#### ECO SAFE CHARGE™ REMOTE CONTROL UNIT

MODEL NO.: ELE1908

Transmission Radio Frequency: 433.92 MHz Transmission Range: 30 meters in open air

Battery: 1 x CR2032 3.0 Vdc

Conforms to FCC, EMC and R&TTE Directives

FCC ID: Y6FELE1908

C€

### Introduction:

This is a remote controller that can generate radio wave carrying control signal. After paired with a suitable Receiver, the remote controller can control the Receiver by pressing on the remote. Each button of the remote contains one unique code. The paired Receiver is capable to identify the code and then take action accordingly.

## Tips of using the Remote Control Unit:

- \* Line of sight from the Remote Control Unit to the Receiver is not required.
  The control signal can pass through walls and ceilings.
- \* As with all RF transmitter devices, electrical fields, metal doors, and motor devices can decrease the strength of the transmitting signal. Reorient the Remote Control Unit may increase the control range.
- \* It is not guaranteed that every control signal sent out by the Remote Control Unit will be received by the paired Receiver. Check to make sure of the Receiver has responded after your press on the Remote Control Unit.
- \* If the LED indicator of the Remote Control Unit dimmed, replace the battery according to the polarity sign on the battery apartment.

  One new CR2032 lithium battery is needed.

## **Important Safeguards:**

This device complies with Part 15 of FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the use's authority to operate the device.
