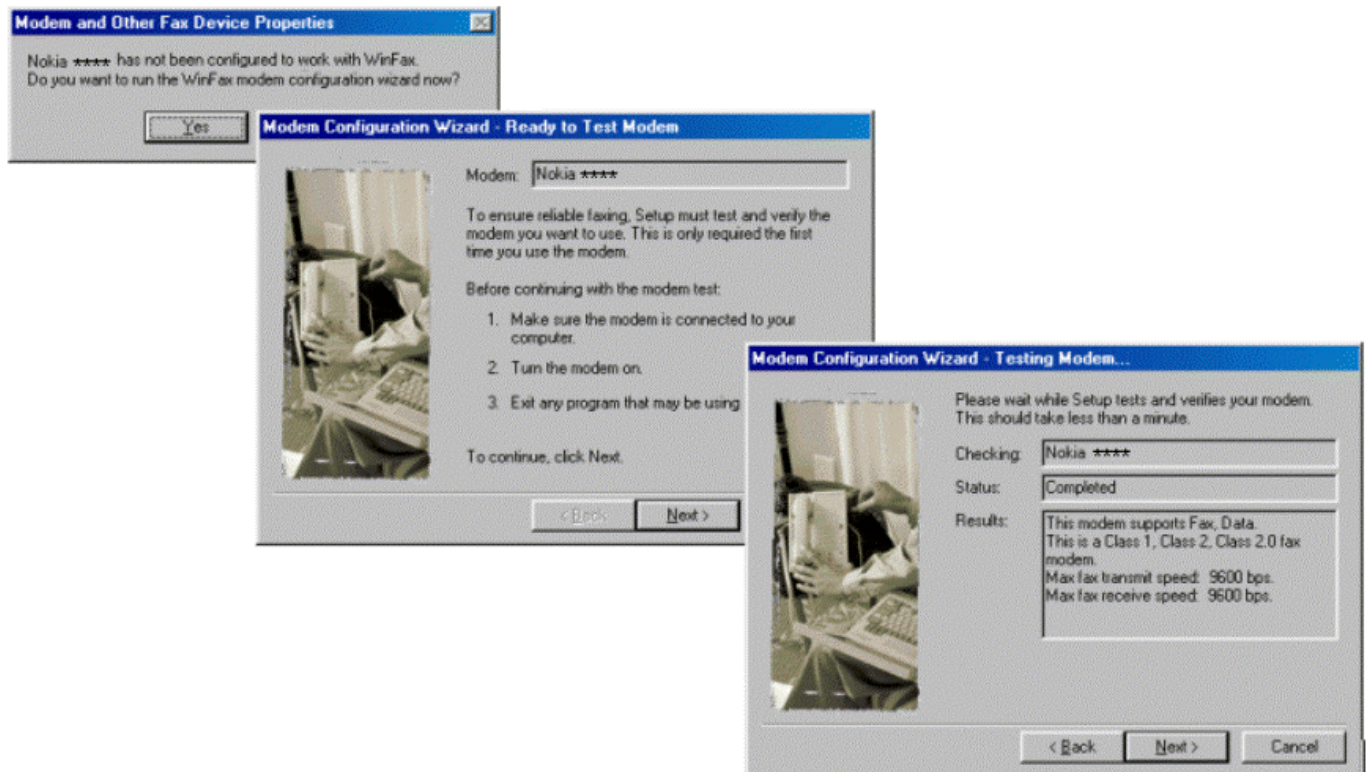

Figure 3. The three steps to configure your modem.

- After you have successfully configured your modem click the **Finish** button. When the program asks you to select the locations for your new modem just accept the default options by clicking the **OK** button (Figure 4).

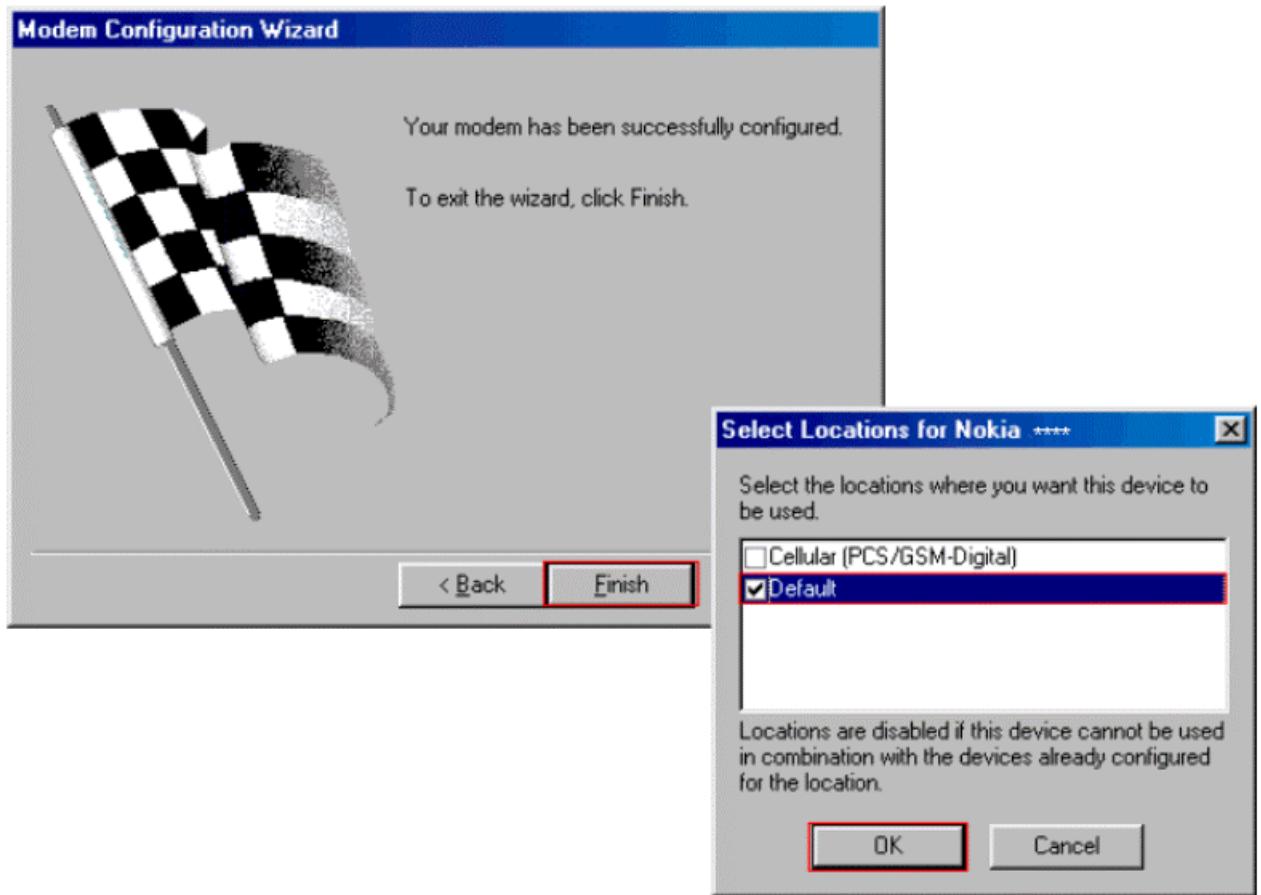

Figure 4. Finishing the modem setup and selecting the locations.

- Click the **Yes** button and check that you have similar settings in the Dialing Properties window as those displayed in the figure below (Figure 5). **Please Note:** it is important to check that in **General – Dialing** the **Detect busy tone** or the **Detect dial tone** has NOT been selected.

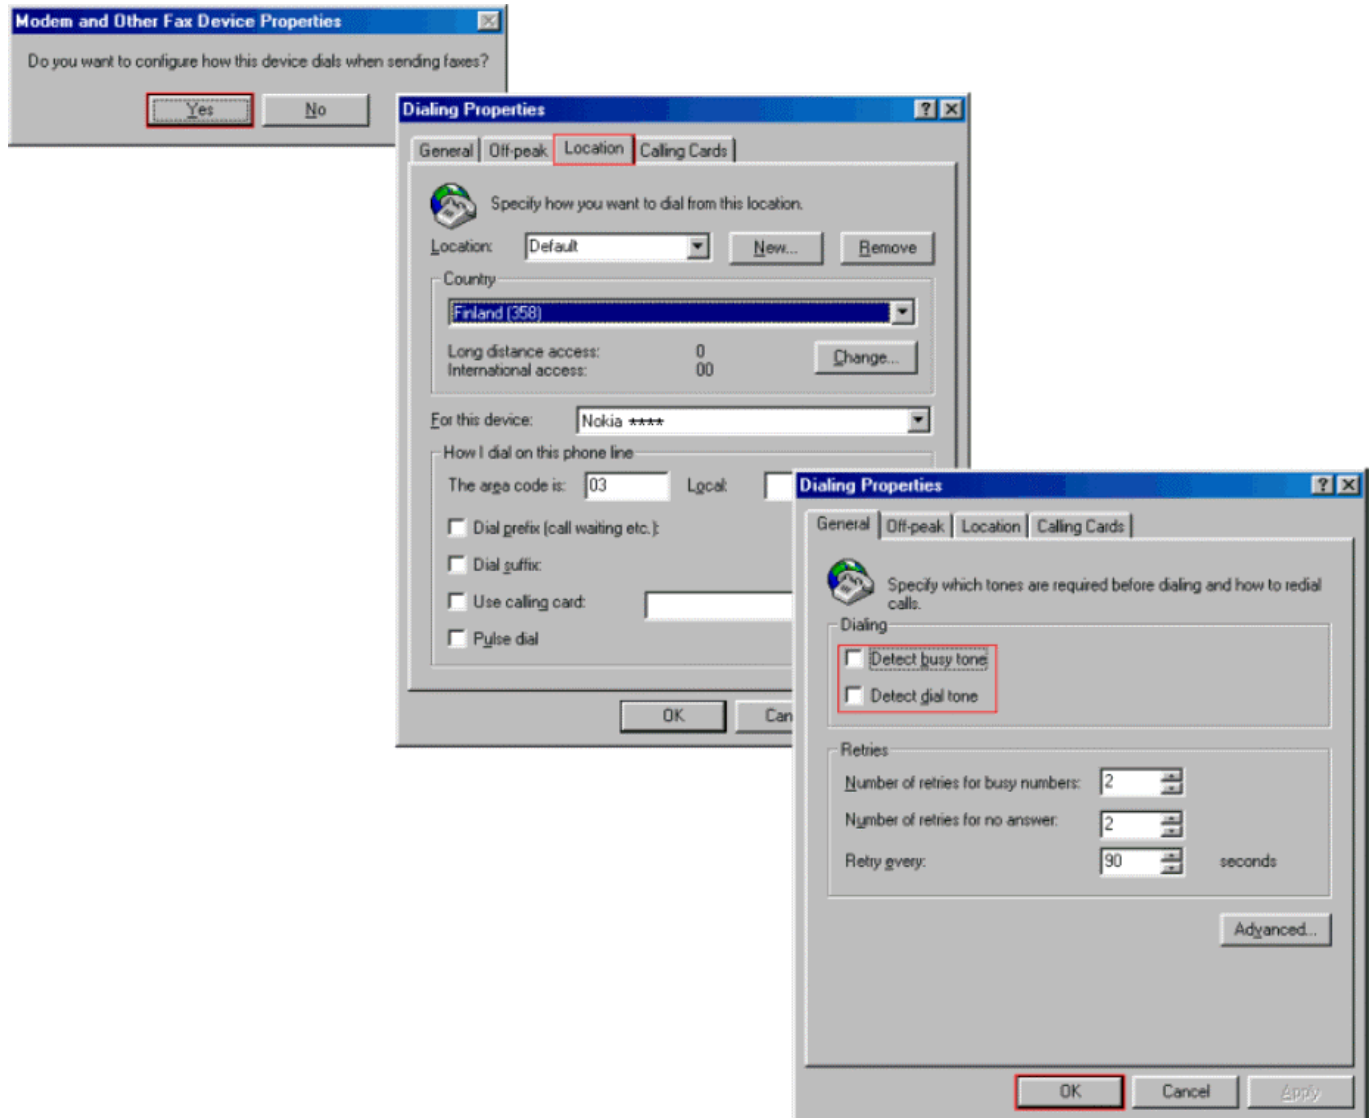

Figure 5. Specifying dialing properties.

Please Note: If fax transmission fails, change the fax class in **Tools – Setup – Program Setup**. Go to **Options – Modems and Other Fax Devices** and select the **Nokia 7110** from the **Connection Device** list. Then click on the **Properties** button and the Properties box for Nokia 7110 will appear on the screen. Now you can change the **Modem type** to something else.
