

Oticon Radio Model - Quick Installation Guide

Radio Model Name: mini RITE

The mini RITE radio model is a low power, inductive radio transceiver working at 3.84 MHz consisting of:

- a Digital-Signal-Processor (DSP)
- a radio Front-End (FE)
- memory
- antenna coil
- and smaller components

All components are mounted on a flexible Printed-Circuit-Board (PCB), which is intended to be installed as a module into Oticon wireless hearing aid devices only.

The module also has all voltage regulators included inside the DSP and FE and buffered data programming inputs on the board.

The module requires a battery, one or two microphones and an audio receiver to be attached and must be mounted in an external plastic shell.

The module is depicted to the right with its main components and connections:
