

This camera is similar to a c-mount type camera except that the lens is built-in (no need to purchase separately). It comes with a powerful 22X zoom 3.9 to 85.8mm varifocal lens. The focus and zoom can be controlled via buttons on the back or using a 12VDC toggle switch (call for details). The built-in On Screen Display (OSD) menu lets you adjust the backlight compensation, focus and zoom settings, and camera id.

### Product Features
