### How to Use

Each Tablet, mobile phone, computer, and operating system will have different software to detect and pair Bluetooth devices. Please consult your device manual for some specific instructions.

#### Pairing Instruction for iPad

1: From your iPad's setting, activate Bluetooth and allow it to detect devices.

2: Make sure the keyboard is power on. Insert 2 x AAA batteries into the battery insert slot, slide the power switch OFF→ON

3: Press the "CONNECT" button (on keyboard) for 2-3 seconds; the bluetooth LED Indicator will now flash.

4: The iPad will detect the keyboard's signal, and you will find "Bluetooth keyboard" displayed on your iPad screen. Click on this displayed "Bluetooth keyboard" and you will be required to enter the PIN code.

5: Enter the PIN code as displayed on the screen and press "Enter" key. After your iPad successfully pairs for the first time, the LED indicator on the front of the keyboard will light for 1-2 seconds and quickly extinguish.

#### Note

1. The Home key will not work when paired with a Macbook
2. This keyboard may not be compatible well with the Mac mini or Moto RAZR.

<4>

### Pairing Instruction for Samsung Tablet

1. Make sure the keyboard is power on. Insert 2 x AAA batteries into the battery insert slot, slide the power switch OFF→ON

2. From your Tablet's setting, activate Bluetooth and allow it to detect devices.

3. Press the "CONNECT" button (on keyboard) for 2-3 seconds; the bluetooth LED Indicator will now flash.

4. Your Tablet will detect the keyboard's signal, and you will find "Bluetooth keyboard" displayed on your Tablet screen. Click on this displayed "Bluetooth keyboard" and you will be required to enter the PIN code.

5. Enter the PIN code as displayed on the screen and press "Enter" key. After your Tablet successfully pairs for the first time, the LED indicator on the front of the keyboard will light for 1-2 seconds and quickly extinguish.

#### Tips

For devices not covered above, you could also check the steps for reference. Before connecting the keyboard to other Bluetooth-enabled devices, please verify the device's Bluetooth standard and compatibility.

<5>

### Power Saving Mode

The keyboard will enter sleep mode after being idle for 10 minutes. To activate it, press any key and wait for 3 seconds.

### Troubleshooting

If you are unable to connect your Bluetooth Keyboard to your device, or if the keyboard does not function properly, please try the following:

1. Ensure the Bluetooth software unique to your device has been successfully installed and that Bluetooth is enabled.
2. Check whether the Bluetooth software has recently updated. If so, try pairing again.
3. Restart your tablet and try pairing again.
4. Install new batteries and try pairing again.
5. Ensure the Bluetooth Keyboard is within a 10 meters range of your device.
6. Remove other Bluetooth peripherals; depending on the device, your system may slow if not equipped to connect multiple Bluetooth peripherals.

**FCC Caution:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
