RQT6924

(For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.
A 5-ampere fuse is fitted in this plug.
Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.
Check for the ASTA mark ⬡ or the BSI mark ▽ on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local dealer.

> ## CAUTION!
> IF THE FITTED MOULDED PLUG IS UNSUIT-ABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE RE-MOVED AND THE PLUG CUT OFF AND DIS-POSED OF SAFELY.
> THERE IS A DANGER OF SEVERE ELECTRI-CAL SHOCK IF THE CUT OFF PLUG IS IN-SERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below.
If in any doubt please consult a qualified electrician.

IMPORTANT
The wires in this mains lead are coloured in accordance with the following code:
Blue: Neutral, Brown: Live.
As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL ⏚ OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use
Remove the connector cover.

How to replace the fuse
The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below. Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

CD-R/RW	—	WMA MP3 JPEG

- ●Use discs with the above logos and that conform to specifications. The unit cannot play other discs correctly.
- ●Do not use irregularly shaped discs (e.g. heart-shaped), as these can damage the unit.

■ Discs that cannot be played
DVD-ROM, CD-ROM, CDV, CD-G, +RW, DVD-RW, CVD, SVCD, SACD, Divx Video Discs and Photo CD.

■ Disc structure
Disc structure and the labels given to the items on discs depend on the disc type.
Track: the smallest division on DVD-Audio, CDs and Video CDs, or a single WMA/MP3 file.
Chapter: the smallest division on DVD-Video.
Group: collections of tracks on DVD-Audio and equivalent to folders or albums on data discs.
Title: the largest division on DVD-Video, usually an entire movie.
Program: the division on DVD-RAM equivalent to a single recording.
Picture: a single JPEG file.
Play list: the largest grouping on a HighMAT disc, or a group of scenes on DVD-RAM.
Scene: DVD-RAM program sections specified and grouped into play lists on a DVD video recorder.
Content: covers tracks and pictures on HighMAT discs.

Playing DVDs and Video CDs
The producer of these discs can control how they are played so you may not always be able to control play as described in these operating instructions (for example if the play time is not displayed or if a Video CD has menus).
Read the disc's instructions carefully.

■ CD-R and CD-RW discs
This unit can play CD-R/RW (audio recording disc) recorded with CD-DA, video CD, WMA, MP3, or JPEG. Finalize※ the disc after recording.
See page 20 for more information about WMA, MP3, and JPEG.

■ DVD-R discs
Panasonic DVD-R recorded and finalized※ on a Panasonic DVD video recorder are played as DVD-Video on this unit.

※A process that allows play on compatible equipment.
■ DVD-RAM discs
DVD-RAM discs must meet the following conditions for this unit to be able to play them.

Type	●Non-cartridge discs ●Discs that can be removed from their cartridges (TYPE 2 and 4)
Capacity	●12 cm 9.4 GB (double-sided) and 4.7 GB (single-sided) ●8 cm 2.8 GB (double-sided)
Recording format	Discs recorded with DVD video recorders, DVD video cameras, personal computers, etc., using Version 1.1 of the Video Recording Format (a unified video recording standard).

- ●Remove TYPE 2 and 4 discs from their cartridges before use, then return them when you are finished. Read the instructions for the disc carefully.
- ●Do not allow the disc to become dirty or scratched. Store discs in their cartridges and ensure the disc label and cartridge label face the same way.
- ●Some parts of the disc, for example where one program ends and another begins, may not play smoothly.

Note
It may not be possible to play CD-R, CD-RW, DVD-R and DVD-RAM in all cases due to the type of disc or condition of the recording.

■ Video systems
This unit can play both the PAL and NTSC video systems. To view PAL or NTSC, however, your television must match the system used on the disc.
PAL discs cannot be correctly viewed on an NTSC television. NTSC can be correctly viewed on a PAL television by converting the video signal to PAL 60 (➡ page 31, Video—NTSC Disc Output).

■ HighMAT discs
This unit is compatible with HighMAT discs containing WMA, MP3, and/or JPEG files.

■ To clean discs
DVD-Audio, DVD-Video, Video CD, CD
Wipe with a damp cloth and then wipe dry.

DVD-RAM, DVD-R
- ●Clean with an optional DVD-RAM/PD disc cleaner (LF-K200DCA1, where available).
- ●Never use cloths or cleaners for CDs etc.

■ Handling precautions
- ●Do not write on the label side with a ball-point pen or other writing instrument.
- ●Do not use record cleaning sprays, benzine, thinner, static electricity prevention liquids or any other solvent.
- ●Do not attach labels or stickers to discs. (Do not use discs with exposed adhesive from tape or left over peeled-off stickers.)
- ●Do not use scratch-proof protectors or covers.
- ●Do not use discs printed with label printers available on the market.

Note
●Do not use the stand to carry the unit.
●Do not apply force down upon the unit while using the stand.
●Do not place anything on top of the AV control receiver.

●**Use only supplied speakers**
Using other speakers can damage the unit and sound quality will be negatively affected.
●Set the speakers up on an even surface to prevent them from falling. Take proper precautions to prevent the speakers from falling if you cannot set them up on an even surface.
●Place the front, center, and surround speakers at approximately the same distance from the seating position. The angles in the diagram are approximate.

Positioning for best effect
How you set up your speakers can affect the bass and the sound field. Note the following points.
●Place speakers on flat secure bases.
●Placing speakers too close to floors, walls, and corners can result in excessive bass. Cover walls and windows with thick curtain.

Main unit
Keep your speakers at least 10 mm away from the system for proper ventilation.

Center speaker
●You can also put this speaker directly under the television.
●Vibration caused by the center speaker can disrupt the picture if it is placed directly on the television. Put the center speaker on a rack or shelf.

Subwoofer
Place to the right of the television, on the floor or a sturdy shelf so that it won't cause vibration.
Leave 10 cm on the right for the woofer to be effective. Leave 10 cm at the rear for ventilation.

STEP3 Television

Video cable

■ Connecting a television with a VIDEO IN terminal

Connect directly to your television.
Do not connect the unit through a video cassette recorder, be-cause the picture may not be played correctly due to the copy guard.
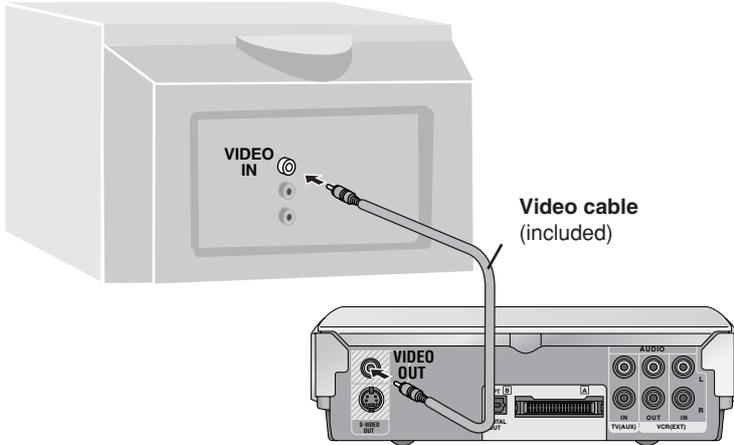

For the United Kingdom, Continental Europe and Russia

Use the RCAJ adaptor (included) if your televi-sion has a 21-pin SCART terminal. You do not have to connect anything to the AUDIO termi-nals.

COMPONENT VIDEO OUT terminal
These terminals can be used for either interlace or progressive output and provide a purer picture than the S VIDEO OUT terminal. Connec-tion using these terminals outputs the color difference signals (P$_B$/P$_R$) and luminance signal (Y) separately in order to achieve high fidelity in reproducing colors.
● The description of the component video input terminals depends on the television or monitor (e.g. Y/P$_B$/P$_R$, Y/B-Y/R-Y, Y/C$_B$/C$_R$). Con-nect to terminals of the same color.

To enjoy progressive video
● Connect to the component video (480P) input terminals on a television compatible with this unit's copy guard system. (Video will not be displayed correctly if connected to an incompatible television.)
● Press [PROGRESSIVE] so "PROGRESSIVE" appears on the display (➡ page 13).
● All televisions manufactured by Panasonic and that have 480P input connectors are compatible. Consult the manufacturer if you have another brand of television.

■ Connecting a television with an S-VIDEO IN terminal

Television's S VIDEO IN terminal

The S video terminal achieves a more vivid picture than the VIDEO OUT terminal by separating the chrominance (C) and luminance (Y) signals. (Actual results depend on the television.)

Conserving power
The unit consumes power (approx. 0.7 W) even when it is turned off with [⏻]. To save power when the unit is not to be used for a long time, unplug it from the household mains socket.
Remember to reset the radio stations and any other memory items before using the unit again.

Information you enter into the unit's memory remains intact for up to two weeks after the AC mains lead is disconnected.
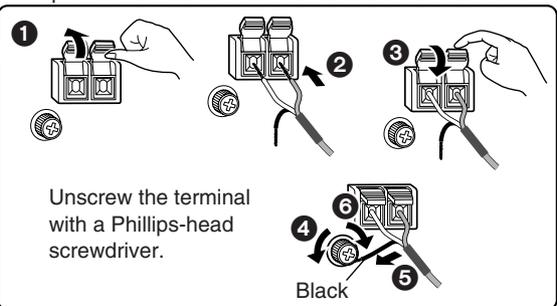

For the United Kingdom only
BE SURE TO READ THE CAUTION FOR THE AC MAINS LEAD ON PAGE 4 BEFORE CONNECTION.

STEP*6* The remote control

Remote control

Batteries
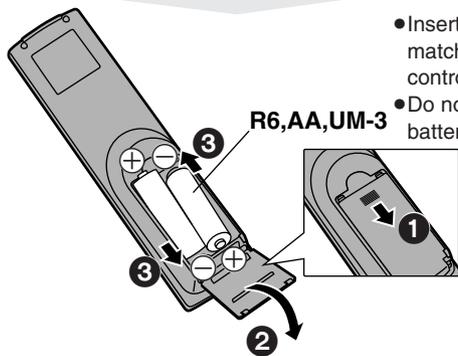

●Insert so the poles (+ and −) match those in the remote control.
●Do not use rechargeable type batteries.

R6,AA,UM-3

Do not;
●mix old and new batteries.
●use different types at the same time.
●heat or expose to flame.
●take apart or short circuit.
●attempt to recharge alkaline or manganese batteries.
●use batteries if the covering has been peeled off.
Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

■ Use
Aim at the sensor, avoiding obstacles, at a maximum range of 7 m directly in front of the unit.

Notes on speaker use
● You can damage your speakers and shorten their useful life if you
  play sound at high levels over extended periods.
● Reduce the volume in the following cases to avoid damage.
  –When playing distorted sound.
  –When the speakers are receiving howling from a record player,
   noise from FM broadcasts, or continuous signals from an oscil-
   lator, test disc, or electronic instrument.
  –When adjusting the sound quality.
  –When turning the unit on or off.

If irregular coloring occurs on your television
These speakers are designed to be used close to a television, but
the picture may be affected with some televisions and setup
combinations.

If this occurs, turn the television off for about 30 minutes.
The television's demagnetizing function should correct the
problem. If it persists, move the speakers further away from the tele-
vision.

Caution
● **Use the speakers only with the recommended system.
  Failure to do so may lead to damage to the amplifier
  and/or the speakers, and may result in the risk of fire.
  Consult a qualified service person if damage has oc-
  curred or if you experience a sudden change in per-
  formance.**
● **Do not attempt to attach these speakers to walls using
  methods other than those described in this manual.**

Note
WMA
● Noise may occur when playing WMA files.
● You cannot play WMA files that are copy protected.
● WMA files must have the extension ".WMA" or ".wma".
MP3
● This unit is not compatible with ID3 tags.
● If you play an MP3 track that includes still picture data, it will take some time before the music itself starts playing and the elapsed time will not be displayed during this time. Even after the track starts, the correct play time will not be displayed.
● MP3 files must have the extension ".MP3" or ".mp3".
JPEG
To view JPEG files on this unit:
—Take them on a digital camera that meets the DCF (Design rule for Camera File system) standard. Some digital cameras have functions that are not supported by the DCF standard like automatic picture rotation which may render a picture un-viewable.
—Do not alter the files in any way or save them under a different name.
—Ensure they have the extension ".JPG" or ".jpg", ".JPEG" or ".jpeg".
● This unit cannot display moving pictures, MOTION JPEG and other such formats, still pictures other than JPEG (i.e. TIFF) or play associated sound.
WMA MP3 JPEG
● Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
● This unit is compatible with multi-session but if there are a lot of sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.

Naming folders and files
At the time of recording, give folders and file names with 3-digit prefixes in the order you want to play them (this may not work at times).

Safety precautions

Placement

Set the unit up on an even surface away from direct sunlight, high temperatures, high humidity, and excessive vibration. These conditions can damage the cabinet and other components, thereby shortening the unit's service life.
Do not place heavy items on the unit.

Voltage

Do not use high voltage power sources. This can overload the unit and cause a fire.
Do not use a DC power source. Check the source carefully when setting the unit up on a ship or other place where DC is used.

AC mains lead protection

Ensure the AC mains lead is connected correctly and not damaged. Poor connection and lead damage can cause fire or electric shock. Do not pull, bend, or place heavy items on the lead.
Grasp the plug firmly when unplugging the lead. Pulling the AC mains lead can cause electric shock.
Do not handle the plug with wet hands. This can cause electric shock.

Foreign matter

Do not let metal objects fall inside the unit. This can cause electric shock or malfunction.
Do not let liquids get into the unit. This can cause electric shock or malfunction. If this occurs, immediately disconnect the unit from the power supply and contact your dealer.
Do not spray insecticides onto or into the unit. They contain flammable gases which can ignite if sprayed into the unit.

Service

Do not attempt to repair this unit by yourself. If sound is interrupted, indicators fail to light, smoke appears, or any other problem that is not covered in these instructions occurs, disconnect the AC mains lead and contact your dealer or an authorized service center. Electric shock or damage to the unit can occur if the unit is repaired, disassembled or reconstructed by unqualified persons.

Extend operating life by disconnecting the unit from the power source if it is not to be used for a long time.

Maintenance

To clean this unit, wipe with a soft, dry cloth.
●Never use alcohol, paint thinner or benzine to clean this unit.
●Before using chemically treated cloth, read the instructions that came with the cloth carefully.

Glossary

Decoder
A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Dolby Digital
This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

DTS (Digital Theater Systems)
This surround system is used in many movie theaters around the world. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range
Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs.

Film and video
DVD-Videos are recorded using either film or video. Usually, film is recorded at 24 frames per second, the rate movies are filmed at, while video is recorded at 30 frames per second.

Frame still and field still
Frames are the still pictures that go together to make a moving picture. There are about 30 frames shown each second.
One frame is made up of two fields. A regular television shows these fields one after the other to create frames.
A still is shown when you pause a moving picture. A frame still is made up of two alternating fields, so the picture may appear blurred, but overall quality is high.
A field still is not blurred, but it has only half the information of a frame still so picture quality is lower.

Interlace and progressive output
NTSC, the video signal standard, has 480 interlaced (I) scan lines, whereas progressive scanning uses twice the number of scan lines. This is called 480P. The video signals output from this unit's COMPONENT VIDEO OUT terminals (Y, P_B, P_R) allow you to enjoy higher quality pictures than if the signals were output from the VIDEO OUT terminal or S VIDEO OUT terminal.

I/P/B
MPEG 2, the video compression standard adopted for use with DVD-Video, codes frames using these 3 picture types.
I: Intra coded picture
This picture has the best quality and is the best to use when adjusting the picture.
P: Predictive coded picture
This picture is calculated based on past I or P-pictures.
B: Bidirectionally-predictive coded picture
This picture is calculated by comparing past and future I and P-pictures so it has the lowest volume of information.

Linear PCM (pulse code modulation)
These are uncompressed digital signals, similar to those found on CDs.

Playback control (PBC)
If a Video CD has playback control, you can select scenes and information with menus.

Reference

Before moving the unit, ensure the disc tray is empty.
Failure to do so will risk severely damaging the disc and the unit.

Troubleshooting guide (Reference pages are shown as black circled numbers ❾.)

Before requesting service, make the below checks. If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem, consult your dealer for instructions.
