

1933 Series Instruction Sheet

For additional help visit www.otterbox.com or call 888.695.8820

Opening your OtterBox 1933 Case

Step 1

Remove the silicone skin from the hard shell.

Step 2

Separate the two halves of the case.

Step 3

Remove the clear membrane and insert.

Installing Your BlackBerry™ Into The Case

Step 1

For maximum protection align the front of the clear membrane with the keyboard. It is recommended that you use the provided installation card and microfiber cloth at this time to reduce any air bubbles trapped beneath the clear screen film.

Note: This is an optional step, however the clear membrane provides added protection to the keypad and screen.

Step 2

Place the phone into the plastic lid. If you are not using the clear membrane proceed to step 4, otherwise go to the next step.

Step 3

Wrap back of clear membrane over your BlackBerry.

Step 4

Snap together the plastic lid and the base.

Step 5

Wrap the silicone skin around the device. Make sure to locate the retaining slots for the silicone as shown. **Note:** If any part is misaligned take apart the case and start over. Pay close attention to the alignment of keyboard, screen & case features at every step of installation.

Cleaning/ Maintenance

Included in the package is an installation card and microfiber cleaning cloth.

Installation Card: Use the installation card at any time to smooth out any air bubbles between the clear membrane and the screen of the BlackBerry.

Cleaning Cloth: Use this microfiber cloth for cleaning the clear plastic membrane, or screen of the phone.
