

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radiofrequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur ina particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct theinterference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

"This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body."

BTR-01

apt-X Bluetooth receiver

usage:

- BTR-01 only works with compatible NuForce electronics.
 It is not a generic USB BT receiver and may be damaged if connected to a computer's USB port.
 It is designed for and can only be connected to compatible NuForce products enabling them to receive
- It is designed for and can only be connected to compatible NuForce products, enabling them to receive and process wireless transmissions from other Bluetooth devices (to be supplied by the customer), and does not produce any radio frequency signal.
- Always turn off your system first before connecting the NuForce BTR-01 to its dedicated port on compatable NuForce electronics.

With the NuForce BTR-O1 you can easily stream wireless CD quality *Bluetooth* audio directly from your smart phone/tablet/PC to any supported NuForce audio components.

The BTR-O1 is the ideal solution for achieving the best possible streaming performance as it avoids multiple stages of conversion to directly deliver pure digital audio to the supported NuForce electronics via its proprietary connection. In addition, the BTR-O1 supports the latest apt-X codec for the ultimate in wireless clarity and audiophile sound quality.
