You are now ready to begin using your wireless keypad

ID setting

Plug the receiver into your notebook's USB port and turn on the wireless keypad. Pressing the ID button on the receiver, then the ID setting is accomplished.

Special Function:

Normally, when users input numbers from a USB keypad, the notebook's Num Lock function will be enabled as well. Users have to disable Num Lock function before inputting characters from a notebook. The enable and disable process will always showing every time when users input numbers from a keypad and it is cumbersome for all the users. If users want to solve this problem, they need to install driver. But our new keypad has no synchronized problem; users can use the keypad and inputting

characters from a notebook at the same time. Especially, it doesn't need any drivers and support Plug & Play. Users just need to plug it into the USB port, and then users can use it smoothly. This new wireless keypad also can use under PC or MAC without any driver. It can detect the PC mode or MAC mode automatically, no other steps needed.

Specification of WKP-3250

There is a power switch at back of the keypad. To save the power, you can turn it off when you don't need to use it.

Operation Force	50±15gm
Weight	100gm
Total Travel	2.2 mm
Operation Frequency	27 MHz/ 1 communication channel/ 1.5M distance
Battery type	1 * AAA Nickel-Metal Hydride battery
Dimension: L×W×H	115 x 75 x 21.95 mm
Receiver Connector	USB
Power consumption	TX Working mode: 10mA max Suspend mode: <40 uA
	RX Working mode: 10mA max Suspend mode: <500uA
Switch Life	8 million cycles
Keycaps type	Low profile
