Product Use

Battery Charging

Your tablet has an integrated rechargeable lithium battery. Before using the product for the first time, the battery should be charged fully to ensure proper working of the product. We recommend 6 hours for first charge.

The battery inside the device can not be replaced. If you have questions or need to replace the battery, please contact an authorized service center.

Do not connect the tablet to a power source other than that which is indicated here or on the rating label as this may result in the risk of fire or electric shock and failure of the product.

When the battery power is low, the device will display a low battery message, if power is low, the device will automatically shut down. Please recharge the tablet to continue using it.

If misused battery used in this device may cause a fire or chemical burns.

The battery used in this device may result in fire or chemical burn if it is misused. Do not disassemble, incinerate, or heat the battery. Do not leave the battery in a place subject to direct sunlight or in a car with its windows closed.

NOTE:
Please use the original included electrical adapter for charging, using different may cause damage to your product and risk of fire or electric shock

Power On/Off/ Standby

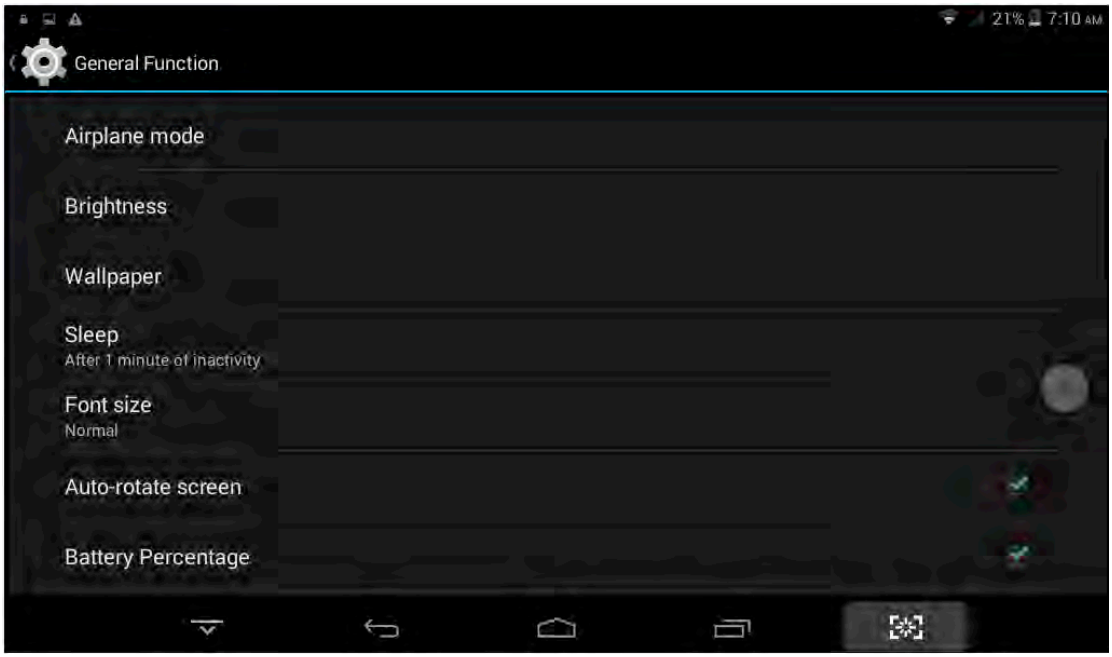
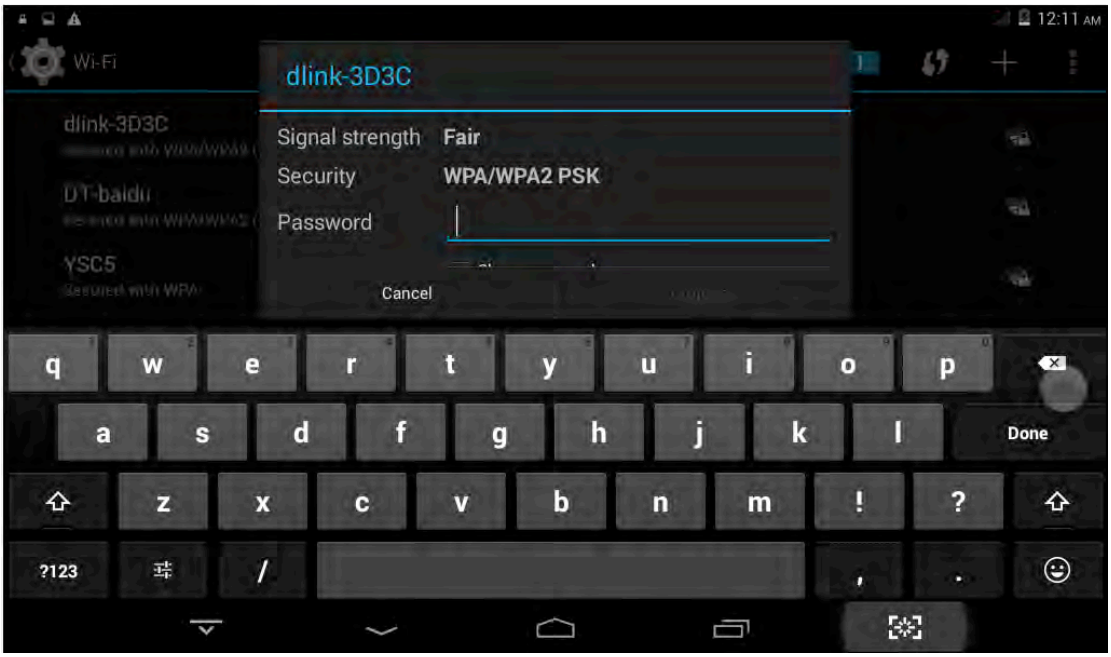
General Function

You can manage some common features such as brightness, wallpaper, sleep time. In Settings - General functions is easy to operate/change as shown below:

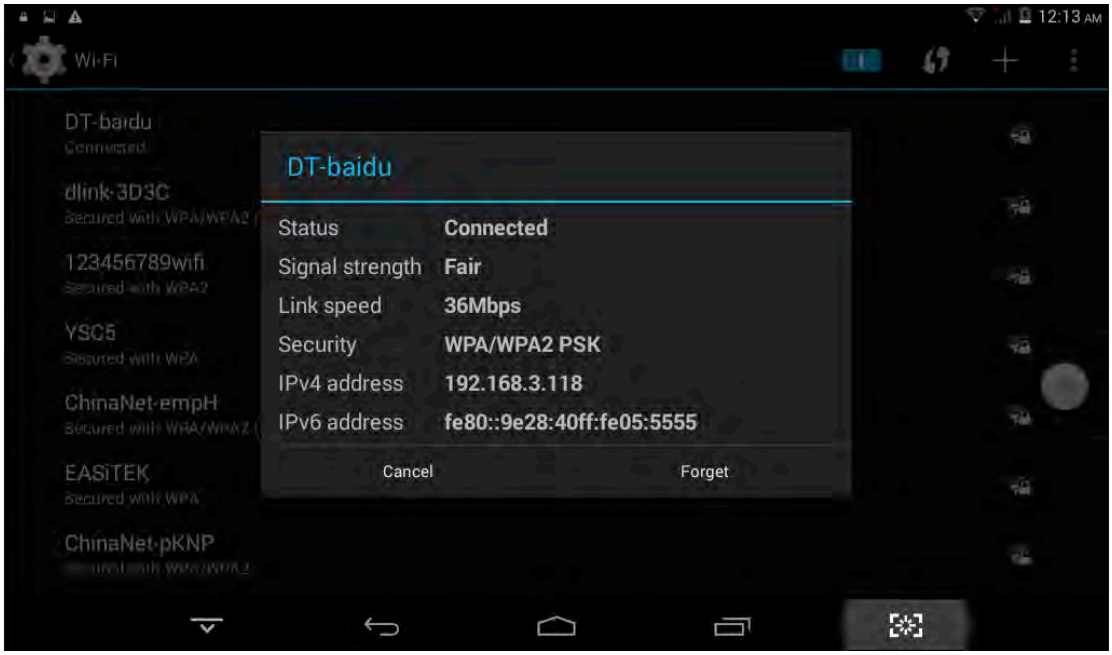


Wi-Fi

Wi-Fi connection is relatively easy to use, and configuration is similar to mobile phone-related operations. Thus, it is subject to service availability and you need your login and password information when the network demands. First, open Wi-Fi, then tap Wi-Fi network you want to connect, and then enter the password to login. Below there is a reference picture:



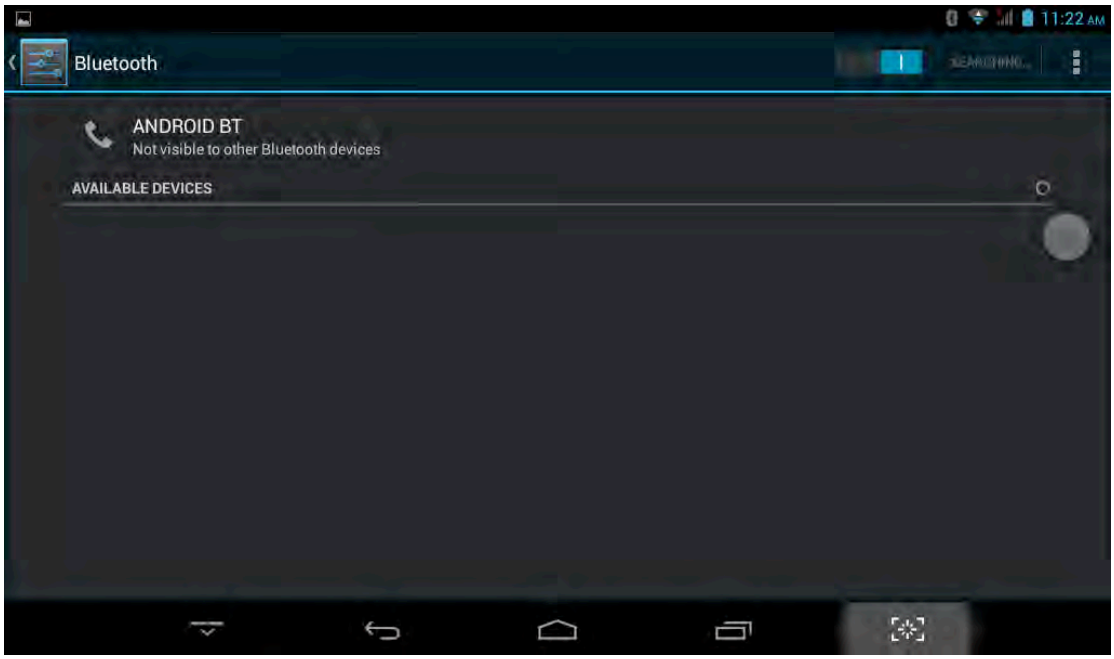
After the network connection, you can click the network is connected, check the specific circumstances of the network connection. Details as follows:



Of course, you can also open Wi-Fi network through the "Quick Setup" described earlier, or "suspended button". However, the premise is that you have a Wi-Fi network in the region, and the appropriate network passwords are known or saved.

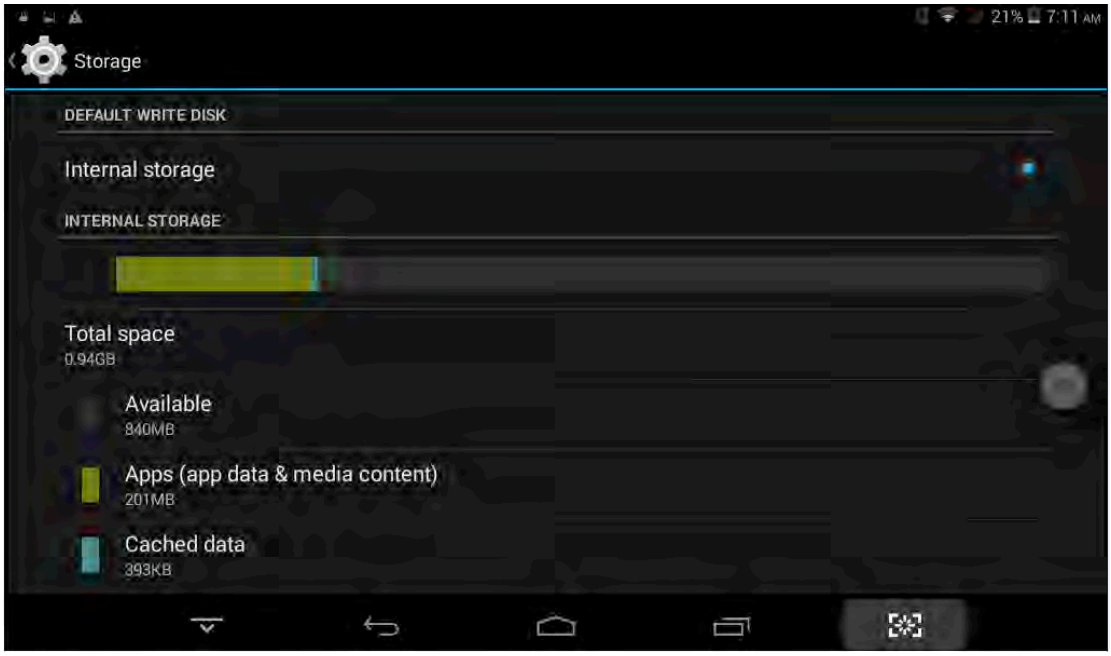
Bluetooth

Enter the Bluetooth option, open the Bluetooth, you can see the Bluetooth device information. You can toggle Bluetooth device status by clicking on the "ANDROID BT". Switch between "Not visible to other Bluetooth devices" and "Visible to all nearby Bluetooth devices". Details as shown below:



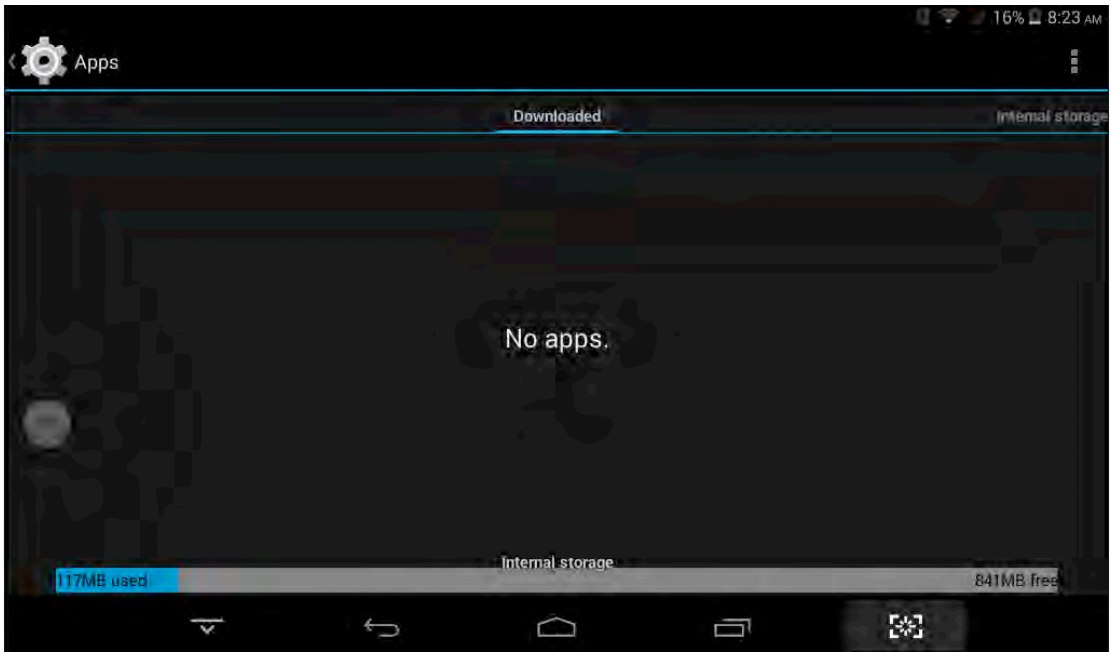
Storage

Enter “Storage”, you can see the storage device information, including the tablet capacity, external Micro-SD card capacity and usage. Below you will find a reference picture:

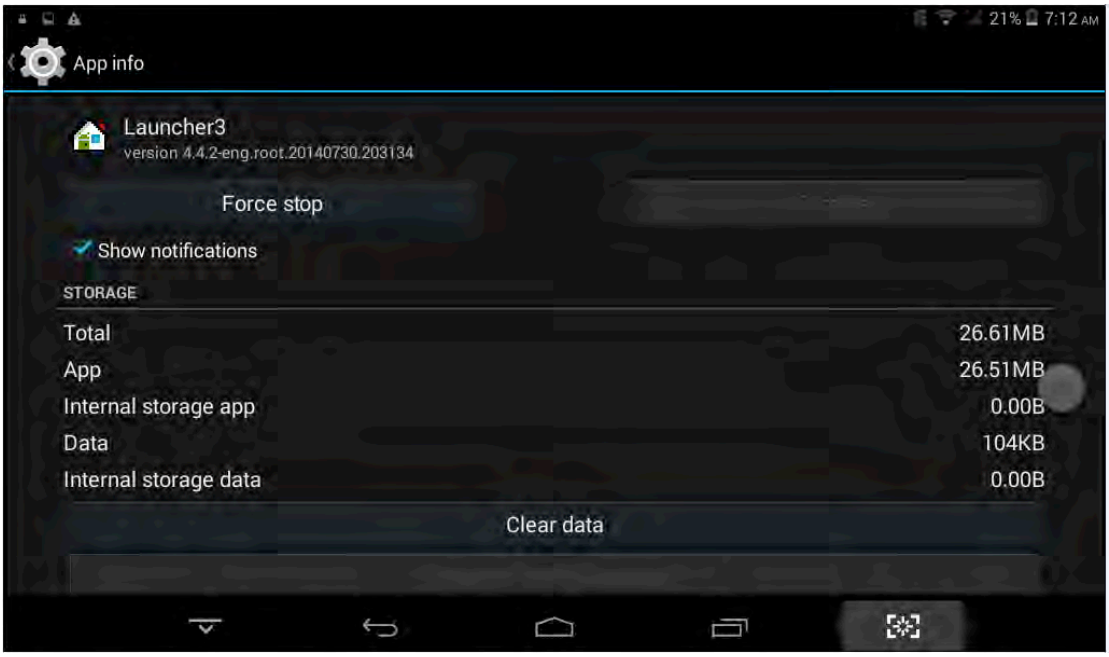


Apps

Enter “Apps” option where you can view the status of each APP, for example: the running, installed, and so on. Details as below:



Click on an individual APP, to enter to details, you can forcibly stop the corresponding APK, clear data, uninstall, move to SD card and other operations. Data loss may occur with certain applications.



Security

Enter “Security” to set security settings, set the security password, pattern or others. Details as below:

Language & input

Enter “Language & input”, can set the language and input. As shown below, click on the language to enter, you can set the machine language. (Under manual preparation process language library is the latest 4.4.2 system language libraries, however it may present changes on your device depending on software version pre-installed)

Trouble Shooting

If you have a problem with this device, please check the troubleshooting guide below.

Problem	Resolution
The Tablet does not turn on.	● Ensure that the tablet is fully charged. Try charging the Tablet overnight (8 hours).
The buttons does not work.	Switch –off and switch on the tablet
I cannot transfer files to the tablet.	● Ensure that your computer is running on a supported operating system platform. ● Check the USB extension cable, ensure that it is securely attached to the tablet and the PC, or try using another USB cable. ● Ensure that the tablet's memory capacity is full.
There is no sound during playback.	● Check the volume level. ● Ensure that the earphone is attached securely to the tablet.

FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.
SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the pone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.
Before a new model phone is a available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.
For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product
