

## FEDERAL COMMUNICATIONS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: [1] this device may not cause harmful interference, and [2] this device must accept any interference received, including interference that may cause undesired operation.

### Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation if this equipment does cause harmful interference to radio or television, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

Shielded interface cables must be used in order to comply with emission limits.

This equipment marketed in USA is restricted by firmware to only operate on 2.4G channel 1-6 Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipments.

## 2.4GHz Wireless Optical Mouse

User Manual

P1-10

Version: 1.0

## Low Battery Indicator Light

When the battery is running low, the LED flashes RED.

! If the indicator light is flashing, it is highly recommended that you change the wireless mouse as soon as possible to properly maintain battery.

## How to charge the mouse

! To continuously charge the mouse, your computer must be ON and AWAKE.

(1) While the USB receiver is plugged into the computer's USB port, simply attach the computer's USB wireless mouse to the USB port of the receiver mouse on the back end of the mouse.

(2) Once the mouse is in charging mode, the Red LED indicator will light up.

(3) When battery is fully charged, the LED indicator will turn GREEN.

## How to use this Wireless Optical Mouse comfortably

The Wireless Optical Mouse implements a non-mechanical tracking engine based on optical navigation technology which measures changes in position by optically acquiring sequential surface images (frames) and mathematically determining the direction and magnitude of movement. As a consequence, you can use it on most kinds of tabletops, paper, and even on your pants leg. However, please do not use this product on the following surfaces which may cause detecting failure of the optical sensor.

Class or mirror surfaces

Shiny or polished surfaces

Surfaces with Dark-colored stripe next to light-colored stripe

Surfaces with pixels printed or too many repeated patterns

The optical sensor detects mouse movement by optically acquiring sequential surface, so no mouse pad is needed to use together.

However, to prevent the mouse scratched by rugged surfaces, it is suggested to use mouse pad to use mouse together.

Certain kinds of mouse pads may let the mouse fall to enter power saving modes. This will cause more power consumption to shorten the battery life.

Please do not use this product on the kinds of hardly-reflection black or retractable mouse pads.

Maintaining your hardware and resolving basic problems

**Features of 2.4G Wireless Optical Mouse**

- 3-button Optical Mouse Perfectly for Notebook users
- 800 DPI high resolution Optical Mouse
- Compact and Patent design
- USB Plug and Play interface
- No driver required in Window's 98SE/2000/ME/XP
- Rechargeable Low power indicator
- Cut off power when receiver is stored
- 6 channels availability for avoiding any interference in multi-users environment

**!** Please read this User Manual in detail before you use

**Foreword**

Thank you for purchasing this Optical Mouse. This product is a perfect combination of Optical-Sensor technology and Radio Frequency technology.

Please make sure that you have read and completely understand this User Manual before using it.

Please refer to the product inside to identify its real cosmetic colors.

Please do not copy the content without manufacturer's authorization

If you have questions about the content, please contact your retailer.

The content of this User Manual may be changed without prior notice.

**Be aware of the following tips during operation**

Please do not use or operate any wireless Radio Frequency products in the aircraft. Due to that, it may have negative effect on navigation equipments. It is not allowed to use any wireless Radio Frequency products on the airplane. So, please do not use this Optical Mouse on aircraft. And please take the batteries out when you are landing.

Please do not touch this product when it is hotting. It is easy to get an electric shock.

Please do not cover the enclosure of this product, or disassemble it. It is easy to cause damage or get an electric shock.

Please do not put metal or pour liquid into this product. It is easy to cause damage or get an electric shock.

Please do not violently vibrate or deaf this product. It is easy to cause damage or get an electric shock.

Please do not place or store this product in high moisture, dusty, light or high temperature like automobiles and houses with heater or electric shock. It is easy to cause damage or get an electric shock.

Please do not place or store this product in an unsealed plastic bag. It is likely to cause damage or broken if falling down.

Please do not take this product up or please insert stuff on this product. It is likely to cause the case or broken.

Please do not place this product in an unsealed plastic bag. It is likely to cause damage or broken if falling down.

This product is not responsible for computer crash or data loss during your operation. It is a good solution to save the important data backup.

**Compatible Equipment**

Compatible with all IBM-compatible Notebooks with USB interface.

**Compatible with Windows Operating Systems**

Windows-XP, 2000, ME, 98SE

**Please Review this Checklist**

- Your package includes:
- 2.4G Wireless Optical Mouse.....1
  - Mini USB 2.4G receiver.....1
  - BAG.....1
- Please read the instruction for installing, operating and using the wireless Mouse.

**Switching Channels**

Please do not use cordless optical mouse to clean the product. It is likely to cause painting spray, damaged. Please clean it with soft cloth. Please do not use this product with medical equipments, some facilities, aircrafts and spacecrafts. If transportation facilities or the wireless receiver's wires or space cables are damaged, please clean it with soft cloth. Will not take any responsibility.

**Take the receiver out of mouse**

Take the receiver out of the mouse.

**Installing the Wireless Mouse to your Computer**

- (1) Remove the receiver from the mouse's side.
- (2) Insert the USB receiver into an available USB port.

**Restore the receiver into mouse**

Put it in the receiver into the mouse.

When the receiver in the mouse power supply is automatically off to save power consumption.
