FEDERAL COMMUNICATIONS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions :(1) this device may not cause harmful interference, and (2) this device must accept anyinterference received, including interference that may cause undesired operation.

⚠ Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses and can radiated radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation if this equipment does cause harmful interference to radio or television, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
-Consult the dealer or an experienced radio/TV technician of help.

Shielded interface cables must be used in order to comply with emission limits.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Wireless Mouse

Maintaining your hardware and resolving basic problems

■ Should the ball on the mouse not roll smoothly, open the ball enclosure, remove the ball and wipe it thoroughly using a clean, lint-free cloth. With a cotton swab slightly moistened with industrial alcohol, clean the three roller contacts located inside the enclosure. When finished, return the ball to the enclosure and replace the cover.

■ If your cursor is controlled by another system in an office or multi-user environment, try to unload the batteries, insert them again after 2 minutes and repeat step 5 to step 7 of the quick installation guide.

■ Please locate the receiver at a minimum distance of 20 cm away from computer chassis, monitors, zip-drives, speakers, or switching power supply.

over 20cm

■ A desk made of iron will negatively impact wireless keyboard and mouse operations.

■ If your devices don't function smoothly, you may try the following steps:
   a. replace with new batteries
   b. repeat step 5 to step 7 of the quick installation guide to ensure connection
   c. move mouse and keyboard closer to receiver

● Normal expected battery life for the keyboard and mouse units:

   Battery life is greatly affected by the length of time these units are in use. Under "normal" usage conditions, you may expect unit batteries to last between three and six months. The environment within which the units are used will also affect the length of battery life.
