Welcome to BlackBerry!

Thank you for choosing a BlackBerry® Curve™ smartphone! To set up your device, insert the SIM card (if a SIM card was included with your device), insert the battery, and complete the setup wizard. For more information, see the *Start Here* poster that came with your device.

Important: Before you use your device or any accessories for your device, see the *Safety and Product Information* booklet, located on the *BlackBerry® User Tools* CD. For the most recent version of the booklet, visit www.blackberry.com/go/docs.

About inserting a SIM card

A SIM card is a small rectangular plastic card that stores important information about your wireless service. A SIM card might already be inserted in your BlackBerry device.

Insert a SIM card into your device if one of the following situations applies:

- Your wireless service provider supplied you with a SIM card or it is included in the box with your device. Remove the SIM card from its packaging and insert it into your device.
- You are switching from one device that required a SIM card to another device. Remove the SIM card from your previous device and insert it into your new BlackBerry device. Depending on your wireless service provider, you might need a PIN code for the SIM card. For more information, contact your wireless service provider.

For more information about how to insert a SIM card, see the *Start Here* poster that was included with your device.

Phone basics

CAUTION: Do not hold your BlackBerry® device near your ear while you use the speakerphone. Hearing damage can occur. For more information, see the *Safety and Product Information* booklet, located on the *BlackBerry® User Tools* CD.

Phone tips

- To make a call from the Home screen, type the phone number. Press the  key.
- To end a call, press the  key.
- To answer a call, press the  key.

- To adjust the volume during a call, press the **Volume** keys.
- To turn on or turn off mute during a call, press the  key.
- To turn on or turn off the speakerphone during a call, press the  key.

I cannot make or receive calls

Try performing the following actions:

- Verify that your BlackBerry® device is connected to the wireless network.
- Verify that your wireless service plan includes phone or voice services.
- If you cannot make calls and fixed dialing is turned on, verify that the phone number for your contact appears in your fixed dialing list or turn off fixed dialing.
- If you have traveled to another country and you have not changed your smart-dialing options, dial the full phone number, including the country code and area code, for your contact.
- If you are not receiving calls, verify that call blocking and call forwarding are turned off.
- Your device or your SIM card might support more than one phone number, even if you only have one phone number. Verify that your phone number is set as your active phone number.
- If you have more than one phone number associated with your device, verify that the phone number that you want to make calls from and receive calls to is set as your active phone number.

Add a contact

1. On the Home screen, click the **Contacts** icon.
2. Click **Add Contact**.
3. Type the contact information.
4. Press the  key.
5. Click **Save**.

About emergency calls

If you are outside of a wireless coverage area and the SOS wireless coverage indicator appears, you can only call emergency numbers. Your BlackBerry® device is designed to allow emergency calls even when your device is locked. Depending on your device model and the wireless network that your device is connected to, your device is also designed to allow emergency calls when the SIM card is not inserted. If the connection to the wireless network is turned off when you initiate an emergency call, your device is designed to connect to the wireless network automatically.

You can only make emergency calls by typing official emergency access numbers (for example, 911 or 112).

Note: You should not rely on any wireless device for essential communications, including medical emergencies. Emergency numbers may vary by location and emergency calls may be blocked or impeded by network, environmental, or interference issues.

Message basics

Send an email message

1. On the Home screen, click the **Messages** icon.
2. Press the  key.
3. Click **Compose Email**.
4. In the **To** field, type an email address.
5. Type a message.
6. Press the  key.
7. Click **Send**.

Send an SMS text message

You can send an SMS text message to up to ten recipients.

1. On the Home screen, click the **Messages** icon.
2. Press the  key.
3. Click **Compose SMS**.
4. In the **To** field, type an SMS phone number (include the country code and area code).

5. Type a message.
6. Press the  key.
7. Click **Send**.

Message tips

- To compose a message from a message list, press the  key.
- To reply to a message, press the  key.
- To reply to all, press the  key.
- To forward a message, press the  key.
- To move to the top of a message list, press the  key.

- To move to the bottom of a message list, press the  key.

I cannot send or receive messages

Try performing the following actions:

- Verify that your BlackBerry® device is connected to the wireless network. If you are not in a wireless coverage area, your device should send the messages when you return to a wireless coverage area.
- If you created an email address or added an existing email address to your device using the email setup screen in the setup wizard, verify that you have received an activation message on your device from the BlackBerry® Internet Service. If you have not received an activation message (the message might take a short period of time to arrive), in the setup wizard, open the email setup screen to send a service book to your device.
- If you have not received a registration message from the wireless network, register your device. On the Home screen, click the **Options** icon. Click **Advanced Options**. Click **Host Routing Table**. Press the  key. Click **Register Now**.
- If you switched devices, verify that you completed the process for switching devices automatically or manually so that your messages are sent to your new device.
- If the menu item for sending a message does not appear, verify that you have added an email address or a PIN for your contact.
- Resend the message. Open the message. Press the  key. Click **Resend**.
- If you use email message filters, verify that the options for email message filters are set correctly.

Browser basics

Visit a web page

Depending on your wireless service provider, multiple browsers might appear on your BlackBerry® device. For more information about the charges associated with using each browser, contact your wireless service provider.

1. On the Home screen, click the **Browser** icon.
2. Perform one of the following actions:
 - If a web address field appears on the screen, type a web address.
 - If a web address field does not appear on the screen, press the  key. Click **Go To**. Type a web address.
3. Press the **Enter** key.

Browser tips

- To move to a specific web page, press the  key.
- To insert a period (.) in the web address field, press the  key.
- To insert a slash mark (/) in the web address field, press the **Shift**  key and the  key.

- To add a bookmark, press the  key.
- To open the bookmark list, press the  key.
- To stop loading a web page, press the  key.

Personalize your device

You can install the BlackBerry® Desktop Software on your computer and connect your BlackBerry® device to your computer to charge your device, to synchronize data between your device and your computer and to perform other functions.

With the BlackBerry Desktop Software, you can also personalize your device by synchronizing music, pictures, and other media files to your device that you have stored on your computer.

For more information about synchronizing media files, synchronizing data, backing up or restoring data, adding applications, or other functions, see online help that is available in the BlackBerry Desktop Manager or visit <http://www.blackberry.com/go/mediaplayer>.

System requirements: BlackBerry Desktop Software

- Intel® compatible 486 or higher computer that is compliant with USB 1.1 or later
- Windows® XP or later
- BlackBerry® User Tools CD

Install the BlackBerry Desktop Software

1. If your BlackBerry® device is connected to your computer, disconnect it.
2. Insert the *BlackBerry® User Tools* CD into the CD drive on your computer.

3. Click **BlackBerry Desktop Software**.
4. Complete the instructions on the screen.
5. When the installation is complete, connect the smaller end of the USB cable to the USB port on the side of your device.
6. Connect the larger end of the USB cable to the USB port on your computer.

Note: If the BlackBerry® Desktop Manager does not open automatically, on the taskbar, click **Start > Programs > BlackBerry > Desktop Manager**.

Insert a media card

You can use a microSD media card to extend the memory available on your BlackBerry® device for storing media files such as songs, ring tones, videos, or pictures. The media card might be sold separately from your device.

Synchronize your media files

1. Connect your BlackBerry® device to your computer.

2. On your computer, open the BlackBerry® Desktop Manager.
3. Click **Media**.

For more information about synchronizing and managing media files, see the online help that is available in the BlackBerry Desktop Manager or visit www.blackberry.com/go/mediaplayer.

About switching devices

If you are switching from a BlackBerry® device that is associated with one or more existing email addresses (for example, a Google Mail™ or Windows Live™ Hotmail® email account), to start receiving email messages to your new BlackBerry device, you must complete the process for switching devices using the BlackBerry® Internet Service email setup application. To complete the process for switching devices automatically, follow the prompts that appear when you access the email setup application on your new BlackBerry device. If you do not receive the prompts or if you decline any of the prompts, email messages will continue to be sent to your previous device until you complete the process for switching devices manually.

You can also import data from your previous BlackBerry device, Palm® device, or Windows Mobile® powered device to your new BlackBerry device using the switch device wizard tool of the BlackBerry® Desktop Manager. For more information about switching devices, see the online help that is available in the BlackBerry Desktop Manager.

Switch your device manually

If you do not receive prompts to complete the process for switching devices automatically when you access the email setup application, or if you decline any of the prompts, you must complete the process for switching devices manually.

To complete this task you must know the PIN for your new BlackBerry® device and, depending on your wireless service provider, either your new device IMEI, ESN, or MEID. To find the required device information on your new device, on the Home screen, click the **Options** icon. Click **Status**.

1. On the Home screen or in the **Setup** folder, click the **Email Settings** icon.
2. If necessary, log in to the email setup application.
3. On the **Email Accounts** screen, press the  key.
4. Click **Change Device**.
5. Type the new device information.
6. Press the  key.
7. Click **Save**.

Safety information

Carrying your device

Your BlackBerry® device might not come with a holster (body-worn carrying solution equipped with an integrated belt clip). If you wear the device on your body, always put the device in a holster with an integrated belt clip supplied or approved by Research In Motion. Carrying solutions, including RIM approved carrying solutions and carrying solutions not approved by RIM, that do not come equipped with an integrated belt clip should not be worn or carried on the body. For more information about carrying your device, including separation distances when wearing your device, see the *Safety and Product Information* booklet located on the *BlackBerry® User Tools* CD that came with your device.

To purchase RIM approved holsters equipped with an integrated belt clip or other accessories for your device, contact your wireless service provider or visit www.shopblackberry.com.

Driving and walking safely

Give your full attention to driving; driving safely is your first responsibility. You are responsible for knowing and obeying the laws and regulations regarding the use of wireless devices in the areas where you drive.

Research In Motion recommends that you do not use your BlackBerry® device while you drive. Instead, consider having a passenger in the vehicle use the device for you, or find a safe location to stop your vehicle before you use the device.

Avoid using your device while walking or engaging in any activity that requires your full attention. Inattention to vehicular traffic or other pedestrian hazards could result in serious bodily injury.

For important safety information about driving safety, see the *Safety and Product Information* booklet, located on the BlackBerry® *User Tools* CD.

Specific Absorption Rate data

The BlackBerry® device is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government, Industry Canada of the Canadian Government (IC), and the recommendations of The Council of the European Union. The exposure standard for wireless devices employs a unit of measurement known as the Specific Absorption Rate, or SAR.

This BlackBerry device model meets government requirements for exposure to RF energy. For more information on the SAR data for this BlackBerry device, see the *Safety and Product Information* booklet, located on the BlackBerry® *User Tools* CD.

Interference with electronic equipment

Most modern electronic equipment is shielded from radio frequency (RF) signals. However, certain electronic equipment, including medical devices, might not be shielded against the RF signals from the BlackBerry® device. For more information, see the *Safety and Product Information* booklet, located on the *BlackBerry® User Tools* CD.
