6. : Alarm button
7. : Sleep Timer
8. **Mode**: Switch between Internet radio/DAB/FM/Bluetooth/Media Centre
9. : Main Menu
10. : Previous station on the list/previous track on bluetooth/Media Centre
11. **Local**: Access the local station list
(Local area set up in Configuration)
12. : Press to toggle between Standby and Operation
13. : Recall the favorite list
14. **OK**: confirm button
15. : Cursor right
16. : Cursor down
17. **Vol+**: Volume up
18. **Vol-**: Volume down
19. **EQ**: Equalizer (for Headphone out and Line out only)
20. : Next station on the list/next track on bluetooth/Media Centre
21. : Play/pause for Bluetooth/Media Centre
Play/stop for Internet radio
22. **Dimmer**: Access the Dimmer menu to adjust the brightness of the display
23. **Info**: Quick access to Network and System information

How to input security code for your wireless network

Using remote control

On the alpha-numerical keypad, press each button repeatedly to cycle through the letters, numbers and symbols as listed below.

To input a character, scroll to the correct one and when it is highlighted, press the ► button to input the next character. When it comes to the last character of the password and it is highlighted, press **[OK]** to confirm.

Button 1: 1 and different kind of symbols !@#\$%^&*()_+[]{};:"'|\./<>?

Button 2: 2ABCabc

Button 3: 3DEFdef

Button 4: 4GHIghi

Button 5: 5JKLjkl

Button 6: 6MNomno

Button 7: 7PQRSpqrs

Button 8: 8TUVtuv

Button 9: 9WXYZwxyz

Button 0: 0

Using control button on the Tuner

Use the **[Tune/Select]** knob to scroll through the characters, when the correct one is highlighted, press **[Forward/ ►]** button to input the next character. When it comes to the last character of the password and it is highlighted, press **[Tune/Select]** to confirm.

Note: The security code is case sensitive.

Before you start

Please ensure the following is ready:

You have a broadband internet connection.

A wireless broadband router is connected to the internet successfully. The radio supports Wireless B, G and N connection (Wireless N router can also be used with the setting on B or G).

You know the Wired Equivalent Privacy (WEP) or Wi-Fi Protected Access (WPA) data encryption code/password. You need to key in the correct code when the radio is connected to the wireless router for network connection. If you do not know the code/password, please contact the person /technician who set up the router/network for you.

The radio can work via Wireless network connection (Wi-Fi connection) and Wired connection (Ethernet Rj45).

Precautions

The radio should not be used in a high temperature or high humidity environment over prolonged periods of time as this may damage the unit.

Keep the radio away from liquids as it may get damaged. Please switch off the radio immediately if water or liquids is spilled into the radio. Consult with the shop you bought this radio for any question.

Avoid using or storing the unit in dusty or sandy environment.

Do not open and repair the radio by yourself.

Use only the AC adaptor supplied with the radio. Connecting a power supply with a different rating will cause permanent damage to the radio and may be hazardous.

Clean only with dry cloth.

WARNING: TO PREVENT FIRE OR ELECTRIC SHOCK HAZARD,
DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE THE RADIO BACK. NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THE LIGHTNING FLASH AND ARROWHEAD WITHIN THE TRIANGLE IS A WARNING SIGN ALERTING YOU OF "DANGEROUS VOLTAGE" INSIDE THE RADIO.

THE EXCLAMATION POINT WITHIN THE TRIANGLE IS A WARNING SIGN ALERTING YOU OF IMPORTANT INSTRUCTIONS ACCOMPANYING THIS RADIO.

1. To start up

- Remove internet radio tuner (called Tuner hereafter) from the package box.
- Plug in the DC adapter and switch the Power on/off switch (on the rear cabinet) to ON. Press [] button on the front (Power LED will be briefly lit).
 - Caution: Use only the adaptor supplied with the radio. Connecting a power supply with a different rating will cause permanent damage to the radio and may be hazardous.
- The Tuner is intended to connect with external powered speaker. It does not have amplifier and speaker driver built-in. Please connect your stereo through the Analogue output or Digital output located on the rear panel of the Tuner for listening.

Note - All radio modes work through Analogue and Digital output, except DAB and FM which work only with Analogue output.

2. Network Setup

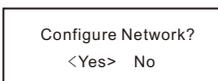

Internet connection can be setup via Wired LAN or Wireless LAN (WiFi). Your Tuner requires a broadband Internet connection through wired Ethernet or WiFi. The easiest way is use a CAT 5 or CAT 6 cable to connect through wired Ethernet to a Wifi router, which connects to an Adsl modem or a cable modem provided by your ISP.

Wired LAN (Ethernet)

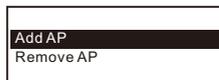

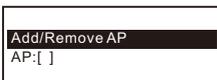

For Wired Ethernet connection to a router with DHCP enabled, the network configuration for Internet connection is automatically done and the Tuner can be used for Internet radio and UPnP sharing without user interaction. When the network is connected, the Ethernet icon  will appear on the top left corner.

Wireless LAN (Wi-Fi)

- If this is first time use, the Configure Network wizard will be displayed. Choose Yes to start configuring network. Press the [Back/ ] button to highlight Yes and press [Tune/Select] to confirm.

- Select Add/Remove AP from the list, use the [Tune/Select] knob to scroll and press it to confirm, then choose Add AP (Scan):

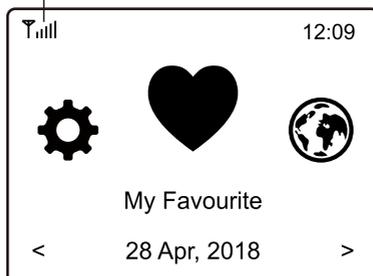

- It will start scanning the available Wi-Fi routers around. Scroll to your network and press [OK] to confirm. If your wifi network has a security code protected, it will ask you to enter the passphrase/password. Please refer to the above section '**How to input security code for your wireless network**' on P.3.

Note: The password is case sensitive. Please consult with the one who setup your network if you don't know the password.

- When the Wi-Fi connection is successful, the Association Complete will be shown briefly. The wifi signal bar will appear on the top left corner of the display:

Wi-Fi signal bar

3. Overview of features and functions

Press [**Menu/** ] to enter the main menu or the  on the remote control. Scroll by rotating the [**Tune/Select**] knob or the [ / ] button on remote:

My Favorite - To show the list of favorite stations which have been assigned to the presets. There are up to 99 presets available.

Internet Radio - Start exploring the worldwide radio stations and music here.

Media Centre - You can browse and stream music from your network via UPnP or DLNA Compatible devices.

DAB+/DAB Radio - Pick up DAB+ and DAB radio signal if available in your local area (no internet connection required).

FM Radio - Receive ordinary FM radio stations in your local area (no internet connection required).

Bluetooth - Bluetooth playback, to play audio stream (receive) from another Bluetooth enabled device after pairing/connected each other.

Alarm - Alarm clock. Two alarm settings available.

Sleep Timer - Enable the timer to turn the radio in standby after the selected time elapsed.

Configuration - More options/settings available to personalize as you desire.

4. Internet Radio

On the main menu, choose Internet Radio and you will find the options below:

Skytune

Select Skytune to start enjoying thousands of radio stations over the world. You can filter your search by Region, Music genre and talks.

The **Local Radio** let you access quickly the stations available in your local area through internet connection.

Note - You can change the Local Radio area under **Configuration > Local radio setup**. Please refer to section 11 for the details.

Note - When you scroll along the list of **Globe All** and want to quickly reach to a certain point of the long list, input the index number on the remote control to quickly jump to that point. For example, on the remote control, input 2 8 and press OK, it will highlight the station no. 28.

Search

Instead of browsing the radio station list, you can input a few characters of the desired station to filter out / short list the stations.

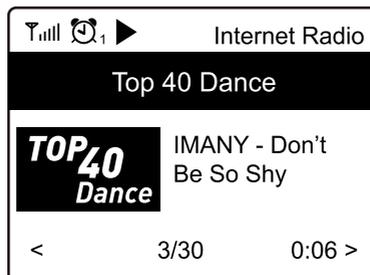

History

The radio memorizes the stations you have listened up to 99 stations.

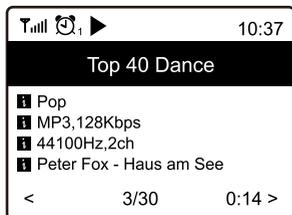

If you have listened more than 99 stations, it will supersede the first station that you have listened.

Start playing internet radio

When a radio station starts playing, more radio information can be displayed. Press the ► button in the state of the playing screen below:

Every time you press the ► button, it will show various information at a time such as the streaming bit rate, name of the song, artist name (if available), the big time clock and the radio's station logo (if available):

My Favorite

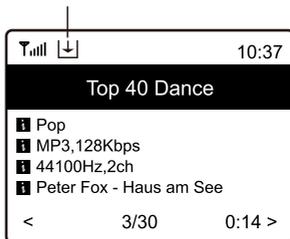

This is to show the list of your Favorite stations which have been assigned to the presets.

Preset a station

You need a remote control to preset the station.

When a radio station is playing, press the  button on the remote control, you will see the  icon appears as below. It means the station is added to the Favorite list.

Preset icon

The new added station will always show in the last item on the Favorite list.
You can store up to 99 presets.

Recall a station

Press the  button on the remote control to recall the list of presets, or navigate to **My Favorite** on the main menu and select it to confirm.

Edit your favorite list

On the Favorite list, choose the radio station you want to edit then press the [►] button on the remote control (or press [Forward/ ►] on the unit). It will enter the Edit menu with the following options:

Move down - To move down the ranking of a station

Move up - To move up the ranking of a station

Delete - To delete a particular station

5. Media Centre

The device supports UPnP and is DLNA-compatible.

This provides the opportunity to stream music from your network. However, this requires you to have a compatible device in your network that can function as a server. This can be e.g., a network hard drive or a conventional PC with e.g., Windows 8 via which access to the shared folder or media sharing is permitted. The folders can then be browsed and played on the Tuner.

Note - Please make sure your computer laptop is on the same Wi-Fi network as the Radio before you start using this function.

Music streaming

- Once the UPnP/DLNA compatible server is configured to share media files with your radio, you can start music streaming.
- On the main menu, select **Media Centre** and choose **UPnP**.
- It may take a few seconds for the radio to complete the scan for available UPnP servers. If no UPnP servers are found, it will show **Empty List**.
- After a successful scan is done, select your UPnP server.
- The radio will show the media categories available from the UPnP server, e.g. 'Music', 'Playlists' etc.
- Choose the media files that you wish to play.

You can set the mode of playback under **Configuration > Playback setup**.

My Playlist

You can make your own playlist for the UPnP music files. Choose and highlight the song you want to add to playlist, press and hold the **[Tune/Select]** knob or press and hold the **[OK]** button on remote, until the sign **[⌵]** appears. The song will be added to **My playlist**.

Clear My Playlist

Remove all songs in "My Playlist" to allow a new playlist to be prepared.

Note - If you have DLNA compatible servers available, follow the steps described above to browse the audio files from DLNA compatible device on the Tuner to play.

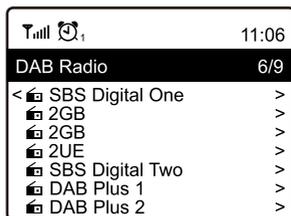

6. DAB+/DAB Radio(Digital Audio Broadcasting)

If there is Digital Audio Broadcasting (DAB) in your area, the Tuner can pick up the DAB stations as well (no internet connection is required). The Tuner supports both DAB and DAB+.

Connect the wire antenna (supplied in the box) to the antenna jack on the rear cabinet. Place the Tuner close to the window and extend the antenna as far as it can go to get the best reception.

On the main menu, scroll to **DAB Radio** or use the **[Mode]** button on remote to switch to DAB Radio. Press **[OK]** to start.

It will ask whether you want to **Scan DAB Station**. Press **OK** to start scanning and it will show the progress on the number of channels received. When it is done, a preset page will be displayed for your action.

You can select the channel and start listening to it. Whenever you want to add to **My Favourite**, press the button and it will add to the favourite list.

Always press the [<] button (or [**Back/** <] on the unit) to return to the Preset list.

Note - When a DAB radio is playing, press the [>] button to view more radio information, each time you press the [>] button, it will display various information at a time such as radio frequency, rolling texts (if available) and big time clock.

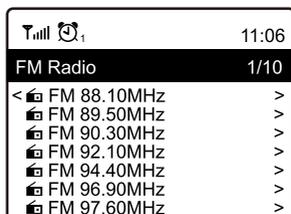

New digital radio stations should be picked up automatically by the Tuner if they are part of a multiplex you already received. Otherwise you need to do the Preset Scan again.

7. FM Radio

To receive the ordinary FM stations (no internet connection is required), connect the wire antenna (supplied in the box) to the antenna jack on the rear cabinet first. Place the Tuner close to the window and extend the antenna as far as it can go to get the best reception.

On the main menu, scroll to **FM Radio** or use the [**Mode**] button on remote to switch to FM Radio. Press [**OK**] to start.

It will ask whether you want to Scan FM Station. Press **OK** to start scanning and it will show the progress on the number of channels are found. When it is done, it will automatically save the found channels on presets and display the list for your action.

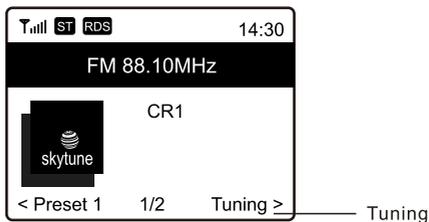

You can select the channel and start listening to it. Whenever you want to add to **My Favourite**, press the button and it will add to the favourite list.

Always press the [<] button (or [**Back/** <] button on the unit) to return to the Preset list.

Note - When it is playing FM radio, press the [>] button to view more radio information, each time you press the [>] button, it will display various information at a time such as radio frequency and big clock display.

Manual Tune

To manual tune to the frequency, long press the [OK] on remote or long press [Tune/Select] on the unit, until you see the "Tuning" appeared on the display, at the bottom right corner. Use the < ◀ / ▶ > button on remote to tune the frequency. When done, long press the [OK] button to exit manual tune.

8. Bluetooth playback

Before transmission between your Bluetooth device and the radio is possible, both devices must be coupled. This process is called "pairing". The Tuner is served as a receiver, to receive music stream to play on the Tuner.

If you have already coupled to a Bluetooth device before, this connection will be restored automatically when both devices are in range and Bluetooth operation has been selected on the radio. "Pairing" does not have to be repeated. This function may need to be activated in your Bluetooth device, however.

- Push the Menu button to display the selection menu for the different operating modes.
- Use the up / down button to select the operating mode Bluetooth and push the dial switch.
- Switch your Bluetooth device to which you want to connect the radio on and activate the pairing mode here. The device scans for Bluetooth devices in the reception range.
- When the radio is found, your bluetooth device shows its name WR-10-XXXX (the XXXX is an identification code for your radio unit).
- Select the radio at your bluetooth device.
- Start playback on your bluetooth device.
- Playback now takes place using the radio.

9. Alarm Setting

- Choose Alarm from the main menu or press the [Alarm] button on the remote control.
- Select either Alarm 1 or Alarm 2, choose **Turn on** to activate the Alarm.
- Follow the alarm wizard instructions to set the alarm.
- The wizard will guide you through the settings below:

Time - Set the time for the alarm

Sound - You can choose **Wake to Tone, My Favourite, Wake to FM Radio or Wake to DAB Radio** as the alarm source.

Note - Wake to FM or Wake to DAB Radio - only the preset stations can be used for the radio alarm (if the preset scan has been completed).

Wake to My Favourite - Please preset your favorite station before setting this as the alarm source.

Repeat - You can schedule the alarm as you desire-Everyday, Once or multiple days.

Alarm Volume - Adjust the volume of the alarm as you like by rotating the [Tune/Select] knob or [▲/▼] button on remote.

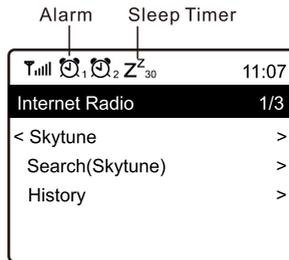

After the above settings are completed, press the [◀] button to exit and make sure the Alarm is turned on. You will see the Alarm icon appeared on the display if it is activated.

10. Sleep Timer Setting

You can set the timer to let the radio goes standby after the selected time elapsed in the range of 15 minutes to 180 minutes.

Press [⌘] button on the remote control to set the timer.

You will see the icon appeared on the display if the timer is set.

11. Configuration

Here you will find the complete settings / options available to configure your own tuner. On the main menu, navigate to Configuration setting. Press OK and you will see a list of options available.

Wi-Fi Network

• Add / Remove AP

Add AP - It will scan out a list of routers around.

Remove AP - If you have already added a router and want to remove it, choose this option.

Note - Always bring the Tuner within 2 meters of the Wi-Fi router for setup.

• AP: []

If you have added more than one routers on the radio and want to switch to another one, select this option to change.

• Signal

This is to show the strength of the Wi-Fi Signal of the Wi-Fi router as received by the radio. Usually signal levels lower than -70dBm is at weaker level and if it affects the reception of your radio, you may need to optimize the router location or check any problem of the router itself.

• IP

The IP is set **Dynamic** by default. Select to change **Fixed** IP according to your network condition.

• DNS

The DNS is set **Dynamic** by default. Select to change **<Fixed>** DNS according to your network condition.

Wi-Fi Channels

Not all of the Wi-Fi channels are available in every country. There may be variation between different countries. Therefore it is necessary to choose the Wi-Fi channels to ensure the Wi-Fi performs satisfactory.

We have already set the channels according to the requirement in different countries. Choose the country you are staying from the list to get the correct channel.

The **Europe/United Kingdom** is set by default, press **[OK]** on the Remote control or push the **[Tune/Select]** knob to edit the country selection.

LAN Network

Connect the Tuner's Ethernet port to one of the LAN ports in a router or Wi-Fi router using CAT 5 or CAT 6 cable. If your Router or Wi-Fi router is DHCP-enabled (recommended), you don't have anything to setup and the Tuner will connect to Internet with the parameters automatically assigned by the Router/Wi-Fi router.

Use the remote control for configuration if you want to use a fixed IP, scroll to IP:[Dynamic] and press **OK**. Choose Fixed. Press the **▲** button, you can then enter the IP, press **▲**, **▼** to tune to the required numbers: xxx.xxx.xxx.xxx. Switch among the 4 groups by pressing **◀▶**. When done, press **OK**. Scroll to GW and NM to do the same.

You can also choose to use a DNS server other than the one from the DHCP server. Scroll to DNS and do the same.

Note - Use DHCP to get the network parameters unless you are familiar with network setup.

Date and Time

The radio will set your local time automatically after the internet connection is completed. If you want to do manual setting, change it by the following options:

• Time zone

Auto-set Time Zone: This option is set by default.

Manual-set Time Zone: Choose this option if you want to set the time in another region.

Choose and highlight the region/city you prefer and press **OK** to confirm.

Coupled with NTP (use network time) and DST (Daylight time saving) will be adjusted automatically if you choose to use network time (NTP).

• Set Time Format

Choose either 12-hour or 24-hour notation you prefer.

• Set Date Format

• DST (Day Light Saving)

Enable on/off

• NTP (Use network time)

NTP is designed to synchronize a device's clock with a time server. Your Tuner will synchronize the time server by default every time it powers up and connects to Internet. This ensures a very high degree of accuracy in the Tuner's clock. You can change to use other

time server by inputting the URL address (see below NTP server). You can choose "**Do not use network time**" if you don't want it to.

If you choose not to use NTP for clock synchronization, highlight the NTP (Network time protocol) and press **OK** to make the change. You will see the Set Date & Time appeared on the menu. Select it and adjust the date and time as you desire.

• **NTP Server**

NTP is designed to synchronize a device's clock with a time server. Here it shows the server being used for the tuner.

Language

The default language is English, you can choose other languages as preferred. Scroll with the **▲ ▼** buttons on remote or **[Tune/Select]** knob to the item with **[↔]** and press **OK**. Scroll to highlight and press **OK** to select your language of choice. English, French, Spanish, Italian, German, Dutch, Polish, Russian and Simplified Chinese are available.

Local Radio

The radio is set by default to detect the radio stations in your local area automatically through internet connection and these stations can be accessed by a press of **[Local]** button on remote. You can also set **Local** in another region if you want. Highlight the **Local Radio** and press **OK**. Choose **Manual-set Local radio** to change the region setting.

DAB set up

• **DAB Preset Scan**

You can always carry out a new scanning of DAB channels by selecting this option. All current presets and channels will be erased.

• **DAB Radio Preset**

The scanned DAB stations will be listed here for management. You can move the position or even delete any station. Scroll to the station and press **[Right]** button. A pop up window will be presented: Move up, Move down and Delete.

FM Setup

• **FM Area**

Choose the Region according to your physical location to define the search range for the Tuner.

• **FM Preset Scan**

You can always carry out a new scanning of DAB channels by selecting this option. All current presets and channels will be erased.

The radio at the lowest frequency of the scanned values will be highlighted. The preset list will be saved unless a new preset scan is carried out.

• **FM Radio Presets**

You can adjust the preset ranking by Move down, Move up or Delete it. Highlight one of the preset, then press the **[▶]** button (or **[Forward/ ▶]** on the unit), it will enter into the Edit menu.

Always press the **[◀]** button (or **[Back/ ◀]** on the unit) to return to the Preset list.

Playback Setup

This is to set the mode of playback under UPnP/DLNA compatible streaming: Repeat All, Repeat Once or Shuffle.

Resume when Power on

This function is ON by default. The radio will resume to the last state of mode when the radio is power on next time, e.g. if it was playing radio station before power off, it will resume playing the last listened station when it is power on the next time.

Dimmer

You can set the backlight level for the display as you prefer.

There are two settings: Mode and Level

• Mode - Normal or Power Saving

Normal - the display will stay with the same level of brightness all the time without dim down.

Dim - the display will dim down after 20 seconds if no operation is made on the radio.

• Level - Bright and Dim

Bright - This is to adjust the level of brightness in Normal mode.

Dim - This is to adjust the level of brightness in Dim mode.

• Dimmer in Standby

When the radio is in Standby, rotate the **[Tune/Select]** knob to adjust the backlight level at your preference which you feel comfortable especially during night time.

EQ(Equaliser)

Various music genres can be set (for Headphone out and Line out only).

Buffer Time

Sometimes you may experience uneven playback of the internet radio. This can happen if the internet connection is slow or network congestion occurs. To help improving the situation, you can choose longer buffer time to get a few seconds of radio stream before beginning to play.

The default value is 2 seconds. You can choose 5 seconds if you prefer to have a longer buffering time.

Information

View the Network and System Information of your radio.

To access quickly to this information, press the [Info] button on the remote control.

When you use your PC to manage the My favorite stations, you have to use the IP address and you can view this info from here. Then type in the IP address (Configuration > Info > Network > IP) to your PC's browser input window

Software Update

There may be software release to upgrade features of the radio from time to time. Check the update regularly to keep your radio up to date with the latest software.

Reset to Default

You can do the reset to clear all the settings and return to default settings.

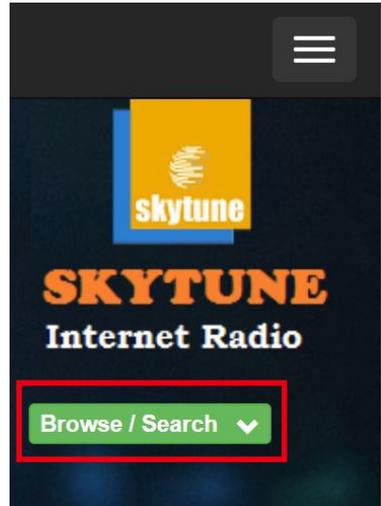

****Please note all the Station presets, Settings and configuration will be erased after you have performed the Reset.**

12. Remote control via PC / Smart phone - Tuning internet radio & manage favourite

Experience an easy way to control tuning internet radio channels and manage your favourite list via PC or Smart phone's web browser.

The supported browsers are Internet Explorer and Chrome.

- Connect your PC or Smart phone to the same Wi-Fi network as your radio.
- Visit **www.skytune.net**
- On the home page, click "Browse/Search"

- Browse or enter the name to search the radio channel, a list of internet radio channels will be displayed.

- Click the "♥" symbol

Result for Searching 'dance'

			
1.fm 90's Dance	1.fm Dance One	101.RU - Club Dance	101.RU - Russian Dance
			

- It will prompt you whether to "Add Favourite" or "Listen to Station". Enter the IP address of your radio (e.g. 192.168.1.11):

Add Favourite / Listen to Station ✕

Which operation do you want to apply to the station ?

1.fm Dance One

- Add station to my radio device favourite
- Listen to station on my radio device

Please enter your radio device's IP below.

192 . 168 . 1 . 11

Send

Close

The IP address can be located on the radio unit as follow:

* On the remote control, press the **[Info]** button, choose Network and scroll to IP to view the IP address

* On the radio, return to the main menu. Navigate to **Configuration > Information > Network Information > IP**

- Select "Listen to Station", click "Send" and the radio unit will switch playing the channel and the "My Favourite" page will pop up on the web browser.

You can then choose to add the playing station to favourite or manage your list by other edit options. Any changes will synchronize to the radio unit immediately.

13. Trouble Shooting

Problem	Cause	Solutions
Cannot connect to Wi-Fi network	Network down	<ul style="list-style-type: none"> • Confirm that a Wi-Fi or Ethernet Wired connected PC can access the internet (i.e. can browse the web) using the same network. • Check that a DHCP server is available, or that you have configured a static IP address on the radio. • Check that you firewall is not blocking any outgoing ports. As a minimum the radio needs access to UDP and TCP ports 80,443 and 8008, DNS port 53.
	Router restricts access to listed MAC addresses	<p>Obtain the MAC address from Configuration > Information > Network > Wi-Fi MAC and add to the allowed equipment list on your access point.</p> <p>Note: The radio has separate MAC addresses for wired and wireless networks;</p>
	Insufficient Wi-Fi signal strength	<ul style="list-style-type: none"> • Check distance to router; see if a computer can connect to the network in this location • Optimize the distance of the router's location
	Unknown encryption method	Change encryption method on router. The radio supports WEP, WPA, WPA2
	Firewall preventing access	Windows Media Player: varies non Microsoft firewalls may require configuration for UPnP.
If your radio can connect to the network successfully, but is unable to play particular stations		<ul style="list-style-type: none"> • The station is not broadcasting at this time of the day (remember it may be located in a different time zone). • The station has too many people trying to attach to the radio station server and the server capacity is not large enough. • The station has reached the maximum allowed number of simultaneous listeners. • The link on the radio is out of date. This is updated automatically every day, so the next time you turn on the link will be recognised.
No DAB/FM reception		<ul style="list-style-type: none"> • Please carry out "Factory Reset" on the radio and extend the antenna. • Move the radio close to the window.
DAB/FM Radio reception is poor		<ul style="list-style-type: none"> • Please check that the aerial is extended for the maximum signal strength and improved reception. • Check that you do not have other electrical equipment too close to your radio, causing interference.
No sound		<ul style="list-style-type: none"> • Adjust the volume level of the external powered speaker. • Please check if the power of the external powered speaker is switched on.

1. If the Internet Radio keeps re-buffering radio station:

The Internet Radio is streaming the data from the radio station via your broadband connection, if there is a high error rate on your broadband connection, or the connection is intermittent, then it will cause the Internet Radio to pause until the connection is re-established and it has received enough data to start playing again. If your Internet Radio keeps stopping, please check the DSL modem to ensure that the Broadband line is not suffering a high error rate or disconnections. If you are experiencing these problems, you will need to contact your broadband supplier.

2. What is Buffering?

When playing a stream, the Internet Radio/Media player, downloads a small amount of the stream before it starts playing. This is used to fill in any gaps in the stream that may occur if the internet or the wireless network is busy. The Internet Radio streams music data from the PC while you are listening. If a stream gets blocked or experiences Internet congestion while transferring it may stop/interfere with the quality of play. If this happens, check your internet connection speed- it must be faster than the speed of the streams.

3. My Tuner is working but some stations cannot be played.

The problem may be due to one or more of the followings:

- a. The radio station is no longer broadcasting.
- b. The radio station has reached the maximum allowed number of simultaneous listeners.
- c. The radio station has changed the stream arrangement and the link is no longer valid.
- d. The radio station is not broadcasting at the time of the day (not all stations are broadcasting 24 hours throughout the day).
- e. The Internet connection between your Tuner and the radio station server is too slow or unstable to support the data rate of the broadcast.

Technical Specification

Model: WR-10
Power input: 5V \square 1A
Power voltage: 100-240V~50/60Hz
Wireless Network: IEEE802.11b/g/n
Wireless network frequency: 2.4 GHz
Security Protocol: WEP/WPA/WPA2
Ethernet connection (LAN): 10/100 Mbps RJ45
Bluetooth version: V4.2 BR/EDR compliant
Bluetooth frequency: 2.4 GHz
Bluetooth range: 10 meters (line of sight)
Bluetooth transmission power: 0 dBm
DAB frequency range: 174.928MHz (5A) - 239.200MHz (13F)
Support DAB and DAB+
FM frequency range: 87.5-108MHz
Audio output: Stereo earphone jack 6.35 mm
Stereo line out
Optical (Toslink) and co-axial digital out (SPDIF)
Wire antenna jack
External wifi antenna
Unit Dimension: 430 x 48 x 243 mm (L x H x D)
Remark: Specification may vary without notice

What's included in the box

- * Internet Radio Tuner
- * Power adaptor
- * Wire antenna
- * Remote control (without batteries)
- * User manual
- * RCA cable

WEEE and Recycling

The European laws do not allow any more the disposal of old or defective electric or electronic devices with the household waste. Return your product to a municipal collection point for recycling to dispose of it. This system is financed by the industry and ensures environmentally responsible disposal and the recycling of valuable raw materials.

FCC

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
