THE FOLLOWING APPLIES IN THE U.S.A. AND CANADA

This device complies with Part 15 of FCC Rules and RSS-Gen of IC Rules.
Operation is subject to the following two conditions:
(1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of this device.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
This product is restricted to indoor use due to its operation in the 5.15 to 5.25 GHz frequency range.
FCC and IC require this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems. High power radars are allocated as primary users of the 5.25 to 5.35 GHz and 5.65 to 5.85 GHz bands. These radar stations can cause interference with and/or damage this product.

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. Wireless LAN adaptor (DY-WL10) has been tested and found to comply with FCC/IC radiation exposure limits set forth for an uncontrolled equipment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules.

CE QUI S'APPLIQUE AU CANADA ET AUX ÉTATS-UNIS

Cet appareil est conforme à la section 15 de la réglementation de la FCC et à la section RSS-Gen de la réglementation IC. Son utilisation est soumise aux deux conditions suivantes : (1) cet appareil ne doit pas provoquer d'interférence et (2) cet appareil doit tolérer les différentes interférences reçues, y compris les interférences susceptibles de provoquer un dysfonctionnement.

Cet émetteur ne doit pas être placé à proximité d'une autre antenne ou d'un autre émetteur, ni être utilisé de pair avec de tels autres appareils.

Ce produit est strictement destiné à un usage en intérieur en raison de son fonctionnement dans la bande de fréquence 5,15 à 5,25 GHz. La FCC et IC exigent que cet appareil soit utilisé en intérieur pour la plage de fréquence entre 5,15 et 5,25 GHz afin de réduire les éventuelles interférences nuisibles au canal commun des systèmes de service mobile par satellite. Des radars haute puissance sont désignés utilisateurs primaires des bandes 5,25 à 5,35 GHz et 5,65 à 5,85 GHz. Ces stations radars peuvent causer des interférences (et/ou) endommager l'appareil.

Les connaissances scientifiques disponibles ne font état d'aucun problème de santé associé à l'utilisation d'appareils sans fil à faible puissance. Par contre, il n'existe aucune preuve que ces appareils ne posent absolument aucun risque pour la santé. Les appareils sans fil de faible puissance émettent de bas niveaux d'énergie radiofréquence (RF) dans la plage des micro-ondes pendant leur utilisation.

Bien que des niveaux élevés de RF peuvent avoir des effets nocifs sur la santé (en faisant augmenter la température des tissus), l'exposition à de bas niveaux de RF n'entraînent aucun effet thermique ni pose aucun risque connu à la santé. Les nombreuses études portant sur les expositions RF de faible intensité n'ont décelé aucun effet biologique. Certaines études ont suggéré l'existence de certains effets biologiques, mais leurs conclusions n'ont pas été corroborées. L'adaptateur de réseau local sans fil (DY-WL10) est conforme aux limites d'exposition aux radiofréquences FCC/IC établies pour un environnement non contrôlé et satisfait aux exigences de conformité pour l'exposition aux radiofréquences (RF) de la FCC, Supplément C à OET65 et RSS-102 des exigences d'exposition aux RF de l'IC.
