### FEDERAL COMMUNICATIONS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

#### Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installations. If this equipment does cause harmful interference to radio or television, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician if help.

Shielded interface cables must be used in order to comply with emission limits.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

1

#### Compatible Equipment

Compatible with all IBM-compatible Notebooks with USB interface.

#### Compatible with Windows Operating Systems:

Windows XP, 2000, ME, 98SE

**⚠ If the Optical Mouse is not functional for USB compatibility problem, please upgrade your operation system.**

#### Please Review this Checklist

Your package includes:

- 2.4G Wireless Travel Mouse 1
- Mini USB 2.4G receiver 1
- USB Recharging Cable 1
- AAA size Ni-MH battery 2
- User manual 1

**⚠ Please read the instruction for installing, operating, and using the wireless Travel Mouse.**

#### Features of 2.4G Wireless Travel Mouse

- Compact and Patent design
- Hidden receiver stored in the mouse receiver for easy carrying
- USB Plug and Play interface
- No driver required in WindowsR 98SE/2000/ME/XP
- Rechargeable Low power indicator
- Cut off power when receiver is stored
- 8 channels availability for avoiding any interference in multi-users environment

2

#### Please read this User Manual in detail before you use it

#### Foreword:

Thank you for purchasing this Optical Mouse. This product is a perfect combination of Optical-Sensor technology and Radio Frequency technology.

※Please make sure that you have read and completely understand this User Manual before using it.

※Please refer to the product inside to identify its real cosmetic colors.

●Please do not copy the content without manufacturer's authorization.

●If you have questions about the content, please contact your retailer.

●The content of this User Manual may be changed without prior notice.

#### Be aware of the following tips during operation

●Please do not use or operate any wireless Radio Frequency products on the aircraft. Due to that it may have negative effect on navigation equipments, it is not that allowed to use any wireless Radio Frequency products on the airplane - So, please do not use this Optical Mouse on aircraft. And please take the batteries out when you are boarding.

●Please do not touch this product when thundering. ⚠It is easy to get an electric shock.

●Please do not open the enclosures of this product, or disassemble it. ⚠It is easy to cause damage or get an electric shock.

●Please do not put metal or pour liquid into this product. ⚠It is easy to cause damage, fire, or get an electric shock.

●Please do not violently vibrate or dash this product. ⚠It is easy to cause damage or broken.

●Please do not place or store this product in high moisture, dusty, high vapor, high temperature like automobiles and houses with heater, or under direct sun light. ⚠It is easy to cause damage or get an electric shock.

3

●Please do not pile this product up, or place heavy stuff on this product.

▲It is likely to cause fire or broken.

●Please do not place this product in a unsafe location.

▲It is likely to cause damage or broken if falling down.

●This product is not responsible for computer crash or data loss during your operation.

▲It is a good solution to have a periodical data backup.

●Please do not use volatile organic solvent to clean this product.

▲It is likely to cause painting spray damaged. Please clean it with soft cloth.

●Please do not use this product with medical equipments, atomic facilities, aircrafts and spacecrafts, transportation facilities, or life-related machines. If any misuse causes life accidents or social damages, the manufacturer will not take any responsibility.

#### Tips for Battery

▲It is suggested to use AAA Rechargeable batteries for this product.

▲Please do not use different types of battery at the same time. ▲Please follow the instructions of battery manufacturers to handle the exhausted batteries.

▲If a consumer uses batteries improperly, it is likely to cause battery broken or liquid leaked, and will result in a burn or injury. Therefore, please do not disassemble, throw into fire, or put in 100° C place or boiling water. Furthermore, please also avoid misplacing battery positive and negative into compartment or put the Alkaline batteries in a battery charger. If batteries touch rings, bracelets, or keys, it is Likely To cause a short to enable batteries heated. Sometimes it will cause battery broken or liquid leaked.

●We suggest that you take out of batteries to store in a dry and ordinary temperature place if it is not for long time use.

4

### Recharging batteries and Replacement

1. Remove the battery cover from the back of the mouse.

2. Insert the supplied batteries, making sure that the positive(+) and negative (-) ends of each battery match the polarity inside the battery housing.

**⚠ NOTE : Non-Recharging batteries are prohibited to use.**

3. Replace the battery cover into position until it "clicks" firmly into place.

5

### Switching Channels

In some instances, radio frequency interference may require you to switch to an alternate channel. To do this:

• Press and release the reset button, located on the bottom of the mouse.

### Installing the 2.4G Wireless Travel Mouse to your Computer

1. Remove the receiver from the mouse's hidden compartment. 2. Insert the USB receiver into an available USB port.

6

### Take the receiver out of mouse

To connect the mouse receiver:

1. Press the eject button on the bottom of the mouse.
2. Take the receiver out of the compartment.

### Restore the receiver into mouse

1. Place the receiver 90° to the compartment.
2. Press the receiver into the compartment

**⚠ When the receiver is in the compartment of the mouse, power supply is automatically off to stop power consumption**

7

### How to charge the mouse

1. Make sure that the Ni-MH batteries are installed in the mouse.

2. Plug the USB connector of the cable into the USB port of the Desktop/Laptop, and the other end into the port in the front of the mouse.

3. Keep charging for four hours.

### Low Battery Indicator Light

When the battery charge is running low, the light emitter diode (LED) on the scroller wheel flashes.

8

### How to use this Wireless Optical Mouse comfortably

The Wireless Optical Mouse implements a non-mechanical tracking engine, based on optical navigation technology, which measures changes in position by optically acquiring sequential surface images (frames) and mathematically determining the direction and magnitude of movement. As a consequence, you can use it on most kinds of tabletops, paper, and even on your pants leg.

However, please do not use this product on the following surfaces which may cause detecting failure of the optical sensor.

- Glass or mirror surfaces
- Shiny or polished surfaces
- Surfaces with Dark-colored stripe next to light-colored stripe
- Surfaces with pixels printed or too many repeated patterns

The optical sensor detects mouse movement by optically acquiring sequential surface, so no mouse pad is needed to use together. However, to prevent the mouse scratched by rugged surfaces, it is suggested to use mouse pad.

Certain kinds of mouse pads may let the mouse fail to enter power saving modes. This will cause more power consumption to shorten the battery life.

Please do not use this product on the kinds of hardly-reflection black or refractable mouse pads.

9

### Maintaining your hardware and resolving basic problems

If the mouse doesn't work properly, please the follow the instruction:

■ Please do not use this mouse on the surfaces of transparent, light-reflection, and iron-made tabletops, for example, glass, mirrors, or iron tables. If you have no choice but use this product on such tabletops, please use a mouse pad. Please keep iron-made office partitions, computer chassis, monitors, zip-drives, speakers, and switching power supply at least 20 cm from the mouse and receiver.

■ If your cursor is controlled by another mouse in a multi-user environment, please proceed "Switch security ID of Wireless Optical Mouse" procedure on the page 6.

■ Please check the USB receiver is properly installed into the USB port of your Notebooks.

■ If your mouse does not work smoothly when the receiver is installed in USB-HUB, please install the receiver in the USB port of your Notebook.

■ If the above points can not improve your problems, please move the mouse closer to the receiver to avoid any identified interferences.

■ Effective operation range about 6-10 meter
