

Operating Instructions

Section 2 : Operation

Memory Card Video Recorder

Model No. **AG-CPD20P**

Car Use only

Playback with the remote control panel is not available at present.
Upgrading is scheduled for the future.
For playback, it is recommended to use the Front-End application
or Back-End Client application.

In this manual, each explanation for playback with the remote control panel is enclosed in a colored frame, like .

Manuals for this recorder are prepared in two parts:

Section 1 : Before Use (Control Reference Guide, Connections, etc.) (Paper)

Section 2 : Operation (This manual)

Before operating this product, please read the instructions carefully and save this manual for future use.

■ **Figures in this manual**

Figures for the main unit and display on the menu screen may differ from the actual product.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

About This Manual

Manuals for this recorder are prepared in two parts: “Section 1: Before Use” (Paper) and “Section 2: Operation” (This manual).

This manual describes the operation of the recorder using the remote control panel (sold separately).

Section 1: Before Use (Control Reference Guide, Connections, etc.) (Paper)

Section 2: Operation (This manual)

■ Definition of terms

Officer :Anybody using the Remote Control Panel.

Administrator :A user with administration privileges to collect and manage Memory Card Video Recorder data.

■ Operations available to officers

The sections other than “Administrator Setup” describe the operations available to officers with the remote control panel (sold separately).

■ “Administrator Setup”

These sections describe operations available only to administrators with the remote control panel (sold separately).

Major contents

- How to change the factory defaults as required by the operating environment.
- How to collect and keep the recorded data.

■ “Menu List”

This section lists the functions provided by the operation menu displayed on the LCD panel of the Remote Control Panel (sold separately).

■ Organization of the “Operation Using the Remote Control Panel (sold separately)” sections

This manual uses the following symbols to distinguish between operations that involve button operations and those that use LCD panel menus.

Example)

Button operations of the Remote Control Panel are indicated as follows :

 **Selecting pictures**

While menu operations are indicated as follows :

 **Adjusting image brightness**

Features

Multi-picture display and record

The memory card recorder allows to six cameras to be connected at a time. Pictures captured by these cameras are displayed on a Main and/or Sub windows and are recorded.

Main window: A picture of a camera selected from among CAMERA 1, 2, and 3

Sub window: A picture selected from among CAMERA 1, 2, and 3, and pictures from CAMERA 4, 5, and 6 in QUAD or PANORAMA pattern.

Example: connection of six cameras

Camera setup

Selected from among CAMERA 2, and 3

Selected from among CAMERA 1, 2, and 3

Pictures from three cameras are reduced to 1/9.

Selected from among CAMERA 2, and 3 (Upper and lower parts of a picture is cut by 1/6)

Record time in each record mode

Record mode	D1 HI (High quality mode)				D1 STD (Standard quality mode)				CIF (Low quality mode)				D1 10 (10 frames/second)				
	Resolution		Frame rate [fps]		Resolution		Frame rate [fps]		Resolution		Frame rate [fps]		Resolution		Frame rate [fps]		
	720 x 480		30		720 x 480		30		352 x 240		30		720 x 480		10

Control Reference Guide of the Remote Control Panel

Front panel

- ① **LCD panel**
Shows images and operation menus.
- ② **AUTO ZOOM button***1, *2
Provides automatic control of zoom-in, pause and zoom-out operation.
The officer can set zoom ratio and pause time.
- ③ **BOOK MARK button***2
Press during recording or **playback** to enter bookmarks. A set bookmark displays an icon on the display for 1 to 2 seconds when pressed.
- ④ **Backlight compensation button** () *1, *2
Press to compensate for strong backlighting. This button toggles between ON and OFF at each press.
- ⑤ **Zoom buttons***1, *2
Use these buttons to zoom out (W-button) and zoom in (T-button).
- ⑥ **REC lamp**
Lights or flashes during recording.
- ⑦ **REC button***2
Press to start recording video and sound to SDHC Memory Cards.
- ⑧ **STOP button** () *2
Stops recording.
- ⑨ **AUDIO 2 MUTE button/lamp**
Starts/releases recording for Audio2. Pressing this button turns the lamp on/off. While the lamp is lit, Audio2 is not being recorded.
If "Audio2" on the Audio Allocation screen is set to OFF, the button operation is disabled.
- ⑩ **IR MODE button***1
Switches the IR mode to one of the following modes.
AUTO : Automatically changes IR mode depending on ambient brightness.
ON : Turns on the IR mode.
OFF : Turns off the IR mode.
- ⑪ **CAMERA SELECT button**
Each press of the button toggles the displayed picture between Main and Sub.
If you hold the button pressed for more than two seconds, the preset mode set on the Video Allocation screen in Administrator setup (see page 79) (Preset1, Preset2, or Preset3) is switched.
- Note:**
When you switch the preset mode, noise may occur in video.
- ⑫ **Volume control buttons** ()
Adjusts speaker sound volume of the Remote Control Panel.
- ⑬ **Brightness buttons** ()
Adjusts LCD panel brightness.
- ⑭ **CONTROL PANEL ON/OFF button**
Turns on and off the LCD panel, lamp indications and buttons when the Memory Card Video Recorder is on. It cannot turn on or off the Memory Card Video Recorder or Remote Control Panel.
- ⑮ **LIVE/ARCHIVE button**
Switches between the live and **playback** screen. Press this button to open the Live screen when the "Information" screen, "Archive" screen, Officer setup top screen or Setup/Admin top screen is displayed.
- ⑯ **Skip back button** ()
Press to return playback to the previous skip location.
Skip forward button ()
Press to move playback to the next skip location.
- ⑰ **RETURN button**
Returns to the previous menu or screen.
- ⑱ **MENU button**
Opens menus on the LCD panel.

⑯ **Skip back button** ()
Press to return playback to the previous skip location.
Skip forward button ()
Press to move playback to the next skip location.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

*1 Commercially available cameras connected to the [CAMERA 2], [3], [4], [5] and [6] connectors cannot be controlled.

*2 The lamp turns on when the [CONTROL PANEL ON/OFF] button is set to ON.

Control Reference Guide of the Remote Control Panel (continued)

Front panel

19 Cursor buttons

(PUSH, Δ , ∇ , \leftarrow , \rightarrow , \uparrow , \downarrow)

Use these buttons to manipulate menus and control playback.

• During menu operation

[\rightarrow]: Press the center position of the button to confirm an entry.

[Δ , ∇ , \leftarrow , \rightarrow]: Press to move the cursor or change a set value.

• During playback

[\rightarrow]: Press the center position of the button to toggle between playback and pause.

[\leftarrow]: Press to return to a playback position that is 7 seconds earlier.

[\rightleftarrows]: Engages slow playback. Each press changes playback speed between 1/10 and 1/2.

[\lll]: Press to rewind.

Each press changes the rewind speed from x4 to x20 and x200.

[\ggg]: Press to fast forward.

Each press changes the fast forward speed from x4 to x20 and x200.

20 BUSY lamp

Lights or blinks when accessing an SDHC Memory Card (for example during recording and playback).

21 READY lamp

Lights, flashes or goes off to indicate whether or not an SDHC Memory Card can be recorded.

22 LOCK lamp

When lit:

Indicates that the [W], [T], [AUTO ZOOM], [BACKLIGHT], [CAMERA SELECT], [IR MODE], [AUDIO 2 MUTE], [LIVE/ARCHIVE], [\lll], [\ggg], and [BOOKMARK] buttons are locked.

When blinking:

Indicates that the license plate recognition mode is running.

For details, see "License Plate Recognition (LPR) Mode" on page 18.

Rear panel

23 Speaker

In playback screen mode:

Outputs audio. However, during [\rightleftarrows] slow playback, [\lll] rewind, and [\ggg] fast forward, audio is not output.

In Live screen mode:

The audio sound track is not normally available. For how to monitor the audio, refer to "Checking audio" on page 52.

24 Anchoring groove

Provides attachment for a commercially available stand.

25 Securing screw holes

Use the supplied screws to attach a commercially available mounting bracket.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

On Recording

Starting Recording

■ Recording Start Methods

- Press the [REC] button (the REC buttons on the recorder, Color Camera, Remote Control Panel, and Front-End application all operate the same way).
- Apply a recording trigger.
- When power-on recording is enabled, recording starts when the recorder is turned on.

The prerecord function (see “Pre-recording and post-recording” on page 10) records video for a pre-specified period prior to a recording-start trigger event (or pressing the [REC] button). The amount of the prerecord time is set on the Rec/Play screen (see “Rec/Play” on page 81). An audio prerecord time, as well as an audio postrecord time, can be set independently, although it cannot be longer than the specified video prerecord/postrecord time. You can use this function to prerecord video without audio.

■ Recording Triggers

The following types of recording triggers are available.

- When [Action] set for detection of trigger signals (GPI1-16) is “REC”, “P1REC”, “P2REC”, or “P3REC” and the trigger signal is valid.
- Vehicle Speed Signal
Speed data detected by the recorder serves as a recording trigger when the specified speed is exceeded.
Select from the following detection methods according to the intended application or installation conditions.
Detection of own vehicle speed:
 Uses GPS or a radar gun
Target vehicle speed:
 Uses a radar gun

Note:

To use the GPS or radar gun as the recording trigger, check with your supplier to ensure that connections have been made correctly, then specify the source device (see “Radar/GPS” on page 90).

Notes:

- If the GPS is enabled, and the recording trigger is detected by GPS, if the vehicle is stopped or a speed of 5 MPH or 5 km/h below the set speed is detected, the recording trigger can be used again.
- Recording is allowed only when the [READY] lamp on the recorder and the Remote Control Panel is lit. If pressing the [REC] button or applying a recording trigger fails to start recording, the [REC] lamps on the recorder, Color Camera and Remote Control Panel blink at a high rate.
- The Remote Control Panel, the Color Camera and the recorder [REC] lamps go on during recording.
- Video signals set for Preset1, Preset2, and Preset3 are recorded (see “Preset1, Preset2, Preset3” on page 80 and “Trigger” on page 86).
- Audio signals input to the [AUDIO IN] [1] to [4] connectors are recorded, and recording of audio input to the [AUDIO IN 2] connector can be turned on or off with a trigger signal (see “Trigger” on page 86).
- Recording stops if the SDHC Memory Card slot cover is opened.

- Recording cannot start unless the SDHC Memory Card slot cover is closed.
- Recording will not start while the user is configuring administrator settings, even if the level signal satisfies the recording start conditions. In this case, recording will still not start when the user quits the administrator settings. To start recording, the recording start conditions must be satisfied again after configuration of the administrator settings is finished.
- When multiple recording triggers are enabled, recording starts when the first recording start criteria are met, and if a prerecord time has been set, the specified period before the start event is also recorded.
- If Loop recording is not activated, recording will not start under the following condition even if there is space left on an SDHC Memory Card.
 - When the number of files recorded on any SDHC Memory Card inserted in slots 1, 2, 3 or 4 totals over 5,000 files.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Stopping Recording

Setting criteria determines when recording stops. Settings that affect when recording stops include the stop timer setting for Rec Continue Time and the presence of the recording trigger level signal.

The following conditions are handled in the same manner.

- When the [STOP] button on the recorder is pressed.
- When the [STOP] button on the Remote Control Panel is pressed.
- When the [STOP] button on the Front-End application is pressed.
- When the [REC] button on the Color Camera is kept pressed for about 2 seconds.
- When [Action] for detection of trigger signals (GPI1-16) is set to "STOP" and the trigger signal has reached an active edge.

- Pressing the [STOP] button when recording is already stopped also causes the [REC] lamp to blink for about one second.
- When recording is stopped by the stop timer at the end of the Rec Continue Time, the post-recording function is disabled.
- After recording is started by a level trigger signal, it continues for at least one minute regardless of changes to the signal level. During this period, you can press the [STOP] button to interrupt the recording.
- If the [REC] button was pressed multiple times and the recording trigger set as the edge signal had multiple active edges, Rec Continue Time is applied to the last button press and active edge.
- Intermittent recording does not stop due to the Rec Continue Time.

■ Recording Stop Criteria

Level Signal	Stop Timer Setting	Criteria to Stop Recording (whichever happened earlier)
No	No	[STOP] button is pressed.
	Yes	[STOP] button is pressed or the time set for the stop timer of the edge trigger recording is reached.
Yes	No	[STOP] button is pressed or the level signal changes to an invalid level.
	Yes	[STOP] button is pressed, the level signal changes to an invalid level, or the signal whose level is specified is invalid and the stop timer setting for the edge trigger recording is reached.

The post-recording function continues to record video after the recording stop trigger event. The amount of time to continue recording after the stop-recording event can be set from the Remote Control Panel.

Recording stops also under the following conditions.

- There is no more space left on the SDHC Memory Card.
- When an administrator setup is started.
- When an error is detected on an SDHC Memory Card and recording is no longer possible.
- When the number of files recorded on an SDHC Memory Card exceeds 5,000 files.
- When the memory card slot cover opens.
- When the recorder is turned off.

Notes:

- Continuous video and audio from starting to stopping recording, and including pre-recording and post-recording periods, are recorded as one file on the SDHC Memory Card.
- If recording time exceeds 4 hours, or if the size of one file would exceed 4 GB, the file is automatically split into multiple files during recording.
- Once recording starts, it may not be possible to stop it during the first five seconds (approx.). Pressing the [STOP] button during this period causes the [REC] lamp to blink for about one second as recording continues.

Write-protect switch

The SDHC Memory Card is equipped with a write-protect switch. Sliding this switch to the LOCK position prevents writing data, formatting SDHC Memory Cards and deleting files.

Note:

If the write-protect switch is set to the LOCK position on any of the SDHC Memory Cards in the four card slots, recording will not start.

Pre-recording and post-recording

Pre-recording is the capability of including material from an interval before the specified start point in a recording. Similarly, post-recording is the capability of including material from an interval after the specified stop point in a recording.

Pre-recording and post-recording times can be set for each recording time.

Audio pre-recording and post-recording times can be set separately from video, so pre-recording and post-recording audio may be partly omitted. Because video pre-recording and post-recording time settings have priority, audio pre-recording and post-recording times cannot be set longer than video pre-recording and post-recording times.

Notes:

- Pressing the [STOP] button turns off the [REC] lamp and video and sound recordings stop when the post record interval has elapsed. Then the [BUSY] lamp goes off.
- If "Loop Rec" is set to ON, pre-recording and post-recording do not function.

On Recording (continued)

In the cases shown below, the actual prerecord and postrecord time may be shorter than the respective setting.

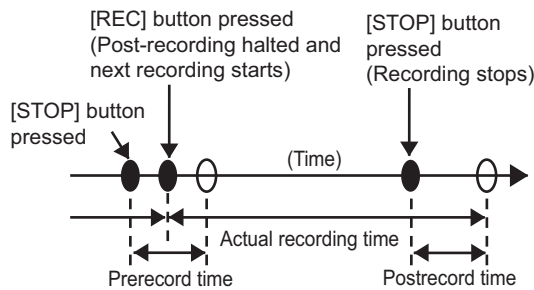

■ If recording is started immediately after system startup

Prerecord time will be shorter.

■ If recording is started during postrecord interval

Post-recording will be terminated and next recording starts. There is no pre-recording interval for the second recording.

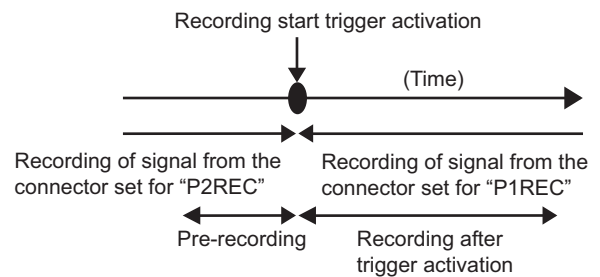

Notes:

- If you press the [REC] button and [STOP] button alternately in rapid succession, the system may not separate the two recording sessions, resulting in a single video file.
- If the remaining capacity of the SDHC Memory Card is low, the prerecord time or postrecord time may become shorter.
- Pre-recording is interrupted by **playback**, trial shoot (RecCheck) or administrator setup.
- Post-recording is interrupted by **playback**, trial shoot (RecCheck), automatic file restoration or administrator setup.

Selecting the video source to record

You can select and record video input at the [CAMERA] [1], [2], [3], [4], [5], or [6] connector on the rear panel of the recorder. Also, when the action set for the detection of trigger signals (GPI1-16) is "P1REC", "P2REC" or "P3REC" and the trigger signal is enabled, the selected video is recorded. If pre-recording is enabled and the video source is switched by a recording trigger, the prerecord video is taken from the source selected before switching, and the video is taken from the source selected after switching. You can select whether the video source is switched by the recording trigger or not, as well as selecting which video is recorded upon switching.

Example: When video input set for "P2REC" is switched to that set for "P1REC"

Notes:

- When switching video input, the video or audio may be briefly disrupted.
- For best results, minimize the amount of video source switching while recording.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Audio sources when recording

The Memory Card Video Recorder can record up to four audio channels (Audio1, 2, 3, and 4).

- Pressing the [AUDIO 2 MUTE] button on the Remote Control Panel disables recording of the signal input to the [AUDIO IN 2] connector only.

Power-on recording

The recorder automatically starts recording when it is powered on.

Also when the recorder is operating with the [PowerOff Time] setting, recording will start automatically when the recorder is turned on.

Loop recording

Loop recording continues recording new video while deleting the oldest recorded files. When loop recording is set, the file is split for every 60 minutes normally.

When the number of files recorded on an SDHC Memory Card reaches the maximum value (5,000 files per card), loop recording will continue recording, deleting the oldest file and retaining the rest.

Notes:

- If an error occurs during recording, the record file will be split.
- When loop recording is set, total recorded time is displayed in the remaining record time section on the Overlay OSD. See “Viewing the status of the recorder (Overlay OSD)” on page 55.
- During loop recording, recording stops under the following conditions:
 - When an error is detected in an SDHC Memory Card, and recording is no longer possible.
 - When the memory card slot cover opens.
- If loop recording is started with a large number of files recorded on an SDHC Memory Card, no pre-recording may be obtained.
- If “Loop Rec” is set to ON, pre-recording and post-recording do not function.

Intermittent recording

Intermittent recording records only one image per second extending recording time. An audio signal is not recorded. Intermittent recording and normal recording transit in the same record mode. Recording in each record mode is as shown below.

Record mode	D1 HI	D1 STD	CIF	D1 10
Normal recording (fps)	30	30	30	10
Intermittent recording (fps)	1	1	1	1

Interrupting intermittent recording

Entering a recording trigger during intermittent recording interrupts intermittent recording and starts normal recording. Normal recording includes pre-recording so intermittent recording and pre-recording of normal recording may overlap during pre-recording. When a recording stop criteria other than the [STOP] button are met, intermittent recording starts after post-recording.

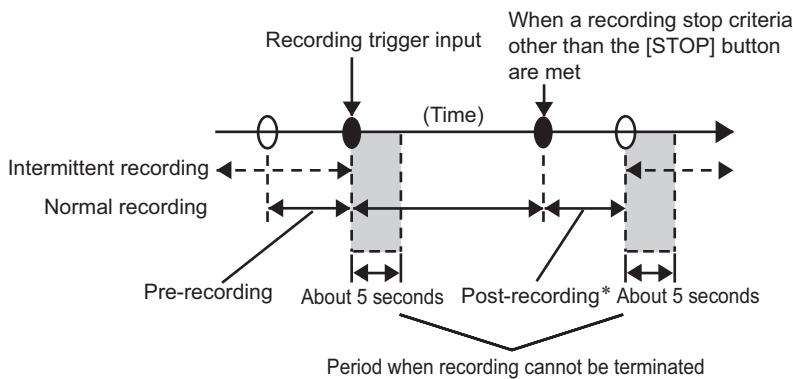

*When intermittent recording is started after post-recording, audio is postrecorded for the duration of the video postrecord time, regardless of the value set for the audio postrecord time.

Period when recording cannot be terminated

Under the following conditions, pressing the [STOP] button does not stop recording.

- About the first five seconds after intermittent recording transitions to normal recording (not including pre-recording)
- The first five seconds (approx.) after normal recording transitions to intermittent recording

*When intermittent recording is started after post-recording, audio is postrecorded for the duration of the video postrecord time, regardless of the value set for the audio postrecord time.

Notes:

- When both intermittent recording and power-on recording are set to "ON", intermittent recording starts in the intermittent recording mode when the recorder is turned on. (When intermittent recording mode is set to "OFF", normal recording starts.)
- When recording stops after the Rec Continue Time elapses, intermittent recording starts without activating post-recording.
- When pre-recording time is set to something other than "0", and a recording trigger starts normal recording during intermittent recording, the pre-recording time is automatically set to start after the intermittent recording start time.
- Period when recording cannot be terminated just after starting recording, intermittent recording transitions to normal recording or normal recording transitions to intermittent recording, may become longer when loop recording is set to "ON".
- The [REC] lamp lights during post-recording after a transition from normal to intermittent recording.
- The Rec Continue Time setting does not function outside of a recording trigger.

On Recording (continued)

Changes in intermittent recording status

Status changes caused by button operations, recording triggers, recording stop criteria and other inputs are shown below for set intermittent recording conditions.

<When intermittent recording is set to “ON”>

Status prior to input	Input			
	[STOP] button pressed	[REC] button pressed	When a recording stop criteria other than the [STOP] button are met	Recording trigger input
Recording stop status	No change	Intermittent recording status	No change	Normal recording status
Intermittent recording status	Recording stop status	No change	No change	Normal recording status
Normal recording status	Recording stop status	No change	Intermittent recording status	No change

<When intermittent recording is set to “OFF”>

Status prior to input	Input			
	[STOP] button pressed	[REC] button pressed	When a recording stop criteria other than the [STOP] button are met	Recording trigger input
Recording stop status	No change	Normal recording status	No change	Normal recording status
Normal recording status	Recording stop status	No change	Normal recording status	No change

On Recording (continued)

Location and name of recording files

The names of folders storing recording files are created according to the Rule of Filename.

WT (world time) : "/DATA" is the base folder
 LT (local time) : "/DATA /LOCAL" is the base folder

A folder indicating the recording start date is created in the above base folder and a file indicating the recording start time is created in that folder.

WT : Date and time are designated according to world time
 LT : Date and time are designated according to local time

For example, if recording started at 10:23:39 on September 28, 2009,

Name of folder storing recording files: "/DATA/20090928"
 Name of recording file: "102339xn.eee"

x	L	Local time
	-	Derivative file
	B	Bookmark file (in WT mode)
	M	Bookmark file (in LT mode)
	None	No Files other than above
n	Derivative number (numbers are sometimes not assigned)	
.eee	Extension	

Derivative files are created when there are multiple file names with the same start time.

Names of files that have been split up automatically

The filename when the file automatically split has two patterns; one is a filename indicating the derivative file, and another is indicated by the recording start time.

- Indicating the derivative file
 The file name consists of the recording start time to which "_n" is appended. In the file list screen, "*" is added to the end of the file name.
- Indicating the recording start time
 The time when the file is split automatically in loop recording will be the file name.

On Recording (continued)

Recording Error Warnings

When the recorder detects that it cannot properly record audio or video, it will output the warning signals described below via GPO1, GPO2, and GPO3 (Pin number 25, 8, and 18 of the [GPIO] connector).

Data output via GPO1, GPO2, and GPO3

GPO1, GPO2, and GPO3 signals	When not recording	During recording	When an error occurs*1
OFF	Unlit*2	Unlit*2	Unlit*2
ERROR	Continued (Fast blinking when recording error was the prior status.)	Unlit*2	Fast blinking*4
REC	Unlit*2	Lit*3	Unlit*2
REC + ERROR	Continued (Fast blinking when recording error was the prior status. Otherwise Unlit.)	Lit*3	Fast blinking*4

*1 A recording error indicates any of the following conditions.

- Cannot record (a detailed description of examples follow)
 - SDHC Memory Card slot cover is open
 - No recordable SDHC Memory Card is inserted or it is not recognized
 - No more SDHC Memory Card space available
 - The write-protect switch of the SDHC Memory Card is set to "LOCK".
 - When an error is detected on an SDHC Memory Card and recording is no longer possible.
 - When a new unformatted SDHC Memory Card is inserted
 - When an SDHC Memory Card is inserted and the maximum number of recording files has been exceeded
 - When an administrator setup is started or is going on
 - When [PowerOff Time] (see "PowerOff Time" on page 81) is set to "AUTO" and the engine switch is set to the LOCK (OFF) position
- Cannot recognize video signal from the camera

*2 Unlit : Output to GPO1, GPO2, or GPO3 is low (output voltage 0 V).

*3 Lit : Output to GPO1, GPO2, or GPO3 is high (output voltage 5 V).

*4 Fast blinking: Output to GPO1, GPO2, or GPO3 repeatedly cycles between low → high → low (250 ms cycle).

GPO output

The [GPIO] connector on the recorder has four GPO outputs and output the signals below.

The functions of GPO1, GPO2, and GPO3 can be changed with settings (see "GPO1, GPO2, GPO3 Signal" on page 83). GPO4 always outputs the power status of the recorder, and has no setting.

Pin number	Signal
8	GPO2 (REC and ERROR)
18	GPO3 (REC)
19	GPO4 (Power status of the recorder)
25	GPO1 (REC and ERROR)

About the Trigger Signals

Trigger signals (GPI1 - 16), which are used for recording control and Color Camera control, consist of edge and level signals.

■ Edge signals

High-edge, low-edge and both-edge of an edge signal can be specified. Control specified by Action starts when a change in an edge of the specified signal is detected.

For example, when a high-edge of “AUTOZOOM” is specified (see “Trigger1 to 16” on page 86):

■ Level signals

The high-level and low-level of a level signal can be specified and control specified by Action (recording control) occurs when a change is detected in the specified signal.

When high-level is specified:

A change in the signal from low to high starts recording and a change from high to low stops it.

When low-level is specified:

A change in the signal from high to low starts recording and a change from low to high stops it.

License Plate Recognition (LPR) Mode

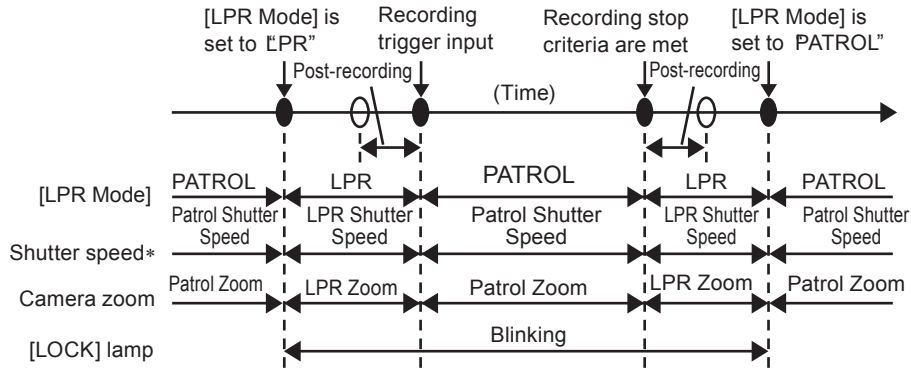

Engaging the License Plate Recognition (LPR) mode allows you to start up the LPR system.

Set the color camera shutter speed to [LPR Shutter Speed] (1/500 or 1/1000) when using the LPR system.

When a recording trigger starts a recording during license plate recognition, however, the shutter speed automatically switches to the setting configured for [Patrol Shutter Speed].

When recording stop criteria are met, the shutter speed automatically returns to the setting configured for [LPR Shutter Speed] (1/500 or 1/1000).

The diagram below shows how changes in LPR mode settings and starting and stopping recording by an officer affect shutter speed, camera zoom, and the [LOCK] lamp.

* The settings available for [Patrol Shutter Speed] are AUTO, 1/100, 1/500, and 1/1000. The settings available for [LPR Shutter Speed] are AUTO, 1/500, and 1/1000.

Notes:

- The License Plate Recognition (LPR) mode is activated when a color camera connected to the [CAMERA 1] connector is used.
- [Patrol Shutter Speed] and [Patrol Zoom] are available also without the license plate recognition program. (When [Init LPR Mode] is set to "DISABLE", or when [Init LPR Mode] is set to "ENABLE" and [LPR Mode] is set to "PATROL".)

Setup

Factory default values are shown below.

Items officers can set

	Setting Item	Factory Default Value	Description
1	Camera1		Color camera connected the [CAMERA 1] connector setting
	AE[-2 -- +2]	0	Color camera video brightness setting totally Setting : -2, -1, 0, +1, +2
	LPR Mode	PATROL	LPR mode setting Setting : PATROL (normal mode), LPR (License Plate Recognition mode)
	Patrol Shutter Speed	AUTO	Shutter speed setting with [LPR Mode] set to "PATROL" Setting : AUTO, 1/100, 1/500, 1/1000
	Patrol Zoom	×1.0	Zoom ratio setting with [LPR Mode] set to "PATROL" Setting : ×1.0 - ×22.0
	LPR Shutter Speed	1/1000	Shutter speed setting with [LPR Mode] set to "LPR" Setting : AUTO, 1/500, 1/1000
	LPR Zoom	×1.0	Zoom ratio setting with [LPR Mode] set to "LPR" Setting : ×1.0 - ×22.0
2	Audio/Video		Audio and video setting
	Image Enhance	OFF	The brightness of a dark video image on the main screen adjustment Setting: OFF (no enhancing) LOW (enhancing slightly) HIGH (enhancing strongly)
	VIDEO OUT1	VIDEO OUT2	Output to [VIDEO OUT1] connector Setting: CAM1 (Camera 1)*1 CAM3 (Camera 3)*1 VIDEO OUT2 (the same signal as that output from the [VIDEO OUT2] connector)
3	Setup/Info		Setup/Information
	Officer		Officer settings
	Officer 1 ID	----	Officer 1 ID
	Officer 1 Name	----	Officer 1 name
	Officer 2 ID	----	Officer 2 ID
	Officer 2 Name	----	Officer 2 name
	Source*2	----	Source
	Area*2	----	Area
	Shift*2	----	Shift
	Work Time	----	Work Time
	Overlay OSD	OFF	Overlay OSD setting Setting : OFF, AUTO, SIMPLE, DETAILS,
	Camera1 Rec LED	ON	Color camera [REC] lamp setting Setting : ON, OFF
	Target Speed	OFF	Target vehicle speed setting Setting: OFF, 1, 2, ..., 200*3

*1 CAM1 and CAM3 may not be displayed, depending on the settings made on the Video Allocation screen in Administrator setup.

*2 If the Front-End application is connected, the names, Source, Area, and Shift, may be different from the corresponding field names of the Front-End application. The field name of the Front-End application can be changed using the Back-End application.

*3 This may not be selected, depending on the setting made on the Trigger screen in Administrator setup.

Setup (continued)

Items administrators can set

	Setting Item	Factory Default Value	Description
1	Audio Allocation		Audio settings
	Audio1	WMIC	Audio signal connected to the [AUDIO IN 1] connector Setting: WMIC (wireless microphone) MIC (microphone) OFF (no connection)
	Audio2	MIC	Audio signal connected to the [AUDIO IN 2] connector Setting: WMIC (wireless microphone) MIC (microphone) OFF (no connection)
	Audio3	OFF	Audio signal connected to the [AUDIO IN 3] connector Setting: WMIC (wireless microphone) MIC (microphone) OFF (no connection)
	Audio4	OFF	Audio signal connected to the [AUDIO IN 4] connector Setting: WMIC (wireless microphone) MIC (microphone) OFF (no connection)
2	Video Allocation		Video settings
	Detect		Connection detecting automatically
	CAM1	ON	Connection to the [CAMERA 1] connector Setting: ON, OFF
	CAM2	ON	Connection to the [CAMERA 2] connector Setting: ON, OFF
	CAM3	OFF	Connection to the [CAMERA 3] connector Setting: ON, OFF
	CAM4	OFF	Connection to the [CAMERA 4] connector Setting: ON, OFF
	CAM5	OFF	Connection to the [CAMERA 5] connector Setting: ON, OFF
	CAM6	OFF	Connection to the [CAMERA 6] connector Setting: ON, OFF
	Preset1		Preset 1 setting
	Form	1Ch	Channel mode setting Setting: 1Ch, 2Ch, 4Ch-QUAD, 4Ch-PANORAMA, 5Ch-QUAD, 5Ch-PANORAMA, - (preset not used)
	Main Sub	1, -	Cameras for Main and Sub pictures setting Setting: 1, - 2, - 3, - 1, 2 1, 3 2, 3 -, 1456 -, 2456 -, 3456 1, 2456 1, 3456 2, 3456 3, 2456

(Continued on the next page)

Setup (continued)

	Setting Item	Factory Default Value	Description
2	Preset2*1		Preset 2 setting
	Form	1Ch	Channel mode setting Setting: 1Ch, 2Ch, 4Ch-QUAD, 4Ch-PANORAMA, 5Ch-QUAD, 5Ch-PANORAMA, - (preset not used)
	Main Sub	2, -	Cameras for Main and Sub pictures setting Setting: 1, - 2, - 3, - 1, 2 1, 3 2, 3 -, 1456 -, 2456 -, 3456 1, 2456 1, 3456 2, 3456 3, 2456
	Preset3		Preset 3 setting
	Form	2Ch	Channel mode setting Setting: 1Ch, 2Ch, 4Ch-QUAD, 4Ch-PANORAMA, 5Ch-QUAD, 5Ch-PANORAMA, - (preset not used)
	Main Sub	1, 2	Cameras for Main and Sub pictures setting Setting: 1, - 2, - 3, - 1, 2 1, 3 2, 3 -, 1456 -, 2456 -, 3456 1, 2456 1, 3456 2, 3456 3, 2456
	Main Resolution/ RecRate	D1 HI	Main-picture's resolution and bit rate settings Setting: CIF, D1 10, D1 STD, D1 HI
Sub Resolution/ RecRate	D1 HI	Sub-picture's resolution and bit rate settings Setting: CIF, D1 10, D1 STD, D1 HI	
3	Rec/Play		Recording and playback settings
	PowerOff Time*2	AUTO	Time from the SIGNAL turn-off to recorder shut-down (minutes) Setting : 0 min, 10 min, 20 min, 30 min, 60 min, 90 min, 120 min, 180 min, AUTO*3
	Init Preset Select	PRESET1	Initial Preset setting*4 Setting: PRESET1, PRESET2, PRESET3, LAST *5
	Init VIDEO OUT1	VIDEO_OUT2	Initial through-out video setting*4 Setting: CAM1, CAM3, VIDEO_OUT2, LAST *5
	PowerOn Rec	OFF	Automatically start recording with power-on Setting : OFF, ON
	Loop Rec	OFF	Loop recording Setting : OFF, ON*6
	Intermittent Rec	OFF	Intermittent recording Setting : OFF, ON

(Continued on the next page)

*1 If the Preset2 or Preset3 setting is canceled on the Video Allocation screen in Administrator setup, the setting of Action on the Trigger screen may be changed to NONE.

*2 Depending on the vehicle, the battery may run out of power during operation.

***3 When a PC with the Front-End application or Back-End application installed is not connected:**

Power is turned off immediately. Note, however, that power is not turned off while data is being exported to a USB memory device, but is turned off after completion of data export.

When a PC with Front-End application or a Back-End application installed is connected:

Power is turned off when control from a Front-End application or Back-End application is released, when upload, streaming, administrator setting, or updating with Back-End application is terminated, or when the SDHC Memory Card slot is opened.

*4 Depending on the settings on the Video Allocation screen in Administrator setup, some items may not be displayed.

*5 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

*6 If "Loop Rec" is set to ON, pre-recording and post-recording do not function.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Setup (continued)

	Setting Item	Factory Default Value	Description
3	Rec Continue Time	CONTINUE	Continuous recording time (minutes) Setting : CONTINUE, 1 min, 2 min, 5 min, 10 min, 15 min, 20 min, 30 min, 60 min, 90 min
	PreRec Time (Video)	30 s	Video Prerecord time (seconds)*1 Setting : 0 s, 10 s, 20 s, 30 s, 60 s, 90 s
	PreRec Time (Audio)	0 s	Audio Prerecord time (seconds)*1 Setting : 0 s, 3 s, 10 s, 20 s, 30 s, 60 s, 90 s
	PostRec Time (Video)	0 s	Video Postrecord time (seconds)*1 Setting : 0 s, 10 s, 20 s, 30 s, 60 s, 90 s
	PostRec Time (Audio)	0 s	Audio Postrecord time (seconds)*1 Setting : 0 s, 3 s, 10 s, 20 s, 30 s, 60 s, 90 s
	Rule of Filename	WT	Recording file naming method Setting : WT(World time) LT(Local time)
	Init Audio2 Rec	ON	Initial on/off setting for Audio2 input (upon power on) Setting : ON, LAST*1, OFF
	Init Overlay OSD	OFF	Initial OSD (on-screen display) overlay setting Setting : OFF, AUTO, SIMPLE, DETAILS, LAST*2
	GPO1 Signal	OFF	GPO1 output signal setting*3 Setting: OFF, REC, ERROR, REC+ERROR
	GPO2 Signal	OFF	GPO2 output signal setting*3 Setting: OFF, REC, ERROR, REC+ERROR
	GPO3 Signal	OFF	GP 3 output signal setting*3 Setting: OFF, REC
	Init Audio Out (Play)	ON	Initial audio output selection (upon power on) Setting : ON, LAST*2, OFF
	Play Mode	SINGLE	Select playback mode (relay playback setup) Setting : SINGLE, RELAY
	Skip Target		Skip position
	Trigger/Marker	YES	Select a trigger or marker location Setting : YES, NO
	Head of File	YES	Select the starting point of the file Setting : YES, NO

*1 If "Loop Rec" is set to ON, pre-recording and post-recording do not function.

(Continued on the next page)

*2 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

*3 The functions of GPO1, GPO2, and GPO3 can be changed with settings, but GPO4 always outputs the power status of the recorder, and has no setting.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Setup (continued)

	Setting Item	Factory Default Value	Description
4	Date/Time		Date, Time and Time Zone Settings
	TimeZone	Eastern DST	Time zone Indicates time difference from world standard time. Hawaii : Hawaiian standard time Yukon : Alaska standard time Yukon DST : Alaska daylight saving time Pacific : Pacific standard time Pacific DST : Pacific daylight saving time Mountain : Mountain standard time Mountain DST : Mountain daylight saving time Central : Central standard time Central DST : Central daylight saving time Eastern : Eastern standard time Eastern DST : Eastern daylight saving time Atlantic : Atlantic standard time Atlantic DST : Atlantic daylight saving time Asia Tokyo : Japan standard time
	Style	USA	Date display format setup Setting : ISO (YYYY-MM-DD HH:MM:SS format), USA (MM/DD/YYYY HH:MM:SS format)
	Date/Time	Current time	Year/Month/Day Hour:Min.:Sec.

(Continued on the next page)

Setup (continued)

	Setting Item	Factory Default Value	Description
5	Trigger		Trigger signal (GPI1-16) settings
	Trigger	ON	All trigger signal input or no input Setting : ON (All trigger signal input permission), OFF
	Action	NONE	Action upon trigger signal (GPI1-16) detection Setting: NONE (no operation) REC (recording), STOP (stopping) AUTO ZOOM (automatically zooms in/out or pauses) P1 (selects Preset1 input) P2 (selects Preset2 input)*2 P3 (selects Preset3 input)*2 P1REC (records video of Preset1 input) P2REC (records video of Preset2 input)*2 P3REC (records video of Preset3 input)*2 CMA1 LED (Changes the status setting (on/off) of the [REC] lamp on a Color Camera connected to the [CAMERA 1] connector) AUDIO2ON (records audio input to the [AUDIO IN 2] connector) AUDIO2MUTE (not records audio input to the [AUDIO IN 2] connector) TGT (REC) (records with a TGT input)*1 TGT (P1REC) (records video of Preset 1 input with a TGT input)*1 TGT (P2REC) (records video of Preset 2 input with a TGT input)*1, *2 TGT (P3REC) (records video of Preset 3 input with a TGT input)*1, *2 OWN (REC) (records with an OWN input)*1 OWN (P1REC) (records video of Preset 1 input with an OWN input)*1 OWN (P2REC) (records video of Preset 2 input with an OWN input)*1, *2 OWN (P3REC) (records video of Preset 3 input with an OWN input)*1, *2
	Detection	H	Method for trigger signal (GPI1-16) detection Choice of signal detection depends on set [Action] • REC, P1REC, P2REC, and P3REC modes Setting: H (high-edge trigger) Level H (high-level trigger) L (low-edge trigger) Level L (low-level trigger) B (both-edge trigger) • P1, P2, P3, CAM1 LED, AUTO ZOOM, AUDIO2ON, AUDIO2MUTE, STOP modes Setting: H (high-edge trigger) L (low-edge trigger) B (both-edge trigger) • TGT(REC), TGT(P1REC), TGT(P2REC), TGT(P3REC), OWN(REC), OWN(P1REC), OWN(P2REC), and OWN(P3REC), modes Setting: OFF, 200, ..., 2, 1 • NONE mode Setting: H (high-edge trigger) L (low-edge trigger)
	Display	OFF	Character definition when one letter is displayed in the OSD Setting : OFF, A - Z, -

*1 These are selectable for Trigger 15 or Trigger 16.

*2 These cannot be selectable if Prese2 or Preset3 has not been allocated on the Video Allocation screen in Administrator setup.

(Continued on the next page)

Setup (continued)

	Setting Item	Factory Default Value	Description
6	Embedded OSD		Embedded OSD
	Main OSD	ON	Main OSD on/off setting Setting: ON, OFF
	Sub OSD	ON	Sub OSD on/off setting Setting: ON, OFF
	Display Position	L-Upper	Location display setting Setting : L-Upper (upper left) R-Upper (upper right) L-Bottom (bottom left) R-Bottom (bottom right)
	Trigger	ON	OSD setting during trigger signal (GP11-16) input Setting : ON, OFF
	Time	ON	Date and time display setting Setting : ON, OFF
	Source @ Area	OFF	Display setting for the vehicle identification and name of a location Setting : ON, OFF

(Continued on the next page)

Setup (continued)

	Setting Item	Factory Default Value	Description
7	Camera1		Color Camera connected to the [CAMERA 1] connector setting
	Zoom Limit	×220	Maximum zoom magnification Setting : ×22, ×220
	AGC Level	HIGH	Color Camera automatic gain control setting Setting : HIGH, OFF, LOW, MID
	Init Backlight	OFF	Initial backlighting compensation setting (upon power on) Setting : ON, OFF, LAST *1 (perform backlighting compensation when on)
	Init AE Shift	0	Initial exposure compensation of Color Camera video (upon power on)*2 Setting : 0, +1, +2, LAST *1, -2, -1
	Flip	OFF	Color Camera image top/bottom flip enable/disable Setting : OFF (Top/bottom flip disabled) ON (Top/bottom flip enabled)
	AutoZoom Magnification	×10	Magnification of auto zoom Setting : ×10, ×15, ×22, ×1, ×2, ×3, ×4, ×5, ×7
	AutoZoom Time	3 s	Auto zoom magnification retention time (seconds) Setting : 3 s, 5 s, 8 s
	AutoZoom End Position	×1	Target magnification of auto zoom Setting: ×1, ×2, ×3, ..., ×22, LAST *1
	Init Camera1 Rec LED	ON	Initial Color Camera [REC] lamp enable/disable setting (upon power on) Setting : ON ([REC] lamp lights during recording) LAST*1 OFF ([REC] lamp does not light)
	Init IR Mode	AUTO	IR switching function Setting : AUTO (Automatically switch IR function on/off), OFF (Force IR function off) ON (Force IR function on) LAST *1
	IR Level	LOW	IR auto switching level setting*3 Setting : LOW, HIGH
	IR Time	30 s	IR auto switching level detection time (seconds)*3 Setting : 30 s, 60 s, 300 s, 10 s
	Auto Focus	PRESET	Select color camera focusing method when, • [Init LPR Mode] is set to "DISABLE" • [Init LPR Mode] is set to "ENABLE" and [LPR Mode] is set to "PATROL" • A recording trigger starts recording when [Init LPR Mode] is set to "ENABLE" and [LPR Mode] is set to "LPR". Setting : PRESET (When the zoom is 3x or below, the camera is focused at a distance of about 15 m (50 feet). Subsequent zooming will engage auto focus.) DISABLE (Focus is locked at a distance of about 40 m (130 feet) and auto focus is disabled.) AUTO (Set to auto focus when zoom ratio has been changed.)
Init LPR Mode	DISABLE	LPR (License Plate Recognition) function switching Setting : DISABLE (LPR function is off and [LPR Mode] switches to "PATROL".) ENABLE (LPR function is on.)	

(Continued on the next page)

*1 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

*2 When the [Init AE Shift] setting is "+2" and the target is dark, the image may not refresh at 30 frames/sec.

*3 The [IR Level] and [IR Time] settings apply only when the [Init IR Mode] setting is "AUTO".

Setup (continued)

	Setting Item	Factory Default Value	Description
8	Management Mode		Officer management setup
	Classify* ¹	DISABLE	Classify settings Setting: DISABLE (disables adding) ENABLE (enables adding) FORCE (forcibly adding)
	Setting Method	AUTO	Officer registration procedure Setting : AUTO, MANUAL, LIST
	Upload Mode	MANUAL	Upload mode setting Setting: AUTO (uploading automatically) MANUAL (uploading manually)
	Export Menu	DISABLE	Export menu setting Setting: ENABLE, DISABLE
	Preset Select	ENABLE	Preset selection setting Setting: ENABLE, DISABLE
	Operation Key Lock	OFF	Lock of buttons by an administrator Setting : OFF, ANY, STOP
9	Radar/GPS		Radar Gun* ² , GPS and speed settings
	Model Select	ProLaser	Radar gun type selection* ³ Setting : ProLaser STALKER_ GOLDEN_E
	Connection of Radar	OFF	Radar Gun connection* ² Setting : OFF, Recorder
	Connection of GPS	Recorder	GPS connection Setting : Recorder, OFF
	Collection Time	1 s	Interval for GPS data collection (seconds) Setting : 5 s, 10 s, 1 s, 2 s
	Speed Unit	MPH	Speed measurement units Setting : MPH, km/h

(Continued on the next page)

*1 If Loop Rec on the Rec/Play screen is set to ON, the Classify does not function.

*2 When using a radar gun, contact your supplier.

*3 Only the first 8 characters appear in the [Model Select] input field.

Setup (continued)

	Setting Item	Factory Default Value	Description
10	Network		Network setting
	IP Address		Each network setting
	PC LAN	Server1	DHCP Setting: Server1, Server2 Server3, Server4 OFF*1
	UPLOAD LAN	Client	DHCP Setting: Client, OFF*2
	USB WIRELESS LAN	Client	DHCP Setting: Client, OFF*2
	Wireless LAN		Wireless network setting
	AP Priority	AP1 Highest	AP (Access Point) priority setting Setting: RANDOM, AP1 Highest
	Network	Access Point1	Network access point setting Setting: Access Point1, Access Point2, ..., Access Point10
	Access Point	DISABLE	Access Point setting Setting: ENABLE DISABLE
	Security	----	Security setting Setting: WEP, WPA/WPA2-PSK, NONE
	SSID	----	Service set ID setting
	Network Key	----	Network key setting
	Key Index	–	Key index setting Setting: 1, 2, 3, 4

*1 If Server1, Server2, Server3, or Server4 is selected, the IP Address, Subnet Mask, and Gateway are fixed as shown below. If Off is selected, the IP Address, Subnet Mask, and Gateway can be changed.

	Server1	Server2	Server3	Server4	OFF

Subnet Mask	--	--
Gateway	--	--

Text Files Used with the Recorder

The following types of text files can be used by the recorder, and created with a commercially available text editor. To display correctly, the files must meet the following specifications. Refer to “Sample Files” on page 31 for examples.

File Types

File Types	Contents	File Name
Officer Data File	This file type contains officer settings. It is required when the officer data setting method is “AUTO” or “MANUAL”. It is also used for log-in authentication on the administrator settings screen.	WIDKEY\ WID****.TXT
Officer Registration File	This file type contains batch officer registration data (for up to 1,000 officers) for the recorder. When the “LIST” officer data setting method is selected, officers can select their own names from the registration list to load their settings into the recorder. It is also used for log-in authentication for the Front-End application.	WIDKEY\ WOFFICER.TXT
Administrator Registration File	This file type contains administrator registration data (for up to 10 administrators) that enables logging in to the administrator settings screen. An officer data file is required for log-in authentication on the administrator settings screen.	WIDKEY\ WADMIN.TXT
Classify File	The file is used to store classify tags on the recorder. Up to 10 files are stored.	WIDKEY\ CLASSIFY.TXT
Source File	The file is used to store vehicle ID from the vehicle list when storing an officer. Up to 1,000 files are stored.	WIDKEY\WSOURCE. TXT
Shift File	The file is used to store work shift from the shift list when storing an officer. Up to 100 files are stored.	WIDKEY\WSHIFT. TXT
Area File	The file is used to store area from the area list when storing an officer. Up to 100 files are stored.	WIDKEY\WAREA. TXT

Note:

When the officer or administrator registration file is as follows, officer or administrator data is not registered, but is deleted along with previously registered officer and administrator data.

- When no officer or administrator data is present
- When the content of required items is invalid

Saving Location and File Naming

Text files to be used on the recorder must be stored in a “WIDKEY” created under the root directory of a USB memory device.

Be sure to save the Officer Data File to one USB memory device.

Officer data file names are composed of up to eight characters beginning with the prefix “WID”, and having the extension “.TXT”. There are no restrictions on naming other than the “WID” prefix.

When multiple officer data files are saved in the “WIDKEY”, the file names are automatically sorted (in ascending order), and the first 1 or 2 files are used as officer data.

Text Files Used with the Recorder (continued)

File Specifications

Syntax:

Officer data files may contain no more than one statement per line.
Multiple statements or definitions on one line are invalid.

Line Feed Codes:

Line feeds are coded as the hexadecimal values 0Dh 0Ah or just 0Ah.

Blank Lines:

Blank lines are ignored. Aside from the line feed code, a blank line may contain only space and tab (09h) characters.

Comment Lines:

Lines beginning with “#” (ignoring leading spaces or tabs) are considered to be comment lines. These have no special meaning, but may contain notes or descriptions. Valid comment characters are those from 20h to 7Eh.

Definition Lines:

- An identifier is a definition value.
- These lines define names and other data. Leading spaces and tabs are ignored.
- Identifier descriptions are shown in the following table.
 - ⊙ : Required item
 - : An item with significance or an object of inspection
 - × : Ignored item

Identifier	Max. characters.	Description	Officer Data File		Officer/Administrator Registration File	
			Officer 1	Officer 2	Officer	Administrator
FirstName	50	Specify officer's first name	⊙	⊙	⊙	⊙
MiddleName	1	Specify officer's middle initial	○	○	○	○
LastName	50	Specify officer's last name	⊙	⊙	⊙	⊙
ID	50	Officer number for authentication	⊙	⊙	⊙	⊙
Password	12	This should be entered when making administrator settings.	○	○	○	○
SDate	10	Shift start date YYYY-MM-DD	○	×	×	×
SdayOfWeek	3	Shift start day of week	×	×	×	×
STime	5	Shift start time hh:mm	○	×	×	×
EDate	10	Shift end date YYYY-MM-DD	○	×	×	×
EdayOfWeek	3	Shift end day of week	×	×	×	×
ETime	5	Shift end time hh:mm	○	×	×	×
WHour*	5	Working period hh:mm	○	×	○	×
Shift	50	A term for a work period, for example, early shift.	○	×	×	×
Area	50	Name of a location	○	×	×	×
Source	50	Vehicle identification	○	×	×	×
Border	73	Borders may be assigned to multiple officers. Defined values are ignored. For use within registration files.	×	×	○	○

Identifier	Max. characters.	Description	Classify
Classify	99	Defines Classify.	○

- *
- If SDate, STime, and ETime have been set, the WHour setting will be ignored.
 - If a value of more than 24 hours is set, the default value of 8 hours will be set.
 - The minimum period to be set is 15 minutes.

Text Files Used with the Recorder (continued)

- If no definition is provided for a required item (that is, it is undefined), necessary data is considered to be incomplete and invalid for registration or testing. Identifiers are not case sensitive.
- All item definition values are character strings consisting of alphanumeric symbols other than "<" (3Ch), ">" (3Eh), "\" (5Ch), "&" (26h) and "," (2Ch), control character codes 00h to 1Fh, and "Delete" character code 7Fh. Characters (including spaces) following "=" on a line are considered to be the definition value. Any invalid characters are handled as spaces. Characters exceeding the maximum character length are ignored.
- Identifiers having no defining characters are considered to be undefined. For example, if a line contains a "=" followed by a line feed character, that identifier is considered to be undefined. If an identifier is multiply defined on different lines, the last definition line has priority.

Sample Files

Officer data file:

If work day and time data (SDate, EDate, ETime) are not specified, the time loading the officer data will be the work start day and time. The work end day and time will be the day and time after the work time (WHour) elapsed. If WHour has not be specified, the work hour will be 8 hours.

Basic Menu Operations

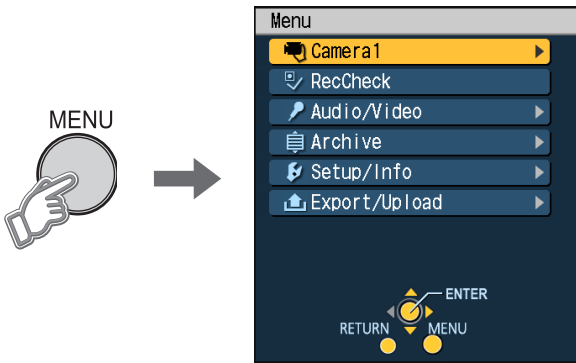

For a list of all the menus, refer to “Menu List” on pages 97 - 106.
 (This list also describes menus available only to administrators.)

Example: Audio1 Test

1. Press the [MENU] button.

The Menu appears.
 A triangle displayed at the right edge of a menu item indicates that it contains a submenu.

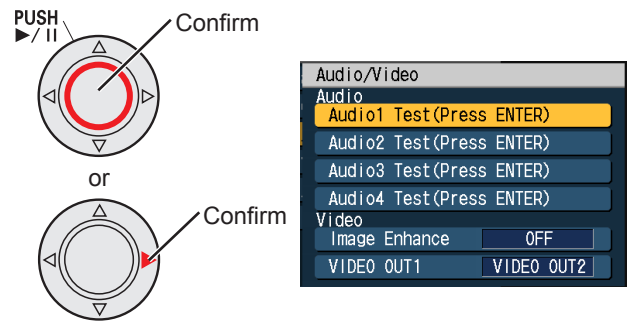

2. Press the cursor buttons [Δ, ∇] to select an item.

3. Press the center position of the cursor button [PUSH] or [▷] to confirm the entry.

The selected item opens to reveal selection details.

4. Press the [Δ, ∇] buttons to select [Audio1 Test].

5. Press the [PUSH] button to confirm the entry.

The Audio1 test is now ready to run.

Basic Menu Operations (continued)

Changing the value

Press the [Δ , ∇ , \triangleleft , \triangleright] buttons to set a value.

- A selected item with tiny triangles at the top and bottom allow you to change its value by pressing [Δ] or [∇].

(Screen example)

- A selected item with tiny triangles to the left and right allow you to change its value by pressing [\triangleleft] or [\triangleright].

(Screen example)

Displaying the submenu

A triangle displayed at the right edge of the menu item indicates that it contains a submenu. Press the [\triangleright] button to display the submenu.

Returning to previous screen

Press the [RETURN] button to return to the previous screen. The menu is cleared when the "Archive" screen, Officer setup top screen or Setup/Admin top screen is displayed.

Long menus

Menus with arrows at the top and bottom contain items that are currently not shown. Press the [Δ] or [∇] button to display the item.

(Screen example)

Setting up/Deleting Officer Data

When Front-End application is running, this unit freezes in the live screen and officer data cannot be set or deleted. In AUTO mode, officer data can be set using the USB memory device.

Before using this unit, you must create and configure officer data, such as an officer ID and officer name. For details on creating officer data, refer to “Text Files Used with the Recorder” on pages 29 - 33.

Three setup methods are available, called the AUTO, MANUAL and LIST modes.

Check with the administrator which mode is selected (see “Setting Method” on page 89).

Note:

Starting up Front-End application during officer data setup will abort the setup operation. The recorder will then freeze in the live screen and disable setup and deletion of officer data.

Notes:

- If a USB memory device is connected and the officer data is read during recording, the file will be split up at the location where reading was effectuated.
- Once the officer data has been read, the USB memory device may be removed.
- Once the officer data has been set up, it is not deleted even when power is turned off or the mode changed.

AUTO mode

When a USB memory device is connected to the recorder, or when connection is detected after turning power on, the officer data for one or two officers is automatically read in and activated (see “Text Files Used with the Recorder” on pages 29 - 33).

Connect a USB memory device containing officer data to the recorder.

The [READY] lamp flashes for one second:

This indicates that the data was correctly read.

The [BUSY] lamp flashes for one second:

This indicates that the data could not be correctly read. Disconnect the USB memory device and then reconnect it. If the [READY] lamp does not flash when the USB memory device is connected again, check if the officer data file has been correctly saved to the USB memory device.

If the above measures do not correct this problem, replace the USB memory device.

Setting up/Deleting Officer Data (continued)

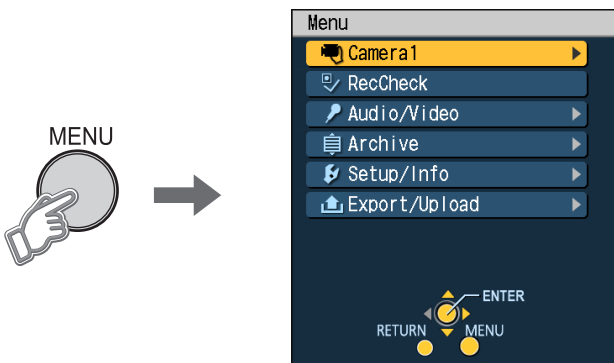

MANUAL mode

Display the menu on the LCD panel. Then read and load the officer data from the Officer setup top screen.

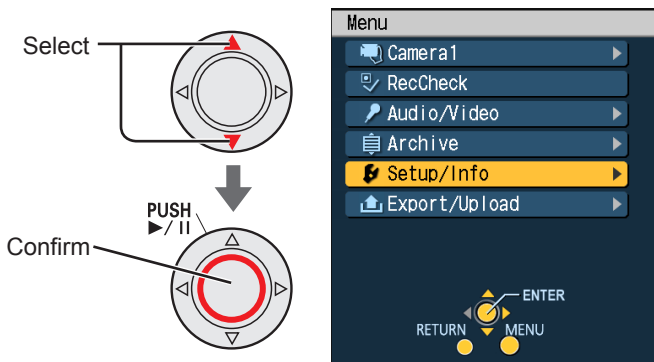

1. Press the [MENU] button.

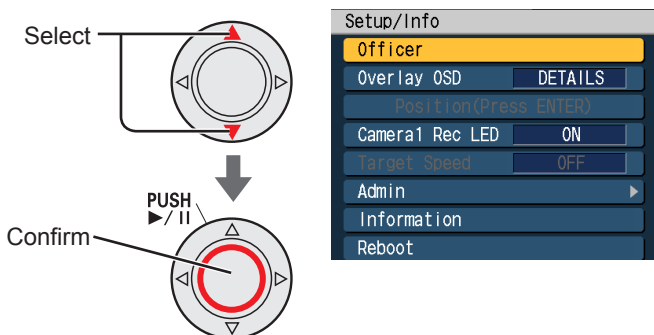

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

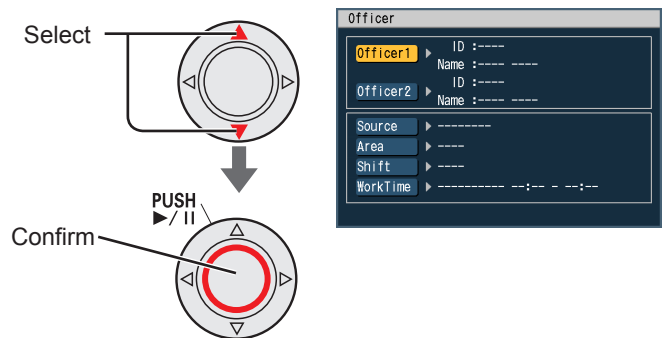

The Officer setup top screen appears.

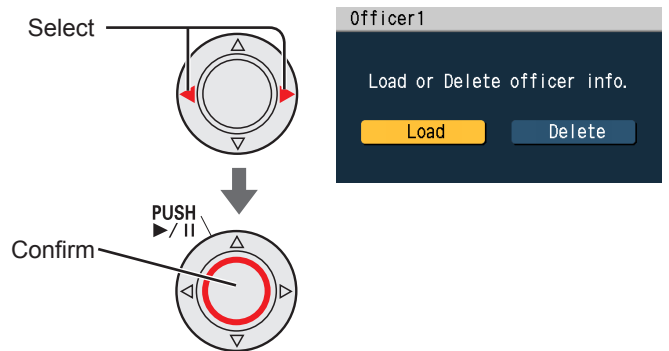

4. Connect a USB memory device containing officer data to the recorder.

5. Press the [Δ, ∇] buttons to select [Officer1] and press the [PUSH] button to confirm the entry.

6. Press the [◀, ▶] buttons to select [Load] and press the [PUSH] button to confirm the entry.

This registers officer1 and the name and ID appear.

Note:

Long names and IDs may not be displayed in full.

Entering Officer2 data

Replace the USB memory device with the one containing data for another officer. Then select [Officer2] in Step 5 mentioned above and repeat Step 6.

Setting up/Deleting Officer Data (continued)

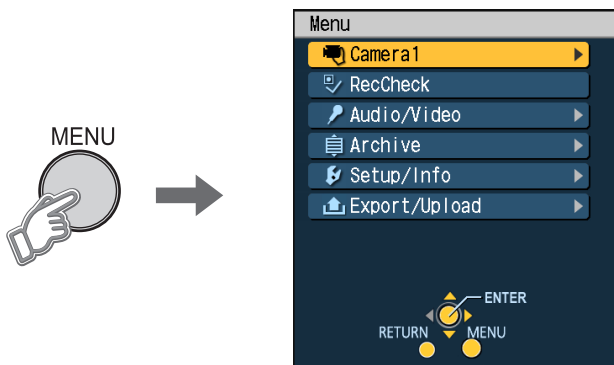

LIST mode

Open the menu on the LCD panel and read in the officer data registered in the recorder from the Officer setup top screen. For details on registering officer data, refer to "Load Officer" on page 85.

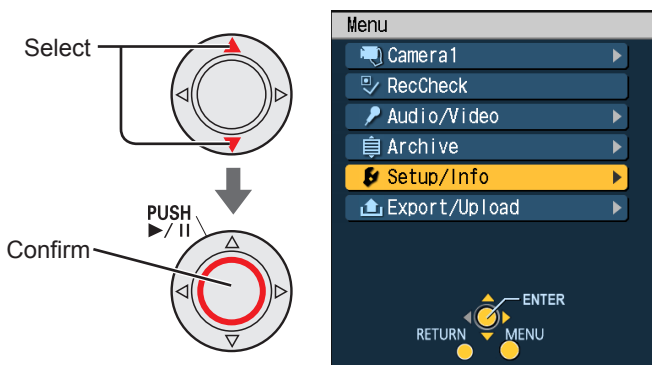

1. Press the [MENU] button.

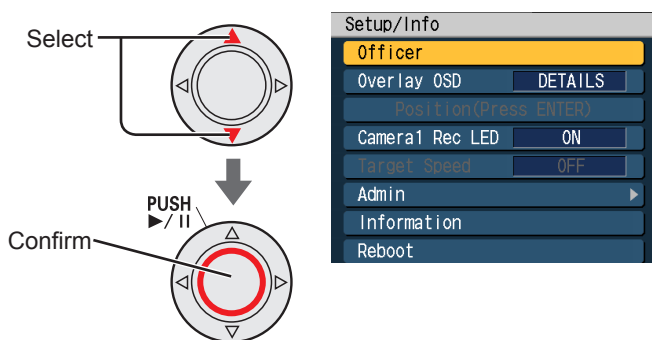

The Menu appears.

2. Use the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

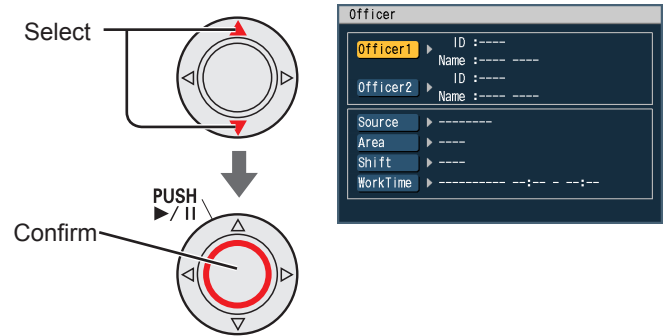

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

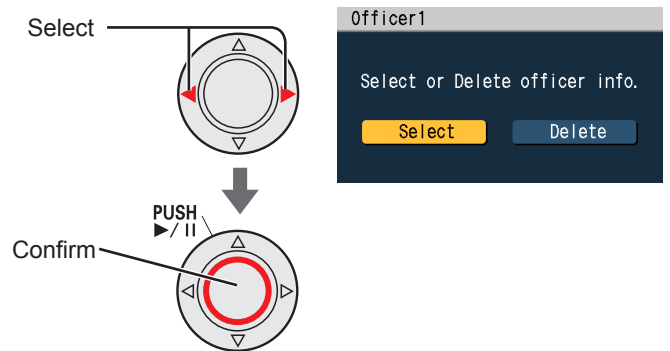

The Officer setup top screen appears.

4. Press the [Δ, ∇] buttons to select [Officer1] and press the [PUSH] button to confirm the entry.

A list of officers registered in the recorder appears.

5. Press the [◀, ▶] buttons to select [Select] and press the [PUSH] button to confirm the entry.

6. Press the [Δ, ∇] buttons to select an officer, (use the [◀, ▶] buttons to go between pages) and press the [PUSH] button to confirm the entry.

The Officer setup top screen appears when officer1 has been set.

Note:

Long names and IDs may not be displayed in full.

Entering Officer2 data

Select [Officer2] in Step 4 mentioned above, and repeat Steps 5 and 6.

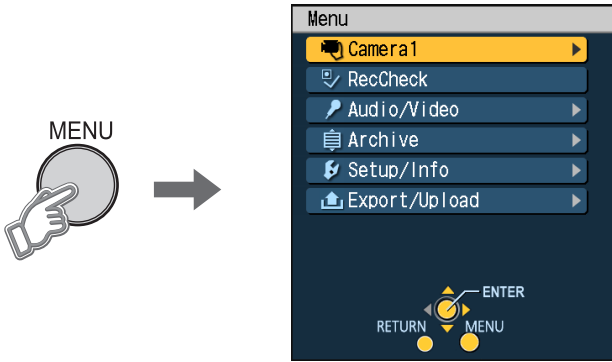

Setting up/Deleting Officer Data (continued)

Setting the Source data

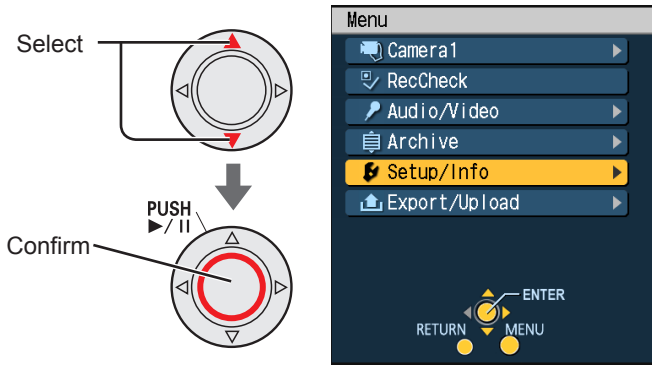

Display the menu on the LCD panel. Then read the Source data loaded in the recorder and set. For details on loading the Source data, see "Load Source" on page 85.

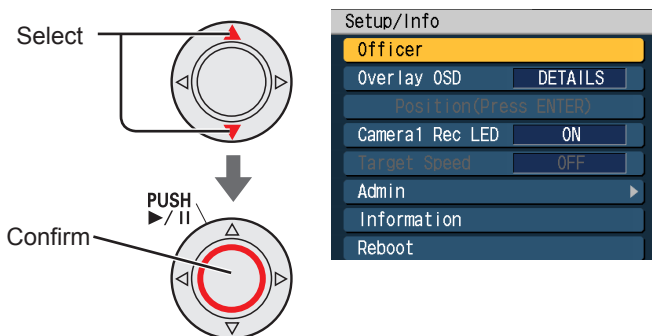

1. Press the [MENU] button.
The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

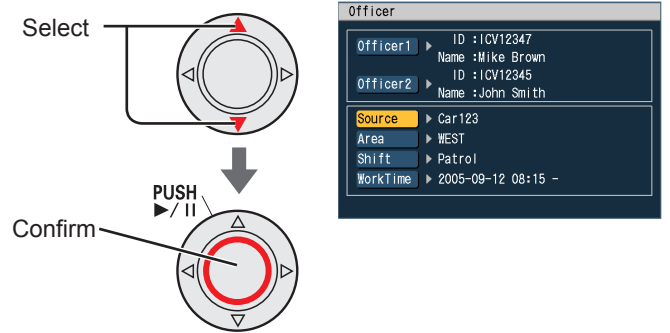

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

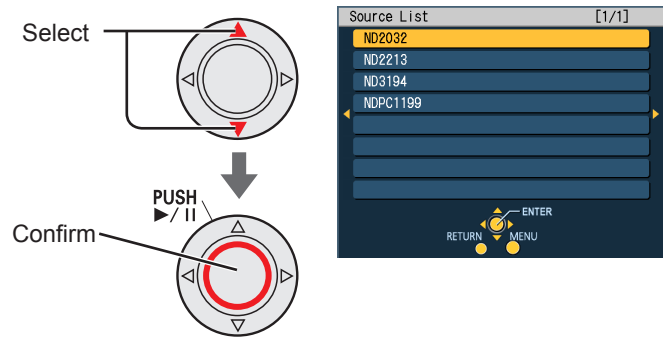

The Officer setup top screen appears.

4. Press the [Δ, ∇] buttons to select [Source] and press the [PUSH] button to confirm the entry.

The registered Source data list appears.

5. Press the [Δ, ∇] buttons to select Source data (use the [◀, ▶] buttons to go between pages), and press the [PUSH] button to confirm the entry.

The Source data are set, and the Officer setup top screen appears.

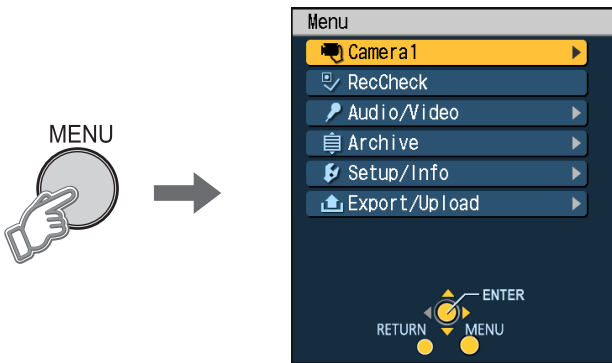

Setting up/Deleting Officer Data (continued)

Setting the Area data

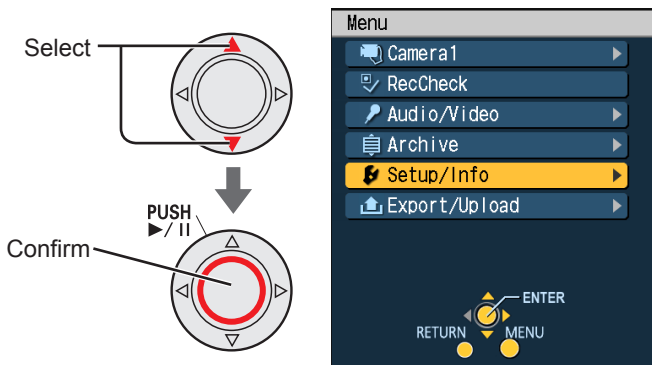

Display the menu on the LCD panel. Then read the Area data loaded in the recorder and set. For details on loading the Area data, see "Load Area" on page 85.

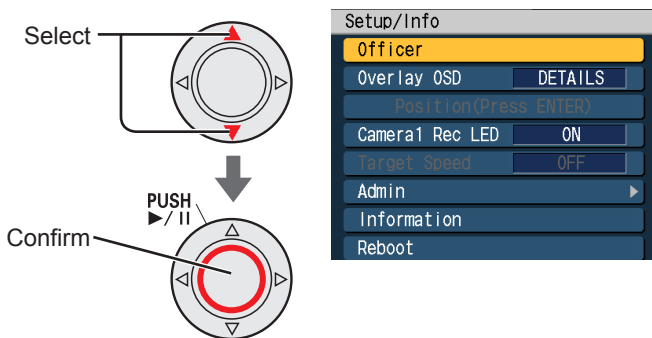

1. Press the [MENU] button.
The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

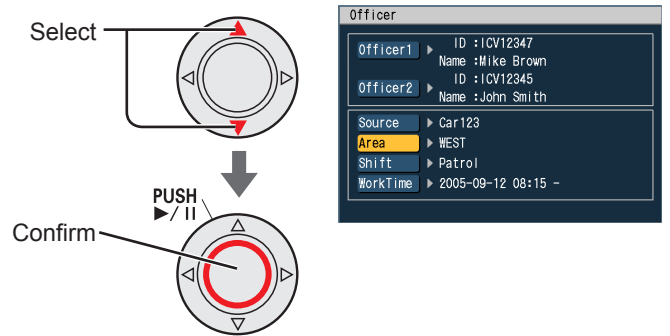

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

The Officer setup top screen appears.

4. Press the [Δ, ∇] buttons to select [Area] and press the [PUSH] button to confirm the entry.

The registered Area data list appears.

5. Press the [Δ, ∇] buttons to select Area data (use the [◀, ▶] buttons to go between pages), and press the [PUSH] button to confirm the entry.

The Area data are set, and the Officer setup top screen appears.

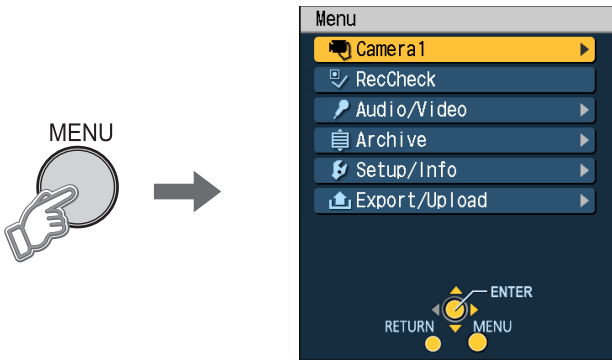

Setting up/Deleting Officer Data (continued)

Setting the Shift data

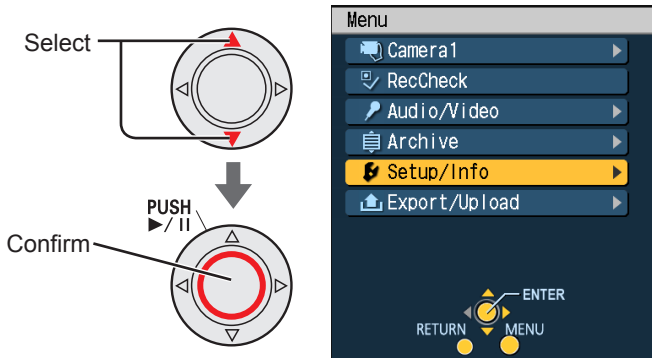

Display the menu on the LCD panel. Then read the Shift data loaded in the recorder and set. For details on loading the Shift data, see "Load Shift" on page 85.

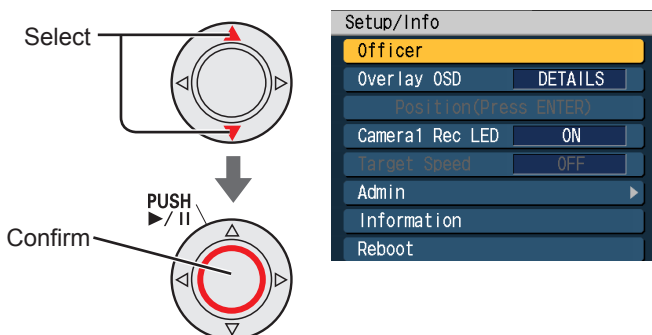

1. Press the [MENU] button.
The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

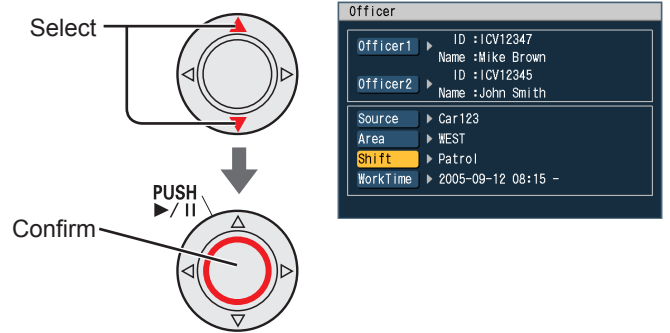

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

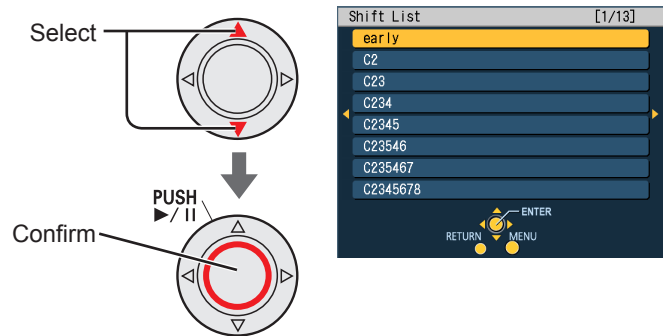

The Officer setup top screen appears.

4. Press the [Δ, ∇] buttons to select [Shift] and press the [PUSH] button to confirm the entry.

The registered Shift data list appears.

5. Press the [Δ, ∇] buttons to select Shift data (use the [◀, ▶] buttons to go between pages), and press the [PUSH] button to confirm the entry.

The Shift data are set, and the Officer setup top screen appears.

Setting up/Deleting Officer Data (continued)

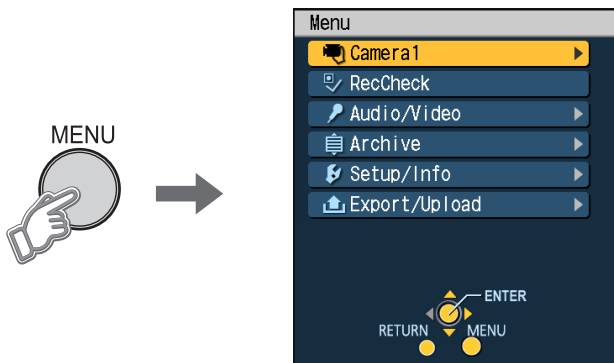

Setting the Work Time data

Display the menu on the LCD panel. Then read the Work Time data loaded in the recorder and set.

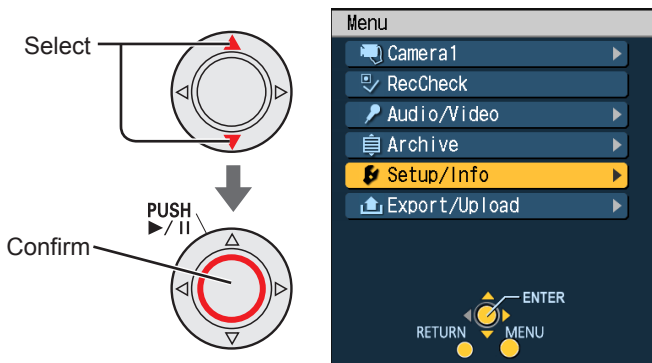

1. Press the [MENU] button.

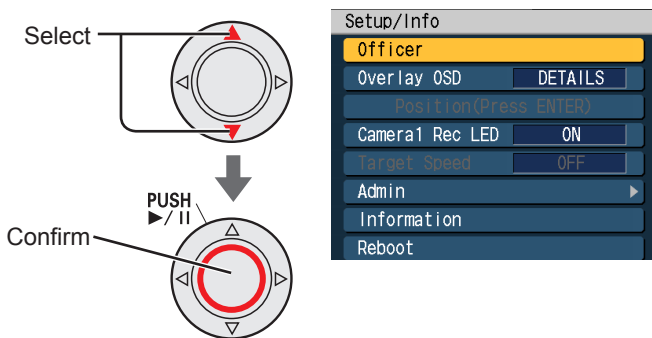

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

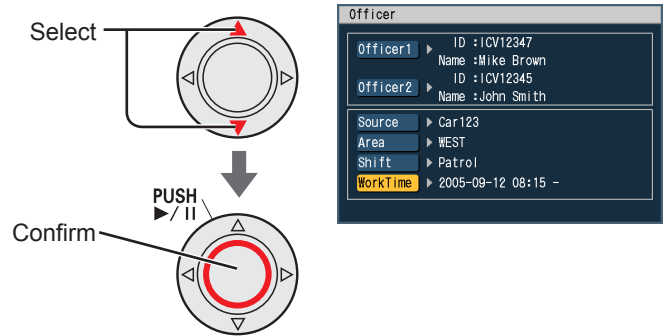

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

The Officer setup top screen appears.

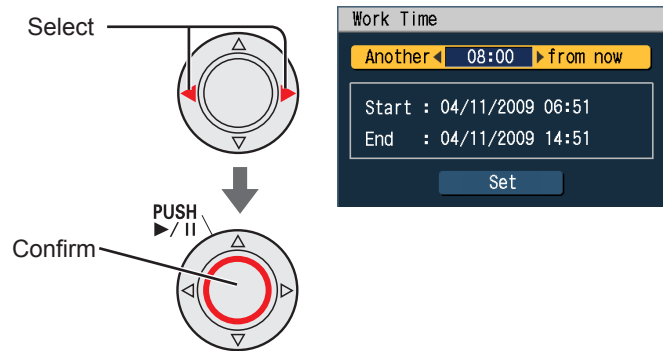

4. Press the [Δ, ∇] buttons to select [Work Time] and press the [PUSH] button to confirm the entry.

The Work Time setting screen appears.

5. Press the [◀, ▶] buttons to set Work Time data.

The setting is made on a 15-minute basis.

6. Press the [Set] button.

The Work Time data are set, and the Officer setup top screen appears.

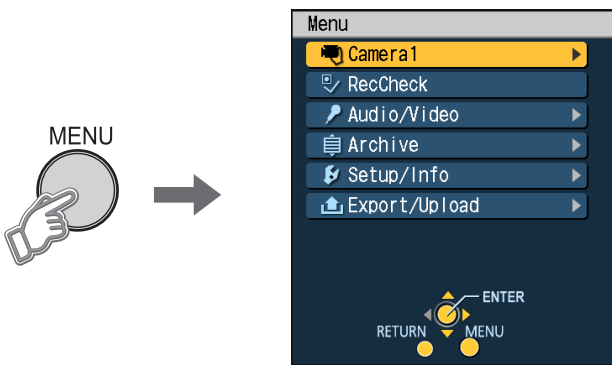

Setting up/Deleting Officer Data (continued)

Deleting entered data

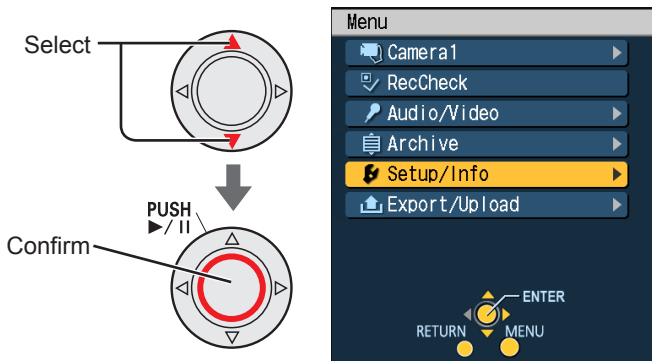

1. Press the [MENU] button.

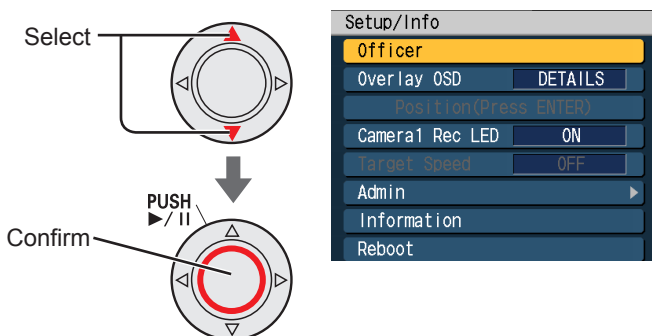

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

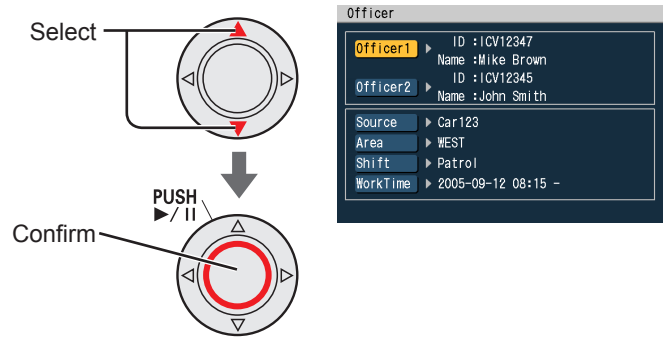

3. Press the [Δ, ∇] buttons to select [Officer] and press the [PUSH] button to confirm the entry.

The Officer setup top screen appears.

4. Press the [Δ, ∇] buttons to select [Officer1] or [Officer2] to be deleted, and press the [PUSH] button to confirm the entry.

Notes:

- Only Officer1 and Officer2 data can be selected. Even if Source, Area, Shift, or Work Time is selected, the data cannot be deleted.
- When the Officer1 data are deleted, the Source, Area, Shift, and Work Time data for the Officer1 are also deleted.

5. Press the [◀, ▶] buttons to select [Delete] and press the [PUSH] button to confirm the entry.

The displayed screen depends on the setup method.

<When set in AUTO mode>

<When set in MANUAL mode>

<When set in LIST mode>

This deletes officer data selected in Step 4.

Viewing Live Video

Use the functions described below to manipulate video output by the camera connected to the [CAMERA 1] connector and sound from the microphone.

Press the [LIVE/ARCHIVE] button to view live video.

A commercially available cameras connected to the [CAMERA 2, 3, 4, 5, 6] connectors cannot be controlled.

Selecting pictures

Press the [CAMERA SELECT] button.

Each press of the button toggles the main and sub pictures. Holding the button pressed for more than two seconds switches the preset (Preset1, Preset2 or Preset3).

Notes:

- Color Camera operations in the Remote Control Panel menu cannot be accessed when one of the [CAMERA] [2] to [6] connector input is selected.
- If the preset setting is enabled, the main screen for Preset1 is displayed with selection of the [CAMERA SELECT] button.

Zooming

To view the overall scene, press the [W] button and zoom out.

To view fine details, press the [T] button and zoom in.

1. Press the [W] button or the [T] button.

The camera zooms in or out while the button is kept depressed.

2. Release the button when reaching the desired image size.

Pressing [AUTO ZOOM] button

It zooms in the image to the target ratio and then pauses before zooming out towards the wide angle end. When the zoom in operation goes beyond the target ratio, it first zooms out to the target ratio.

Making a backlit image easier to view

A dark subject against a bright background can be made easier to view.

Press the [] button.

This button toggles between “ON” and “OFF” at each press. Set this button to “OFF” for normal operation.

Making a dark image easier to view

Use the infrared mode to make dark images easier to view.

Press the [IR MODE] button.

The **IR ON** appears.

Each press of this button switches the function from “AUTO”, “ON” and “OFF”. Set this function to “AUTO” for normal operation.

Note:

This function can be used together with “Adjusting image brightness” (on page 47) to make an image brighter.

Adjusting speaker volume

Adjust the sound volume of the speaker on the remote control panel with the volume control buttons.

1. Press the [+] or [-] button of the [🔊] button.

Pressing the [+] button increasing the volume, while pressing the [-] button decreases the volume.

2. Release the button when reaching the desired volume.

Muting Audio 2 input sound

Press the [AUDIO 2 MUTE] button.

Each press of this button toggles the button between record and mute.

Note:

It is not possible to switch Audio1, 3, or 4 sound recording in this manner.

Adjusting brightness of the LCD panel

Adjust the brightness of the LCD panel on the remote control panel with the brightness buttons.

1. Press the [+] or [-] button of the [☀] buttons.

Pressing the [+] button makes the LCD panel brighter, while pressing the [-] button makes the it darker.

2. Release the button when reaching the desired brightness.

Turning off the LCD panel

Press the [CONTROL PANEL ON/OFF] button.

This turns off the LCD panel and lamps and disables all button functions.

Pressing this button a second time turns on the LCD panel and lamps and button operations again become available.

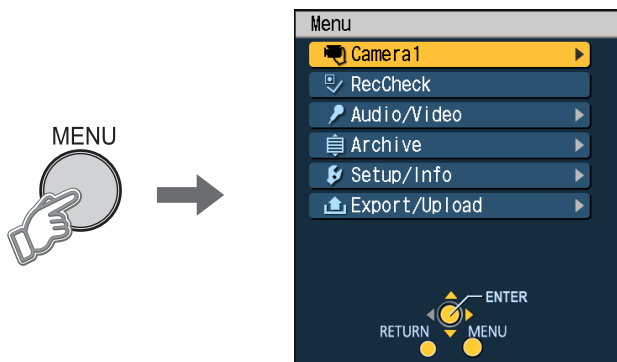

○ Adjusting image focus

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH >/II] button.

The **Auto Focus(Press ENTER)** appears.

3. Press the [PUSH >/II] button.

The autofocus function automatically focuses the image.

■ When the autofocus function cannot properly focus the image.

1. Press the [Δ, ∇] buttons to select [Manual Focus].

The **Manual Focus** appears.

2. To focus on a more distant subject, keep pressing the [▷] button and release it when it comes into focus.

To focus on a closer subject, keep pressing the [◁] button and release it when it comes into focus.

Adjusting image brightness

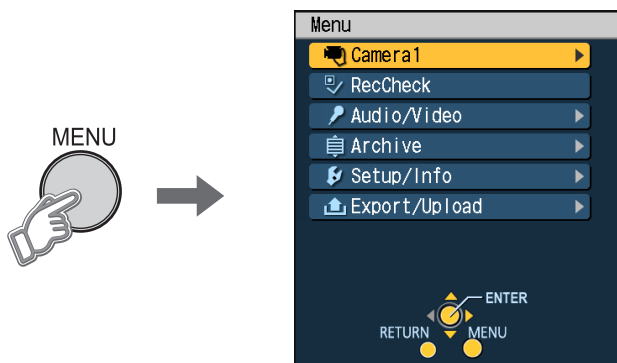

Total brightness of the video captured by the color camera is adjusted.

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH] button.

3. Press the [Δ, ∇] buttons to select [AE [-2 -- +2]].

The **[AE [-2 -- +2]]** appears.

4. Press the [▷] button to make the image brighter.

Press the [◁] button to make the image darker.

Set this button to "0" (zero) for normal operation.

Setting LPR mode

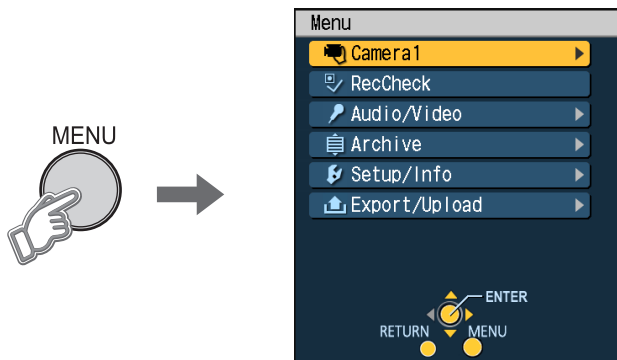

When the camera for the LPR mode is connected to the [CAMERA 3] connector (see “Example” on page 5), use the signal output from the [VIDEO OUT 1] connector, and set [VIDEO OUT 1] on the Audio/Video screen to “CAM3”. Use of license plate recognition requires the following setup. This menu is available only when [Init LPR Mode] in administrator setup is set to “ENABLE” (see “Camera1” on page 88).

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH >/||] button.

3. Press the [Δ, ∇] buttons to select [LPR Mode].

The **LPR Mode** appears.

4. Press the [◀, ▶] buttons to select the recognition mode.

LPR: Engages the License Plate Recognition mode and the [LOCK] lamp blinks. [LPR Shutter Speed] and [LPR Zoom] now become available.

PATROL: Engages the normal mode. [Patrol Shutter Speed] and [Patrol Zoom] now become available.

Note:

Changing [Init LPR Mode] to “DISABLE” in administrator setup while setting “LPR” engages “PATROL” and [LPR Mode] is no longer available.

Viewing Live Video (continued)

Setting shutter speed (in LPR mode)

Set a shutter speed to capture sharp video of fast-moving subjects.

This menu is available only when [Init LPR Mode] in administrator setup is set to "ENABLE" and [LPR Mode] is set to "LPR".

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH] button.

3. Press the [Δ, ∇] buttons to select [LPR Shutter Speed].

The **LPR Shutter Speed** appears.

4. Press the [◀, ▶] buttons to select a shutter speed.

AUTO: Automatically adjusts the shutter speed to ambient light.

1/500, 1/1000: Set as required by the subject.

Note:

A recording started by a recording trigger during license plate recognition will automatically switch the shutter speed to the value set by Patrol Shutter Speed. When recording stop criteria are met, the shutter speed automatically returns to the value set in Step 4.

Viewing Live Video (continued)

Setting camera zoom (in LPR mode)

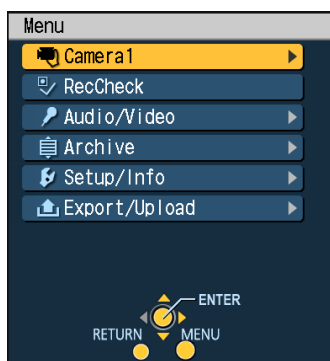

The camera zoom can be set in the range 1.0 to 22.0 x. This menu is available only when [Init LPR Mode] in administrator setup is set to “ENABLE” and [LPR Mode] is set to “LPR”.

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH >/II] button.

3. Press the [Δ, ∇] buttons to select [LPR Zoom].

The **LPR Zoom** appears.

4. Press the [▷] button to raise the ratio.

➔ Raise the ratio.

Press the [◁] button to lower the ratio.

➔ Lower the ratio.

Note:

A recording started by a recording trigger during license plate recognition will automatically switch the camera zoom setting to [Patrol Zoom]. When recording stop criteria are met, the camera zoom setting is automatically switched to [LPR Zoom].

Viewing Live Video (continued)

Setting shutter speed (in PATROL mode)

Set a shutter speed to capture sharp video of fast-moving subjects.

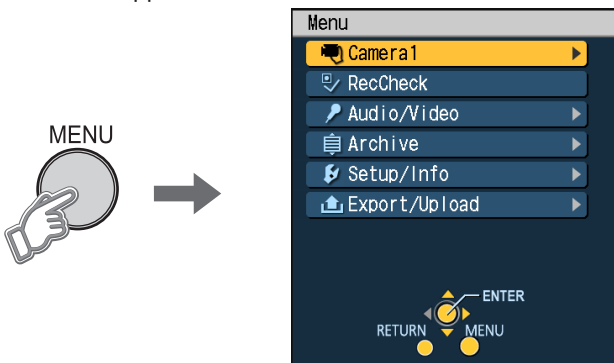

This menu is available only when [Init LPR Mode] in administrator setup is set to “ENABLE” and [LPR Mode] is set to “PATROL”.

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH] button.

3. Press the [Δ, ∇] buttons to select [Patrol Shutter Speed].

The **Patrol Shutter Speed** appears.

4. Press the [◀, ▶] buttons to select a shutter speed.

AUTO: Automatically adjusts the shutter speed to ambient light.
1/100, 1/500, 1/1000: Set as required by the subject.

Setting camera zoom (in PATROL mode)

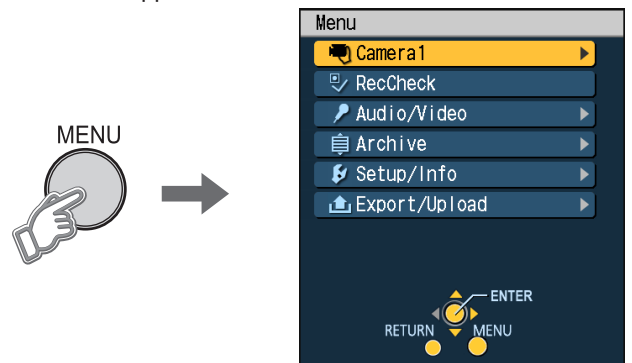

The camera zoom can be set in the range 1.0 to 22.0 x. This menu is available only when [Init LPR Mode] in administrator setup is set to “ENABLE” and [LPR Mode] is set to “PATROL”.

Note:

This menu is available only when the [CAMERA 1] connector input is selected.

1. Press the [MENU] button.

The Menu appears.

2. Confirm that [Camera1] is selected, and press the [PUSH] button.

3. Use the [Δ, ∇] buttons to select [Patrol Zoom].

The **Patrol Zoom** appears.

4. Press the [▶] button to raise the ratio.

Press the [◀] button to lower the ratio.

Viewing Live Video (continued)

Checking audio

Sound output is normally off when viewing live video. Use the following steps to check that sound is input normally.

1. Press the [MENU] button.

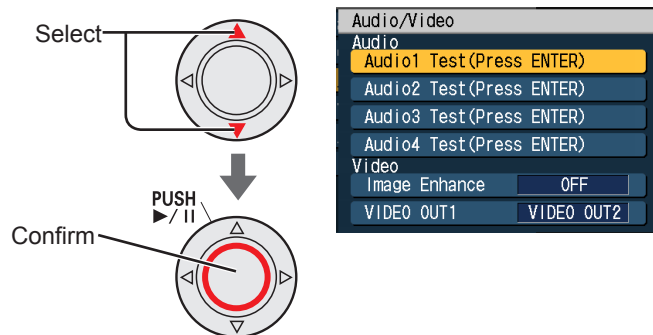

The Menu appears.

2. Use the [Δ, ∇] buttons to select [Audio/Video] and press the [PUSH/II] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select the channel to be checked, and then press the [PUSH/II] button.

Sound is output while the [PUSH/II] button is depressed.

Notes:

- The output sound may be too loud depending on the sound volume setting. Lower the sound volume as required.
- Audio channels set to OFF on the Audio Allocation screen in Administrator setup cannot be selected.

Viewing Live Video (continued)

Adjusting the image enhancement

The brightness of the dark part of the main picture is adjusted. The sub picture is not adjusted.

1. Press the [MENU] button.

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Audio/Video] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Image Enhance].

4. Press the [◀, ▶] buttons to set brightness, and press the [PUSH] button to confirm the entry.

LOW: Adjusting slightly
HIGH: Adjusting strongly
OFF: No adjustment

Viewing Live Video (continued)

Setting the output video

Set the through-out signal output from the [VIDEO OUT 1] connector on the recorder.

1. Press the [MENU] button.

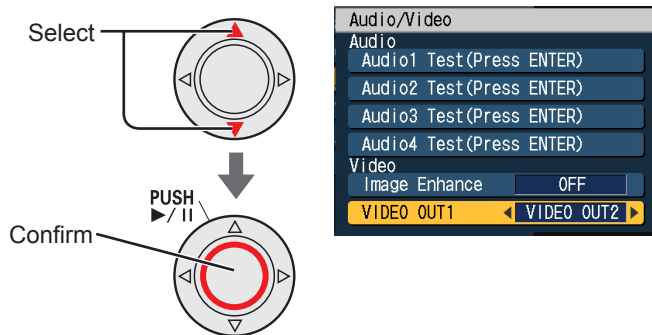

The Menu appears.

2. Use the [Δ, ∇] buttons to select [Audio/Video] and press the [PUSH >/II] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [VIDEO OUT1].

4. Press the [◀, ▶] buttons to select a signal, and press the [PUSH >/II] button to confirm the entry.

CAM1: Signal input to the [CAMERA 1] connector
CAM3: Signal input to the [CAMERA 3] connector
VIDEO OUT2: The same signal as that output from the [VIDEO OUT 2] connector

Viewing Live Video (continued)

Viewing the status of the recorder (Overlay OSD)

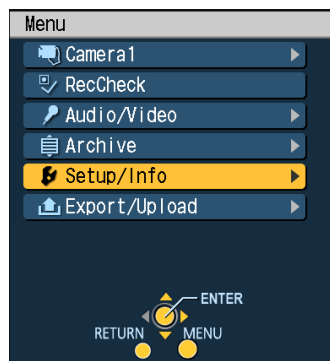

The following function is provided to enable viewing the status of the recorder and the trigger signal (GP11-16) status.

1. Press the [MENU] button.

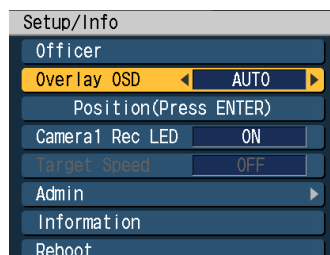

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH >||] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Overlay OSD].

4. Press the [◀, ▶] buttons to select "AUTO", "SIMPLE", "DETAILS" or "OFF".

AUTO: The simple overlay OSD (see page 56) appears for 3 to 5 seconds when any of the following items have been changed.

- Mode indication
- Status display

SIMPLE: The simple overlay OSD appears.

DETAILS: The detailed overlay OSD appears.

OFF: The overlay OSD closes.

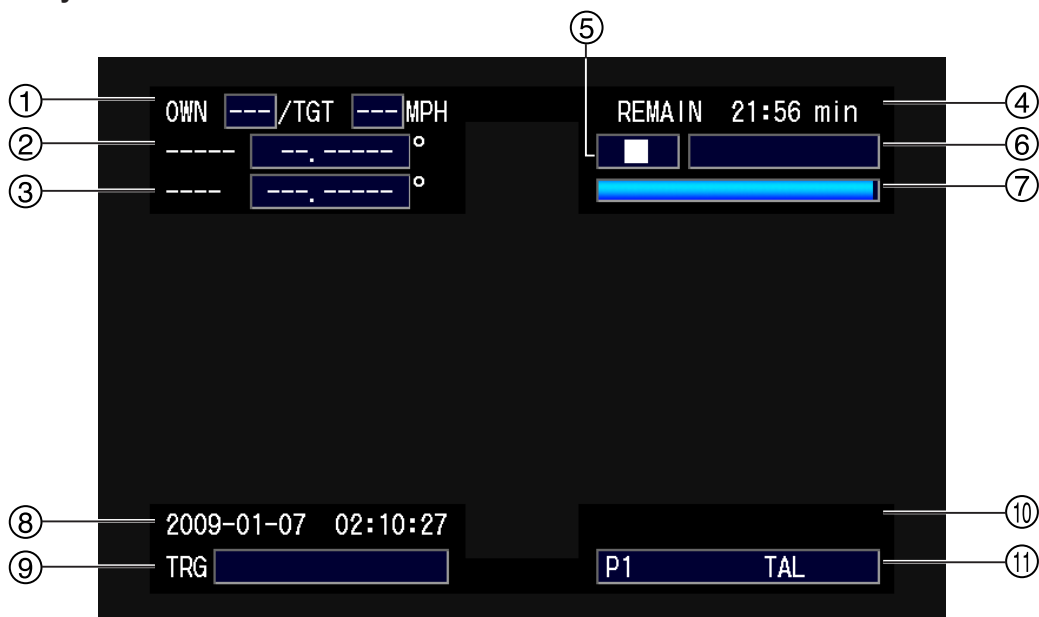

Notes:

- The administrator can set the Overlay OSD (Init Overlay OSD) selected at power-on.
- See the next page for how to read the overlay OSD.
- When "AUTO" is selected and the [BOOK MARK] button is pressed, the simple overlay OSD does not appear but the bookmark icon  appears for 1 to 2 seconds.

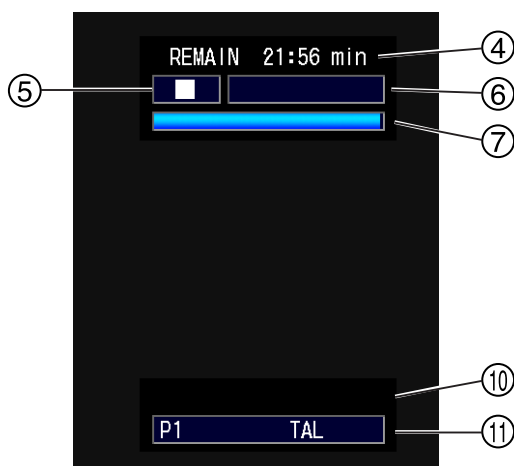

Adjusting the display position

When [Main OSD] or [Sub OSD] is set to OFF on the Embedded OSD screen in administrator setup, select the [Position (Press ENTER)] on the Setup/Info screen, and press the [PUSH >||] button. Then the display position moves up and down.

<Detailed Overlay OSD>

<Simple Overlay OSD>

① Speed (MPH / km/h)

OWN: Own vehicle speed

Own vehicle speed detected by a Radar or GPS connected to the recorder is displayed. If the speed data of both the Radar and GPS are sent from the recorder, the speed detected by the Radar is displayed.

TGT: Target vehicle speed

Target vehicle speed indication depends on the type of radar gun that is connected. For example, one ProLaser3 measurement indicates vehicle speed for a period of about 10 seconds. If another measurement is made within this 10 second period (approx.), the speed indication is updated accordingly.

Note:

“ERR” appears to indicate that the radar gun measurement result is not correct.

② Location information (latitude)

③ Location information (longitude)

④ Remaining SDHC Memory Card recording time (HH : MM)

REMAIN: The remaining recordable time

LOOP TIME: Loop period (total recording time)

- The remaining recording time is updated about every 30 seconds.
- When Loop recording is set to [ON], loop period (total recording time) is displayed.

Note:

The total recording time does not include pre-recording and post-recording time.

⑤ Mode indication

■: paused ●: recording

⑥ Status display

Displays the status of the recorder and SDHC Memory Card.

<Status of the recorder>

PON: Power ON recording “ON”

LOP: Loop recording “ON”

INT: Intermittent recording “ON”

<Status Display>

CARD FULL, CARD PROTECT, VUP CARD, UNFORMATTED, NO CARD, READ ERROR, UNSUPPORTED, PLAY ERROR (see “Status Display” on page 118)

- ⑦ **Remaining time on the SDHC Memory Card**
Displays the remaining time on the SDHC memory card that can be recorded by the recorder.
- ⑧ **Date/Time**
- ⑨ **Trigger signal (GPI1-16) input status**
(GPI1 to 16 are displayed in order from the left.)
The characters assigned by [Display] appear when the state set by [Detection] occurs.
- ⑩ **Mark position**
 -  : Bookmark position
 -  : Upload
- ⑪ **Setup status of the recorder**
 - P1** : Preset1 input is selected.
 - P2** : Preset2 input is selected.
 - P3** : Preset3 input is selected.
 - IR** : Camera IR mode is "ON".
 - IRA** : Camera IR mode is "AUTO".
 - BL** : Camera backlight compensation is "ON".
 - TAL** : Camera1 Rec LED is "ON".
 - LOCK** : Operation button lock is "ON".

Viewing Live Video (continued)

Disconnecting the recorder from a Front-End application

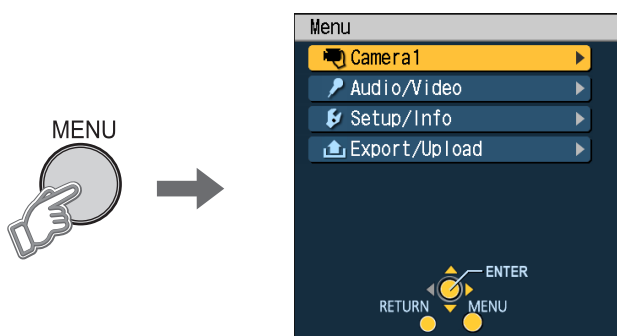

Connecting a PC with Front-End application installed to the recorder and starting up a Front-End application freezes the recorder in the live screen and disables the following operations.

- Setting up/Deleting Officer Data
- A trial shoot
- **Playback**
- Administrator Setup
- Exporting to the USB memory device

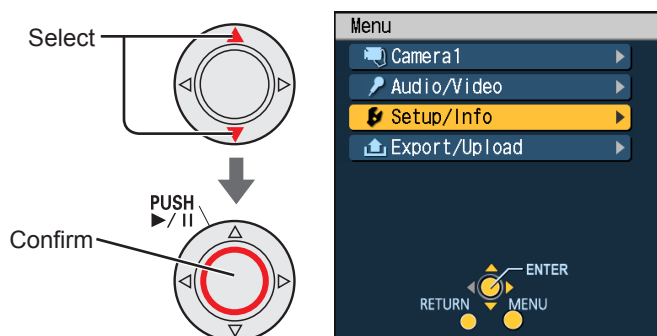

Follow these steps to disconnect a Front-End application from the recorder to enable the above operations.

1. Press the [MENU] button.

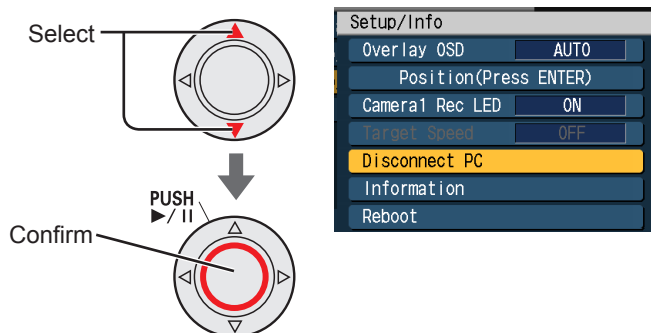

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Disconnect PC] and press the [PUSH] button to confirm the entry.

These steps disconnect the recorder from a Front-End application.

Notes:

- Do not disconnect a PC with Front-End application from the recorder during automatic uploading.
- For details on how to restart the Front-End application, see the Operating Instructions of the Front-End application.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Recording

Starting and stopping recording

Starting recording

Press the [REC] button.

This starts video and sound recording. The live screen appears automatically if not already on. The Remote Control Panel, the Color Camera and the Memory Card Recorder [REC] lamps go on during recording.

Note:

The Color Camera [REC] lamp goes on regardless of camera input setting.

There are also other methods for starting recording. For details, refer to “Starting Recording” on page 8.

Stopping recording

Press the [STOP] button (■).

Pressing the [STOP] button turns off the [REC] lamp and video and sound recordings stop when the post record*1 interval has elapsed. Then the [BUSY] lamp goes off.

Notes:

- When recording is stopped under the conditions in which Classify information is registered (see page 89), Classify on the Management Mode screen is set to “ENABLE” or “FORCE” (see page 89), and Loop Rec on the Rec. Play screen is set to “OFF” (see page 81), the Classify selection screen **Classify** **FOOTBALL** appears. Select the classify information with the [◀, ▶] buttons and press the [BOOK MARK] or [RETURN] button. The classify information will be added to the file.
- In the following cases, the Classify screen disappears and the classify information cannot be added.

*1 Post record is the capability of including material from an interval after the specified stop point in recording. The interval is set by an administrator.

- When automatic uploading has started
- When automatic restoring has started
- When the CONTROL PANEL button is set to OFF
- When a fatal error has occurred
- When the SDHC Memory Card slot cover is open
- When the unit is in ACC-OFF mode

There are also other conditions for stopping recording. For details, see “Stopping Recording” on page 9.

Adding bookmarks

A bookmark can be added to a file that is being recorded to mark it for playback. (See “Moving back to a previous skip location to start playback” and “Moving to the next skip location to start playback” on page 65.)

Press the [BOOK MARK] button.

The bookmark icon  appears for 1 or 2 seconds.

Notes:

- The bookmark icon  appears on the overlay OSD. When [Overlay OSD] is “OFF” (see “Viewing the status of the recorder (Overlay OSD)” on page 55), the bookmark icon does not appear.
- Bookmarks can be added with a minimum interval of 2 seconds.
- A bookmark cannot be entered until about 2 seconds after recording starts.
- It is possible to move the playback location to the bookmark during playback.
- Bookmarks can be added also during playback. (See “Adding bookmarks” on page 66.)
- Bookmarks but not classify tags can be added during recording.
- Classify tags can be added only during playback. (See “Adding bookmarks” on page 66.)

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Recording (continued)

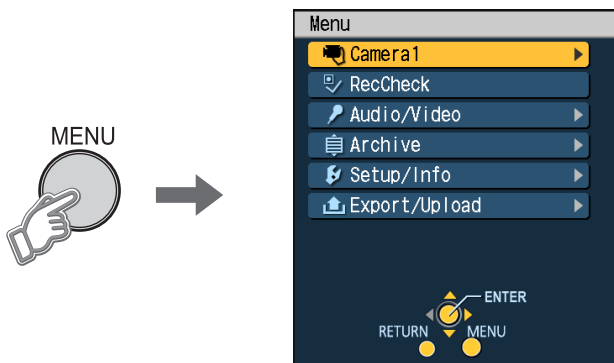

☰ A trial shoot

When Front-End application is running, or Back-End application is streaming a picture, this unit freezes in the live screen, and a trial shoot is disabled.

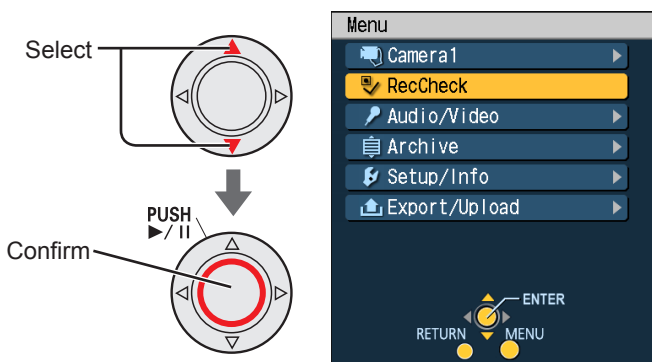

The following is a description of a test to check if recording can be correctly made.

1. Press the [MENU] button.

The Menu appears.

2. Press the [Δ, ∇] buttons to select [RecCheck] and press the [PUSH] button to confirm the entry.

A five-second recording is made and played back.

Notes:

- A trial shoot cannot be performed during recording or playback.
- The trial shoot portion of a recording is automatically deleted after playback.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Recording (continued)

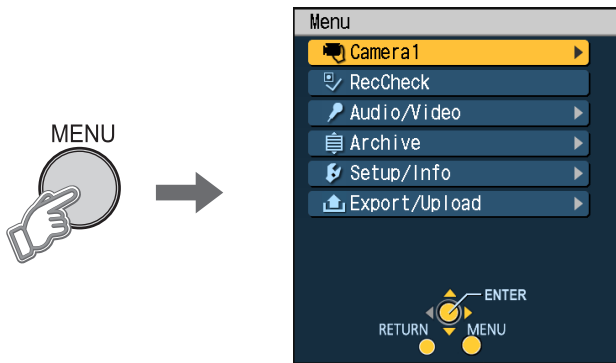

Setting the target speed

If the target speed detected with the radar gun exceeds the value set here, it is used as a record trigger.

1. Press the [MENU] button.

The Menu appears.

4. Press the [<, >] buttons to set the speed.

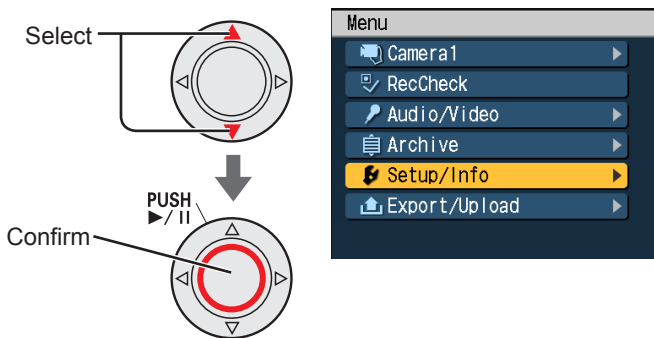

Setting values: OFF, 1, 2, ..., 200

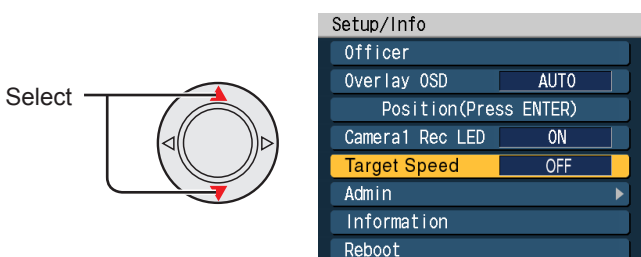

Notes:

- [Target Speed] may not be selected due to the settings on the Trigger screen in Administrator setup.
- Set Connection Of Radar on the Radar/GPS screen in Administrator setup to "Recorder".

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Target Speed].

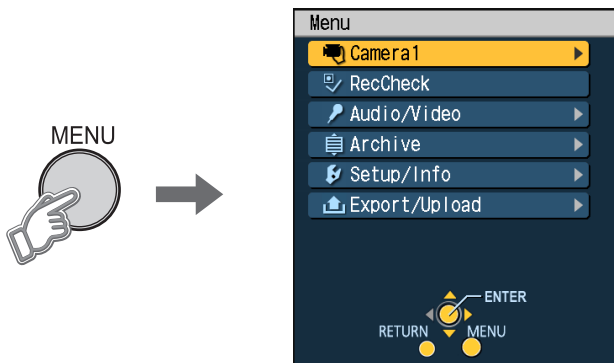

To turn off the [REC] lamp during recording

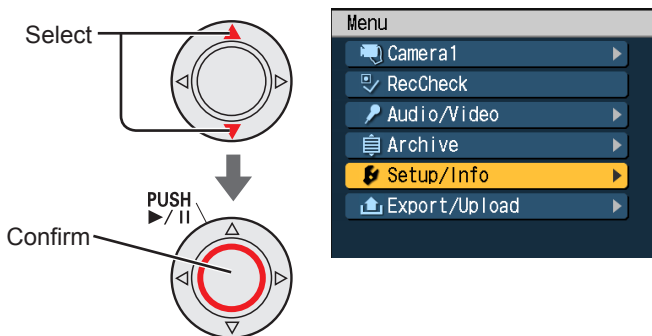

The [REC] lamp on the camera connected to the [CAMERA 1] connector lights during recording. The following steps allow you to keep this lamp off at all times.

1. Press the [MENU] button.

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] buttons to confirm the entry.

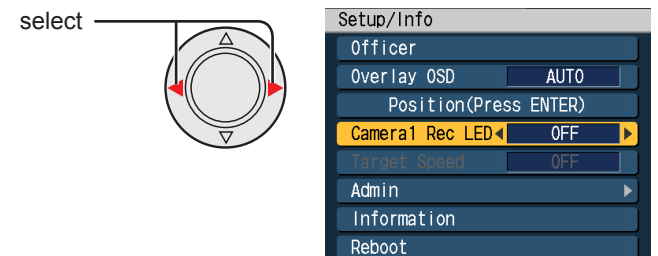

3. Press the [Δ, ∇] buttons to select [Camera1 Rec LED].

Note:

If "Camera1" has not been set for any of Preset1, Preset2, and Preset 3 on the Video Allocation screen in Administrator setup, [Camera1 Rec LED] cannot be selected.

4. Press the [◀, ▶] buttons to select "OFF".

The lamp will now remain off at all times.

Playback

When Front-End application or the streaming player of Back-End application is running, this unit freezes the live screen, and the card cannot be played back.

● Playback

Press the [LIVE/ARCHIVE] button.

The playback screen appears and playback starts from the location where playback was last made. If recording was started or stopped prior to pressing the [LIVE/ARCHIVE] button, playback starts from the beginning of the recorded file.

Notes:

- In the following cases, recorded files may not be played back from the beginning.
 - When [Setup/Info]-[Admin]-[Date/Time]-[Date/Time] is changed
 - When [Setup/Info]-[Admin]-[Date/Time]-[TimeZone] is changed
 - When [Setup/Info]-[Admin]-[Rec/Play]-[Rule of Filename] is changed
 - When the clock time is corrected by GPS
- If playback was previously ended at the end of the file, playback is paused.
- If the LCD panel is turned off by using the [CONTROL PANEL ON/OFF] button, file playback stops.
- If Front-End application or the streaming player of Back-End application is activated during playback, playback stops.

■ Name of record file

A record file name that appears on the overlay OSD or playback file list screen takes a name that is based on the local time when recording started. A date format is set under Style on the Date/Time screen in Administrator setup. (See "Date/Time" on page 84.)

Note:

A physical filename (for example, a filename that appears on a PC) can be indicated either in world or local time depending on Administrator setup.

■ Intermittent recording files

An intermittent recording file records only one video frame per second but no audio.

Note:

The playback speed of an intermittent recording file is slower than a normal file.

■ Loop recording files

A loop recording file is automatically separated, and the starting time of recording at separation will be the filename.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

● Changing playback method

■ Playback and pause

Press the [PUSH] button.

Playback starts. Press again to pause playback. Use this button to pause slow, rewind and fast forward.

■ Slow

Press the [▶] button.

Slow plays back at 1/10 or 1/2 of normal speed. Each press changes playback speed from 1/10 to 1/2 and 1/10.

Note:

Intermittent recording files cannot be played back at slow speed.

■ Quick Replay

Press the [↶] button.

Playback starts 7 seconds prior to the current location. During slow playback, slow playback starts 7 seconds prior to the current location.

■ Rewinding

Press the [◀◀] button.

Rewinding is performed at 4, 20 or 200 times normal speed. Each press changes the rewind speed from 4, to 20, 200 and back to 4 times normal speed.

■ Fast forward

Press the [▶▶] button.

Fast forwarding is performed at 4, 20 or 200 times normal speed. Each press changes the fast forward speed from 4, to 20, 200 and back to 4 times normal speed.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

Skip back button
Skip forward button

■ Moving back to a previous skip location to start playback

Press the [⏮] button.

Playback starts from the previous skip location. If the current location is 5 seconds or less away from a skip location, playback starts from the skip location before the previous skip location. However, if the current location is 5 seconds or less away from the first skip location in the file, playback starts from a skip location in the previous file. If there is no previous file, playback starts from the current location without skipping.

■ Moving to the next skip location to start playback

Press the [⏭] button.

Playback starts from the next skip location. If the current location comes after the last skip location in the file, playback starts from a skip location in the next file. If there is no next file, playback starts from the current location without skipping.

Notes:

- The skip location may be a bookmark, head of file or a trigger position (one per file) at which recording began. However, no trigger position can exist in automatically divided files.
- One of the following icons may appear on an overlay OSD screen for about 2 seconds depending on the location playback skips. When not shown on an overlay OSD screen, they appear on the LCD panel.
 - ⏮ : File beginning
 - ⏭ : Trigger position
 - 📌 : Bookmark position
- It is recommended that the skip location be placed at the [Trigger/Marker] or [Head of File] in the administration setup. (See "Skip Target" on page 83.)
- Up to 999 bookmarks can be skipped. You cannot skip to the bookmark position exceeding this limit.
- When the [⏮] button or [⏭] button is pressed, playback stops momentarily while the skip location is searched for, and then playback resumes from that position.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Setting bookmarks

Adding bookmarks

Bookmarks can be added to a file during playback, pause or slow playback. Loading Classify tags from a USB memory device in advance to the recorder allows the operator to add both bookmarks and Classify tags. (See "Load Classify" on page 85.)

When no Classify tags are loaded

Press the [BOOK MARK] button.

- A bookmark icon  appears.
- Playback or slow playback stops for a short while and then resumes.

When Classify tags are loaded

1. Press the [BOOK MARK] button.

Classify < FOOTBALL > *1 appears.

2. Press the [< , >] buttons to select a Classify tag and press the [BOOK MARK], [RETURN] or [MENU] button to confirm the entry.

- The recorder returns to previous playback status, and the bookmark icon  appears enabling insertion also of Classify tags.
- Playback or slow playback stops for a short while and then resumes.

Notes:

- The bookmark icon  appears on the overlay OSD. When [Overlay OSD] is "OFF" (see "Viewing the status of the recorder (Overlay OSD)" on page 69), the bookmark icon does not appear.
- Bookmarks can be added with a minimum interval of 2 seconds.
- Playing back a segment with a bookmark shows a bookmark icon  for about 2 seconds.
- Once characters are set for a classify tag, the default setting "---" is not displayed.
- If a classify tag of the video being played is not registered on the recorder used for playback, the classify tag is grayed out during playback. Once the grayed-out classify tag is edited, the original classify tag cannot be retrieved.

- *1 • The last used classify tag appears.
- The last used classify tag remains even after a power off. However, if classify tags are reloaded, "---" appears.
- Long classify tag character strings may not be displayed in full.
- Classify tags where bookmarks cannot be set, for example a recording file with unregistered classify tags, are displayed in gray.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

☰ Selecting a file for playback

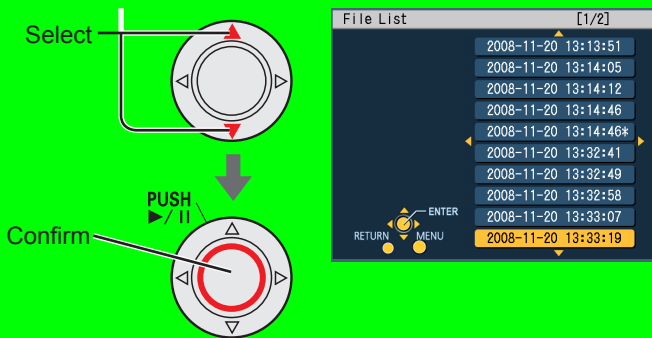

1. Press the [MENU] button.

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Archive] and press the [PUSH / II] button to confirm the entry.

The playback file list screen appears.

Notes:

- [Archive] is not available when there are no playback files.
- Files appear in the order of the filenames (see "Rule of Filename" on page 82) that are assigned at recording.

"WT" (world time) files are displayed in recording start order (but the time is converted and indicated in local time).

↓
"LT" (local time) files are displayed in recording start order.

- When a file is recorded across two SDHC Memory Cards and is split into two files, the start time of the latter file is suffixed by "*". Also, if two or more files have the same start time, the start time of the second and succeeding files are suffixed by "*".

3. Press the [Δ, ∇] buttons to select a file to play back.

(Use the following functions to go between pages.)

- Press the [◀, ▶] buttons once to turn pages one at a time.
- Keep pressing the [◀, ▶] buttons to go quickly between pages. This function turns pages up to page 3 in one-page increments and pages from page 4 in 10-page increments.

4. Press the [PUSH / II] button to start playback.

Playback starts from the beginning of the file. When playback reaches end of the file, playback is paused.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

Turning Playback sound ON and OFF

4. Press the [◀, ▶] buttons to select “ON” or “OFF”.

1. Press the [MENU] button.

The Menu appears.

Notes:

- An administrator can set the audio output (Init Audio Out (Play)) selected at power-on.
- An audio channel set to OFF on the Audio Allocation screen in Administrator setup cannot be selected. (See “Audio Allocation” on page 78.)

2. Press the [▲, ▼] buttons to select [Audio] and press the [PUSH ▶/||] button to confirm the entry.

3. Press the [▲, ▼] buttons to select an audio channel to be played back.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

Viewing the status of the recorder (Overlay OSD)

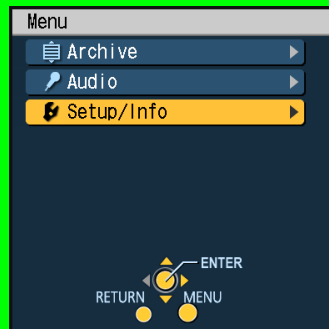

Use the following function to see the status of the recorder or trigger signal (GPI1-16) status when a played back file was recorded.

1. Press the [MENU] button.

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Overlay OSD].

4. Press the [<, >] buttons to select "AUTO", "SIMPLE", "DETAILS" or "OFF".

AUTO : The simple overlay OSD appears for 3 to 5 seconds when any of the following items have been changed (see page 70).

- Playback filename
- Mode indication
- Playback speed and status indication

SIMPLE: The Simple overlay OSD appears.

DETAILS: The Detailed overlay OSD appears.

OFF: Overlay OSD closes.

Notes:

- An administrator can set the Overlay OSD (Init Overlay OSD) selected at power-on.
- See the next page for how to read the overlay OSD.
- When "AUTO" is selected and the [BOOK MARK] button is pressed or the bookmark position is reached, the simple overlay OSD does not appear but the bookmark icon  appears for 1 to 2 seconds.
- When "AUTO" is selected and the trigger position is reached, the simple overlay OSD does not appear but the trigger icon  appears for 1 to 2 seconds.

Adjusting the display position

When a picture recorded with Main OSD or Sub OSD embedded on the Embedded OSD screen in Administrator setup set to OFF is played, Trigger, Time, and Source@ Area that are set to ON on the Embedded OSD screen are displayed. Select [Position (Press ENTER)] on the Setup/Info screen then press [PUSH] button. Then the display position will move up and down.

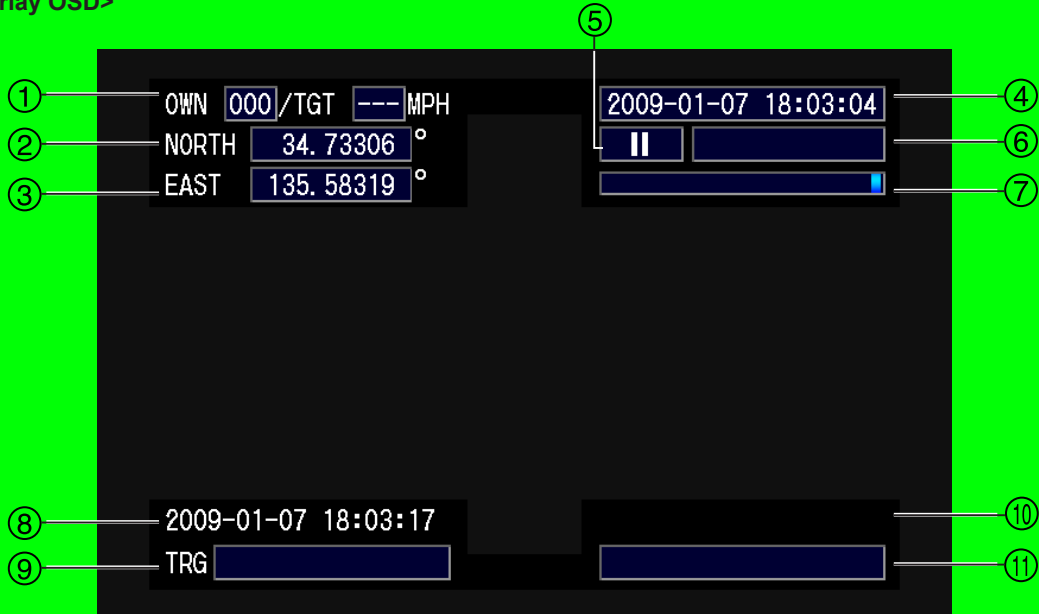

Note:

The OSD position of the picture recorded with Main OSD or Sub OSD on the Embedded OSD screen in Administrator setup set to ON cannot be changed.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Playback (continued)

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

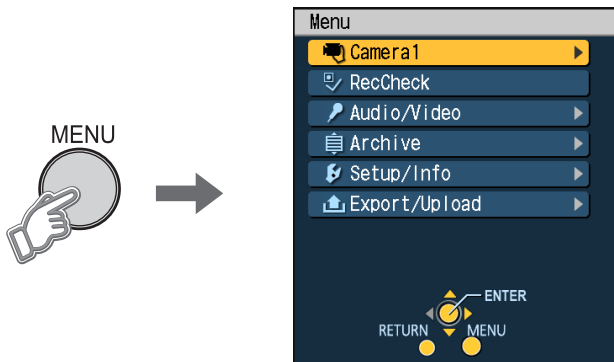

Displaying Product Information

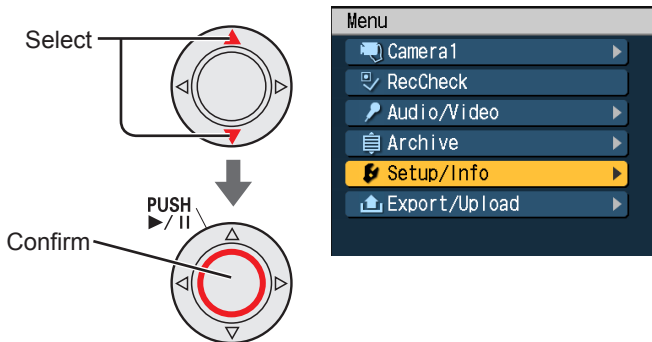

Viewing SDHC Memory Card type and software version

1. Press the [MENU] button.

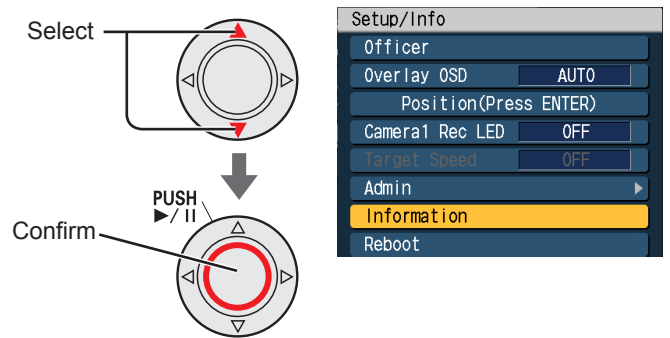

The Menu appears.

2. Press the [Δ, ▽] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ▽] buttons to select [Information] and press the [PUSH] button to confirm the entry.

The Information screen appears.

- This displays SDHC Memory Card model and card information. The following information appears depending on card type.
 - UNFORMATTED
 - CARD PROTECT
 - CARD ERROR
 - CARD FULL
 - UNSUPPORTED
 - VUP CARD
 - NO CARD
- This opens the product information screen that contains the software version information.
- The product name is defined by the SD Card Association and may differ from the SDHC memory card product number.

Displaying Product Information (continued)

Viewing error log data

Use the following procedure to open a dialog showing up to five of the most recent errors.

1. Perform steps 1 to 3 in “ Viewing SDHC Memory Card type and software version”.
2. This selects [Last Errors]. Press the [] button to accept.

This dialog shows the most recent error data (the items listed below).

- Month/day (MM/DD)
- Hour/minute (HH : MM)
- Error No.
- Error type (Fatal Error/Error)
- Error message (the first 40 characters appear)

Notes:

- Error data with a low priority is also displayed.
- The following error numbers do not appear as error log data.
E00604, E08601, E20901, E20911, E20912, E20921, E20922, E22420 to E22432, E24010, E24011, E24030, E24110, E28206 to E28203

Transferring Files

Exporting files

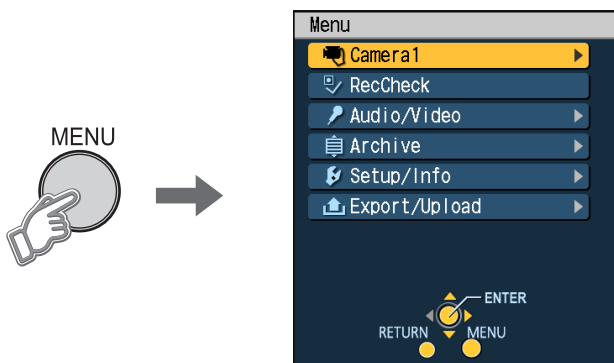

Video and audio data recorded on the SDHC Memory Cards are copied to the USB memory device. Exported data are deleted from the cards.

Notes:

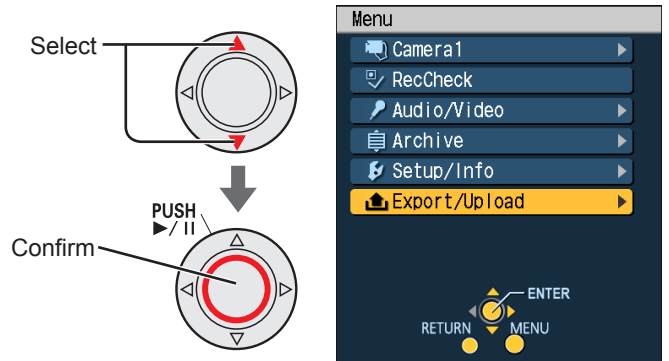

- Export cannot be executed while recording or post-recording. If export is selected while recording, a confirmation dialog box appears. Select [Stop] to stop recording and start exporting, or [Cancel] to continue recording. If export is selected while post-recording, post-recording stops and export starts.
- If the updating file is stored on the USB memory device, error message “E28406” appears and files cannot be exported.
- If a USB memory device for authentication is removed or inserted, an error message “E28201” appears. While exporting, do not insert or remove the USB memory device, even if it is not accessed.
- Be sure to set Export Menu on the Management Mode screen in Administrator setup to ENABLE. Otherwise [Export/Upload] cannot be selected. (See “Export Menu” on page 89.)
- If the Front-End application is connected, export is disabled.
- Export will be canceled if the Front-End application is to be connected during exporting.

1. Press the [MENU] button.

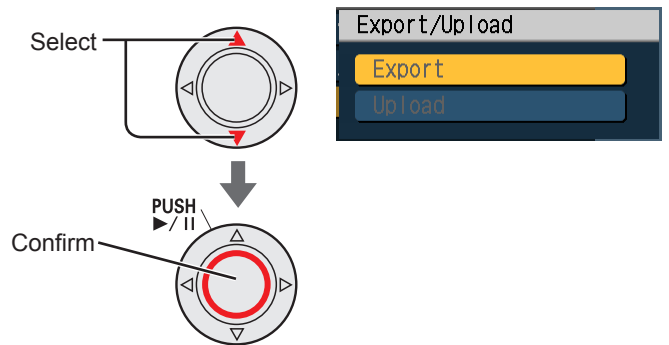

The Menu appears.

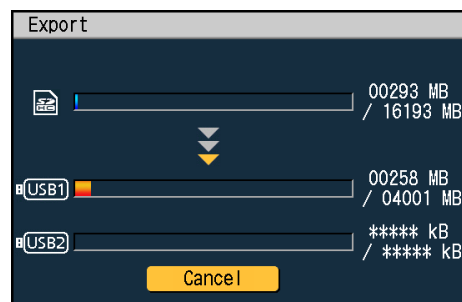

2. Press the [Δ, ∇] buttons to select [Export/Upload] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Export] and press the [PUSH] button to confirm the entry.

Files are exported.

Note:

The USB1 and USB2 progress bars are displayed on the screen, but the USB connectors on the recorder are not discriminated. If two USB memory devices are connected, you cannot specify the device used for exporting. Check the access lamp on the USB memory device.

Cancel exporting

Press the [PUSH] button.

Exporting is canceled immediately when the button is pressed, but the data transferred before the button was pressed are exported.

Transferring Files (continued)

Uploading files

Video and audio data recorded on the SDHC Memory Cards are uploaded to the Back-End server. You can upload data manually or automatically with Upload Mode on the Management Mode screen in Administrator setup. Uploaded data are deleted from the cards.

Notes:

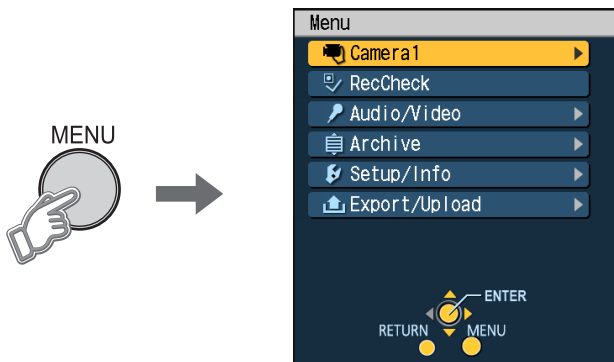

- Upload cannot be executed while recording or post-recording. If upload is selected while recording, a confirmation dialog box appears. Select [Stop] to stop recording and start uploading, or [Cancel] to continue recording. If upload is selected while post-recording, post-recording stops and upload starts..
- For uploading, the network connection must be enabled.
- If the Back-End application is not connected, upload is disabled.

Uploading files manually

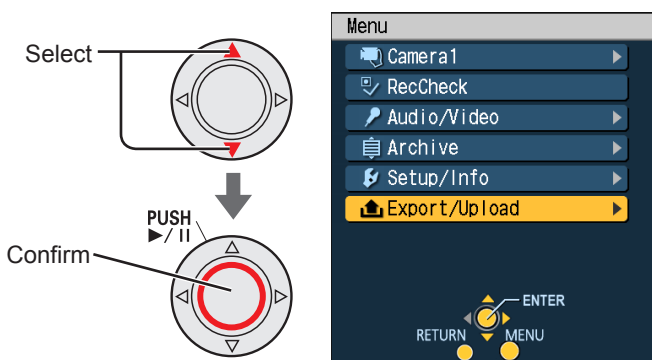

Set the Upload Mode on the Management Mode screen in Administrator setup to MANUAL. (See "Upload Mode" on page 89.)

1. Press the [MENU] button.

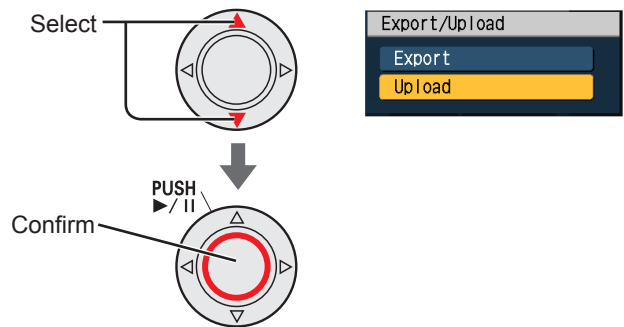

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Export/Upload] and press the [PUSH] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Upload] and press the [PUSH] button to confirm the entry.

Files are uploaded.

Note:

When the vehicle's ignition switch is set to ACC-OFF with Upload Mode on the Management Mode screen in Administrator setup set to MANUAL and PowerOff Time on the Rec/Play screen set to AUTO, uploading will start automatically.

Cancel uploading

If the [Cancel] button is pressed on the screen, the [REC], [MENU] or [RETURN] button on the remote control panel, or the [STOP] button on the Memory Card Video Recorder is pressed, uploading will be canceled.

Uploading files automatically

When "Upload Mode" on the Management Mode screen in Administrator setup is set to "AUTO", files are automatically uploaded with the signal from the Back-End. (See "Upload Mode" on page 89.)

Note:

If the SDHC Memory Cards are accessed during automatic uploading for recording or playback, uploading will be canceled.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Restoring Files Automatically

If the power of the recorder is turned off or an SDHC Memory Card is removed during recording, the file will be corrupted and require restoring. In the following cases, files are restored automatically.

- When the SDHC Memory Card that requires restoring is inserted to the recorder, and the recorder is turned on and transferred to the live mode
- When the SDHC Memory Card that requires restoring is inserted to the recorder, the card slot cover is closed, and the recorder transfers to the live mode
- When the SDHC Memory Card that requires restoring is inserted to the recorder, and the recorder is transferred to the live mode from **playback** mode

During automatic-restoring, the restoring status is shown on the LCD of the remote control panel.

Notes:

- The restoration status is displayed when Overlay OSD on the Setup/Info screen in Administrator setup is set to AUTO, SIMPLE, or DETAILS. (See “Viewing the status of the recorder (Overlay OSD)” on page 69.)
- If the [MENU] button is pressed during automatic restoration, the progress bar disappears, but the restoration continues.
- If recording, **playback**, or trial shooting begins, or if Administrator setup mode is obtained, the progress bar disappears, and the restoration is canceled.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

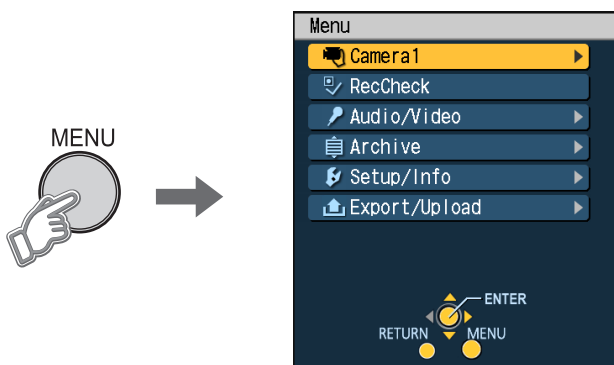

Rebooting This Unit

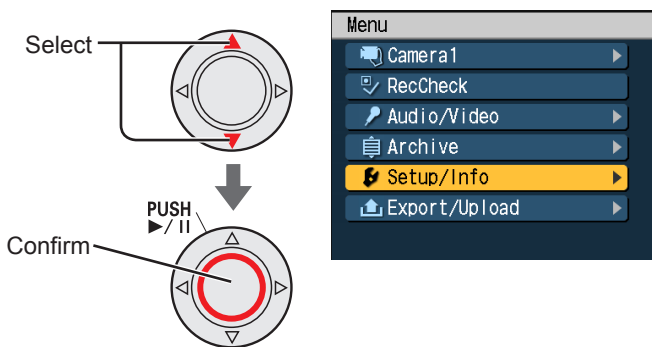

Should the operating status of the recorder become unstable, use the following steps to reboot the recorder.

1. Press the [MENU] button.

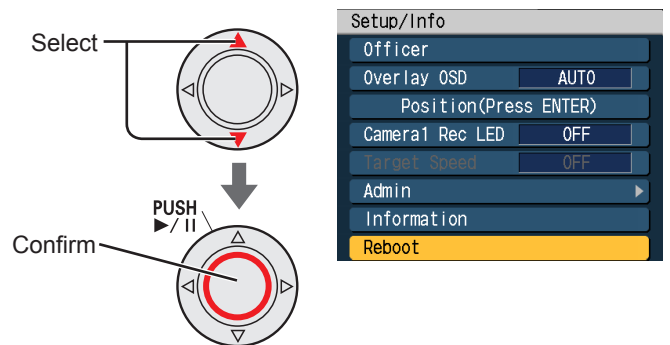

The Menu appears.

2. Press the [Δ, ∇] buttons to select [Setup/Info] and press the [PUSH >/II] button to confirm the entry.

3. Press the [Δ, ∇] buttons to select [Reboot] and press the [PUSH >/II] button to confirm the entry.

The Reboot confirmation screen appears.

4. Press the [◀, ▶] buttons to select [OK] and press the [PUSH >/II] button to confirm the entry.

A reboot takes between 40 to 50 seconds to complete.

Administrator Setup

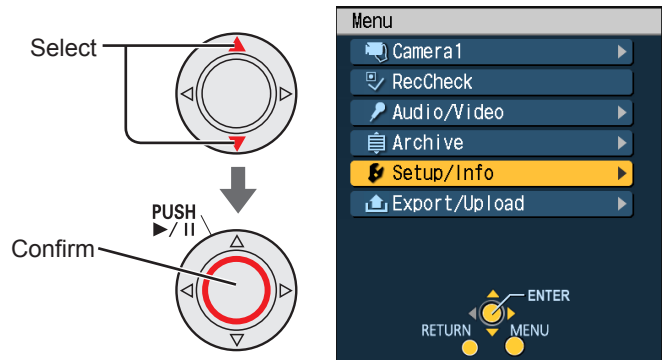

When a Front-End application is running or the Back-End application is streaming a picture, the recorder freezes in the live screen and disables Administrator Setup.

The setup of the recorder includes items that only an administrator is allowed to set up.

Notes:

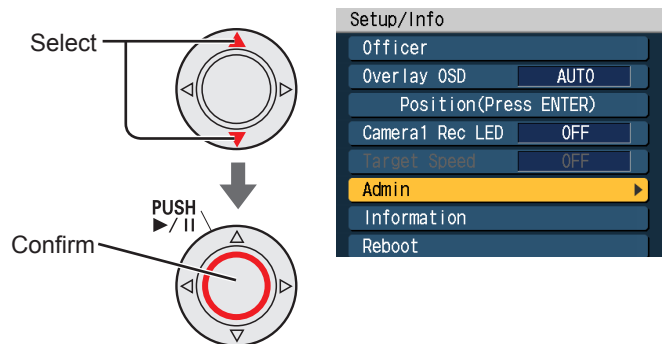

- Starting up a Front-End application or streaming on the Back-End application during Administrator Setup aborts Administrator Setup. The recorder will then freeze in the live screen and disable Administrator Setup.
- Starting Administrator Setup from a Front-End or Back-End application causes the following screen transitions.
 - ① The “Under admin setup from PC...” standby screen replaces the live screen.
 - ② The live screen reappears when the Front-End or Back-End application completes Administrator Setup.

4. Press the [Δ , ▽] buttons to select [Setup/Info] and press the [PUSH] button to confirm the entry.

Note: Some USB memory devices may not be properly recognized.

5. Press the [Δ , ▽] buttons to select [Admin] and press the [PUSH] button to confirm the entry.

The first of the files automatically sorted (in ascending order) from the USB memory device is loaded as the administrator's officer data.

If the Front-End application or Back-End application is running, the message shown below appears, and Administrator Setup is disabled.

Logging in the Setup/Admin screen

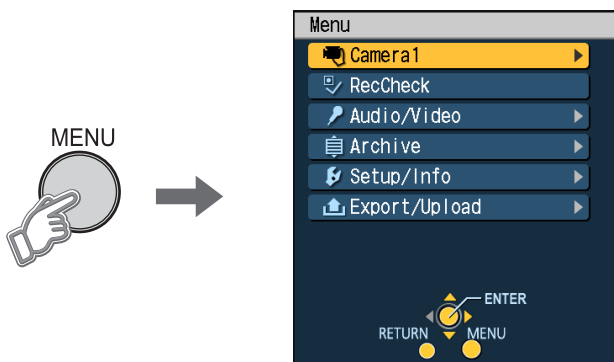

1. Use a computer to copy the administrator's officer data to a USB memory device.

For details on creating a text file with the administrator's officer data, refer to “Text Files Used with the Recorder” on pages 29 - 33.

2. Connect the USB memory device to the recorder.

3. Press the [MENU] button.

The Menu appears.

(Continued on the next page)

The recorder searches to determine whether officer data for the administrator has already been registered, and in the following cases, the Setup/Admin top screen appears.

- When no officer data for the administrator is registered, such as immediately after purchase.
- When identical officer data is already registered for the administrator.

Audio Allocation

Audio 1, Audio 2, Audio 3, and Audio 4

Select the signal level depending on the signal connected to the [AUDIO IN] [1], [2], [3], or [4] connector.

WMIC: Wireless microphone

MIC: Microphone

OFF: No signal input

If officer data is already registered for the administrator but is not identical, the following screen appears before the Menu automatically reappears.

Obtain correct data from the administrator and repeat operations from Step 1 above.

Note:

Refer to "Setup" on pages 19 - 28 for information on the factory defaults.

Video Allocation

■ Detect

Press the [Δ , ∇] buttons to select [Detect] and press the [$\text{PUSH} \triangleright / \text{II}$] button.

Cameras connected to the recorder are detected, and the connected status are displayed.

ON: Connected

OFF: Not connected

The recommended preset settings are set for Preset1, Preset2, and Preset3.

(See "Camera Connection and Combination of Cameras" on page 117.)

Setting camera connection manually

1. Press the [\triangleleft , \triangleright] buttons to select a camera.

2. Press the [Δ , ∇] buttons to change the settings and press the [$\text{PUSH} \triangleright / \text{II}$] button.

Notes:

- If it is set to "OFF" but a camera is connected, no signal will be recorded.
- If the camera input is disconnected on the Video Allocation screen, the display will change to the Live screen.

■ Preset1, Preset2, Preset3

1. Press the [△, ▽] buttons to select a preset number to be set.

2. Press the [▷] button to select [Form].

3. Press the [△, ▽] buttons to change the settings.

4. Press the [▷] button to select [Main Sub].

5. Press the [△, ▽] buttons to change the setting and press the [PUSH] button to confirm the setting.

Pattern of the selected Main video and Sub video is displayed at the lower right on the screen.

Preset setting pattern

Form	Main	Sub
1Ch	1 / 2 / 3	-
2Ch	1 / 2	2 / 3
4Ch-QUAD	-	1/2/3 6 4 5
4Ch-PANORAMA	-	1 / 2 / 3 4 6 5
5Ch-QUAD	1 / 2 / 3	2/3 6 4 5
5Ch-PANORAMA	1 / 2 / 3	2 / 3 4 6 5

Notes:

- Some pattern cannot be selected depending on the connected cameras.
(See "Camera Connection and Combination of Cameras" on page 117.)
- If Form is set to "-", no Preset can be selected.

■ Main Resolution/RecRate

Set the resolution and record rate of a main video.

Setting: CIF, D1 10, D1 STD, D1 HI

(For details, see "Record time in each record mode" on page 5.)

Note:

If the Main Resolution/RecRate is set to "D1 10", the setting of the Sub Resolution/RecRate is changed to "D1 10".

■ Sub Resolution/RecRate

Set the resolution and record rate of a sub video.

Setting: CIF, D1 10, D1 STD, D1 HI

(For details, see "Record time in each record mode" on page 5.)

Note:

If the Sub Resolution/RecRate is set to "D1 10", the setting of the Main Resolution/RecRate is changed to "D1 10".

Enabling the settings

When setting is changed on this screen, the [Set] button appears at lower left on the screen.

To enable the settings on the screen, select [Set] and press the [PUSH] button.

If you press the [Return] button on the remote control panel to terminate the screen, the setting will not be updated.

Note:

If the Preset setting is enabled, the selection with the [CAMERA SELECT] button will be the main picture of Preset1.

Rec/Play

Page 1

■ PowerOff Time

Use this function to set the interval after which the Remote Control Panel and the recorder will shut down after the ignition switch has been set to the LOCK (OFF) position.

Setting : 0 min, 10 min, 20 min, 30 min, 60 min, 90 min, 120 min, 180 min, AUTO*¹

■ Init Preset Select

Select a Preset number when the power is turned on. Only the preset numbers set on the Video Allocation screen are selectable. For example, if only Preset 1 and Preset 2 have been set, Preset 3 cannot be selected.

Setting: PRESET 1, PRESET 2, PRESET 3, LAST *²

■ Init VIDEO OUT1

Select a signal output from the [VIDEO OUT 1] connector on the recorder when the power is turned on. Only the cameras set to ON on the Video Allocation screen are selectable. For example, if CAM3 has been set to OFF, CAM3 is not selectable.

Setting: CAM1, CAM3, VIDEO OUT2, LAST *²

■ PowerOn Rec

Use this function to set recording to start when the recorder is turned on.

Setting: OFF, ON

■ Loop Rec

Use this function to continue recording new video while deleting the oldest recorded files if no space is available on an SDHC Memory Card.

Setting: OFF, ON

Notes:

- If Upload Mode on the Management Mode screen is set to AUTO, the setting is fixed to OFF, and loop recording will be disabled.
- If Loop Rec is set to ON, the Upload Mode on the Management Mode screen cannot be set, and uploading is disabled.

■ Intermittent Rec

Use this function to record one video frame per second*³.

Setting: OFF, ON

■ Rec Continue Time*⁴

Use this function to set recording continue time for normal recording when a trigger is entered or when the [REC] button is pressed.

Setting: CONTINUE, 1 min, 2min, 5min, 10 min, 15 min, 20 min, 30 min, 60 min, 90 min

*1 When recorder operation is not controlled by a Front-End or Back-End application:

Power is turned off immediately. Note, however, that power is not turned off while data is exported to a USB memory device, but is turned off after completion of data export.

When recorder operation is controller by a Front-End or Back-End application:

Power is turned off when control from a Front-End or Back-End application is released, uploading, streaming, administrator setup, or updating is finished on the Back-End application, or the SDHC Memory Card slot cover is opened.

If uploading or exporting continues for more than three hours, it will be interrupted to save battery charge, and the power will be shut off.

- *2 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.
- *3 Normal recording records 10 or 30 video and audio frames per second.
- *4 Intermittent recording does not stop with the time set on Rec Continue Time.

Page 2

■ PreRec Time (Video)*1

Use this function to set how much of already stored video will be retained when a trigger is entered or the [REC] button is pressed.

Setting : 0 s, 10 s, 20 s, 30 s, 60 s, 90 s

■ PreRec Time (Audio)*1

Use this function to set how much of already stored audio will be retained when a trigger is entered or the [REC] button is pressed. However, the audio recording starts at the same time when the video pre-recording starts, even if the PreRec Time (Audio) is set longer than the PreRec Time (Video).

Setting : 0 s, 3 s, 10 s, 20 s, 30 s, 60 s, 90 s

■ PostRec Time (Video)*2

Use this function to set the time interval video recording will continue after the [STOP] button is pressed.

Setting : 0 s, 10 s, 20 s, 30 s, 60 s, 90 s

■ PostRec Time (Audio)*2

Use this function to set the time interval audio recording will continue after the [STOP] button is pressed. However, the audio recording ends at the same time when the video post-recording ends, even if the PostRec Time (Audio) is set longer than the PostRec Time (Video).

Setting : 0 s, 3 s, 10 s, 20 s, 30 s, 60 s, 90 s

■ Rule of Filename

Use this function to set the rules for filenames generated during recording.

WT : World time

LT : Local time

■ Init Audio2 Rec

Sets Audio2 recording when the power is turned ON.

ON : Recording is performed.

LAST : See footnote.*3

OFF : Recording is not performed.

Note:

If Audio2 on the Audio Allocation screen is set to OFF, this setting is disabled.

■ Init Overlay OSD

Use this function to set the Overlay OSD used when the power is on.

Setting : OFF, AUTO, SIMPLE, DETAILS, LAST *3

*1 Intermittent recording does not include pre-recording time.

*2 If recording is stopped by Intermittent recording, Rec Continue Time, post-recording is not included.

*3 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

Page 3

■ GP01, GP02, GP03 Signal

Use this function to select the output signal from GP01, GP02, and GP03.

GP01, 2: OFF, REC, ERROR, REC+ERROR

GP03: OFF, REC

■ Init Audio Out (Play)

Use this function to set Audio Out used when the power is on.

ON : All audio channels are output.

LAST : See footnote. *1

OFF : All audio channels are not output.

■ Play Mode

Use this function to turn all valid files starting in order from the oldest file on four SDHC Memory Cards into a virtual file for playback.

SINGLE : Normal playback for playing back files one at a time.

RELAY : Plays back multiple files as one single file without the need for further operation. Playback pauses upon reaching the end of the large virtual file (the most recently recorded file). Playback operation is the same as for normal playback.

Notes:

- Slow playback of a virtual file that contains intermittent recording files will revert to normal playback speed at the start of an intermittent recording file. Slow playback is not restored for subsequent normal recording files.
- Quick replay starts playback 7 seconds prior to current location.
- A large virtual file consists of multiple files and video and sound may be momentarily interrupted in playback between files.

Skip Target

Use this function to set the skip location when the [Skip back] or [Skip forward] button is pressed.

■ Trigger / Marker

Pressing of the skip-buttons jumps to the trigger position (one per file) at which recording began, or to a bookmark position, whichever found earlier. However, no trigger position can exist in automatically divided files.

YES: Jumping with the skip-buttons enabled

NO: Jumping with the skip-buttons disabled

■ Head of File

Use this function to move to the beginning of a file with the skip-button operation.

YES: Jumping with the skip-buttons enabled

NO: Jumping with the skip-buttons disabled

Notes:

- When both [Trigger/Marker] and [Head of File] are set to "YES", playback will restart from the first trigger or bookmark that appears or restarts from the beginning of the file.
- [Trigger/Marker] and [Head of File] cannot both be set to "NO".

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

*1 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

Date/Time

■ TimeZone

Indicates time difference from world standard time.

- Hawaii** : Hawaiian standard time
- Yukon** : Alaska standard time
- Yukon DST** : Alaska daylight saving time
- Pacific** : Pacific standard time
- Pacific DST** : Pacific daylight saving time
- Mountain** : Mountain standard time
- Mountain DST** : Mountain daylight saving time
- Central** : Central standard time
- Central DST** : Central daylight saving time
- Eastern** : Eastern standard time
- Eastern DST** : Eastern daylight saving time
- Atlantic** : Atlantic standard time
- Atlantic DST** : Atlantic daylight saving time
- Asia Tokyo** : Japan standard time

■ Style

Use this function to set a date format.

- ISO** : YYYY-MM-DD
HH : MM : SS
- USA** : MM/DD/YYYY
HH : MM : SS

■ Date/Time

The [Set] button appears when [Date/Time] is used to change the date and time. Select the [Set] button and use the [PUSH] button to confirm the entry. The [Set] button disappears upon confirmation. Use the [MENU] button, [CONTROL PANEL ON/OFF] button, [RETURN] button or the [LIVE/ARCHIVE] button to cancel.

- Setting** :Year/month/day
hour : minute : second

Note:

If GPS information is used for the date and time setting, setting of Date/Time on the menu will be invalid.

Registration

Page 1

■ Load Admin

Use this function to load administrator data from a USB memory device, overwriting any existing administrator data.

Note:

No administrator data is registered when shipped from the factory.

■ List Admin

Use this function to view the IDs of administrators and officer names already registered in the recorder. Use the [Δ , ∇] buttons to go between pages.

■ Load Officer

Use this function to load officer data from a USB memory device, overwriting any existing officer data.

Note:

No officer data is registered when shipped from the factory.

■ List Officer

Use this function to view the IDs of officers and officer names already registered in the recorder. Use the [Δ , ∇] buttons to go between pages.

Note:

Long IDs and officer names may not be displayed in full.

■ Load Classify

Use this function to load classify tags from a USB memory device, and delete any existing classify tags and update all classify tags.

Note:

The recorder contains no classify tags when shipped from the factory.

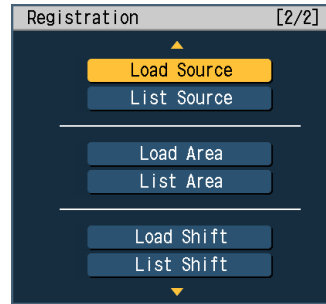

■ List Classify

Displays classify tags stored on the recorder. Use the [Δ , ∇] buttons to go between pages.

Note:

Long classify tag character strings may not be displayed in full.

Page 2

■ Load Source

Use this function to load source data from a USB memory device, overwriting any existing source data.

Note:

No source data is registered when shipping from the factory.

■ List Source

Use this function to display source data already registered in the recorder. Use the [Δ , ∇] button to go between pages.

■ Load Area

Use this function to load area data from a USB memory device, overwriting any existing area data.

Note:

No area data is registered when shipping from the factory.

■ List Area

Use this function to display area data already registered in the recorder. Use the [Δ , ∇] button to go between pages.

■ Load Shift

Use this function to load shift data from a USB memory device, overwriting any existing shift data.

Note:

No shift data is registered when shipping from the factory.

■ List Shift

Use this function to display shift data already registered in the recorder. Use the [Δ , ∇] button to go between pages.

Trigger

■ Trigger

Use this function to turn trigger on or off.

Setting : ON, OFF

■ Trigger1 to 16

< Action >

Enter actions for detection of trigger signals (GPI1–16). Enter “NONE” for triggers that will not be used.

- REC** : Record
- STOP** : Stop
- AUTO ZOOM** : Automatically zooms in/out or pauses
- P1, P2 *1, P3 *1** : Selects video set for Preset1, Preset2, or Preset3
- P1REC, P2REC *1, P3REC *1** : Records video set for Preset1, Preset2, or Preset3
- AUDIO2ON** : Records audio input to the [AUDIO IN 2] connector
- AUDIO2MUTE** : Not records audio input to the [AUDIO IN 2] connector
- TGT(REC) *2** : Starts recording with a TGT input signal
- TGT(P1REC) *2, TGT(P2REC) *1 *2, TGT(P3REC) *1 *2** : Starts recording video set for Preset1, Preset2, or Preset3 with a TGT input signal
- OWN(REC) *2** : Starts recording with an OWN input signal
- OWN(P1REC) *2, OWN(P2REC) *1 *2, OWN(P3REC) *1 *2** : Starts recording video set for Preset1, Preset2, or Preset3 with an OWN input signal
- CAM1 LED** : Changes the status setting (on/off) of the [REC] lamp on a Color Camera connected to the [CAMERA 1] connector
- NONE** : No operation

Note:

When you switch the preset mode, noise may occur in video.

< Detection >

Enter conditions for detection of trigger signals (GPI1–16). Choice of detection method depends on the setting selected by <Action>.

- In REC, P1REC, P2REC, and P3REC modes
 - H** : High-edge trigger
 - Level H** : High-level trigger
 - L** : Low-edge trigger
 - Level L** : Low-level trigger
 - B** : Both-edge trigger
- In P1, P2, P3, CAM1 LED, AUDIO2ON, AUDIO2MUTE, AUTO ZOOM, and STOP modes
 - H** : High-edge trigger
 - L** : Low-edge trigger
 - B** : Both-edge trigger
- In NONE mode
 - H** : High-edge trigger
 - L** : Low-edge trigger
- In TGT(REC), TGT(P1REC), TGT(P2REC), TGT(P3REC), OWN(REC), OWN(P1REC), OWN(P2REC), and OWN(P3REC) modes
 - Setting:** OFF, 200, ..., 2, 1

< Display >

Assign characters to be used in the Embedded OSD display.

Setting: OFF (no display), A to Z, –

Note:

The value set by <Display> appears when the state triggered by <Detection> prevails. However, only when a value “B” is set for <Detection>, the value set by <Display> will appear during a high state.

*1 These are not displayed if Preset 2 and Preset 3 have not been set on Video Allocation screen.

*2 TGT(REC), TGT(P1REC), TGT(P2REC), TGT(P3REC), OWN(REC), OWN(P1REC), OWN(P2REC), and OWN(P3REC) can be selected for Trigger 15 and Trigger 16.

Embedded OSD

■ Main OSD

Use this function to set whether the items in “Contents” are to be embedded on the main screen on recording.

ON: Trigger, Time, and Source@Area that are set to ON are embedded on the screen during recording. When a file with the items embedded is **played**, the embedded items are displayed at the recorded locations.

OFF: No item is embedded during recording.

■ Sub OSD

Use this function to set whether the items in “Contents” are to be embedded on the sub screen during recording.

ON: Trigger, Time, and Source@Area, that are set to ON are embedded on the screen during recording. When a file with the items embedded is **played**, the embedded items are displayed at the recorded locations.

OFF: No item is embedded during recording.

■ Display Position

Use this function to set the display position for the On-Screen Display on the screen and in record files.

L-Upper : Upper left
R-Upper : Upper right
L-Bottom : Lower left
R-Bottom : Lower right

■ Trigger

Use this function to turn trigger display on or off upon trigger signal (GPI1–16) inputs.

Setting : ON, OFF

Note:

The Detailed Overlay OSD (see pages 56, 70) will hide this indication.

■ Time

Use this function to turn date and time display on or off during recording.

Setting : ON, OFF

Note:

The Detailed Overlay OSD (see pages 56, 70) will hide this indication.

■ Display for the vehicle identification and name of a location (Source@Area)

Use this function to turn vehicle identification and name of a location on or off during recording.

This information appears as “Source@Area”.

The first 5 characters in the vehicle identification is displayed as “Source” and the first 4 characters in the name of a location is displayed as “Area”.

Setting : ON, OFF

Notes:

- If the Source is less than 5 characters, the number of characters for the Area is adjusted so that the total number of characters becomes 10.
- If the Area is less than 4 characters, the number of characters for the Source is adjusted so that the total number of characters becomes 10.
- “@Area” is displayed when there is no Source.
- The vehicle identification only is displayed when there is no Area.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Camera1

Note:

If “Camera1” has not be set for any of Preset1, Preset2, and Preset 3 on the Video Allocation screen in Administrator setup, the Camera1 screen cannot be selected.

Page 1

Zoom Limit

Use this function to enter maximum zoom ratio.

Setting : ×22, ×220

AGC Level

Use this function to set the level of camera input gain control.

Setting : HIGH, OFF, LOW, MID

Init Backlight

Use this function to turn backlight compensation on or off when the power is on.

Setting : OFF, ON, LAST *1

Init AE Shift

Use this function to adjust brightness when the power is on.

Setting : 0, -2, -1, +1, +2, LAST *1

Flip

Use this function to determine whether to vertically flip camera video image or not.

Setting : OFF, ON

AutoZoom Magnification

Use this function to set the target zoom-in ratio.

Setting : ×10, ×15, ×22, ×1, ×2, ×3, ×4, ×5, ×7

AutoZoom Time

Use this function to set the zoom-in pause time.

Setting : 3 s, 5 s, 8 s

AutoZoom End Position

Use this function to set the zoom-end ratio for auto zoom.

Setting: x1, x2, x3, x4, x5, x7, x10, x15, x22, LAST *1

Page 2

Init Camera1 Rec LED

Use this function to turn the [REC] lamp on the camera connected to the [CAMERA 1] connector on or off when the power is on.

Setting : ON, LAST *1, OFF

Init IR Mode

Use this function to set the IR function when the power is on.

Setting : AUTO *2, OFF, ON, LAST *1

IR Level

Use this function to set the IR function level during automatic switching.

Setting : LOW, HIGH

IR Time

Use this function to set the IR function detection time during automatic switching.

Setting : 30 s, 60 s, 300 s, 10 s

Auto Focus

Selects color camera focusing method when,

- [Init LPR Mode] is set to “DISABLE”.
- [Init LPR Mode] is set to “ENABLE” and [LPR Mode] is set to “PATROL”.
- A recording trigger starts recording when [Init LPR Mode] is set to “ENABLE” and [LPR Mode] is set to “LPR”.

PRESET : When the zoom is 3x or below, the camera is focused at about 15 m (50 feet). Subsequent zooming will engage auto focus.

DISABLE : Focus is locked at about 40 m (130 feet) and auto focus is not available.

AUTO : Auto focus goes into operation when the zoom ratio is changed.

Init LPR Mode

Enables or disables the LPR function (license plate recognition) when the recorder is turned on.

DISABLE : Color camera shutter speed changes to “AUTO”. The zoom position for the camera at power on returns to the position it had when the power was last turned off.

ENABLE : Allows changes to be made to the officer [LPR Mode]. Values set in this mode will persist through a power off and become available at the next power on.

*1 Applies the setting in effect when power was last turned off. Unless power is turned off properly, the operating state may not be saved correctly.

*2 Automatically switches between ON and OFF.

Management Mode

■ Classify

Use this function to set whether the classify tag is added upon stopping of recording.

DISABLE : Disables adding a classify tag.

ENABLE : Enables adding a classify tag.

FORCE : Add a classify tag forcibly.

If “Loop Rec” on the Rec/Play screen is set to ON, the classify tag will not be added even if [ENABLE] or [FORCE] is selected.

■ Setting Method

Use one of the following methods to enter officer data.

AUTO : Automatically reads and loads officer data for up to two persons from a USB memory device.

MANUAL : Display the menu on the LCD panel, and then read in and configure officer data from a USB memory device on the Officer setup top screen.

LIST : Display the menu on the LCD panel and allow you to set the officer data by selecting from the list on the Officer setup top screen after reading in the officer data already stored on this unit.

■ Upload Mode

Use this function to set the upload mode.

AUTO : Data are uploaded automatically.

MANUAL : Data are uploaded manually.

Notes:

- If Loop Rec on the Rec/Play screen is set to ON, the Upload Mode cannot be set, and uploading is disabled.
- If the Upload Mode is set to AUTO, connection with a PC will be automatically started and maintained during uploading.

■ Export Menu

Use this function to set Export menu.

ENABLE : Enables Export menu.

DISABLE : Disables Export menu.

■ Preset Select

Use this function to set preset selection.

ENABLE : Enables the preset selection.

DISABLE : Disables the preset selection.

■ Operation Key Lock

Use this function to lock the buttons on the remote control panel.

OFF : All buttons can be used.

ANY : The [W], [T], [AUTO ZOOM], [BACKLIGHT], [CAMERA SELECT], [IR MODE], [AUDIO2MUTE], [LIVE/ARCHIVE], [PREV], [NEXT], and [BOOKMARK] buttons are locked.

STOP : The buttons other than the [STOP] button are locked.

Notes:

- When a USB memory device containing administrator data is connected, you can press the [MENU] button to enter the Setup/Admin top screen via the menu items. Set [Management Mode] – [Operation Key Lock] setting to “OFF” in administrator setup to release key lock.
- The key lock is activated for the first time when you move to the live screen.
- The [LOCK] lamp indicates whether the keys are locked.
- The Color Camera zoom and brightness buttons cannot be locked.
- Trigger signal (GPI1-16) control (see page 86) is not locked.

Radar/GPS

Radar Model

The model name of the radar gun connected to the recorder is displayed.

Model Select

Use this function to select a radar gun.

ProLaser :

The recorder is set to support Kustom Signal's Inc.'s ProLaser3 as standard.

STALKER_ :

The recorder is set to support Applied Concepts, Inc.'s STALKER DUAL.

GOLDEN_ :

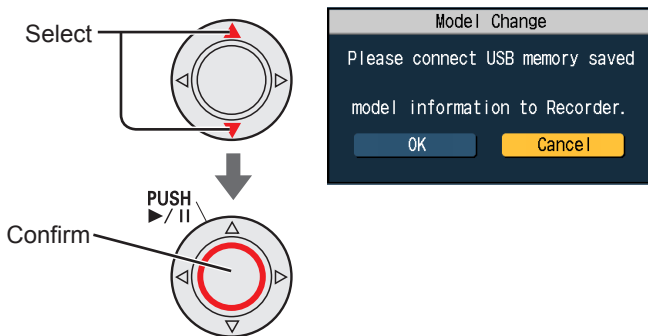

The recorder is set to support Kustom Signals, Inc.'s Golden Eagle II.

Note:

To use the recorder with other radar guns, consult your supplier.

Add Model

1. Press the [Δ , ∇] buttons to select [Add Model], and press the [$\text{PUSH} \rightarrow / \text{II}$] button to confirm the entry.

2. Connect the USB memory device containing the model data to the recorder.

3. Press the [\leftarrow , \rightarrow] buttons to select [OK], and press the [$\text{PUSH} \rightarrow / \text{II}$] button to confirm the entry.

A new radar gun is added.

Connection of Radar

Use this function to specify the radar gun connection port.

OFF : When not connected

Recorder: When connected to the recorder

Notes:

- The remote control panel has no function for calculating the speed of the target vehicle from the moving own vehicle.
- No distinction is made between the speed of an approaching target vehicle and a receding one.
- Some radar guns come with a function for setting conditions that enable correct measurement of target vehicle speed. Use this function according to the instructions in the Operating Instructions of the radar gun.
- Error messages appear when the radar gun is operating abnormally.

GPS

Connection of GPS

Use this function to select GPS data source.

Recorder: Uses GPS data from the GPS module attached to the recorder.

OFF : Does not use GPS data.

Collection Time

Use this function to set the time to collect GPS data.

Setting : 5 s, 10 s, 1 s, 2 s

Speed Information

Speed Unit

Use this function to set the speed unit for own and target vehicles.

Setting : MPH, km/h

File Management

Delete All Files

Use this function to delete all video and audio data files on the recorder. Select [OK] in the confirmation dialog box that appears to delete the files or select [Cancel] to keep the files.

Notes:

- Do not make button operations or turn the power off during a delete all files operation.
- SDHC Memory Card files for which the following information appears in the status display cannot be deleted.
 - CARD PROTECT
 - VUP CARD
 - UNFORMATTED
 - NO CARD

Format

Use this function to format all SDHC Memory Cards in the recorder.

- ① : Displays the model of the inserted SDHC Memory Card.
- ② : Formats all SDHC Memory Cards.
- ③ : Cancels formatting.

Notes:

- Do not make button operations or turn the power off during a format operation.
- An SDHC Memory Card for which the following information appears in the status display cannot be formatted.
 - CARD PROTECT
 - VUP CARD
 - NO CARD
 - UNSUPPORTED
- Format a new SDHC Memory Card or an SDHC Memory Card to be used with another device, in the recorder or with the "SD Memory Card Formatting Software". "SD Memory Card Formatting Software" can be downloaded from the Web site below.
http://panasonic.jp/support/global/cs/sd/download/sd_formatter.html
For formatting with the "SD Memory Card Formatting Software", be sure to set the FORMAT SIZE ADJUSTMENT of the format option to "OFF". If it is set to "ON", the recorder will not be able to use the SDHC Memory Card.
- The product name is defined by the SD Card Association and may differ from the SDHC memory card product number.

Administrator Setup (continued)

Network

IP Address

Use this function to set IP address.

Interface

Select an interface to be used.

- PC LAN** : Wired LAN for connecting the Front-End application and the recorder
- UPLOAD LAN** : Wired LAN for connecting the Back-End application and the recorder
- USB WIRELESS LAN** : USB Wireless LAN for connecting the Back-End application and the recorder

DHCP

Use this function to set DHCP.

• When “PC LAN” is selected for [Interface]

If [DHCP] is set to “Server1”, “Server2”, “Server3”, or “Server4”, the recorder is set to the DHCP server and the Front-End application is set to the DHCP client. In this case, the IP address is fixed.
If [DHCP] is set to “OFF”, IP Address, Subnet Mask, and Gateway can be set with the procedures described below.

1. Press the [Δ , ▽] buttons to select [Interface].

2. Press the [◀ , ▶] buttons to select [PC LAN].

3. Press the [Δ , ▽] buttons to select [DHCP].

4. Press the [◀ , ▶] buttons to select [OFF].

5. Press the [Δ , ▽] buttons to select [IP Address].

6. Press the [▶] button.

7. Enter the address.

Select a character to be entered with the cursor button, and press the [^{PUSH}] button.

To delete a entered character: Select [DELETE] with the cursor button, and press the [^{PUSH}] button.

To change displayed characters: Select [SHIFT] with the cursor button, and press the [^{PUSH}] button.

8. When all characters have been entered, select [SET] with the cursor button, and press the [^{PUSH}] button.

Set Subnet Mask and Gateway in the same way.

• When “UPLOAD LAN” is selected for [Interface]

If the network includes a DHCP server, set [DHCP] to “Client”. The recorder is set to the DHCP client, and obtains the IP address from the server.

If the network does not include a DHCP server, set [DHCP] to “OFF”. The IP address is fixed.

• When USB WIRELESS LAN is selected for [Interface]

If the network includes a DHCP server, set [DHCP] to “Client”. The recorder is set to the DHCP client, and obtains the IP address from the server.

If the network does not include a DHCP server, set [DHCP] to “OFF”. The IP address is fixed.

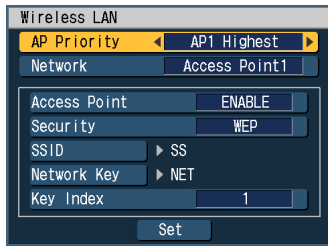

Updating network setting

When network settings are changed, press the [Set] button. The network setting will be updated.

Administrator Setup (continued)

Wireless LAN

Use this function to set details for the USB wireless LAN.

■ AP Priority

Use this function to set priority.

Random : Trying to connect to the access point at random

AP1 Highest : Trying to connect to the access point in order of Access Point1, Access Point2, ..., Access Point10

■ Network

Use this function to set the access point of the network.

Setting: Access Point1, Access Point2, ..., Access Point10

Make the following settings for each access point.

• Access Point

Set whether the access point is enabled or disabled.

Setting: ENABLE, DISABLE

• Security

Use this function to set security.

Setting: WEP, WAP/WPA2-PSK, NONE

• Service Set ID (SSID)

Use this function to set the service set ID.

• Network Key

Use this function to set network key.

• Key Index

Use this function to set key index.

Setting: 1, 2, 3, 4

■ [Set] button

Press this button when a setting is changed. The network setting will be updated.

Reset All Network Settings

Use this function to reset the network settings.

1. Press the [△, ▽] buttons to select [Reset All Network Settings].

2. Press the [▷] button.

3. Press the [◀, ▶] buttons to select [OK] and press the [PUSH] button to confirm the entry.

Factory Default	▶

■ Software Version Up

For details on obtaining version upgrade files, consult your supplier. Make sure to use a computer beforehand to save the version upgrade file you obtain in the root directory*1 of an SDHC Memory Card or USB memory device.

1. Insert the SDHC Memory Card or connect the USB memory device to the recorder.

2. Select [Service] - [Operations] - [Software Version Up], and press the [] button to confirm the entry.

A confirmation dialog box appears.

3. Select [OK], and accept by pressing the [] button.

The version upgrade is performed, and the recorder automatically restarts.

Notes:

- Do not make button operations or turn the power off during a version upgrade.
- An error screen appears if the version upgrade fails. (See “Error Message” on pages 111-116.)

*1 Version upgrade cannot be performed when the following conditions exist in the root directory.

- If a DATA folder is present
- If multiple version upgrade files (.VUP extension) are present

■ Menu Copy (Copy to USB)

Use this function to copy menu settings on this recorder to another recorder.

1. Connect a USB memory device to this recorder.
2. Select [Service] – [Operations] – [Menu Copy (Copy to USB)], and press the [] button to confirm the entry.

A confirmation dialog box appears.

3. Select [OK], and press the [] button to confirm the entry.

■ Menu Copy (Copy to Recorder)

Use this function to copy menu settings stored on a USB memory device to this recorder.

1. Connect a USB memory device to this recorder.
2. Select [Service] – [Operations] – [Menu Copy (Copy to Recorder)], and press the [] button to confirm the entry.

A confirmation dialog box appears.

3. Select [OK], and press the [] button to confirm the entry.

Menu settings are copied from a USB memory device.

Note:

The following lamp states indicate that an error has occurred.

[BUSY] lamp fast blinking:

This indicates that an error occurred during configuration file*1 check or administrator authentication.

- If a configuration file*1 check error occurred, the followings are probable causes.
 - The configuration file is missing.
 - There are multiple configuration files.
 - The configuration file is corrupted.
- If an administrator authentication error occurred, administrator setup has been made on another recorder. Use a PC to copy the administrator's officer data to the WIDKEY on the USB memory device.

For details regarding text files containing administrator's officer data, see "Text Files Used with the Recorder" on pages 29 – 33. Perform operations above from Step 1.

[READY] lamp goes off:

This indicates that the data could not be correctly loaded. Perform the operations below in the stated order. If the [READY] lamp still does not light, consult your supplier.

- ① Remove the USB memory device, and perform the operation from Step 1.
- ② Replace the USB memory device, and perform the operation from Step 1.

*1 The configuration file is the file with the ".CFG" extension. The configuration file contains all information set on this recorder. However, the following data are excluded.

- Recorder Operating Time
- Fan Operating Time
- CAMERA 1 Operating Time
- Remote Control Panel Operating Time

- LCD Lighting Time
- Recorder Version
- Recorder serial number
- Microcontroller Version
- Remote Control Panel Version
- Last errors

Administrator Setup (continued)

■ Service Log

Use this function to copy service log (see “Service Log” on page 119) to an USB memory device.

1. **Connect a USB memory device to this recorder.**
2. **Select [Service] – [Operations] – [Service Log], and press the [] button to confirm the entry.**

A confirmation dialog box appears.

3. **Select [OK], and press the [] button to confirm the entry.**

A service log is created with the filename of SVddhmm.log (dd: day, hh: hours, mm: minutes), and copied to the top folder of the USB memory device. Select [Cancel] to stop copying.

■ Clear Officer Information

Use this function to delete officer data from a recorder.

1. **Select [Service] – [Operations] – [Clear Officer Information], and press the [] button to confirm the entry.**

A confirmation dialog box appears.

2. **Select [OK], and press the [] button to confirm the entry.**

Officer data will be deleted. Select [Cancel] to stop deleting officer data.

■ Factory Default

All recorder settings can be returned to their factory defaults. The following settings do not return to their factory defaults.

- Recorder Operating Time
- FAN Operating Time
- CAM1 Operating Time
- Remote Control Panel Operating Time
- LCD Lighting Time
- Recorder Version
- Recorder serial number
- Microcontroller Version
- Remote Control Panel Version

Note that the recorder will not revert to user made settings after being reset to their factory defaults. Make sure you really want to return all settings to their factory defaults before performing the following steps.

1. **Select [Service] - [Operations] - [Factory Default], and press the [] button to confirm the entry.**

A confirmation dialog box appears.

2. **Select [OK], and accept by pressing the [] button.**

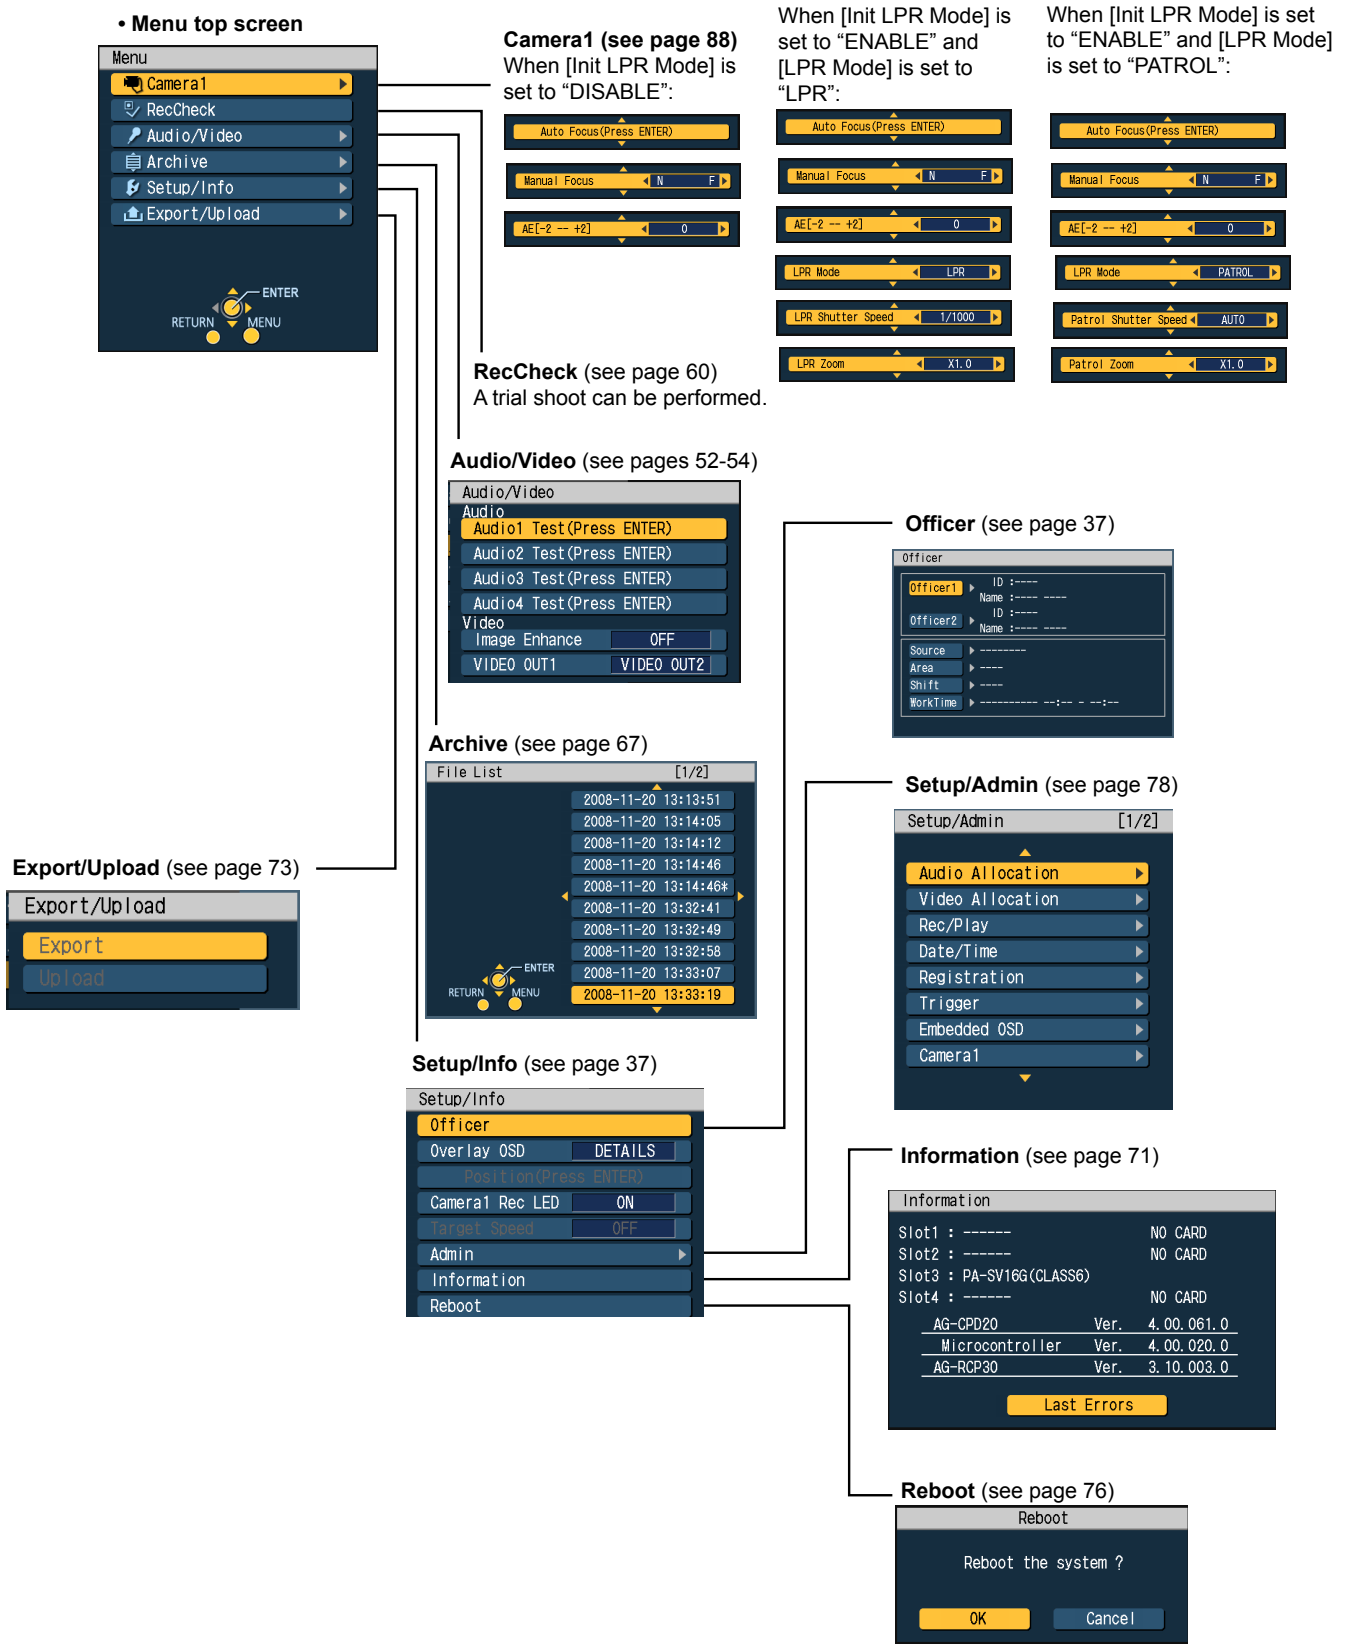

The recorder will reboot and start up in the factory default settings. Select [Cancel] to cancel returning to the factory defaults.

Menu List

Use menus provided by the Remote Control Panel to set up and adjust this recorder.

Indicator Lamps and Recorder Status

This table shows the relationship between lamp Lit/Unlit/blinking states and the recorder's operating status.

- : Lit ● (with vertical line) : Normal blinking ○ : Unlit ● (with horizontal line) : Fast blinking (about three times/sec)
- (with horizontal line) : Blinking consisting of short off intervals combined with long on intervals
- (with vertical line) : Blinking consisting of short on intervals combined with long off intervals

Lamp Indication on the Memory Card Recorder

	Indicator Lamp	Recorder Status
SDHC	● (green)	Recordable SDHC Memory Cards are inserted.
	● (with vertical line) (green)	Data cannot be recorded on the SDHC Memory Cards inserted in the slots, but can be read from the cards (write-protected or memory full).
	● (with vertical line) (blue)	Startup
	● (orange)	The SDHC Memory Cards on which data have been recorded last.
	● (with vertical line) (orange)	Recording, playing , uploading
	● (with horizontal line) (orange)	Recognizing or repairing the card
	● (with vertical line) (orange)	SDHC Memory Cards are not inserted in all four SDHC Memory Card slots, or at least one of the inserted SDHC Memory Cards cannot be read from and/or written to.
	○	No SDHC Memory Card is inserted or the inserted SDHC Memory Card cannot be recognized.
UPLOAD	● (green)	Connecting the recorder and the Back-End server via UPLOAD-LAN
	● (with vertical line) (green)	Uploading to the Back-End server or exporting to an external media using the Remote Control Panel, or displaying the UPLOAD/Export/DVD Burn screen
	○	Back-End server is not connected.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Indicator Lamps and Recorder Status (continued)

Lamp Indication on the Memory Card Recorder or the Remote Control Panel

This table shows the relationship between lamp Lit/Unlit/blinking states and the recorder's operating status.

- : Lit ◐ : Normal blinking ○ : Unlit ⦿ : Fast blinking (about three times/sec)
- ◑ : Blinking consisting of short off intervals combined with long on intervals
- ◒ : Blinking consisting of short on intervals combined with long off intervals

Indicator Lamp			Recorder Status
REC (Red)	READY (Green)	BUSY (Red)	
◐	◐	◐	Status immediately after power-on
○	◐	◐	Recorder booting, Front-End and Back-End applications running
○	●	○	Live video display
●	●	●	Normal recording*1, Loop recording
◑	●	●	Intermittent recording*1
○	●	●	• Post-recording • Including Front-End and Back-End application operation*2
○	◐	●	Restoring automatically Administrator setting screen display with recording stopped (accessing SDHC Memory Card), formatting, deleting a file
○	◐	○	Administrator setting screen display with recording stopped (not accessing SDHC Memory Card)
○	○	●	Playing exporting, uploading
○	○	◐	• Terminating operation • SDHC Memory Card start processing (recognition when inserted) • SDHC Memory Card shutdown processing (when a SDHC Memory Card slot cover is opened)
○	⦿	○	The SDHC Memory Card slot cover is opened.
●	◐	●	Updating recorder firmware
◐	●	●	• Updating microprocessors on the recorder and Remote Control Panel • Copying menu settings
◐	●	◐	Successfully copied the menu settings
◐	○	◐	Failed to copy menu settings
⦿	●, ◐ or ○	○	An error involving recording operations occurred during live screen display*3
●	●	◐	Starting upgrading
◐	◐	●	Finishing upgrading
◐	◐	○	Failed in upgrading
○	○	○	• No SDHC Memory Card is inserted, or it is not recognized • No more SDHC Memory Card space available • The write-protect switch of the SDHC Memory Card is set to "LOCK" • An unformatted card

*1 The [REC] lamp normally blinks under the following conditions:

- When there is little space left (about 30 minutes or less) on an SDHC Memory Card
- When the number of files recorded on each SDHC Memory Card inserted in slots 1, 2, 3, and 4 totals over 5,000 files

*2 For details on how to run the Front-End or Back-End application, refer to the operating instructions supplied with the Front-End or Back-End application.

*3 If the error is related to the status of the SDHC Memory Card, the status will appear in the status display of the Overlay OSD. Refer to "Viewing Live Video → Viewing the status of the recorder" on page 55, or contact your supplier.

Notes:

- If pressing the [REC] button or entering a recording trigger fails to start recording, the [REC] lamp blinks at a high rate.
- The [BUSY] lamp blinks when accessing the SDHC Memory Card immediately after opening or closing the recorder's SDHC Memory Card slot cover.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Troubleshooting

Before requesting service, check the points listed below. If the problem persists, contact your supplier.

■ Starting up

Symptom	Remedy
Power does not come on.	<ul style="list-style-type: none"> • Check whether power cable (included in the sold separately Cable Kit) is connected correctly.
Power gets turned off automatically.	<ul style="list-style-type: none"> • If you have set a refer to “PowerOff Time” on page 81 and are running the recorder with the ignition switch at LOCK (OFF), turn the ignition switch on and reboot the recorder (see “Rebooting This Unit” on page 76). • If the operating environment is hotter than the recommended temperature, the recorder may turn off for safety reasons. If this happens, wait for the operating environment to cool down before using the unit.

■ Operation

Symptom	Remedy
Cover cannot be opened.	<ul style="list-style-type: none"> • Are you using the supplied key?
Key cannot be removed from lock.	<ul style="list-style-type: none"> • Is the SDHC Memory Card slot cover closed? The key can only be removed if the SDHC Memory Card slot cover is closed.
SDHC Memory Card slot cover cannot be closed.	<ul style="list-style-type: none"> • Is an SDHC Memory Card inserted correctly in an SDHC Memory Card slot?
The recorder does not respond or another problem has occurred.	<ul style="list-style-type: none"> • To reset the recorder, keep pressing the [REC] button and [STOP] button on the recorder together for about 10 seconds. When resetting, after all lamps turn off (1 or 2 seconds) and then on (1 or 2 seconds), all lamps blink. • If the button lock is enabled (“ANY” or “STOP”), change the setting to “OFF” (see “Operation Key Lock” on page 89).
Recorder was restarted without performing a reset.	<ul style="list-style-type: none"> • If you remove the SDHC Memory Card during SDHC Memory Card access ([BUSY] lamp is lit), the SDHC Memory Card slot may become inoperative. In such a case, the recorder automatically restarts itself, and the card slot will become operative again.

Troubleshooting (continued)

■ Recording

Symptom	Remedy
<p>Cannot start recording. Or a recording error warning appears.</p>	<ul style="list-style-type: none"> • Is an SDHC Memory Card inserted in an SDHC Memory Card slot? • Is the SDHC Memory Card slot cover closed? • Is there any free space on the SDHC Memory Card? Check the remaining space, and upload files to clear some space. • Make sure that the write-protect switch of the SDHC Memory Card is not set to LOCK. • Is a new SDHC Memory Card formatted in the recorder? • Are the [GPIO] connector or recording trigger criteria set correctly? • Check whether the recorder is set to administrator setup status. • Check whether the correct cables have been connected to the video input connectors.
<p>Recorded data have become totally or partially unusable.</p>	<ul style="list-style-type: none"> • A power outage or power cable (included in the sold separately Cable Kit) disconnection during recording may damage the SDHC Memory Card or corrupt data on an SDHC Memory Card. Never turn the power off while recording to an SDHC Memory Card. • Do not insert or remove an SDHC Memory Card when another SDHC Memory Card is being accessed as this may damage the SDHC Memory Card or corrupt data on the SDHC Memory Card. • Corrupted data may be restored automatically (see “Restoring Files Automatically” on page 75 for details).
<p>Video is distorted or not recorded.</p>	<ul style="list-style-type: none"> • Are Color Camera and video monitoring equipment connected properly? • Are both the video input connector selection and the input selection made with the Remote Control Panel the same? • Are the video outputs settings correct for the connected equipment? Connect a monitor to the [VIDEO OUT1] connector on the rear panel of the recorder and check the picture.
<p>Sound is distorted or not recorded.</p>	<ul style="list-style-type: none"> • Is the cable connection to the audio input correct? • Are both the audio input connector selection and the input selection made with the Remote Control Panel the same? • Are the audio outputs settings correct for the connected equipment? Refer to the Operating Instructions for the connected device.
<p>Information from equipment connected via the [SERIAL] connector is not recorded in the meta data file.</p>	<ul style="list-style-type: none"> • Do the communication settings of the connected device match those of the recorder’s [SERIAL] connector? Check this while referring to the Operating Instructions for connected equipment.

E00603	Unsupported Control Panel! Replace Control Panel.	<p>A Remote Control Panel not supported by this recorder was detected. Disconnect the Remote Control Panel.</p>
E00604	Will power off after uploading. Turn ACC ON to cancel power off.	<p>The vehicle engine switch is set to LOCK (OFF) when "PowerOff Time" on page 81 is set to "AUTO". The system awaits that the connection with the Front-End or Back-End application is released, or uploading, streaming, administrator setup, or upgrading on the Back-End application is finished. To continue using the recorder without turning it off, set the engine switch to ON.</p>
E02431	DSP error.	<p>Wait until the error message is cleared. Contact your supplier if the message does not clear after about a minute.</p>
E02432	This system is rebooting.	
E02440	System error. Couldn't format cards.	<p>Insert another SDHC Memory Card.</p>
E02441	Couldn't format cards.	
E02442	Write Protect cards found. Couldn't format.	<p>Disable SDHC Memory Card write-protection.</p>
E02444	No SDHC Cards found. Couldn't format.	<p>Insert an SDHC Memory Card.</p>
E02460	System error. Couldn't delete files.	<p>Contact your supplier.</p>

Error Message (continued)

No.	Message	Measure
E02461	Couldn't delete files.	Check the card information, and proceed as follows according to the information. CARD PROTECT: Release the write-protect switch of the SDHC Memory Card. UNFORMATTED: Replace with the formatted SDHC Memory Card. NO CARD: Insert an SDHC Memory Card. Others: Replace the SDHC Memory Card with another one.
E02470	System error. Couldn't restore files.	Contact your supplier.
E02471	Couldn't restore files.	
E02481	Write error on slot1. Record cannot be continued.	Be sure to use the correct procedure to remove and load SDHC Memory Cards. Replace an SDHC Memory Card that is not recognized after inserting it in the SDHC Memory Card slot and closing the SDHC Memory Card slot cover.
E02482	Write error on slot2. Record cannot be continued.	
E02483	Write error on slot3. Record cannot be continued.	
E02484	Write error on slot4. Record cannot be continued.	
E07671	CAMERA1 communication error. Please check the CAMERA1.	The Color Camera may not be correctly connected. Check whether the camera cable (included in the Color Camera) is correctly connected to the Color Camera. Contact your supplier if this measure does not solve the problem.
E08601	Playback and record cannot be executed.	Close the SDHC Memory Card slot cover.
E08602	The recorder's fan has stopped.	Contact your supplier.
E10400	Radar model file was not found.	
E10401	More than 10 radar model files were found.	
E10402	Invalid radar model file was found.	
E10403	Radar model file cannot be read.	
E10410	Radar communication error. Please check the radar setting.	
E15751	VUP Card found on slot1. Record cannot be started.	A card for upgrading is inserted. Data cannot be written to the card.
E15752	VUP Card found on slot2. Record cannot be started.	
E15753	VUP Card found on slot3. Record cannot be started.	
E15754	VUP Card found on slot4. Record cannot be started.	
E15755	Unsupported Card found on slot1. Record cannot be started.	The inserted card cannot be used. Check card type.
E15756	Unsupported Card found on slot2. Record cannot be started.	
E15757	Unsupported Card found on slot3. Record cannot be started.	
E15758	Unsupported Card found on slot4. Record cannot be started.	
E15759	Unformatted Card found on slot1. Record cannot be started.	An unformatted SDHC Memory Card has been inserted. Replace it with a formatted SDHC Memory Card.
E15760	Unformatted Card found on slot2. Record cannot be started.	
E15761	Unformatted Card found on slot3. Record cannot be started.	
E15762	Unformatted Card found on slot4. Record cannot be started.	

Error Message (continued)

No.	Message	Measure
E15763	Write Protect Card found on slot1. Record cannot be started.	The write-protection switch on the SDHC Memory Card is set to the "LOCK" position. Slide the write-protection switch away from the "LOCK" position.
E15764	Write Protect Card found on slot2. Record cannot be started.	
E15765	Write Protect Card found on slot3. Record cannot be started.	
E15766	Write Protect Card found on slot4. Record cannot be started.	
E15767	No SDHC Cards found. Record cannot be started.	No SDHC Memory Card is inserted. Insert an SDHC Memory Card.
E15768	Write Error. Record cannot be started.	The SDHC Memory Card cannot be written to. Replace the SDHC Memory Card.
E15769	Card Full. Record cannot be started.	The following conditions may have occurred. <ul style="list-style-type: none"> • There is no space left on the SDHC Memory Card. • Files contained in one of the SDHC Memory Cards inserted in the SDHC Memory Card slots 1, 2, 3, and 4 exceed 5,000 files. Replace the SDHC Memory Card with an SDHC Memory Card with free capacity, or free up space in the SDHC Memory Card for new data. (free space of more than 10 MB)
E20801	Recorder reboots by unrecoverable card ejection error.	Be sure to use the correct procedure to remove and load SDHC Memory Cards.
E20802	Please reinsert the card or reboot the system.	Check the SDHC Memory Card and re-insert it, or reboot the recorder.
E20901	Firmware Update FAILED!	An error occurred during the update. <ul style="list-style-type: none"> • Check whether the update file for the recorder has been correctly copied to the SDHC Memory Card or USB memory device. • Reformat the SDHC Memory Card or USB memory device before use. • Use another USB memory device. • Check whether there are multiple update files on the SDHC Memory Card or USB memory device. • Check whether there are multiple SDHC Memory Cards and/or USB memory devices containing update files. • An SDHC Memory Card with a \DATA folder cannot be used for updating. • A USB memory device containing a folder other than the \WIDKEY folder cannot be used for updating.
E20911	Microcontroller Update FAILED!	An error occurred during the update. The recorder reboots automatically to restart an update. Contact your supplier if the problem persists.
E20912	Unsupported Microcontroller Detected!	The recorder has broken down. Contact your supplier.
E20921	AG-RCP30 Update FAILED!	An error occurred during an update of an AG-RCP30 connected to the recorder. The recorder reboots automatically to restart an update. Contact your supplier if the problem persists.
E20922	Unsupported Control Panel Detected!	A Remote Control Panel not supported by the recorder was detected. Disconnect the Remote Control Panel.
E22420	Officer's information file cannot be loaded.	The officer data file (WID*****.TXT) is corrupted. Create a new officer's data file, save it to a USB memory device and re-register it.
E22421	Since you are not an administrator, you cannot open this menu.	You are not registered as an administrator and cannot open this menu. Ask a registered administrator for assistance.
E22422	Officer's information file cannot be loaded.	There is no Officer Registration file or it contains the wrong data. Create a correct Officer Registration file (WOFFICER.TXT), copy it to a USB memory device and reload it.
E22423	Admin's information file cannot be loaded.	There is no Administrator Registration file or it contains the wrong data. Create a correct Administrator Registration file (WADMIN.TXT), copy it to a USB memory device and reload it.
E22425	Classification list cannot be loaded.	There is no classify file or the content of the file is incorrect. Copy the correct classify file (CLASSIFY.TXT) to the USB memory device and reregister it.

Error Message (continued)

No.	Message	Measure
E22426	Menu copy failed.	For copying to a USB memory device, connect a write-enabled USB memory device. For copying to a recorder, connect a USB memory device that contains data.
E22427	Source information file cannot be loaded.	There is no source file or the content of the file is incorrect.
E22428	Shift information file cannot be loaded.	There is no shift file or the content of the file is incorrect.
E22429	Area information file cannot be loaded.	There is no area file or the content of the file is incorrect.
E22432	Service log copy failed.	Copying service log is failed. Connect a writable USB memory device and try copying again.
E22448	Operation was canceled to start streaming.	Streaming starts, and the operation is canceled. Wait until streaming ends.
E25410	GPS communication error. Please check the GPS module.	An error occurred in the GPS module. Consult your supplier.
E27201	Storage capacity was not enough to transfer the file.	Capacity of the server is not enough for uploading data, and uploading is canceled.
E27202	File transfer was completed. Restore file remained.	Upload was completed, but video files not restored remain on the SDHC Memory card.
E27203	File not found in SDHC cards.	No file for uploading is found on an SDHC Memory card.
E27401	Write Protect cards found. Couldn't start file transfer.	A read-only SDHC Memory Card is found, and uploading cannot be started.
E27403	Media error. File transfer was incomplete.	A read/write error was detected with the media. Replace the SDHC Memory Card with another one.
E27405	Storage write error. File transfer was incomplete.	A verification error has occurred in the server storage, and uploading cannot be completed.
E27407	No SDHC Cards found. Couldn't start file transfer.	No SDHC Memory card is inserted, and uploading cannot be started.
E27430	Couldn't start file transfer.	Upload cannot be started. Check the network connection.
E27431	File transfer was incomplete.	Upload cannot be completed because of network trouble.
E27499	System error. File transfer was incomplete.	A system error has occurred, and uploading cannot be completed.
E28201	USB storage capacity was not enough to export.	Use other USB memory device that is not full.
E28202	Export was completed. Restore file remained.	Restore the file not yet restored, and export it again.
E28203	File not found in SDHC cards.	There are no files to export. No export operation needed.
E28400	No USB storage devices found. Couldn't start export.	Connect a USB memory device.
E28401	Write Protect cards found. Couldn't start export.	Set the SDHC Memory Card write-protect switch away from the write-protect position.
E28402	All USB storages are read only. Couldn't start export.	Connect a write-enabled USB memory device.
E28403	Media error. Export was incomplete.	Replace the SDHC Memory Card or the USB memory device.
E28404	USB storage file system error. Couldn't start export.	Replace the USB memory device.
E28405	USB storage write error. Export was incomplete.	
E28406	Found update file in USB storage. Couldn't start export.	Delete the update file on the USB memory device.
E28407	No SDHC Cards found. Couldn't start export.	Insert an SDHC Memory Card with recorded files.
E28409	Couldn't start export.	Replace the SDHC Memory Card with another one.
E28499	System error. Export was incomplete.	Reboot the recorder.
E28880	USB storage was ejected. Export was incomplete.	Do not remove the USB memory device while exporting data. Reconnect the USB memory device and export again.

Error Message (continued)

No.	Message	Measure
E28881	USB storage was inserted. Export was incomplete.	Export the data again.
E29400	Unsupported camera connection.	A camera is connected only to the [CAMERA 4], [CAMERA 5], or [CAMERA 6] connector. Check the input.
E29401	No CAMERA1 video signal.	[CAMERA 1] connector input cannot be detected. Check whether the signal is input to the [CAMERA 1] connector.
E29402	No CAMERA2 video signal.	[CAMERA 2] connector input cannot be detected. Check whether the signal is input to the [CAMERA 2] connector.
E29403	No CAMERA3 video signal.	[CAMERA 3] connector input cannot be detected. Check whether the signal is input to the [CAMERA 3] connector.
E29404	No CAMERA4 video signal.	[CAMERA 4] connector input cannot be detected. Check whether the signal is input to the [CAMERA 4] connector.
E29405	No CAMERA5 video signal.	[CAMERA 5] connector input cannot be detected. Check whether the signal is input to the [CAMERA 5] connector.
E29406	No CAMERA6 video signal.	[CAMERA 6] connector input cannot be detected. Check whether the signal is input to the [CAMERA 6] connector.
E30400	Network setting parameter error.	Network settings are not correct. Check the network settings.

Camera Connection and Combination of Cameras

Combination of cameras depends on the cameras connected to the recorder. Available combination is as shown below. Selectable combination of cameras depends on the detected cameras.

- If only CAM4, CAM5, and CAM6 are set to OFF, preset patterns, 4Ch-QUAD, 4Ch-PANORAMA, 5Ch-QUAD, and 5Ch-PANORAMA, cannot be selected.
- If all of CAM1, CAM2, and CAM 3 are set to OFF, preset patterns, 4Ch-PANORAMA and 5Ch-PANORAMA, cannot be selected.
- If two channels of CAM1, CAM2, and CAM 3 are not connected, preset patterns, 5Ch-PANORAMA cannot be selected.

Selectable preset patterns depends on the detected cameras.

- If CAM1 is set to OFF, any combination of cameras indicated by "1" cannot be selected.
- If CAM2 is set to OFF, any combination of cameras indicated by "2" cannot be selected.
- If CAM3 is set to OFF, any combination of cameras indicated by "3" cannot be selected.
- If any of CAM4, CAM5, or CAM6 is set to ON, a pattern indicated by "456" can be selected.

Status Display

The Status Display shows messages about the operating status of the SDHC Memory Card and the recorder. Take action as appropriate for each status.

Status Display	Measure
CARD FULL	The following conditions may have occurred. <ul style="list-style-type: none">• There is no space left on the SDHC Memory Card.• Files contained in one of the SDHC Memory Cards inserted in the SDHC Memory Card slots 1, 2, 3, and 4 exceed 5,000 files. Replace the SDHC Memory Card with an SDHC Memory Card with free capacity, or free up space in the SDHC Memory Card for new data.
CARD PROTECT	The write-protect switch of the SDHC Memory Card is set to "LOCK". Move the switch to enable writing.
VUP CARD	Writing is not possible on an SDHC Memory Card intended for version upgrade. Replace the card with one that is not intended for version upgrade.
UNFORMATTED	The SDHC Memory Card is not formatted. Replace it with a formatted card.
NO CARD	No SDHC Memory Card is inserted. Insert an SDHC Memory Card.
READ ERROR	An error occurred while reading. File playback is not possible, or the associated meta information cannot be displayed correctly.
UNSUPPORTED	Archive screen: The file is unsupported. Playback is not available. Live screen: The memory card is unsupported. For the memory card supported, refer to "Usable memory cards" in Operating Instructions Section 1: Before Use.
PLAY ERROR	A decoder malfunction occurred. Playback is not available. Reboot the recorder.

Playback with the remote control panel is not available at present. Upgrading is scheduled for the future. For playback, it is recommended to use the Front-End application or Back-End Client application.

Service Log

The operation history of the recorder can be obtained as service logs.

Contents

The items shown below can be obtained as service logs.

■ Normal operation

Software License Agreement

Software License Agreement <GPL>

GNU GENERAL PUBLIC LICENSE Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

- You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
- You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
- Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.
- If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

- If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
- The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Software License Agreement (continued)

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Software License Agreement (continued)

Software License Agreement <LGPL>

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages—typically libraries—of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the “Lesser” General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a “work based on the library” and a “work that uses the library”. The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called “this License”). Each licensee is addressed as “you”.

A “library” means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The “Library”, below, refers to any such software library or work which has been distributed under these terms. A “work based on the Library” means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term “modification”.)

“Source code” for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- The modified work must itself be a software library.
- You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.
- If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

Software License Agreement (continued)

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the Library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

- a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)
- b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.
- c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.
- d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.
- e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

- a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.
- b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any

further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (<http://www.openssl.org/>)"
4. The names "OpenSSL Toolkit" and "OpenSSL Project" must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org.
5. Products derived from this software may not be called "OpenSSL" nor may "OpenSSL" appear in their names without prior written permission of the OpenSSL Project.
6. Redistributions of any form whatsoever must retain the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>)"

THIS SOFTWARE IS PROVIDED BY THE OpenSSL PROJECT "AS IS" AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE OpenSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This product includes cryptographic software written by Eric Young (ey@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License

Copyright (C) 1995-1998 Eric Young (ey@cryptsoft.com) All rights reserved.

This package is an SSL implementation written by Eric Young (ey@cryptsoft.com).

The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used.

This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgment: "This product includes cryptographic software written by Eric Young (ey@cryptsoft.com)"

The word "cryptographic" can be left out if the rouines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement: "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

Software License Agreement <Blowfish License>

Copyright (C) 1995-1997 Eric Young (ey@cryptsoft.com)

All rights reserved.

This package is an Blowfish implementation written by Eric Young (ey@cryptsoft.com).

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution.

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

This product includes software developed by Eric Young (ey@cryptsoft.com).

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

Software License Agreement <DES License>

Copyright (C) 1995-1997 Eric Young (ey@cryptsoft.com) All rights reserved.

This package is an DES implementation written by Eric Young (ey@cryptsoft.com).

The implementation was written so as to conform with MIT's libdes.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution.

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of that the SSL library. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement:

This product includes software developed by Eric Young (ey@cryptsoft.com)

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

Software License Agreement (continued)

Software License Agreement <X.Org License>

1. Introduction

The X.Org Foundation X Window System distribution is a compilation of code and documentation from many sources. This document is intended primarily as a guide to the licenses used in the distribution: you must check each file and/or package for precise redistribution terms. None-the-less, this summary may be useful to many users. No software incorporating the XFree86 1.1 license has been incorporated.

This document is based on the compilation from XFree86.

2. XFree86 License

XFree86 code without an explicit copyright is covered by the following copyright/license:
Copyright (C) 1994-2003 The XFree86 Project, Inc. All Rights Reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE XFREE86 PROJECT BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Except as contained in this notice, the name of the XFree86 Project shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Software without prior written authorization from the XFree86 Project.

3. Other Licenses

Portions of code are covered by the following licenses/copyrights. See individual files for the copyright dates.

3.1 X/MIT Copyrights

3.1.1 X Consortium

Copyright (C) <date> X Consortium

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE X CONSORTIUM BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Except as contained in this notice, the name of the X Consortium shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Software without prior written authorization from the X Consortium.

X Window System is a trademark of X Consortium, Inc.

3.1.2 The Open Group

Copyright <date> The Open Group

Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation.

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE OPEN GROUP BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Except as contained in this notice, the name of The Open Group shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Software without prior written authorization from The Open Group.

3.2 Berkeley-based copyrights:

3.2.1 General

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. The name of the author may not be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE AUTHOR "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

3.2.2 UCB/LBL

Copyright (c) 1993 The Regents of the University of California. All rights reserved.

This software was developed by the Computer Systems Engineering group at Lawrence Berkeley Laboratory under DARPA contract BG 91-66 and contributed to Berkeley.

All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by the University of California, Lawrence Berkeley Laboratory.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by the University of California, Berkeley and its contributors.
4. Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE REGENTS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

3.2.3 The NetBSD Foundation, Inc.

Copyright (c) 2003 The NetBSD Foundation, Inc. All rights reserved.

This code is derived from software contributed to The NetBSD Foundation by Ben Collver <collver1@attbi.com>

Software License Agreement (continued)

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by the NetBSD Foundation, Inc. and its contributors.
4. Neither the name of The NetBSD Foundation nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE NETBSD FOUNDATION, INC. AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE FOUNDATION OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

3.2.4 Theodore Ts'o.

Copyright Theodore Ts'o, 1994, 1995, 1996, 1997, 1998, 1999. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, and the entire permission notice in its entirety, including the disclaimer of warranties.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. The name of the author may not be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH ARE HEREBY DISCLAIMED. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF NOT ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

3.2.5 Theo de Raadt and Damien Miller

Copyright (c) 1995,1999 Theo de Raadt. All rights reserved. Copyright (c) 2001-2002 Damien Miller. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

3.4 GLX Public License

GLX PUBLIC LICENSE (Version 1.0 (2/11/99)) ("License")

Subject to any third party claims, Silicon Graphics, Inc. ("SGI") hereby grants permission to Recipient (defined below), under Recipient's copyrights in the Original Software (defined below), to use, copy, modify, merge, publish, distribute, sublicense and/or sell copies of Subject Software (defined below), and to permit persons to whom the Subject Software is furnished in accordance with this License to do the same, subject to all of the following terms and conditions, which Recipient accepts by engaging in any such use, copying, modifying, merging, publishing, distributing, sublicensing or selling:

1. Definitions.
 - (a) "Original Software" means source code of computer software code which is described in Exhibit A as Original Software.
 - (b) "Modifications" means any addition to or deletion from the substance or structure of either the Original Software or any previous Modifications. When Subject Software is released as a series of files, a Modification means (i) any addition to or deletion from

Software License Agreement (continued)

- the contents of a file containing Original Software or previous Modifications and (ii) any new file that contains any part of the Original Code or previous Modifications.
- (c) "Subject Software" means the Original Software or Modifications or the combination of the Original Software and Modifications, or portions of any of the foregoing.
 - (d) "Recipient" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "Recipient" includes any entity which controls, is controlled by, or is under common control with Recipient. For purposes of this definition, "control" of an entity means (a) the power, direct or indirect, to direct or manage such entity, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.
2. **Redistribution of Source Code Subject to These Terms.** Redistributions of Subject Software in source code form must retain the notice set forth in Exhibit A, below, in every file. A copy of this License must be included in any documentation for such Subject Software where the recipients' rights relating to Subject Software are described. Recipient may distribute the source code version of Subject Software under a license of Recipient's choice, which may contain terms different from this License, provided that (i) Recipient is in compliance with the terms of this License, and (ii) the license terms include this Section 2 and Sections 3, 4, 7, 8, 10, 12 and 13 of this License, which terms may not be modified or superseded by any other terms of such license. If Recipient distributes the source code version under a different license Recipient must make it absolutely clear that any terms which differ from this License are offered by Recipient alone, not by SGI. Recipient hereby agrees to indemnify SGI for any liability incurred by SGI as a result of any such terms Recipient offers.
 3. **Redistribution in Executable Form.** The notice set forth in Exhibit A must be conspicuously included in any notice in an executable version of Subject Software, related documentation or collateral in which Recipient describes the user's rights relating to the Subject Software. Recipient may distribute the executable version of Subject Software under a license of Recipient's choice, which may contain terms different from this License, provided that (i) Recipient is in compliance with the terms of this License, and (ii) the license terms include this Section 3 and Sections 4, 7, 8, 10, 12 and 13 of this License, which terms may not be modified or superseded by any other terms of such license. If Recipient distributes the executable version under a different license Recipient must make it absolutely clear that any terms which differ from this License are offered by Recipient alone, not by SGI. Recipient hereby agrees to indemnify SGI for any liability incurred by SGI as a result of any such terms Recipient offers.
 4. **Termination.** This License and the rights granted hereunder will terminate automatically if Recipient fails to comply with terms herein and fails to cure such breach within 30 days of the breach. Any sublicense to the Subject Software which is properly granted shall survive any termination of this License absent termination by the terms of such sublicense. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.
 5. **No Trademark Rights.** This License does not grant any rights to use any trade name, trademark or service mark whatsoever. No trade name, trademark or service mark of SGI may be used to endorse or promote products derived from the Subject Software without prior written permission of SGI.
 6. **No Other Rights.** This License does not grant any rights with respect to the OpenGL API or to any software or hardware implementation thereof or to any other software whatsoever, nor shall any other rights or licenses not expressly granted hereunder arise by implication, estoppel or otherwise with respect to the Subject Software. Title to and ownership of the Original Software at all times remains with SGI. All rights in the Original Software not expressly granted under this License are reserved.
 7. **Compliance with Laws; Non-Infringement.** Recipient shall comply with all applicable laws and regulations in connection with use and distribution of the Subject Software, including but not limited to, all export and import control laws and regulations of the U.S. government and other countries. Recipient may not distribute Subject Software that (i) in any way infringes (directly or contributorily) the rights (including patent, copyright, trade secret, trademark or other intellectual property rights of any kind) of any other person or entity or (ii) breaches any representation or warranty, express, implied or statutory, which under any applicable law it might be deemed to have been distributed.
 8. **Claims of Infringement.** If Recipient at any time has knowledge of any one or more third party claims that reproduction, modification, use, distribution, import or sale of Subject Software (including particular functionality or code incorporated in Subject Software) infringes the third party's intellectual property rights, Recipient must place in a well-identified web page bearing the title "LEGAL" a description of each such claim and a description of the party making each such claim in sufficient detail that a user of the Subject Software will know whom to contact regarding the claim. Also, upon gaining such knowledge of any such claim, Recipient must conspicuously include the URL for such web page in the Exhibit A notice required under Sections 2 and 3, above, and in the text of any related documentation, license agreement or collateral in which Recipient describes end user's rights relating to the Subject Software. If Recipient obtains such knowledge after it makes Subject Software available to any other person or entity, Recipient shall take other steps (such as notifying appropriate mailing lists or news-groups) reasonably calculated to inform those who received the Subject Software that new knowledge has been obtained.
 9. **DISCLAIMER OF WARRANTY.** SUBJECT SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE SUBJECT SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON- INFRINGING. SGI ASSUMES NO RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE. SHOULD ANY SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, SGI ASSUMES NO COST OR LIABILITY FOR ANY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY SUBJECT SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.
 10. **LIMITATION OF LIABILITY.** UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE OR STRICT LIABILITY), CONTRACT, OR OTHERWISE, SHALL SGI OR ANY SGI LICENSOR BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL,

- OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, LOSS OF DATA, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SGI'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO RECIPIENT.
11. **Indemnity.** Recipient shall be solely responsible for damages arising, directly or indirectly, out of its utilization of rights under this License. Recipient will defend, indemnify and hold harmless Silicon Graphics, Inc. from and against any loss, liability, damages, costs or expenses (including the payment of reasonable attorneys fees) arising out of Recipient's use, modification, reproduction and distribution of the Subject Software or out of any representation or warranty made by Recipient.
 12. **U.S. Government End Users.** The Subject Software is a "commercial item" consisting of "commercial computer software" as such terms are defined in title 48 of the Code of Federal Regulations and all U.S. Government End Users acquire only the rights set forth in this License and are subject to the terms of this License.
 13. **Miscellaneous.** This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed so as to achieve as nearly as possible the same economic effect as the original provision and the remainder of this License will remain in effect. This License shall be governed by and construed in accordance with the laws of the United States and the State of California as applied to agreements entered into and to be performed entirely within California between California residents. Any litigation relating to this License shall be subject to the exclusive jurisdiction of the Federal Courts of the Northern District of California (or, absent subject matter jurisdiction in such courts, the courts of the State of California), with venue lying exclusively in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

Exhibit A

The contents of this file are subject to Sections 2, 3, 4, 7, 8, 10, 12 and 13 of the GLX Public License Version 1.0 (the "License"). You may not use this file except in compliance with those sections of the License. You may obtain a copy of the License at Silicon Graphics, Inc., attn: Legal Services, 2011 N. Shoreline Blvd., Mountain View, CA 94043 or at <http://www.sgi.com/software/opensource/glx/license.html>.

Software distributed under the License is distributed on an "AS IS" basis.

ALL WARRANTIES ARE DISCLAIMED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, OF FITNESS FOR A PARTICULAR PURPOSE OR OF NON-INFRINGEMENT. See the License for the specific language governing rights and limitations under the License.

The Original Software is GLX version 1.2 source code, released February, 1999. The developer of the Original Software is Silicon Graphics, Inc. Those portions of the Subject Software created by Silicon Graphics, Inc. are Copy-right (c) 1991-9 Silicon Graphics, Inc. All Rights Reserved.

3.5 CID Font Code Public License

CID FONT CODE PUBLIC LICENSE (Version 1.0 (3/31/99))("License")

Subject to any applicable third party claims, Silicon Graphics, Inc. ("SGI") hereby grants permission to Recipient (defined below), under SGI's copyrights in the Original Software (defined below), to use, copy, modify, merge, publish, distribute, sublicense and/or sell copies of Subject Software (defined below) in both source code and executable form, and to permit persons to whom the Subject Software is furnished in accordance with this License to do the same, subject to all of the following terms and conditions, which Recipient accepts by engaging in any such use, copying, modifying, merging, publication, distributing, sublicensing or selling:

1. Definitions.

- a. "Original Software" means source code of computer software code that is described in Exhibit A as Original Software.
- b. "Modifications" means any addition to or deletion from the substance or structure of either the Original Software or any previous Modifications. When Subject Software is released as a series of files, a Modification means (i) any addition to or deletion from the contents of a file containing Original Software or previous Modifications and (ii) any new file that contains any part of the Original Code or previous Modifications.
- c. "Subject Software" means the Original Software or Modifications or the combination of the Original Software and Modifications, or portions of any of the foregoing.
- d. "Recipient" means an individual or a legal entity exercising rights under the terms of this License. For legal entities, "Recipient" includes any entity that controls, is controlled by, or is under common control with Recipient. For purposes of this definition, "control" of an entity means (i) the power, direct or indirect, to direct or manage such entity, or (ii) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.
- e. "Required Notice" means the notice set forth in Exhibit A to this License.
- f. "Accompanying Technology" means any software or other technology that is not a

Software License Agreement (continued)

- Modification and that is distributed or made publicly available by Recipient with the Subject Software. Separate software files that do not contain any Original Software or any previous Modification shall not be deemed a Modification, even if such software files are aggregated as part of a product, or in any medium of storage, with any file that does contain Original Software or any previous Modification.
- License Terms. All distribution of the Subject Software must be made subject to the terms of this License. A copy of this License and the Required Notice must be included in any documentation for Subject Software where Recipient's rights relating to Subject Software and/or any Accompanying Technology are described. Distributions of Subject Software in source code form must also include the Required Notice in every file distributed. In addition, a ReadMe file entitled "Important Legal Notice" must be distributed with each distribution of one or more files that incorporate Subject Software. That file must be included with distributions made in both source code and executable form. A copy of the License and the Required Notice must be included in that file. Recipient may distribute Accompanying Technology under a license of Recipient's choice, which may contain terms different from this License, provided that (i) Recipient is in compliance with the terms of this License, (ii) such other license terms do not modify or supersede the terms of this License as applicable to the Subject Software, (iii) Recipient hereby indemnifies SGI for any liability incurred by SGI as a result of the distribution of Accompanying Technology or the use of other license terms.
 - Termination. This License and the rights granted hereunder will terminate automatically if Recipient fails to comply with terms herein and fails to cure such breach within 30 days of the breach. Any sublicense to the Subject Software that is properly granted shall survive any termination of this License absent termination by the terms of such sublicense. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.
 - Trademark Rights. This License does not grant any rights to use any trade name, trademark or service mark whatsoever. No trade name, trademark or service mark of SGI may be used to endorse or promote products derived from or incorporating any Subject Software without prior written permission of SGI.
 - No Other Rights. No rights or licenses not expressly granted hereunder shall arise by implication, estoppel or otherwise. Title to and ownership of the Original Software at all times remains with SGI. All rights in the Original Software not expressly granted under this License are reserved.
 - Compliance with Laws; Non-Infringement. Recipient shall comply with all applicable laws and regulations in connection with use and distribution of the Subject Software, including but not limited to, all export and import control laws and regulations of the U.S. government and other countries. Recipient may not distribute Subject Software that (i) in any way infringes (directly or contributorily) the rights (including patent, copyright, trade secret, trademark or other intellectual property rights of any kind) of any other person or entity, or (ii) breaches any representation or warranty, express, implied or statutory, which under any applicable law it might be deemed to have been distributed.
 - Claims of Infringement. If Recipient at any time has knowledge of any one or more third party claims that reproduction, modification, use, distribution, import or sale of Subject Software (including particular functionality or code incorporated in Subject Software) infringes the third party's intellectual property rights, Recipient must place in a well-identified web page bearing the title "LEGAL" a description of each such claim and a description of the party making each such claim in sufficient detail that a user of the Subject Software will know whom to contact regarding the claim. Also, upon gaining such knowledge of any such claim, Recipient must conspicuously include the URL for such web page in the Required Notice, and in the text of any related documentation, license agreement or collateral in which Recipient describes end user's rights relating to the Subject Software. If Recipient obtains such knowledge after it makes Subject Software available to any other person or entity, Recipient shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to provide such knowledge to those who received the Subject Software.
 - DISCLAIMER OF WARRANTY. SUBJECT SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE SUBJECT SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. SGI ASSUMES NO RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE. SHOULD ANY SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, SGI ASSUMES NO COST OR LIABILITY FOR ANY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY SUBJECT SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.
 - LIMITATION OF LIABILITY. UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE OR STRICT LIABILITY), CONTRACT, OR OTHERWISE, SHALL SGI OR ANY SGI LICENSOR BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SUBJECT SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SUBJECT SOFTWARE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF CERTAIN DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO RECIPIENT TO THE EXTENT SO DISALLOWED.
 - Indemnity. Recipient shall be solely responsible for damages arising, directly or indirectly, out of its utilization of rights under this License. Recipient will defend, indemnify and hold SGI and its successors and assigns harmless from and against any loss, liability, damages, costs or expenses (including the payment of reasonable attorneys fees) arising out of (Recipient's use, modification, reproduction and distribution of the Subject Software or out of any representation or warranty made by Recipient.
 - U.S. Government End Users. The Subject Software is a "commercial item" consisting of "commercial computer software" as such terms are defined in title 48 of the Code of Federal Regulations and all U.S. Government End Users acquire only the rights set forth in this License and are subject to the terms of this License.
 - Miscellaneous. This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable by any judicial

or administrative authority having proper jurisdiction with respect thereto, such provision shall be reformed so as to achieve as nearly as possible the same economic effect as the original provision and the remainder of this License will remain in effect. This License shall be governed by and construed in accordance with the laws of the United States and the State of California as applied to agreements entered into and to be performed entirely within California between California residents. Any litigation relating to this License shall be subject to the exclusive jurisdiction of the Federal Courts of the Northern District of California (or, absent subject matter jurisdiction in such courts, the courts of the State of California), with venue lying exclusively in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation that provides that the language of a contract shall be construed against the drafter shall not apply to this License.

Exhibit A

Copyright (c) 1994-1999 Silicon Graphics, Inc.

The contents of this file are subject to the CID Font Code Public License Version 1.0 (the "License"). You may not use this file except in compliance with the License. You may obtain a copy of the License at Silicon Graphics, Inc., attn: Legal Services, 2011 N. Shoreline Blvd., Mountain View, CA 94043 or at <http://www.sgi.com/software/opensource/cid/license.html>

Software distributed under the License is distributed on an "AS IS" basis. See the License for the specific language governing rights and limitations under the License.

The Original Software (as defined in the License) is CID font code that was developed by Silicon Graphics, Inc. Those portions of the Subject Software (as defined in the License) that were created by Silicon Graphics, Inc. are Copyright (c) 1994-1999 Silicon Graphics, Inc. All Rights Reserved.

[NOTE: When using this text in connection with Subject Software delivered solely in object code form, Recipient may replace the words "this file" with "this software" in both the first and second sentences.]

3.6 Bitstream Vera Fonts Copyright

The fonts have a generous copyright, allowing derivative works (as long as "Bitstream" or "Vera" are not in the names), and full redistribution (so long as they are not "sold" by themselves). They can be bundled, redistributed and sold with any software.

The fonts are distributed under the following copyright:

Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved. Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions:

The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera".

This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names.

The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL BITSTREAM OR THE GNOME FOUNDATION BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and

Software License Agreement (continued)

Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org.

Panasonic Computer Solutions Company

Worldwide Product Warranties

Section 1: Limited Warranty - Hardware

Panasonic Computer Solutions Company (referred to as "Panasonic") will repair the products listed below with new or rebuilt parts, free of charge in the U.S.A. or other Panasonic approved location for the period specified below from the date of original purchase in the event of a defect in materials or workmanship. These warranties are extended solely to the original purchaser. A purchase receipt or other proof of date of original purchase will be required before warranty performance is rendered.

- Laptop Computers – 3 Years
- PDRC - LCD and Keyboard Assemblies – 3 Years
- MDWD – Mobile Computer and Wireless Display Assemblies - 3 Years
- Hand-held Computers (P1/P2) – 1 Year
- Arbitrator Video Camera – 1 Year
- Arbitrator Recorder Unit – 1 Year
- Arbitrator Remote Control Panel – 1 Year
- Arbitrator Wireless Receiver Unit – 1 Year
- Arbitrator P2 Card(s) (All Sizes) – 1 Year
- Arbitrator Wireless Microphone(s) / Transmitter – 90 Days
- Arbitrator System Component Interconnect Cables – 90 Days

Main Battery

The battery supplied with the product is covered under the warranty for one (1) year from date of purchase, except as excluded in Section 3. Batteries purchased separately are covered under the warranty for one (1) year from the date of purchase. A battery furnished under the warranty is covered for the remaining period of the one year warranty on the original or purchased battery.

Options and Accessories

The below listed Panasonic brand or supplied options and accessories are covered under this limited warranty for the period specified from the date of purchase or as specifically stated:

- AC Adapter / Power Cord – 3 Years
- Memory Card (Panasonic Brand) – 3 Years
- Car Mount Docking Station PCB or Complete Vehicle Docking Station – 3 Years
- Port Replicator / I-O Box – 3 Years
- Antenna Pass-through Cable – 3 Years
- Backlit or Full-sized keyboard - 3 Years or assumes warranty of the unit in which it is installed
- Integrated Panasonic supplied options and kits including, but not limited to Wireless Modems, Media Bay Drives (Floppy, CD, DVD, Combo), GPS, Bluetooth, Smartcard Reader, and Fingerprint readers – 3 Years or assumes warranty period of the unit in which it is installed provided the integration was performed by Panasonic or an Authorized Options Integrator
- Hard Drive (separately purchased) – 1 Year
- External USB Drives (CD / DVD / Floppy / Hard Drive) – 1 Year
- Optional Battery – 1 Year
- Battery Charger – 1 Year
- Standard or Digitizer Stylus Pens – 90 Days (physical damage excluded)

Section 2 - Limited Warranty - Software

Panasonic Computer Solutions Company (referred to as "Panasonic") warrants to you only that the disk(s) or other media on which the Programs are furnished will be free from defects in material and workmanship under normal use for a period of sixty (60) days from the date of delivery thereof to you, as evidenced by your purchase receipt.

This is the only warranty Panasonic makes to you. Panasonic does not warrant that the functions contained in the Programs will meet your requirements or that the operation of the Programs will be uninterrupted or error free. Panasonic shall have no obligation for any defects in the disk(s) or other media on which the Programs are furnished resulting from your storage thereof, or for defects that have been caused by operation of the disk(s) or other media.

Panasonic's entire liability and your exclusive remedy under this warranty shall be limited to the replacement, in the United States or other Panasonic designated location, of any defective disk or other media which is returned to Panasonic's Authorized Service Center, together with a copy of the purchase receipt, within the aforesaid warranty period. The customer is responsible for ensuring that all data is backed up and made secure during normal use and before sending a unit for service.

Section 3 - Limited Warranty Exclusions

Specifically excluded from the warranty are:

- All consumable items; such as screen protection films, logo badges, labels, cleaning cloths, carry cases, manuals, cables, straps, belts, holsters, leathers, and harnesses and any other options and accessories not listed above or covered under a separate warranty
- Failures related to the product operating system, hard drive image, software setup, software program, virus, other program(s) or file(s) on the hard drive or in any computer memory location
- Failures due to BIOS settings or changes, as well as any cosmetic or physical damage to the unit
- Any unit or device with a missing or altered model number or serial number label
- Damage which occurs in shipment
- Failures which are caused by products not supplied by Panasonic
- Failures which result from alteration, accident, misuse, introduction of liquid or other foreign matter into the unit, abuse, neglect, installation, maladjustment of consumer controls, improper maintenance or modification, use not in accordance with product use instructions
- Failures due to service by anyone other than a Panasonic Authorized Service Provider
- Failures caused by improper integration by any company other than Panasonic Configuration and Integration Centers
- Damage, failure, or loss due to the unit being stolen, lost, misplaced, or used by anyone other than the original purchaser
- Damage that is attributable to acts of God

This warranty only covers failures due to defects in materials or workmanship which occur during normal use.

Other Limits and Exclusions: There are no other express warranties except as listed above.

PANASONIC SHALL NOT BE LIABLE FOR LOSS OF DATA OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED TO THE APPLICABLE WARRANTY PERIOD SET FORTH ABOVE. Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you.

This limited warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

For technical support or to arrange for service on your Panasonic computer product, call our toll-free 24 hour hotline at 1-800-LAPTOP5.
