

Parrot® MKi9000

Bluetooth® hands-free music system

The Parrot MKi9000 is a Bluetooth® hands-free system that blends in seamlessly inside any vehicle. A wireless remote control can be positioned on the steering wheel or dashboard and allows the driver to control all the functions of the MKi9000.

In addition to conventional functions of accepting or rejecting calls, the Parrot MKi9000 boasts cutting-edge hands-free functions: automatic phonebook synchronisation, training-free voice recognition, speech synthesis of the names in the phonebook, contact management (up to 2 000 per phone) and call records. The Parrot MKi9000 offers a voice menu for accessing its functions.

Listen to your digital music in the car

The Parrot MKi9000 is also designed for music playback. Supplied with a specific cable, it is compatible with all music sources, such as iPod®, iPhone®, USB flash drives, Bluetooth® stereo (A2DP) phones, MP3 players and any other analogue players.

Music is delivered through the car's speakers, giving the driver and passengers exceptional sound quality and the breathtaking Virtual SuperBass and audio effects.

Double microphone for crystal-clear calls

To ensure optimal audio quality when on the phone, the Parrot MKi9000 combines double microphone technology with new signal processing software (DSP-3) that eliminates background and surrounding noise, including noise from inside the car. For maximum listening quality, conversations are reproduced over the vehicle's speakers.

The Parrot MKi9000 is a Bluetooth® hands-free system compatible with all vehicle makes and which works with all mobile phone brands.

Made For iPod® & Works With iPhone®

For hands-free calls in your car with your iPhone®, enable Bluetooth® so that it connects with the Parrot MKi and synchronises its phonebook.

To listen to the music on your iPhone® or iPod®, simply plug into the Parrot MKi cable. Open your playlist using the wireless remote control. You can still make hands-free calls in the car with your Bluetooth® mobile phone. When a call comes in, the music is automatically muted, only to be switched back on at the end of the call.

Parrot[®] MKi9000

Bluetooth[®] hands-free music system

 **Bluetooth[®]**

for mobile phone
for Smartphone
for iPhone[®]
