

## ABOUT YOUR LASER EGG 2+

The Laser Egg 2+ is a smart air quality monitor that measures both the total volatile organic compounds (TVOCs) and particulate matter in the air. Laser-based light scattering is used to determine the particulate pollution, and a MOS sensor provides accurate TVOC readings.

Take control of your indoor air quality by connecting your Laser Egg to Wi-Fi, then pair it with other compatible smart devices in your home.

## STEP 1

When you use your Laser Egg for the first time, plug it in to charge the battery. Any 5V 1A charger and micro-USB cable may be used. Hold the power button for two seconds to turn it on.

## STEP 2

To connect your Laser Egg to Wi-Fi, download the Kaiterra app and follow the steps for adding a new Laser Egg. Download the app at: [app.kaiterra.com](http://app.kaiterra.com)

*For iOS users who wish to connect first using the Home app in iOS, the Laser Egg's 8 digit pairing code can be displayed by holding the mode button for two seconds.*

## WHY CONNECT?

	Without app	With app
PM2.5 & TVOC readings	●	●
Temperature readings	●	●
Humidity readings	●	●
Weather forecast	●	●
Pollution alerts	●	●
Automatic calibration	●	●
Firmware updates	●	●

# MODES

Use the mode button to cycle through the different screens on the Laser Egg. You can add or remove screens from the cycle by changing the Laser Egg's settings in the Kaiterra app.

## Overall Index

The Overall Index is a standard developed by Kaiterra to display a combined reading of PM2.5 and TVOC levels. As the index increases, pollution levels and potential health risks increase. Individual indices are calculated for both PM2.5 and TVOC levels, and the higher of the two is displayed.

The overall index can incorporate national AQI standards from a variety of countries in the PM2.5 calculation. You can use the Kaiterra app to select which standard to use.

## Overall Index / AQI levels

	AQI / Index range	Colour
Good	0-50	
Moderate	50-100	
Unhealthy for sensitive groups	100-150	
Unhealthy	150-200	
Very unhealthy	200-300	
Hazardous	300-500	

# MODES

*PM2.5 concentration, used to calculate the AQI*

*Particle count, temperature, and humidity*

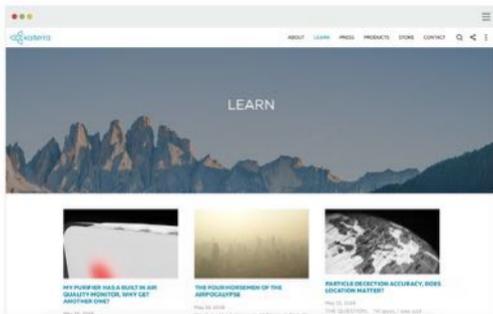

*Local weather forecast (requires Kaiterra app)*

#### Caution:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### RF Exposure

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
