## Thank you for choosing Leviton Network Solutions.

For the past quarter century we have developed an unparalleled selection of high-performance connectivity solutions and systems for enterprise, data center, government, residential, and other markets around the globe.

We manufacture nearly all of our branded products at 12 Leviton manufacturing facilities; the majority are made in the United States at facilities colocated with our product development teams.

We support customers around the world with 11 global sales offices and installations of Leviton Network Solutions products in more than 80 countries.

OUTSTANDING  
**RETURN ON**  
INFRASTRUCTURE  
**INVESTMENT**

ROI<sup>TM</sup>

**THE SMART CHOICE** — At Leviton, we understand that the best value comes from more than a high-quality, affordable product — it means delivering peace of mind. With unbeatable service, best-in-class support, and the reassurance that comes from working with a stable, century-old supplier, you get far and away the highest return on infrastructure investment in the industry. Leviton invents the industry's best technologies. We build them to last, and we back them up with incredible service and support. Whatever your need, Leviton can provide it, and we will stand behind it.

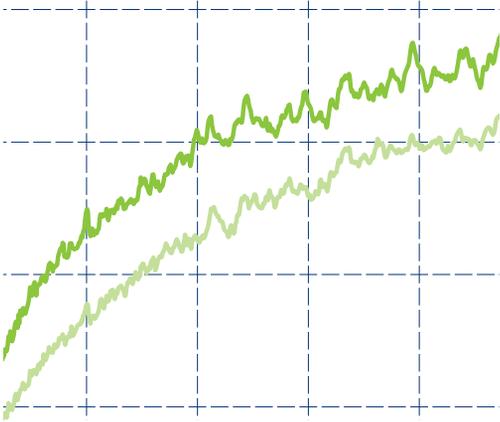

**COMMITTED**  
— TO OUR —  
**CUSTOMERS AND**  
THE ENVIRONMENT

**A NAME YOU CAN TRUST** — Leviton is the world's largest privately held producer of electrical and data connectivity devices. We've been serving customers from the electrical age through the information age, and we'll be here through the life of your installation — and beyond.

**CUSTOMERS AROUND THE WORLD** — Thousands of organizations all across the globe have installed Leviton Network Solutions copper and fiber infrastructure systems. With distribution locations on nearly every continent, we're ready to serve customers in every location and every industry.

**CREATING A SUSTAINABLE FUTURE** — The Leviton "Go Green" initiative provides a framework for reducing our environmental impact. Monitoring energy use, recycling scrap metal, and re-using leftover plastics are just a few examples of how Leviton helps to keep our world clean.

# QUALITY AND PERFORMANCE IN EVERY SOLUTION

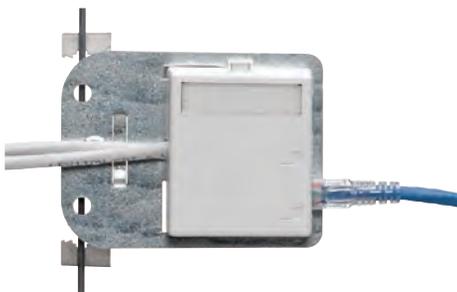

**MANUFACTURING EXCELLENCE** — Our products feature durable construction that reduces maintenance and downtime, with headroom that exceeds standards to boost network performance. We manufacture nearly all of our branded products at company-owned, ISO 9001-2008 certified plants. We ensure product designs are robust and reliable by using trusted quality methods, and all Leviton products include a workmanship warranty, guaranteeing material and manufacturing quality. This high level of quality allows us to offer a limited lifetime performance warranty when your system is installed by a Leviton certified contractor, protecting your investment and providing peace of mind.

## A CULTURE OF **INGENUITY** AND INNOVATION

**INDUSTRY-LEADING INVENTIONS** — At Leviton, we're continuously inventing the solutions that drive next-generation networks, developing innovative solutions that raise the bar on performance and aesthetics. Engineers within our collaborative "Development Factory" have built an extensive patent portfolio with performance, design, and process enhancements that improve product functionality and deliver fast, reliable networks.

THE INDUSTRY'S  
— BEST —  
**SERVICE**  
AND SUPPORT

**MULTI-TIERED SUPPORT MEANS YOU CAN CALL ON A VARIETY OF LEVITON EXPERTS TO HELP YOU WITH EACH AND EVERY PROJECT.**

**Inside Sales Representatives** answer questions, provide quotes, or direct you to field support or a distributor in your city.

**Applications Engineers and Data Center Specialists** provide guidance for product installation, use, and troubleshooting. They can also assist with topology, layout, elevations, pathways, remote, or on-site network analysis, and deliver custom product designs.

**Certified Contractors** deliver the highest-quality installations and are authorized to offer extended product and performance warranties on qualified projects.

**Network Consultants** provide exclusive information and support, delivering the solution-oriented expertise you need.

**U.S. Government Team** provide the contacts, product knowledge, and support needed in a specialized network environment.

**Global Account Managers** deliver the products and support you need, just about anywhere in the world.

**Technical Support Representatives** assist with product and network troubleshooting, over the phone or online.

# THE INDUSTRY'S —PREMIER— **END-TO-END SOLUTIONS**

**RELY ON BERK-TEK LEVITON TECHNOLOGIES FOR THE FASTEST, MOST RELIABLE ENTERPRISE AND DATA CENTER NETWORKS ON THE MARKET.**

The combined strength of Leviton's extensive connectivity portfolio and Berk-Tek's high-performance cable manufactured in U.S.-based, ISO-certified facilities is another way we ensure that you get unparalleled return on your infrastructure investment.

Together, we're customer-focused; meaning we put you, the customer, at the center of everything we do. We're technology-driven so you get industry-leading innovations with outstanding performance. And we assure you the highest quality solutions for every installation.

Advanced data center solutions

Best-in-class category-rated copper systems

High performance optical fiber systems

Pre-terminated, make-to-order solutions with fast delivery

Performance verified by independent third-party labs

**TWO LEADING NETWORK INFRASTRUCTURE EXPERTS**

A B

# CONFIGURABLE

SOLUTIONS

C D

Getting the exact product you need is quicker and easier than ever. Rely on our innovative online configurators for a variety of fiber and copper products, assembled and shipped quickly for fast turnaround.

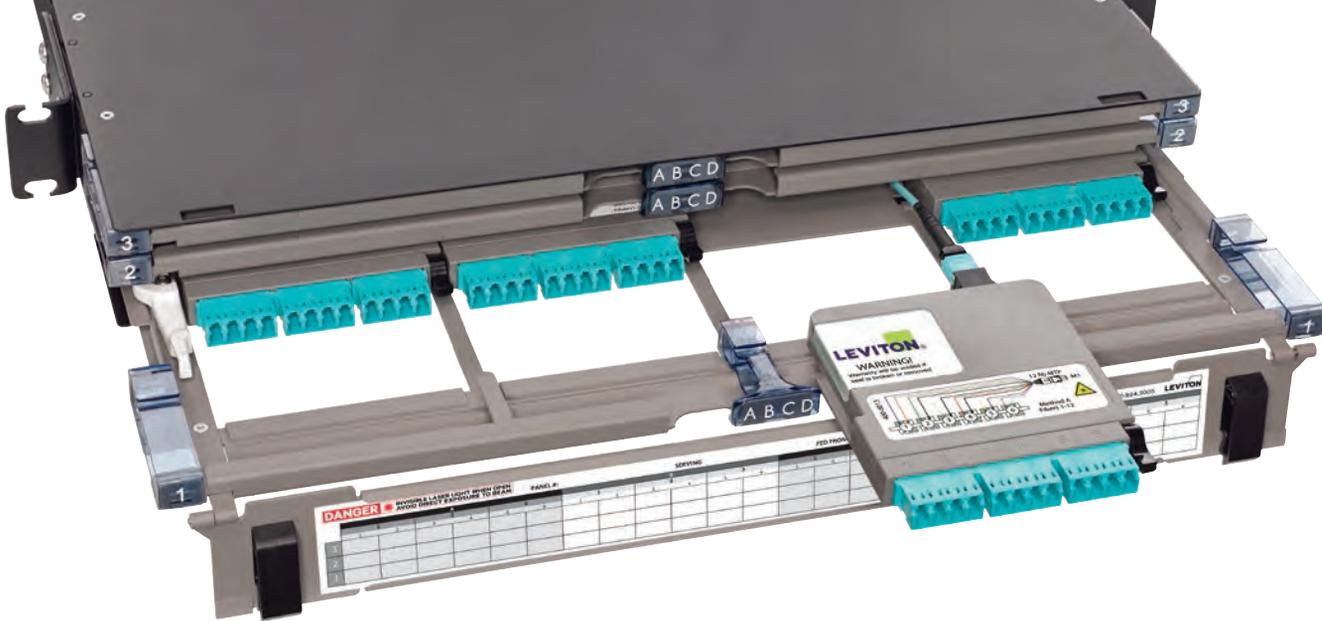

Look for this icon to identify configurable solutions.

### How It Works:

To configure a product, go to [leviton.com/configurator](http://leviton.com/configurator) and choose from a wealth of options (e.g., fiber type, cable length, polarity, etc.). Take the resulting model number or part number and submit your quote request to Leviton inside sales or your local Leviton distributor.

You can expect 24-hour turnarounds on all quote requests.

## FIBER SOLUTIONS

Configure and order fiber panels, enclosures, cassettes, trunk cables, harnesses, and patch cords.

- HDX and SDX Enclosures and HDX Frame
- LightSpace® Enclosures
- HDX and SDX Cassettes
- e2XHD MTP® Cassettes
- MTP Harnesses
- Pre-Terminated Trunks
- Premium and Economy Series Patch Cords
- Intact™ Intelligent Fiber Patch Cords
- Splice Trays

## COPPER SOLUTIONS

Configure and order trunk cables and Secure RJ Patch Cords.

- Pre-Terminated Copper Trunks - Cat 6A/6/5e
- Pre-Terminated Copper Trunks with e2XHD cassettes
- Secure RJ Patch Cords - Cat 6A/6
- Patch Cords - Cat 6A/6/5e
- Intact Intelligent Copper Patch Cords - Cat 6A/6

# DATA CENTER SOLUTIONS

Leviton solutions cover every area of the data center – from the entrance room and computer room to the telecommunications room (TR) and support offices – and our data center experts are always available to provide in-depth technical and design support.

**7** **40/100G MTP® SYSTEMS**  
Ideal migration path to 40/100G speeds

**8** **INTACT™ INTELLIGENT PORT MANAGEMENT SYSTEM**  
Real-time network documentation with alerts for faults or unplanned changes

1

### E2XHD SNAP-IN CASSETTE PATCHING SYSTEM

Single-click patching of copper, fiber, or a combination in the same panel

2

### REPLICATOR® ENCLOSURES

Unique logical port management design can be configured to replicate any switch

3

### CABLE MANAGEMENT

Vertical/horizontal cable management for standard equipment racks and large-scale deployments

4

### SECURE CONNECTIVITY

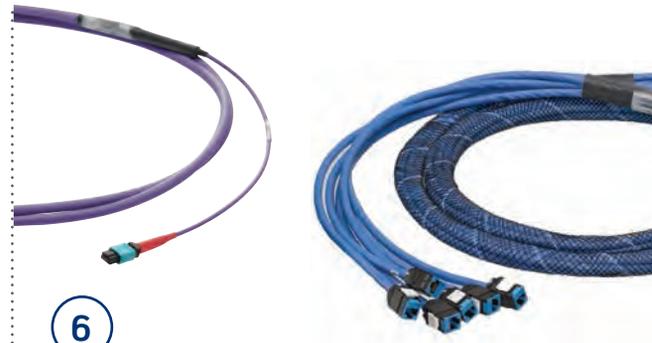

Physical port security with copper RJ and fiber LC assemblies

5

### HDX FRAME SYSTEM

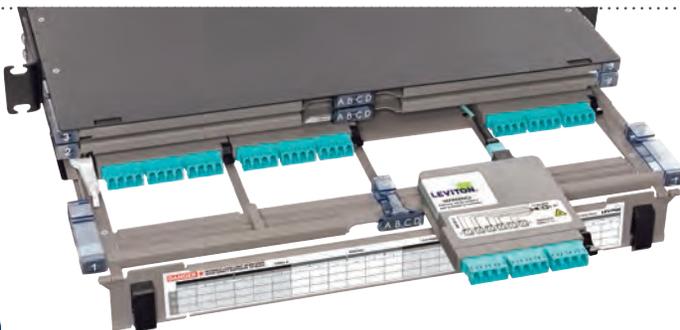

Used in MDA to consolidate patching and reduce footprint, freeing up valuable space

6

### PRE-TERMINATED COPPER & FIBER TRUNKS

Provide backbone connections between entrance facility, MDA/Core, SAN, and HDA

9

### FIBER OPTIC SYSTEMS

High-density enclosures can be custom configured with cassettes, adapter plates, and pre-terminated solutions

10

### POWER DISTRIBUTION UNITS

Provide reliable power distribution into racks and cabinets with outlet power ranging from 2.0 kW to 12.5 kW

# ENTERPRISE SOLUTIONS

Leviton provides high-performance connectivity for health care, education, business, and government applications around the globe, all backed by the industry's best service and support.

7

**HORIZONTAL & VERTICAL CABLE MANAGEMENT**  
Organize and support cables, patch cords, and equipment

8

**WALLPLATES & HOUSINGS**  
Extensive selection to customize work area outlets

1

**ZONE ENCLOSURES**

Easily accessible for simple moves, adds, and changes

2

**PATCH PANELS**

Wide selection of styles: flat, angled, and recessed in UTP and shielded

8

3

**PATCH CORDS**

Include snagless design and strain-relief boot for long-term performance

4

**AV CONNECTIVITY**

For high-quality multimedia applications

4

5

**DATA CONNECTORS & ADAPTERS**

Fast, reliable category-rated and optical fiber connectors and adapters

6

**FIBER OPTIC ENCLOSURES**

Broad selection to address any fiber density requirements

9

**POWER DISTRIBUTION UNITS (PDUs)**

Robust, reliable power to rack and cabinet applications

10

**WALLMOUNT FIBER-OPTIC ENCLOSURES**

Transitions from outside plant cable to inside plant cable

# COPPER SYSTEMS

Leviton copper systems combine category-rated performance with high-density, user-friendly designs to deliver the industry's most innovative family of solutions. Whether you are supporting a large enterprise, data center, or a small business infrastructure, Leviton has the system to fit your needs. Refer to the system features below and on the following pages for an overview of Leviton's three copper system brands: Atlas-X1, eXtreme, and GigaMax.

|                  |  |
|------------------|--|
| System Features: | High-density shielded system with shortest-length connector for better bend radius |
|                  | Advanced features (icons, shutters) for clear network ID and protection            |
|                  | Unified form factor (Cat 5e to Cat 8) for easy migration                           |
|                  | Shielded systems for EMI/RFI protection  |
|                  | Performance exceeds the standard   |
|                  | Margin guarantees for confidence in performance                                    |
|                  | Component-rated products available   |
|                  | Cat 6A   |
|                  | Cat 6  |
|                  | Cat 5e   |
|                  | Third-party tested and verified  |
|                  | Color options  |
|                  | Limited Lifetime Warranty  |

## Atlas-X1

Mission Critical

A premium category-rated system that delivers the highest level of verified performance and reliability.

## eXtreme

Enterprise

Pairs high-quality, guaranteed performance with a user-friendly design to support fast, easy installations.

## GigaMax

Light Commercial, MDU

Delivers proven performance with the reliability you have come to expect from Category 5e applications.

**Atlas-X1** is the premium category-rated system that delivers the highest level of verified performance and reliability, offers tool-free termination for simplified installations, and seamlessly supports network migration paths up to 40G.

### ATLAS-X1 UTP QUICKPORT® CONNECTORS

(See page A12)

- Connector design allows for tool-free terminations, reducing installation time and costs
- Robust housing increases longevity and virtually eliminates alien crosstalk (AXT)
- Patented Retention Force Technology (RFT) protects against tine damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity
- Unified form factor from Cat 5e to Cat 8 (UTP and shielded)
- Includes interchangeable icons (voice, data, AV, and blank) that match connector color
- Connector with internal shutter is available to protect against dust and debris
- Available in 13 colors

Visit [Leviton.com/AtlasX1](http://Leviton.com/AtlasX1) to learn more.

### ATLAS-X1 SLIMLINE BOOT PATCH CORDS

(See page A30-A32)

- Narrow profile alleviates congestion in higher-density applications for easier moves, adds, and changes
- Snagless design prevents tab breakage and strain relief boot ensures long-term network performance
- Manufactured in the United States using Berk-Tek cable

### RECOMMENDED PATCH PANELS

(See page A18-A22)

- High-density e2XHD panels and snap-in cassettes make it easy to deploy networks quickly
- Composite panels can be customized with company or school logos and colors
- High-density 1RU 48-port and 2RU 72-port QuickPort options maximize rack space and reduce costs

## SPOTLIGHT

### California State University Monterey Bay (CSUMB) Installs Leviton Intelligent Network

In 2014, CSUMB broke ground on a new academic facility, the first building on campus to support a Cat 6A intelligent system. CSUMB chose the Leviton Intact™ Intelligent Port Management solution, supported by Leviton Atlas-X1™ connectivity, to provide accurate reporting and optimize network maintenance. Once complete, CSUMB students and faculty will benefit from 10GBASE-T network performance. Plus, the new building sets the standard for future facilities, paving the way for a high-performing, intelligent network campus wide. See page A12 for Atlas-X1 and F3 for Intact Intelligent Port Management.

**The Atlas-X1 Shielded System** includes all the features of the Atlas-X1 UTP System, with shielding for additional EMI/RFI protection and AXT suppression. It is ideal for government, health care, manufacturing, transportation, education, financial, gaming, or any environment where EMI/RFI may be a concern.

**COMING  
IN 2016:  
CAT 8  
SYSTEM**

Copper Systems

COPPER

**ATLAS-X1 SHIELDED QUICKPORT® CONNECTORS**

- Connector design allows for tool-free terminations, reducing installation time and costs
- Robust housing increases longevity and virtually eliminates alien crosstalk (AXT)
- Patented Retention Force Technology (RFT) protects against time damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity
- Unified form factor of from Cat 5e to Cat 8 (UTP and shielded)
- Includes interchangeable icons (voice, data, AV, and blank) that match connector color
- Connector with internal shutter is available to protect against dust and debris
- Shielded connector is enclosed in a die-cast housing for maximum EMI/RFI protection
- Available in 13 colors

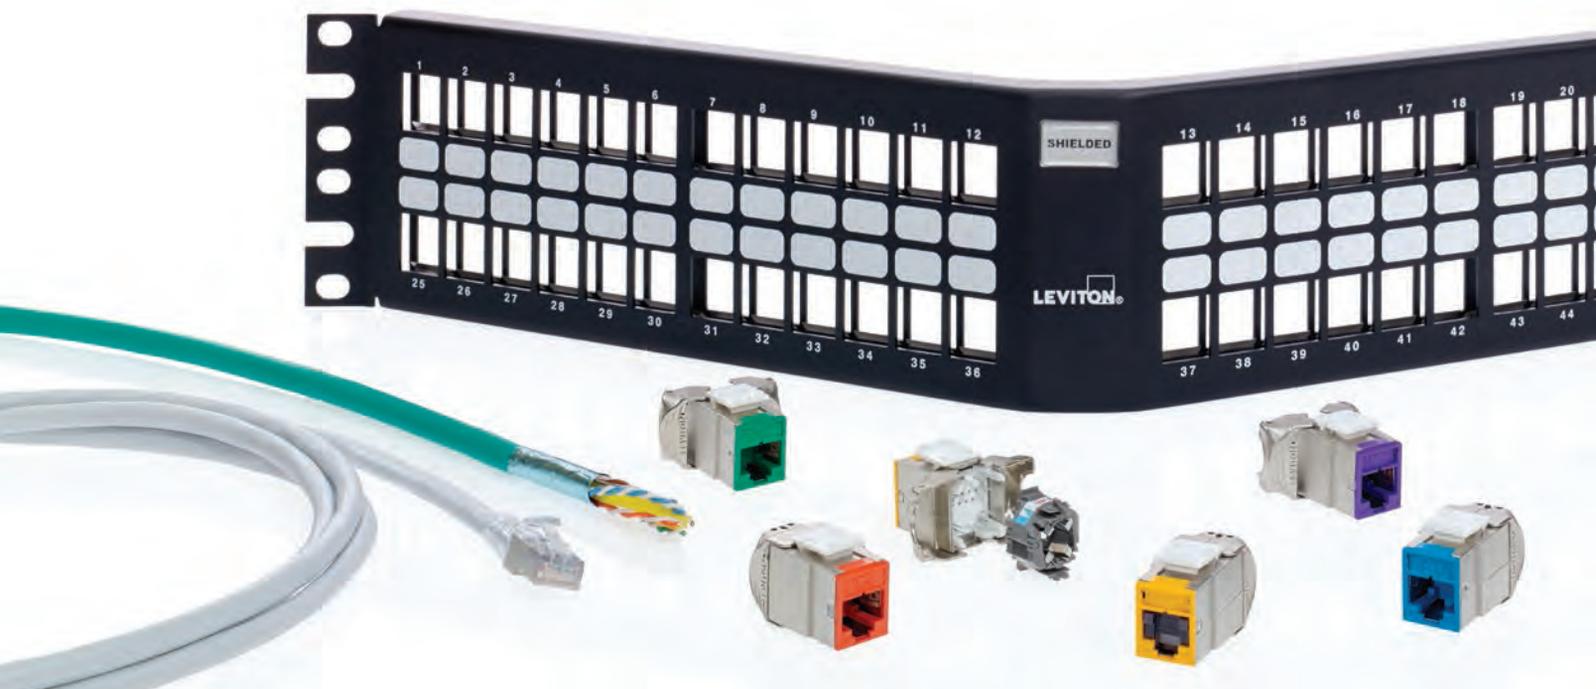

**ATLAS-X1 SHIELDED SLIMLINE BOOT PATCH CORDS**  
(See page A30-A32)

- Narrow profile alleviates congestion in higher-density applications for easier moves, adds, and changes
- Snagless design prevents tab breakage and strain relief boot ensures long-term network performance
- Shielded construction provides excellent alien crosstalk protection and EMI/RFI protection

**RECOMMENDED PATCH PANELS**  
(See page A18-A22)

- Atlas-X1 Shielded 1RU 24-port and 2RU 48-port QuickPort panels are available in flat and angled styles
- 1RU 48-port flat and angled shielded QuickPort panels provide twice the density of a conventional 1RU panel

Visit [Leviton.com/AtlasX1](http://Leviton.com/AtlasX1) to learn more.

The Leviton eXtreme UTP System pairs high-quality, guaranteed performance with a user-friendly design to support fast, easy installations. With enhanced performance and unmatched system longevity, eXtreme systems are well suited for an extensive range of enterprise and commercial networks.

### EXTREME UTP QUICKPORT® CONNECTORS

(See page A13)

- Cutting ledge, large format tear-away dual-layer wiring guide, and pair separation towers simplify punchdown, reduce rework, and support faster terminations
- Patented Retention Force Technology (RFT) protects against tine damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity
- Cat 6A connector includes a patented Cone of Silence® for additional alien crosstalk (AXT) suppression
- Compatible with Fluke JackRapid™ Punchdown Tool for quick and easy terminations
- Available in 13 colors

### EXTREME UTP PATCH CORDS

(See page A30-A32)

- Stranded conductors ensure long-term channel integrity and add enhanced flexibility
- Cat 6A cord provides exceptional AXT suppression
- Cat 6 and 5e cords feature narrow profile SlimLine Boot to alleviate congestion in higher-density applications

### RECOMMENDED PATCH PANELS

(See page A18-A22)

- 110-style panels use 6-port RJ-45 modules in front and 110-style punchdowns on rear
- 110-style offered in flat, angled, and recessed options for any application need
- Silk-screened port numbers and paper label holders for easy reading
- System is also compatible with QuickPort® Panels
- Patented Retention Force Technology (RFT) protects against tine damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity (select panels only)
- Compatible with e2XHD Patching System

Visit [Leviton.com/eXtreme](http://Leviton.com/eXtreme) to learn more.

The **GigaMax Cat 5e UTP System** delivers reliable, field-proven performance for high-bandwidth applications. This cost-effective structured cabling system is ideal for light commercial and MDU environments.

## GIGAMAX UTP QUICKPORT® CONNECTORS

(See page A14)

- Single T568A or T568B wiring labels simplify field terminations
- Narrow connector profile for high-density installations
- Compatible with Fluke JackRapid™ Punchdown Tool for quick and easy terminations
- Durable one-piece frame built for longevity
- Available in 13 colors

## GIGAMAX UTP PATCH CORDS

(See page A32)

- Color-matched cable and boots
- Rubber boot provides plug protection

## RECOMMENDED PATCH PANELS

(See page A17-A21)

- QuickPort flat, angled, and recessed options for any application need
- High-density panels available, with 1RU 48-port and 2RU 72-port options
- QuickPort panels can mix and match different category-rated connectors, and allow users to install the exact quantity of connectors needed while planning for future growth
- System is also compatible with 110-style panels

Leviton Atlas-X1,  
eXtreme & GigaMax

# COPPER SYSTEMS

are designed to give customers the right level of performance and value to fit their needs. These systems have been tested and verified by third-party labs to meet or exceed industry-standard performance. And they all include a limited lifetime warranty when installed by Leviton certified installers.

This selection chart provides part numbers for system connectors, patch cords, and recommended patch panels.

Note that Leviton UTP systems are compatible with a wide range of patch panels beyond what is listed here. For a full list of Leviton patch panels, see pages A16-A23.

## FEATURED PRODUCTS

Atlas-X1  
Component-Rated  
UTP & Shielded  
Connectors **A12**

# Connectors

Leviton copper connectors go through rigorous third-party testing to ensure the highest levels of quality and reliability. Whether supporting mission-critical applications with Atlas-X1™, a large enterprise with eXtreme®, or a small business infrastructure with GigaMax®, Leviton has the connectivity solution for your needs.

## ATLAS-X1 COMPONENT-RATED UTP & SHIELDED CONNECTORS

- Innovative wire manager and door-release levers support quick, repeatable terminations
- Tool-free design requires no specialized termination tool
- Patented Retention Force Technology (RFT) protects against tine damage and increases system longevity
- Each connector includes interchangeable icons (voice, data, AV, and blank), color-coded to match the connector face
- Connector with internal shutter is available to protect ports from dust, debris, and contaminants
- Shielded connectors provide additional EMI/RFI protection, signal isolation, and alien crosstalk (AXT) suppression
- Unified form factor and termination method, from Cat 5e to Cat 8
- Tested and approved for use in air-handling spaces (plenum rating) in accordance with UL Standard 2043
- Supports Power over Ethernet (PoE) – See individual product specifications sheets for full capabilities
- Made in the USA

All Leviton Category-Rated Connectors are RoHS Compliant.

## SPOTLIGHT Component- vs. Channel-Rated Performance

| FEATURE  | COMPONENT RATED | CHANNEL RATED |
|--|-----------------|---------------|
| Meets ANSI/TIA standard                          | ✓               | ✓             |
| Exceeds ANSI/TIA standard                        | ✓               |               |
| Complete end-to-end channel tested               | ✓               | ✓             |
| Individually certified (tested) component        | ✓               |               |
| Meets channel-link performance                   | ✓               | ✓             |
| Greater permanent-link performance               | ✓               |               |
| Ensures multi-manufacturer channel compatibility | ✓               |               |

## GIGAMAX UTP QUICKPORT® CONNECTORS

- Single T568A or T568B wiring labels simplify terminations
- Narrow connector profile for high-density installations
- Compatible with Fluke JackRapid™ Punchdown Tool for quick and easy terminations
- Durable one-piece frame built for longevity
- Made in the USA

## CAT 5/3 & USOC UTP QUICKPORT CONNECTORS

- Fit into all QuickPort wallplates and housings
- Full support of voice and low-speed data applications
- Cat 5/3 and 8P8C USOC accept RJ-45 plugs; 6P6C USOC accepts RJ-11 plugs

See Connection Termination Instructions on pages X7 and X8.

## CONNECTOR ADAPTER BEZELS

- Allow QuickPort connectors to be open spacing installed into third-party wallplates and surface-mount boxes
- Bezel color will be visible after installation
- Packaged individually and sold separately from connectors
- CommScope bezels fit SYSTIMAX® or Uniprise® wallplates and surface-mount boxes

## FEATURED PRODUCTS

Composite Patch Panels **A19**

1RU 48-Port QuickPort® High-Density Flat & Angled Panels **A18, A20**

e2XHD Snap-In Cassette Patching System **A22**

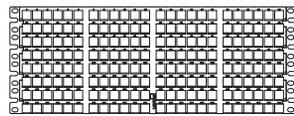

## Patch Panels & Cross Connect

Choose Leviton for all your patch panel needs. Our e2XHD high-density panels make patching easier than ever, using snap-in copper and fiber cassettes. Other popular styles include the 1RU 48-port, component-rated Cat 6A 110-style, and composite panels with a customizable face. Additional UTP and shielded panels, the patented Zero-U Vertigo®, die-cast high-density panels, recessed panels for close quarters, and two angled styles round out the industry's largest selection of patch panels.

# PATCH PANELS & CROSS CONNECT | Selection Guide

Flat 48-Port

Flat 192-Port

## e2XHD Snap-In Cassette Patch Panels ▶ A22

These high-density panels are designed for data center applications where fast single-click deployment and simple maintenance is important. They accept both fiber and copper e2XHD snap-in cassettes in the same panel.

**Available Styles:** Flat | Angled

Flat 48-Port

## Flat Composite Patch Panels ▶ A19

Leviton Composite panels have the same profile as standard metal panels, but feature polymer composite construction. Customizable faces are ideal for data centers, telecommunication rooms, and other showroom-style environments.

**Available Styles:** 110-Style | QuickPort®

Flat 48-Port

## Flat Patch Panels ▶ A17-A19

Traditional, flat profile works well in almost any application. Most flat panels include rear cable management bars.

**Available Styles:** 110-Style | QuickPort | Shielded

Die-Cast High-Density 48-Port

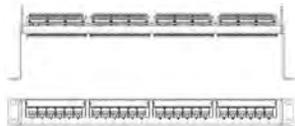

Angled 48-Port

## Angled Patch Panels ▶ A20

Recommended for use in racks to optimize patch cord management and rack space utilization.

**Available Styles:** 110-Style | QuickPort | Shielded

Recessed-Flat 24-Port

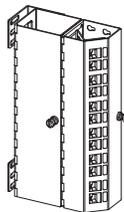

Recessed-Angled 48-Port

## Recessed & Recessed-Angled Patch Panels ▶ A21

Designed primarily for data center cabinet applications, recessed-flat and recessed-angled panels are ideal where a low-profile appearance and minimal depth in front of the panel is required.

**Available Styles:** 110-Style | QuickPort

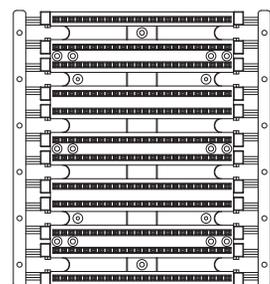

VertiGO® Zero-U

## Zero-U Patch Panels ▶ A23

VertiGO panels are recommended for use in data center cabinets, or for any application that needs connectivity outside of the traditional 19-inch rack space. Vertical channel models provide cable routing and protection.

**Available Styles:** QuickPort | SDX

Cross-Connect 110-Style Wiring Block

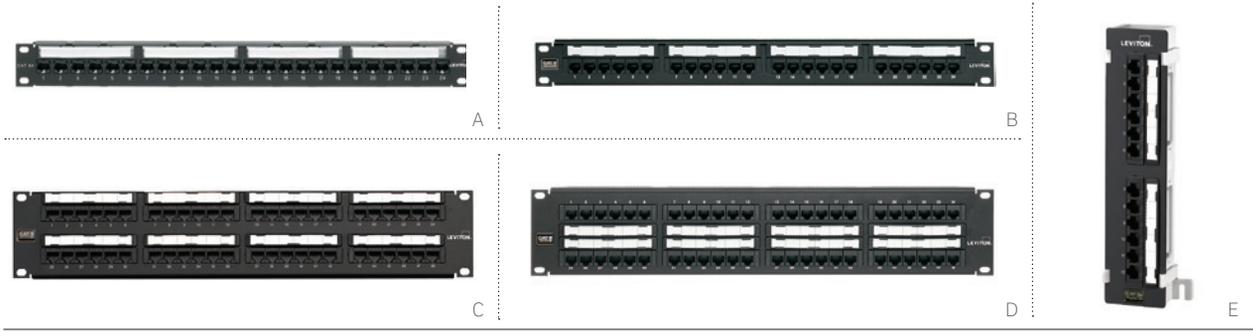

## Cross-Connect ▶ A25

Dependable, flexible, and cost effective, Leviton 110-style and 66-block cross-connect products are ideal for telecommunications rooms and distribution frames. 110-style wiring blocks are available in Cat 6A, 6, and 5e, and can be mounted to the wall or plywood backboard. Rack-mount solutions are also available.

**Available Styles:** Cat 6A | Cat 6 | Cat 5e

# PATCH PANELS | Flat Metal 110-Style > UTP

COPPER Patch Panels

## FLAT UTP 110-STYLE PATCH PANELS

- 1RU 12- or 24-port, 2RU 48-port, and 4RU 96-port configurations
- 6-port RJ-45 modules on front, and 110-style punchdowns on rear
- Includes color codes for T568A and T568B wiring schemes
- Cat 5e and Cat 6 include 25-pair wiring schemes
- Silk-screened port numbers and paper label holders included
- Optional patented magnifying lens label holders for easy reading
- Patented Retention Force Technology (RFT) protects against tine damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity (select panels only)

## AVAILABLE CABLE MANAGEMENT:

See Section E for product details and ordering information.

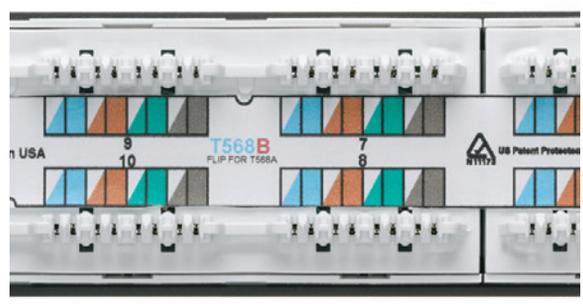

- Versi-Duct®
- Rear Cable Management Bars
- Horizontal Cable Managers
- Blank Filler Panels
- VELCRO® Brand Fasteners

## FLAT 110-STYLE PATCH PANELS & PATCH BLOCK

## SPOTLIGHT | Cat 6A Component-Rated 110-Style Patch Panels

Leviton Cat 6A 110-style patch panels offer ANSI/TIA-568-C.2 performance up to 500 MHz to support 10GBASE-T networks. The panels have a physical design consistent with industry-standard 110-style panels, including in-line configured IDCs and 6-port housing modules. In addition, they add several exclusive design features:

- Pair Separation Tower design makes untwisting Cat 6A pairs easier
- Separated IDC fields simplify identifying first cable-pair position
- Conductor retention feature holds conductors securely in place during termination
- Triple-stage compensation with patented design features enhances permanent link and channel performance

# PATCH PANELS | Flat Metal QuickPort® > UTP & Shielded

## FLAT UTP QUICKPORT PATCH PANELS

- Standard-density 24- and 48-port panels are available with white blocks or patented magnifying lens label holder
- Silk-screened port numbers on panel front
- High-density 1RU 48-port and 2RU 72-port options maximize rack space and reduce costs in high-density applications
- 1RU 48-port panel available in standard (stamped) or patented robust die-cast aluminum

## ATLAS-X1™ FLAT SHIELDED QUICKPORT PATCH PANELS

- Shielding protects against electromagnetic interference (EMI) and radio frequency interference (RFI), and provides excellent alien crosstalk (AXT) suppression
- Includes appropriate grounding hardware
- High-density 1RU 48-port option maximizes rack space and reduces costs in high-density applications

## AVAILABLE CABLE MANAGEMENT:

**FLAT COMPOSITE UTP 110-STYLE AND QUICKPORT® PATCH PANELS**

- 10 percent stronger than standard 16-gauge metal patch panels, providing added support during termination of 110-style panels
- Panel face can be customized to feature any design, color, or logo
- Patch cord managers prevent cables from obstructing view of port numbers
- Clear label holders create a window to easily view port numbers and custom designs
- Patented Retention Force Technology (RFT) protects against tine damage from 4- or 6-pin plugs, saves on costly repairs, and increases system longevity

**SPOTLIGHT** Composite Patch Panels

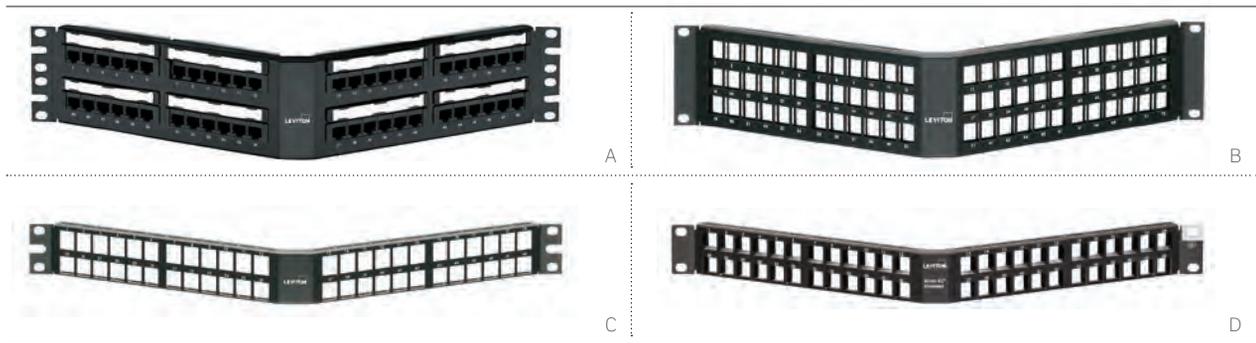

Protective Overlay Cover

Custom Insert

Patch Panel

**Patch panels combine strength and durability** with a unique style and customizable faces, providing a uniform look when installed with 2000i SDX Fiber Enclosures and Versi-Duct Cable Managers.

- Under applied force tests, the panel was 10 percent stronger than standard 16-gauge metal patch panels
- Panels come kitted with two patch cord managers that attach directly to the panel face, saving up to 50 percent of rack or cabinet space and reducing obstruction of center label
- Clear label holders create a "window" to easily view centralized port numbers and custom designs

**ANGLED UTP 110-STYLE & QUICKPORT® PATCH PANELS**

- Angled design conserves rack space by routing patch cords directly into vertical cable management
- Angled design facilitates proper bend radius and simplifies termination
- 110-style angled panels include a snap-in plastic label holder and card stock labels
- QuickPort angled panels include white write-on blocks
- Cat 6A panels include patented magnifying lens label holders for easy reading

**ATLAS-X1™ ANGLED SHIELDED QUICKPORT PATCH PANELS**

- Shielding protects against electromagnetic interference (EMI) and radio frequency interference (RFI), and provides excellent alien crosstalk (AXT) suppression
- Include appropriate grounding hardware
- High-density 1RU 48-port option maximizes rack space and reduces costs in high-density applications

**AVAILABLE CABLE MANAGEMENT:**

See Section E for product details and ordering information.

# PATCH PANELS | Recessed-Flat & Recessed-Angled > UTP

Patch Panels

COPPER

Recessed-flat and recessed-angled patch panels are a great option for rack and cabinet installations with minimal front depth, and where rear cabinet doors are in close proximity to the back rail.

## RECESSED-FLAT 110-STYLE & QUICKPORT® PATCH PANELS

- 3-inch recessed design allows improved access and maintains proper cable bend radius
- All recessed-flat panels include a screwless cable management bar that fastens directly to the back of the panel
- Recessed-flat 110-style panels include patented magnifying lens label holders for easy reading

## RECESSED-ANGLED 110-STYLE & QUICKPORT PATCH PANELS

- Conserve rack space by routing patch cords directly into vertical cable management
- Unique dual-angled design greatly improves punchdown accessibility
- Recessed-angled 110-style panels include a snap-in plastic label holder and card stock labels

### AVAILABLE CABLE MANAGEMENT:

See Section E for product details and ordering information.

## SPOTLIGHT

### Magnifying Lens Label Holder

Available with a wide selection of Leviton patch panels, Leviton patented magnifying lens label holders ensure visibility of port labels for easy identification of individual port designations.

The e2XHD Snap-In Cassette Patching System includes 1RU and 4RU panels, copper and fiber snap-in cassettes, and accessories for additional cable protection and management. The e2XHD cassettes quickly snap in and pull out of the high-density angled panel, making installation, moves, adds, and changes easier than ever.

- Panels allow a mix-and-match of Leviton fiber and copper UTP snap-in cassettes
- Cassettes are available empty or on pre-terminated trunks (see [Leviton.com/configurator](http://Leviton.com/configurator))
- UTP copper connectors easily snap into cassette after termination
- System accessories include rear cable managers, blank cassette inserts for unused cassette openings, and a cover for the angled panel, minimizing dust or debris

# PATCH PANELS | VertiGO® Zero-U QuickPort® UTP & SDX

COPPER Patch Panels

## VERTIGO ZERO-U PATCH PANELS

- Zero-U panels can be mounted to a ladder tray, wire basket, under a raised floor, or onto modular furniture
- QuickPort or SDX-style openings for copper and fiber installations
- Low-profile design fully covers connections
- Improves cabinet center airflow by routing rear cable along outer edges
- Styles with 3- and 6-inch channels provide additional cable management space
- Hinged doors provide easy access to termination field
- Patented magnifying lens label holders facilitate easy reading

## RECOMMENDED APPLICATIONS:

- Any Size Cabinet
- Ladder Tray
- Wire Basket
- Raised-Floor Enclosure
- Modular Furniture
- Wall-Mount

Contact Inside Sales at 800.722.2082 for custom VertiGO configurations. QuickPort connectors are available on pages A12-A14, B70, and C14. SDX adapter plates are available on pages B27-B28. Channel not available separately.

See page B26 for additional specialized fiber applications.

**WATCH: INSTALLATION VIDEOS**

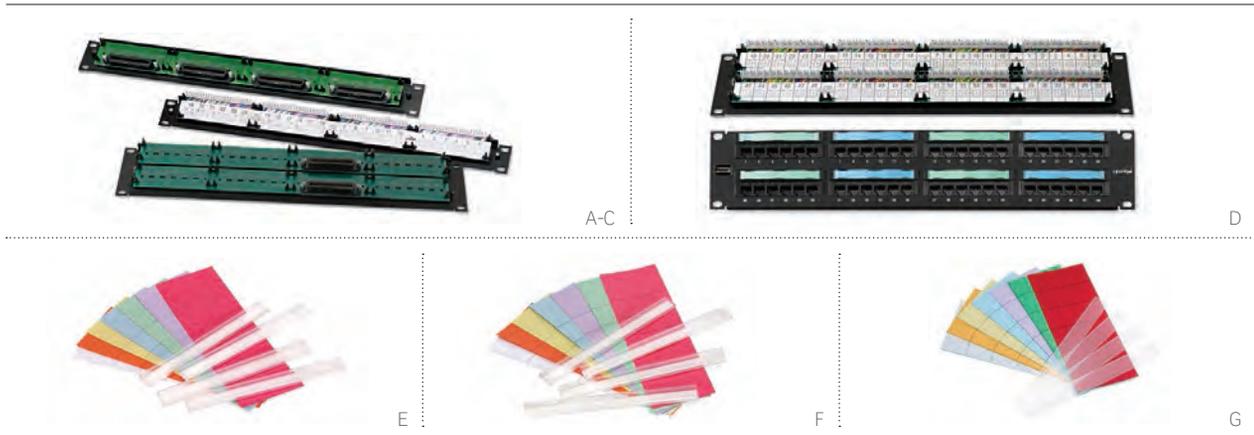

Leviton.com/ns/videos  
"How to Mount a VertiGO Patch Panel"

## SPOTLIGHT VertiGO Zero-U Patch Panels > Unparalleled Flexibility

**Patented VertiGO Zero-U Patch Panels** offer unprecedented versatility for a wide range of installations. In data centers where left- or right-side cabinet installation is ideal, VertiGO can share mounting hardware with servers or other existing equipment. Where traditional cabinet space is lacking, VertiGO can be mounted to a ladder tray, wire basket, directly to the wall, under a raised floor, or even onto modular furniture.

VertiGO addresses three major data center issues: density, cooling, and appearance. Mounting vertically along a back cabinet rail allows more terminations than would otherwise be possible. Cables can be routed along the cabinet outer edges to improve airflow. The low-profile design fully covers the connections, providing the clean look data center managers seek.

## VOICE-GRADE PATCH PANELS

- 110-style or female 25-pair configurations
- Unique label delineates 1-, 2-, 4-, or 25-pair termination options
- 25th pair (violet/slate) is not used in 25-pair style panels
- 8P8C panel supports 10/100BASE-T applications
- Features 25-pair female Amphenol™ RJ-21X connectors

### CAT 6A 110-STYLE WIRING BLOCKS

- Supports high-frequency data signals up to 500 MHz
- Can be used as a consolidation point (CP) in a TIA-defined 90-meter permanent link
- Designed to mitigate alien crosstalk (AXT)
- Independently tested and verified by Intertek (ETL) to meet all TIA component, permanent link, and channel requirements
- Available in 64-pair wall-mount block

### CAT 6 110-STYLE WIRING PRODUCTS

- Supports voice, data, and security applications
- Wall-mount and rack-mount wiring block kits available in 96-, 192-, and 288-pairs
- 110-style patch cords in 110-110 and 110-T568A/B configurations
- Connector clips withstand 200 re-terminations

Our wide selection of 110-style and 66-block products (see page A28) are ideal for telecom rooms and distribution frames. 110-style blocks are available in Cat 6A, 6, and 5e.

COPPER  
Cross Connect

## 66 CONNECTING BLOCKS

- Install individually or in pairs in cross-connect system
- High-impact fire-retardant UL 94V-0 plastic
- Phosphor bronze quick-connect insulation displacement 66-clips
- 25-pair and split 50-pair styles
- Accessories include covers, brackets, wire distribution spools, adapters, and bridging clips

## SURFACE-MOUNT MINI PATCH PANELS

- Excellent for tight spaces and simple breakout patching
- Combine two or more panels for in-line cross connect
- Use with 25-pair cable assemblies
- Wall mountable

Visit [Leviton.com/support](http://Leviton.com/support) for detailed termination diagrams.

### 66 CONNECTING BLOCKS

| DESCRIPTION   | PART NO.  |
|---|-----------|
| <b>[A]</b> M-Block: 25-pair [66M1-25]* 10" H x 3 5/16" W x 1 3/16" D                              | 40066-M25 |
| Split M-Block: 50-pair [66M1-50]* 10" H x 3 5/16" W x 1 3/16" D                                   | 40066-M50 |
| <b>[B]</b> M-Block, female connector [66M1-50W]* 10" H x 3 5/16" W x 1 3/16" D                    | 40066-0MW |
| <b>[C]</b> M-Block, female and male connectors [66M1-50W2]* 10" H x 3 5/16" W x 1 3/16" D         | 40066-MW2 |
| <b>[D]</b> Connectorized Demarc Block [66M1-50R]* 10" H x 3 13/32" W x 2 3/4" D, female Amphenol™ | 40066-0MR |

### BRIDGING CLIPS

|   |           |
|---|-----------|
| <b>[E]</b> Bridging Clips (SA-1) (50 per package) | 40067-0BC |
|---|-----------|

### HINGED COVERS AND SNAP-ON COVERS

|   |           |
|---|-----------|
| Snap-on Cover for M-Blocks: [66MC-4]* 9 15/16" H x 2 15/16" W x 5/16" D                   | 40050-MCV |
| <b>[F]</b> Hinged Cover for M-Blocks: grey [66MC4LH-G]* 10" H x 2 7/16" W x 3/4" D        | 40050-MHG |
| <b>[G]</b> Hinged Cover for Demarc Blocks: orange [66MC4LH-O]* 10" H x 2 7/16" W x 3/4" D | 40050-MHO |

### BRACKET FOR M BLOCKS AND CONNECTOR MOUNTING

|  |           |
|--|-----------|
| <b>[H]</b> M-Block Bracket for Connector Mounting: [89-D/QuickPort® Blocks]* 10" H x 3 13/32" W x 1 1/2" D | 40089-00D |
|--|-----------|

### [I] MODULAR ADAPTERS

|   |           |
|---|-----------|
| 2-Position Modular Adapter [Tap-2]* - Converts two 66-clip contacts into 6P2C modular connector                   | 40072-0T2 |
| 4-Position Modular Adapter [Tap-4]* - Converts four contacts into 6P4C modular connector                          | 40072-0T4 |
| 6-Position Modular Adapter [Tap-6]* - Converts six contacts into 6P6C modular connector                           | 40072-0T6 |
| 8-Position Modular Adapter, T568B wiring [Tap-8]* - Converts eight contacts into 8P8C non-keyed modular connector | 40072-0T8 |

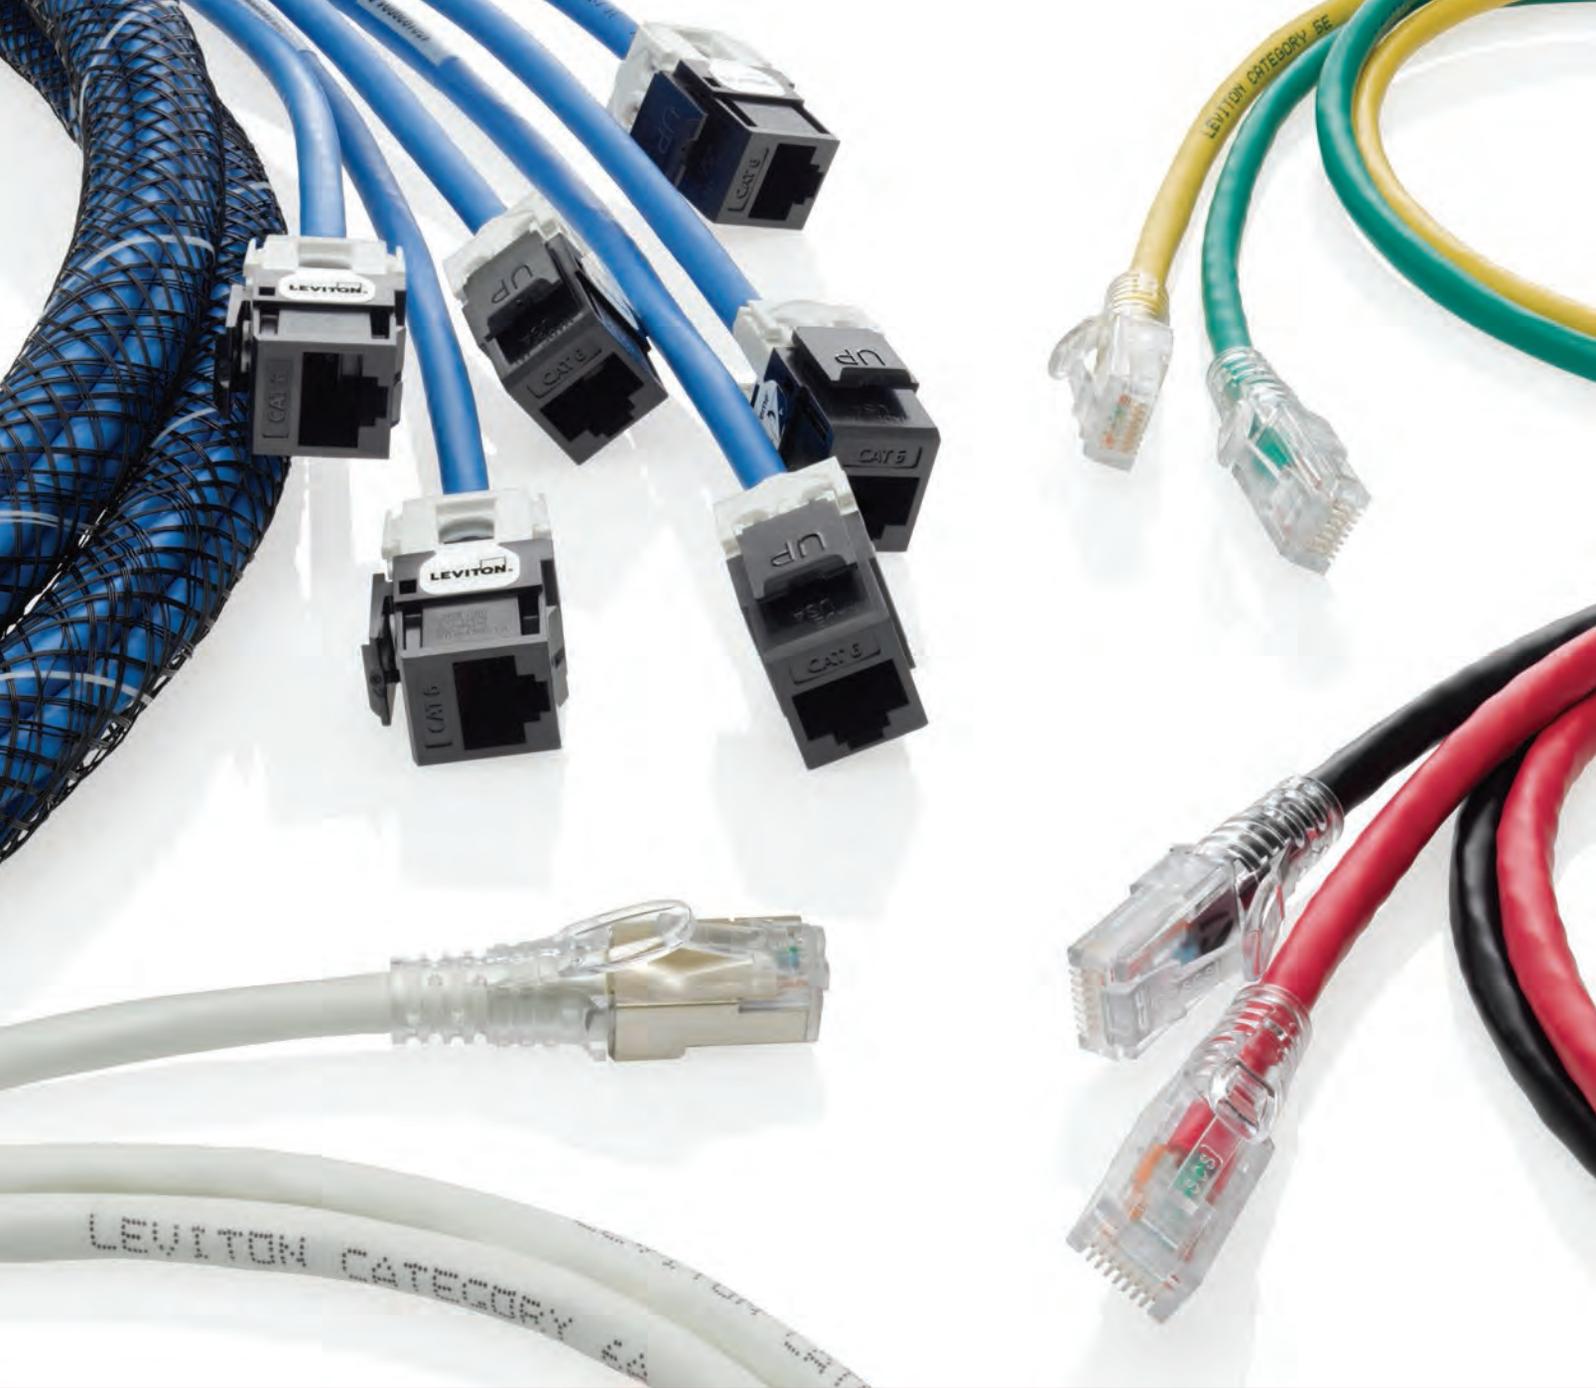

### WIRE DISTRIBUTION SPOOLS

|  |           |
|--|-----------|
| <b>[J]</b> Wire Distribution Spool [20-A]* 1 3/4" Dia. x 3" H            | 40054-0DS |
| <b>[K]</b> Wire Distribution Spool with screw [20-B]* 1 3/4" Dia. x 3" H | 40054-DSS |

### SURFACE-MOUNT MINI PATCH PANELS

|  |           |
|--|-----------|
| <b>[L]</b> 25 6-position 2-Conductor [RJ-11]* FCC Spec Jacks, connected to a circuit board with one male 25-pair connector     | 41600-00I |
| <b>[M]</b> 25 6-position 2-Conductor [RJ-11]* FCC Spec Jacks, connected to a circuit board with two bridged 25-pair connectors | 41620-00I |
| Mounting Magnets (20 per package)  | 49200-00M |

\* = Numbers in brackets refer to industry product designation.

# Patch Cords & Pre-Terminated Trunks

Leviton copper patch cords and pre-terminated trunks are designed to ensure the highest levels of performance, reliability, and longevity whether supporting mission-critical, large-enterprise, or small-business applications. And Leviton makes it easy to configure custom solutions. With factory testing and no need for field terminations, you can reduce installation time by up to 75 percent.

## ATLAS-X1™ CAT 6A SLIMLINE BOOT PATCH CORDS

- Provide exceptional alien crosstalk (AXT) suppression and EMI/RFI protection in Cat 6A channels
- Atlas-X1 Cat 6A cord can be used for UTP or shielded installations
- Cords feature narrow-profile boot for less congestion in high-density applications
- Independently tested and verified by Intertek (ETL) to meet ANSI/TIA-568-C.2 component requirements
- Strain-relief boot ensures long-term network performance
- Snagless design prevents tab breakage
- Ergonomic release tab allows for quick and easy connections and disconnects
- Outside diameter of .240 inches is easier to manage
- 26-gauge stranded conductor cable for maximum flexibility

## EXTREME® CAT 6A STANDARD PATCH CORDS

- Strain-relief boot ensures long-term network performance
- Snagless design prevents tab breakage
- Independently tested and verified by Intertek (ETL) to meet ANSI/TIA-568-C.2 channel requirements
- Color-matched cords and boots
- Low-Smoke Zero-Halogen (LSZH) cords available
- eXtreme Cat 6A standard patch cords use the same cord for UTP or shielded installations

° = Length in meters

All Leviton Cat 6 patch cords are RoHS Compliant.

Additional custom lengths available, for assistance please visit [Leviton.com/MTOCords](http://Leviton.com/MTOCords) or call Tech Support at 800.824.3005

## EXTREME® HIGH-FLEX HD6 PATCH CORD 1G APPLICATION GRADE

- Ultra high-density design
- Maximizes capacity of cable management and pathways
- 28-gauge stranded for the ultimate flexibility
- Used in 1 Gigabit applications where Cat 6 patch cords are commonly utilized

## CAT 5E SLIMLINE BOOT UTP PATCH CORDS

- Independently tested and verified by Intertek (ETL) to meet ANSI/TIA-568-C.2 component requirements
- Narrow-profile boot reduces congestion in high-density applications
- Strain-relief boot ensures long-term network performance
- Snagless boot design prevents tab breakage
- Ergonomic release tab allows for quick and easy connections and disconnects
- 24-gauge stranded conductor cable for maximum flexibility

## CAT 5E STANDARD UTP & SHIELDED PATCH CORDS

- Standard and LSZH cords are independently tested and verified by Intertek (ETL) to meet ANSI/TIA-568-C.2 channel requirements
- Matching color cords and boots
- Strain-relief boot ensures long-term network performance
- Atlas-X1™ shielded patch cord provides exceptional EMI/RFI protection

# PATCH CORDS | Secure RJ System

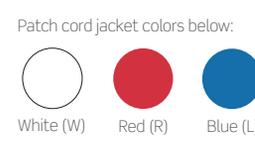

COPPER Patch Cords

## SECURE RJ SYSTEM

- Compatible with industry-standard RJ ports in most network equipment, devices, patch panels, and work area outlets
- Same-color extraction tool disengages color-matched patch cords and port blockers
- Transparent housing allows color coding without blocking visibility to link/status LEDs on electronic equipment
- Port blocker prevents unauthorized network connection and protects open, unused ports
- Cat 6A and Cat 6 Secure RJ Patch Cord options available

| SECURE RJ SYSTEM   |                        |  |
|--|------------------------|--|
| DESCRIPTION  | PART NO.               |  |

UTP connector to plug

e2XHD copper cassettes are available either on pre-terminated trunks or as empty cassettes. See page A22 for field-terminated copper cassettes.

## RECOMMENDED APPLICATIONS:

- Data Center Cabinets
- Telecommunications Racks
- Quick Network Deployment

## PRE-TERMINATED COPPER TRUNKS

- Custom configured for length, connector type, and more
- Fast and easy installation with reduced labor costs
- 100% factory tested, with test results available
- Cat 6A trunks all use component-rated connectors, which provide guaranteed performance in short lengths
- Atlas-X1™ pre-terminated copper trunks provide the option of having connectors with shutters and/or icons
- Customized breakout length from braided sleeve improves installation flexibility and appearance
- Optional pulling eye protects connectors and eases installation
- Pre-terminated assemblies are eligible for limited lifetime product, system, and performance warranties
- Noise-Canceling Helix Technology (NcHT) cable available for Cat 6A assemblies to reduce bundle size and improve alien crosstalk (AXT) suppression

## FEATURED PRODUCTS

Palm Termination Tool **A36**

Wire-Punchdown Termination Tool **A36**

## Copper Tools & Labeling

Leviton has everything you need to terminate and test our copper solutions. The ergonomic Palm Termination Tool, designed by and for installers, offers comfort-grip or rack-mounted positioning for termination, a sturdy connector holder, and a wire-supporting retainer. The Wire-Punchdown Termination Tool enables one-step punchdown of 110-style or 66 connecting block IDCs with a single push on the handle. Specialized termination tools, test equipment, crimping tools, and other accessories complete the collection.

**PALM TERMINATION TOOL**

- Overmolded ergonomic soft grip
- Easy-to-see wiring labels
- Connector holders provide stability for punchdown
- Incorporated retainer supports cable during termination
- Integrated holes allow rack-mounting of the Palm Tool for patch panel terminations
- Compatible with eXtreme® and GigaMax® Cat 6A/6/5e and AV connectors

**MULTI-PAIR TERMINATION TOOL**

- Designed for 110-style wiring blocks
- High-impact, spring-loaded handle for one-punch termination of multiple pairs
- “Blade-in” and “blade-out” options
- Includes 4-pair, Cat 6 head
- Cat 5e and 6 heads available individually

**WIRE-PUNCHDOWN / TERMINATION TOOL**

- Punches and trims each wire with just a single push of the handle
- Adjustable impact setting for minimal physical effort
- Spare blade storage in handle chamber
- Available in 110 IDC and 66 IDC
- Terminate 22-, 24-, or 26-gauge wire

**CUTTING TOOLS**

- Klein Tools® Electrician’s Scissors are excellent for cutting and stripping copper cable as well as trimming center splines and rip cords
- Klein Tools Flush Cutter neatly trims individual cable wires flush to connector body to prevent shorts in metal housings (recommended for Atlas-X1™ connectors)

**TERMINATION TOOLS & BLADES**

| DESCRIPTION  | PART NO.  |

## TONE TEST SET

- Low-voltage tester for continuity, shorts, and opens
- Talk battery for a communications line on a vacant pair
- Identifies tip and ring polarity, and line condition for clear line with dial tone, busy line, and ringing line
- Generates continuous or warble tone to trace pairs and locate broken pairs or cables in walls - use with Inductive Speaker Probe (below)

## INDUCTIVE SPEAKER PROBE

- Detects audible frequency tones for accurate tracing and identification of wires, cables, and metallic circuits

## MODULAR PLUG BREAKOUT ADAPTER

- For testing any six- or eight-position modular connectors
- Works with the Tone Test Set

## COAXIAL CONNECTOR TOOLS

- Crimp coax onto RG-59 or RG-6 cables
- Rugged metal construction with cushioned handles

## MASTER COMPRESSION TOOL

- Terminates all Leviton coaxial compression connectors, including RCA and F-connectors
- Radial-style crimp compresses uniformly around connector body

### TONE TEST SET, INDUCTIVE SPEAKER PROBE & KITS

| DESCRIPTION  | PART NO.  |
|--|-----------|

# FIBER SYSTEMS

Whether your installation is small or large, simple or complex, you can rely on Leviton for a network patching platform that meets your requirements. From cloud data center to remote telecom room, from service provider to enterprise office building, Leviton solutions are versatile enough to meet specific customer demands, ensuring migration options for future bandwidth growth and strong return on infrastructure investment.

System Features:

- LC fibers per RU
- MTP fibers (12F) per RU
- MTP fibers (24F) per RU
- High- and ultra-high density to save rack space
- Individual sliding trays minimize impact on surrounding fibers
- Trays lock into place when open, simplifying network maintenance
- Enclosure-based solutions for network security and protection
- Precision-molded adapter plates for durable network connections
- 10/40/100G Unity migration to ease tech upgrades
- OM4+ fiber type for extended-reach fiber networks
- OM1 / OM2 / OM3 / OM4 / OS2 fiber types for backward compatibility
- Limited lifetime warranty
- Panel-based solutions for easy network accessibility
- Field splicing capability for flexibility and MACs

## PRE-TERMINATED SOLUTIONS

Leviton recommends using pre-terminated trunks and harnesses whenever possible. With 100 percent factory testing and no need for field terminations or splices, installation time is reduced by up to 70 percent. Plug-n-play pre-terminated MTP® cassettes feature a space-saving design with a notched back for a smaller footprint and excellent radius control. All Leviton pre-terminated solutions are made to your specifications: fiber and cable type, fiber count, connector type, breakout leg types, length, and more. See more information on page B51.

### TRUNK CABLES (see pages B53-B56)

- MTP to MTP, including 12- and 24-fiber MTP connectors
- Discrete to discrete (LC, SC, ST, and MU)\*
- MTP to discrete\*
- Single-mode, multimode, and laser-optimized multimode types available
- Secure Keyed LC trunks lock into any industry-compliant adapter or interface

### HARNESSES (see pages B57-B59)

- MTP to MTP connectors
- MTP to discrete connectors (LC, SC, ST, and MU)\*
- Single-mode, multimode, and laser-optimized multimode types available
- Secure Keyed LC harnesses lock into any industry-compliant adapter or interface

### MTP CASSETTES

- Available in HDX, SDX, and e2XHD form factors
- 12- or 24-fiber MTP connectors on the back
- MTP connectors or discrete connectors on the front, including LC, SC, and MU\*
- Single-mode, multimode, and laser-optimized multimode types available

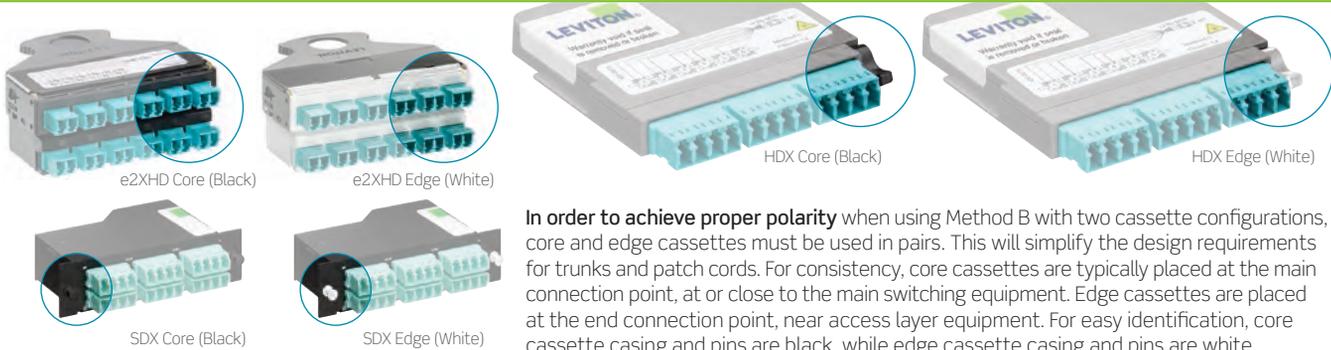

\* = LC/APC and SC/APC available for OS2.

## PRE-TERMINATED FIBER CABLING PERFORMANCE

## SPOTLIGHT

### Core & Edge Cassettes

**In order to achieve proper polarity** when using Method B with two cassette configurations, core and edge cassettes must be used in pairs. This will simplify the design requirements for trunks and patch cords. For consistency, core cassettes are typically placed at the main connection point, at or close to the main switching equipment. Edge cassettes are placed at the end connection point, near access layer equipment. For easy identification, core cassette casing and pins are black, while edge cassette casing and pins are white.

Pre-Terminated

FIBER

### PREPARE FOR 40/100G WITH THE OPT-X UNITY MULTIMODE SYSTEM

Leviton pre-terminated Opt-X Unity 40/100G laser-optimized multimode (LOMM) systems offer an ideal migration path to 40/100G speeds. They also meet IEEE 802.3ba and 802.3bm standards, which respond to the needs of data centers and enterprise networks that require speeds beyond 10. The Opt-X Unity system features pre-terminated trunks, harnesses, array cords, and MTP® cassettes to help you future-proof your networks. See pages B53-B54, B57, and B60 for detailed product information.

- System of trunks, harnesses, and cassettes is 40/100G ready
- Industry-leading 24-fiber MTP system
- System uses best-in-class MTP premium multi-fiber connectors
- Available in laser-optimized multimode (OM3/OM4/OM4+)
- Third-party verification of 40/100G channel performance

### OPT-X UNITY 40/100G SYSTEM

- 24-fiber MTP trunks
- 24-fiber MTP harnesses
- 24-fiber MTP array patch cords
- 24-fiber MTP cassettes
- 100G migration is available in HDX, SDX, and e2XHD footprints

Contact [dcteam@leviton.com](mailto:dcteam@leviton.com) for help designing your 10/40/100G migration plan.

### MIGRATION SOLUTIONS TO OPT-X UNITY 40/100G SYSTEM FROM EXISTING 10G NETWORKS

- Premium 12-fiber MTP trunks
- Premium 12-fiber MTP harnesses
- 24-fiber and premium 12-fiber array patch cords
- Premium 12-fiber MTP cassettes

## FEATURED PRODUCTS

UHD X System **B13**

HDX Adapter Plates & Cassettes **B14**

# UHD X System

144 LC Fibers Per RU

Data centers and telecommunications rooms are rapidly outgrowing their footprints as they attempt to meet increasing network demands. Leviton UHD X enclosures offer optimum patching capacity in areas where space is at a premium. Using HDX Adapter Plates and Cassettes, the enclosures allow up to 144 fibers with LC connectors, or 1,728 fibers with 24-fiber MTP® connectors — the highest density per rack unit available.

## A PART OF THE **OPT-X®** FAMILY

UHDX fiber enclosures, adapter plates, MTP® cassettes, and cable assemblies offer flexible connections and storage options. Featuring compact HDX cassettes and adapter plates, this innovative system creates a scalable platform for comprehensive enterprise and data center applications.

## EASY **TRUNK ROUTING**

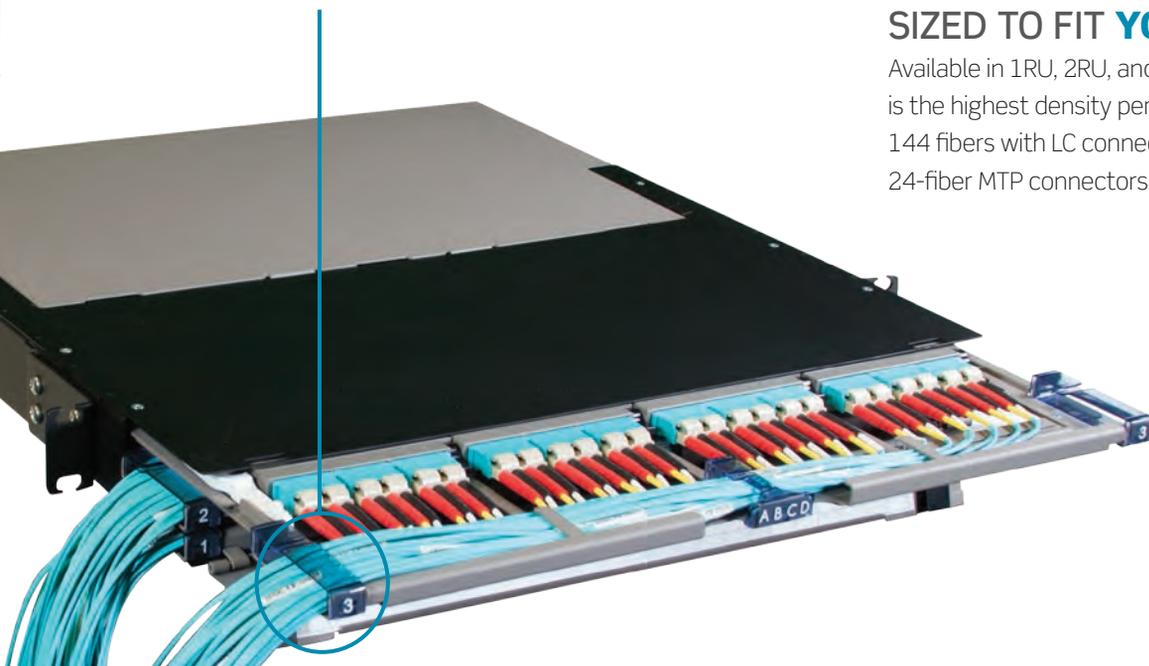

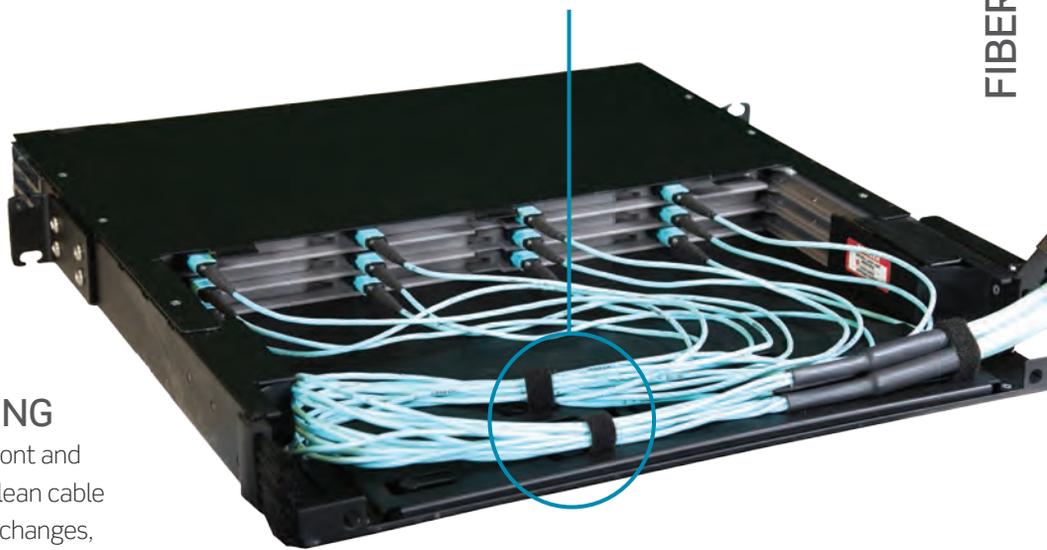

Removable back door, brush guards, cable tie downs, and cable clamp options make trunk routing easier in the most dense applications. And the removable rear cover makes all of the details accessible.

## CLEAN **CABLE ROUTING**

Highly visible tray locators in the front and rear of the enclosure, along with clean cable management, make moves, adds, changes, and updates more manageable. A hinged front door protects patch cords and provides an easy means to maintain port ID labels.

## SIZED TO FIT **YOUR NEED**

Available in 1RU, 2RU, and 4RU, the UHDX system is the highest density per rack unit available: up to 144 fibers with LC connectors or 1,728 fibers with 24-fiber MTP connectors.

UHDX System

## UHDX RACK-MOUNT ENCLOSURES

- Accept Leviton HDX Adapter Plates and Cassettes
- Up to 144 fibers with LC connectors or 1,728 fibers with 24-fiber MTP® connectors
- Individual sliding trays allow easy access to fiber connectors in dense applications while minimizing the impact to surrounding fibers
- 20-inch depth for high-density, pre-terminated solution
- Hinged front door provides easy means to install, remove, and update port ID labels
- Highly visible port locators in the front and rear of the enclosure help easily identify specific ports
- Hinged or removable rear doors improve accessibility to rear cable routing

### RECOMMENDED APPLICATIONS:

Data Centers

Entrance Facility

19" and 23" Racks and Cabinets

## UHDX 1RU ANGLED PANEL

- Eliminates the need for patch cord cable managers
- Open access to patch cords and trunks
- One-hand installation and removal of HDX cassettes or adapter plates
- Up to 144 fibers with LC connectors or 1,728 fibers with 24-fiber MTP® connectors

## ACCESSORIES

- Cable clamp kits minimize excessive pulling, bending, and crushing
- Clamp Kits support easy cable identification and decrease the need for tie-wraps
- Optional brush guards minimize dust buildup in rear of enclosure
- Accessory kit consists of VELCRO® cable ties, mounting ear screws, and port ID card label
- Rear cable manager (sold separately) supports fiber cables and snaps directly into panel without tools

## HDX ADAPTER PLATES

- Connect to field-terminated backbone cabling or pre-terminated trunks
- Easy, one-hand installation and removal
- Offered in OM1/OM2, OM3/OM4, OM4+, and OS2 fiber types
- LC, SC, and MTP styles in 6, 12, or up to 72/144 fiber configurations are available
- Visible sequential numbering to identify ports (for Tx and Rx)

**HDX Adapter Plates & Cassettes work with HDX Frame Patch Decks, UHDX, and HDX Enclosures.**

## OPT-X® UNITY 40/100G HDX MTP CASSETTES

- Easy to migrate from 10G to 40/100G when used with Opt-X Unity trunks, harnesses, and patch cords
- 12- or 24-fiber MTP configurations
- Select from LC or MTP connectors for 10G, 40G, or 100G applications
- Configure up to 48 fibers for 24 channels (10G) and 6 channels (40G)
- Pre-terminated fiber eliminates the need for complicated field terminations and splices
- A variety of fiber types are available, including single-mode, multimode, and laser-optimized multimode
- Easy, one-hand installation and removal

For MTP Method B polarity, you must order one each of the core and edge cassettes.

**For assistance customizing your cassettes, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.**

## FEATURED PRODUCTS

Enclosures & Trays **B16**

# HDX System

## 96 LC FIBERS PER RU

The Leviton HDX System, part of the Opt-X® family of fiber optic solutions, features compact, HDX Adapter Plates and Cassettes with LC or MTP® connectors that fit into high-density enclosures to create a scalable platform for enterprise and data center applications. This allows you to maintain low costs while benefiting from higher density: 33 percent more density with LC connectors or 50 percent with MTP, compared to standard enclosures.

A

B

C

D

## HDX RACK-MOUNT ENCLOSURES

- Enclosures accept HDX Adapter Plates and Cassettes
- 2000i HDX Enclosures offer a stylish design with transparent doors
- 1000i HDX Enclosures provide a simplified look, with 16-gauge steel, powder-coated black
- 1RU enclosures hold up to 96 fibers (using LC) and 2RU enclosures up to 192 fibers using HDX adapter plates or MTP cassettes
- Sliding tray removes completely from enclosure for field terminations
- HDX Retrofit Trays available to upgrade 1RU/2RU 2000i SDX and 1000i SDX enclosures to accept HDX cassettes and adapter plates

## CLAMP KITS

- Cable clamp kits minimize excessive pulling, bending, and crushing
- Support easy cable identification and decreases the need for tie-wraps inside the enclosure
- Create a transition point from jacketed cable to buffered fiber or subunits
- Ideal for vertical strain relief and strain relief at the top or bottom of a rack/cabinet

See page B14 for HDX Adapter Plates & Cassettes.

## FEATURED PRODUCTS

Frame, Patch & Splice Decks **B19**

# HDX Frame System

The Leviton high-density HDX Frame System, part of the Opt-X® family of fiber optic solutions, can handle up to 3,168 LC terminated fibers in just one 2 x 2-foot tile of floor space. Ideal for service providers, central office facilities, large enterprise, and cloud data centers, the HDX Frame System will reduce your patching footprint, free up valuable space, and save you money. Integrated trunk cable and patch cord management improves accessibility and enables easy moves, adds, and changes. In addition, the system is fully scalable and modular, supporting consolidation and growth.

## INDUSTRY-LEADING DENSITY

| HDX FRAME CAPACITY CHART |                    |
|--------------------------|--------------------|
| CONNECTIVITY             | MAX. FIBER STRANDS |
| LC                       | 3,168              |
| SC                       | 1,584              |
| 12-Fiber MTP®            | 7,776              |
| 24-Fiber MTP             | 15,552             |

Chart based on use of 48-fiber trunks

The HDX frame system accomplishes such high density through its unique patch deck design. One frame holds up to 22 patch decks, each configured with your choice of fiber cassettes, adapter plates, or splice trays.

## BUILT-IN CABLE MANAGEMENT & ROUTING

The frame keeps pathways clean and organized, using integrated cable management for minimum bend radius, better slack storage, and protection within the frame. Patch decks contain patch cord and MTP trunk routing for individual trays. And enhanced labeling improves deck and fiber identification to simplify moves, adds, or changes.

## SUPERIOR SCALABILITY

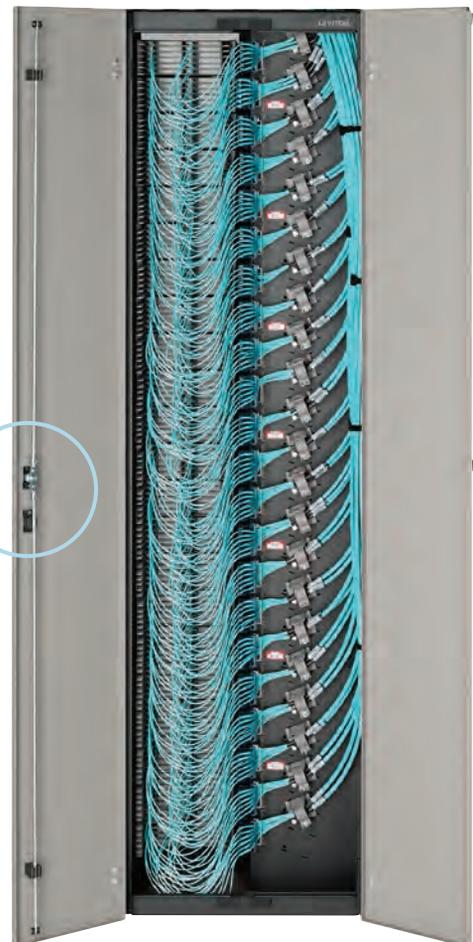

HDX frames can be ganged together to handle future growth with easy pass-through cross-frame routing kits. And with 24-fiber MTP connectivity, they are ideal for migration from 10G to 40G to 100G and beyond.

## ADDITIONAL SECURITY

The HDX frame includes rear doors that lock to protect and conceal trunk cabling. Locking front doors (sold separately) are transparent to allow visibility.

## EASY ACCESSIBILITY

The frame's open design greatly reduces time and labor for maintenance, as it allows unobstructed access to patch cord connections on the cassettes and adapter plates. And the one-tile footprint makes it easier to access the space beneath a raised floor.

# HDX FRAME SYSTEM | Frame, Patch & Splice Decks

## HDX FIBER OPTIC DISTRIBUTION FRAME (3,168 CAPACITY)

- Integrated cable management and routing solutions for minimum bend radius, better slack storage, and protection
- Holds up to 22 decks, each configured with cassettes, adapter plates, or splice trays
- Lockable rear doors included to protect and conceal trunk cabling
- Optional front door kit (sold separately) with transparent door is lockable for additional security
- Occupies only one 2 x 2-foot tile
- Seismic rated to GR-63-CORE, Zone 4, UL 2046 Listed

## PATCH DECK

- 2RU height for up to 144 fibers (using LC) capacity
- Holds 6 independent sliding trays and accepts up to 12 HDX adapter plates or cassettes
- Magnifying port identification label holders for better visibility
- Integrated minimum bend radius protection

See page B14 for HDX Cassettes and Adapter Plates.

## SPLICE DECK

- Modular 3.5-inch-high deck accepts up to three independent splice deck trays
- Sliding trays are removable for ease of splicing
- Heat-shrink fusion splicing of individual 250  $\mu$ m or 900  $\mu$ m tight-buffer fibers for up to 144 fibers per deck
- Mass ribbon fusion splicing available as custom order

## 24-FIBER HIGH-DENSITY SPLICE TRAY

- Use with HDX Frame Splice Decks, 2 trays per splice deck tray
- Protect and manage heat-shrink spliced fibers
- Heat-shrink splice sleeves included

# SDX Systems

## 72 LC FIBERS PER RU

The SDX System, part of the Opt-X® family of fiber optic solutions, is a flexible solution designed for easy installation and maintenance. Whether it's the 2000i for data centers or 1000i and 500i for medium and small enterprise applications, each comes packed with features for better cable organization and maintainability. In addition, precision-molded SDX adapter plates, MTP® cassettes, and cable assemblies offer the flexible connection and storage options to meet any project need.

### 2000i SDX 1RU/2RU/4RU RACK-MOUNT ENCLOSURES

- Accept SDX adapter plates, MTP® cassettes, splice trays, and splice modules
- Removable transparent hinged doors
- Sliding tray provides accessibility to front and rear of bulkhead after installation, and removes completely to facilitate field terminations and splicing
- 17-inch depth for high-density fiber termination and/or splicing
- Stackable and adjustable fiber rings simplify cable management
- Constructed of durable polycarbonate plastic and black powder-coated 16-gauge steel
- 19- or 23-inch rack-mount options (23-inch 1RU mounting bracket sold separately)
- 1RU and 2RU accept the HDX Retrofit Tray (sold separately) for higher density applications using HDX MTP Cassettes and Adapter Plates
- 1RU and 2RU enclosures are “intelligent ready,” accept Intact Fiber Upgrade Kits, see page F5

#### RECOMMENDED APPLICATIONS:

Data Centers

Equipment Room

Entrance Facility

Telecommunications Room

19" and 23" Racks and Cabinets

**1000i SDX 1RU/2RU/3RU/4RU RACK-MOUNT ENCLOSURES**

- Accept SDX adapter plates, MTP® cassettes, splice trays, and splice modules (pages B27-B31)
- Sliding tray in 1RU and 2RU removes completely for easy field terminations and splicing
- 15-inch depth for high-density fiber termination and/or splicing
- 19- or 23-inch enclosure rack-mount option (23-inch 1RU mounting bracket sold separately)
- Enclosures protrude 4.5-inches from mounting ears to align with Versi-Duct® Cable Management System
- LightSpace® (LGX® footprint) compatible versions also available by custom order
- Included accessory kit consists of cable ties, mounting ear screws, and port ID label
- 1RU and 2RU accept the HDX Retrofit Tray (sold separately) for higher density applications using HDX MTP Cassettes

**RECOMMENDED APPLICATIONS:**

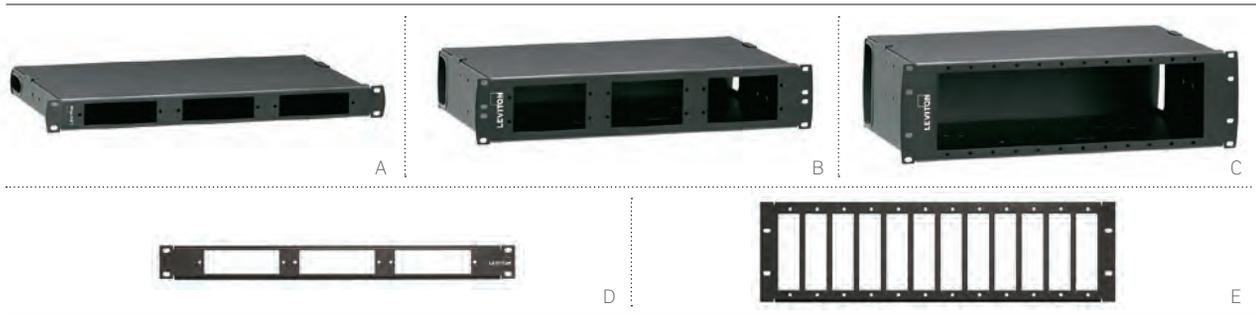

- Equipment Room
- Telecommunications Room
- 19" and 23" Racks and Cabinets

### 500i SDX 1RU/2RU/3RU FLUSH-MOUNT RACK ENCLOSURES

- Accept SDX adapter plates, MTP® cassettes, splice trays, and splice modules (page B27-B31)
- Flush-mount adapter bulkhead makes moves, adds, and changes easy
- One-piece removable cover allows for complete accessibility to the back of the enclosure
- Accepts injection-molded splice trays and 4 inch x 7 inch metal splice trays
- Enclosure can store up to 3 meters of 900 µm tight-buffered fiber per adapter
- Included accessory kit consists of cable ties, mounting ear screws, and port ID label
- 1RU and 3RU flush-mount panels accept SDX adapter plates and cassettes, and mount to 19-inch racks and cabinets
- Optional add-on patch cord cable management tray (sold separately) uses existing rack unit

### RECOMMENDED APPLICATIONS:

- Equipment Room
- Telecommunications Room
- 19" Racks and Cabinets

### SPOTLIGHT

### Patch Cord Management Tray

**Patch Cord Management Trays** help route and organize cables on 500i SDX enclosures. The trays feature identification labels and front saddles that pivot for easier routing. Because they mount directly to the front of the enclosures, they do not require additional rack space. Available in 1RU and 2RU sizes, the trays can be used with any Leviton 1RU flush-mount MTP enclosure, and 2RU trays can be used with 3RU 500i SDX enclosures. (See page B32.)

A

B

C

### 1000 SDX WALL-MOUNT FIBER OPTIC ENCLOSURES

- Self-healing grommet material protects cable and minimizes dust buildup
- Adjustable fiber management rings easily attach to mounting studs
- Ground terminal lug provides grounding option or cable strain relief
- Cutout on side of enclosure allows access to adapter bulkhead when doors are open
- Door options: split with single lock on service side (optional lock available to install on customer side), solid with or without single lock on customer side
- Constructed of 16-gauge steel, powder-coated black

### RECOMMENDED APPLICATIONS:

Telecommunications Room

\* = Maximum splice tray capacity is limited by height of selected splice tray. See page X13 for splice tray dimension and selection guide. See pages B27-B30 for list of SDX adapter plates and cassettes.

### VERTIGO ZERO-U PATCH PANELS

- QuickPort® or SDX-style openings for copper and fiber installations
- Zero-U uses no rack space
- Improves cabinet center airflow by routing rear cable along outer edges
- Styles with 3- and 6-inch channels\* provide additional cable management space
- Hinged doors provide easy access to termination field
- Patented magnified lens label holders make for easy reading
- Pre-configured plug-n-play options available for fast network deployment, call 800.722.2082 for more information

\*Not available as stand-alone pieces and must be purchased as a complete unit.

"How to Mount a VertiGO Patch Panel"

### VERTIGO RACK-MOUNT PLUG-N-PLAY PATCH PANELS

- Adjustable mounting ears provide five unique offset distances for enhanced horizontal cable management
- Integrated cable manager
- Accepts all SDX adapter plates, allowing for a mix of copper, fiber, and multimedia connectivity
- Provides either MTP® Plug-n-Play or discrete point termination
- All VertiGO Rack-Mount Plug-n-Play Patch Panels sold as custom configurations; call 800.722.2082 for more information

### SPOTLIGHT

VertiGO®

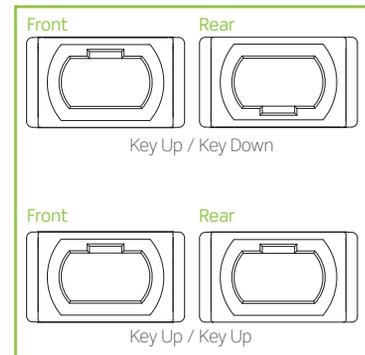

A major developer of enterprise cloud applications for human resource and finance organizations recently installed VertiGO Zero-U panels above their data center cabinets. Installing above the cabinet allowed them to dedicate 100 percent of their rack space to equipment, and mounting brackets made it easy to mount horizontally to ladder racks without requiring any drilling. The panels include both copper and fiber, using built-in dividers to isolate LC fiber and RJ copper connectivity against damage. Rear cable managers protect MTP connections and insure that no other cables installed in the ladder rack will disturb the connection to the cabinets.

## SDX ADAPTER PLATES

- Work with SDX Enclosures, including the 2000i, 1000i, 500i, VertiGO®, and wall-mount 1000
- Captive push/pull fasteners allow for quick, tool-free installation and removal
- Precision-molded LC and SC adapter plate colors designate fiber type, per TIA standards
- Available in 6- to 24-fiber plates for LC, SC, and ST
- Available in 72- to 192-fiber plates for MTP®
- MTP® and LC adapter plates with shutters available by custom order
- 6-position QuickPort® Adapter plates (item T) accept all QuickPort modules

\* = Minimum order quantity and lead times may apply.

Additional adapter plate configurations available. Please contact Tech Support at 800.824.3005 for more information.

## SPOTLIGHT

## SDX Precision-Molded Adapter Plates

**Traditional adapter plate construction** typically uses independent couplers inserted in a metal plate that often results in a “rattling” of components. Leviton SDX Adapter Plates eliminate rattling and loose-fitting adapters by using precision molding and integrated adapters, improving the overall performance, functionality, and quality of construction. All multimode and single-mode SDX plates feature zirconia ceramic sleeves, providing high performance and low insertion loss (recommended for applications requiring 10 Gbps and higher).

A

B

MTP-LC Cassette with Shutters

MTP-LC, 24-fiber, OM4 (OM4+ violet color option)

FIBER SDX MTP Cassettes

## SDX MTP CASSETTES

- Plug-n-play cassettes eliminate the need for field termination or splices
- Bend-insensitive fiber used in OM3/OM4/OM4+ cassette
- All premium 12-fiber MTP cassettes use low-loss MTP connectors
- Low insertion loss of 0.5 dB maximum
- 100% factory tested with test results included with each cassette

### SDX CASSETTES, COMMON CONFIGURATIONS

| DESCRIPTION  | PART NO.     |
|--|--------------|
| 12-Fiber SDX MTP Cassette, MTP-LC                  | FM-*012CACO+ |
| <b>[A]</b> 12-Fiber SDX MTP Cassette, MTP-SC       | FM-*012BACO+ |
| <b>[B]</b> 24-Fiber SDX MTP Cassette, 2x12F MTP-LC | FM-*024CACO+ |

\* = fiber type: A = OS2, E = OM3, F = OM4, G = OM4+

+ = Polarity: A=Method A, C=Method C, BC = Method B (core), BE = Method B (edge). For Method B, each channel must have 1 core and 1 edge cassette.

### Make-to-Order! MTP CASSETTE OPTIONS

| FIBER TYPE  | FIBER COUNT  | CONNECTOR TYPE  | MTP FIBER COUNT  | POLARITY   |
|---|--|---|--|--|
| <ul style="list-style-type: none"> <li>• OM1</li> <li>• OM2</li> <li>• OM3</li> <li>• OM4 (aqua)</li> <li>• OM4+ (violet)</li> <li>• OS2</li> </ul> | <ul style="list-style-type: none"> <li>• 12</li> <li>• 24</li> </ul> | <ul style="list-style-type: none"> <li>• LC</li> <li>• LC (violet)</li> <li>• LC (w/shutters)</li> <li>• LC/APC</li> <li>• LC/APC (w/shutters)</li> <li>• SC</li> <li>• SC/APC</li> <li>• MU</li> <li>• ST</li> </ul> | <ul style="list-style-type: none"> <li>• 12</li> </ul> | <ul style="list-style-type: none"> <li>• MTP Method A</li> <li>• MTP Method B, Core, Black Latches</li> <li>• MTP Method B, Edge, White Latches</li> <li>• MTP Method C</li> </ul> |

For assistance customizing your cassettes, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

For MTP Method B polarity, you must order one each of the Core and Edge cassettes.

## SDX GPON SPLITTER MODULE

- Permits low optical loss for passive optical network layouts
- Cassette includes SC/APC connector on fiber lead
- Fits SDX wall- and rack-mount enclosures

### SDX GPON SPLITTER CASSETTES

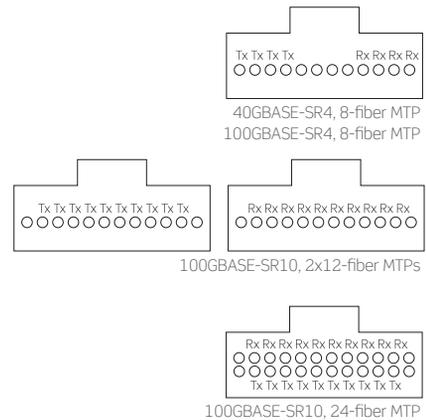

| DESCRIPTION                              | PART NO.  |
|--|-----------|
| SDX Splitter, 1 x 16, SC/APC, 3-foot leg | PLC16-003 |
| SDX Splitter, 2 x 16, SC/APC, 3-foot leg | PLC26-003 |
| SDX Splitter, 1 x 32, SC/APC, 3-foot leg | PLC12-003 |
| SDX Splitter, 2 x 32, SC/APC, 3-foot leg | PLC22-003 |

### OPT-X UNITY 40/100G SDX MTP CASSETTES

- Easy to migrate from 10G to 40/100G when used with Opt-X® Unity trunks, harnesses, and patch cords
- Cassettes support up to 48 fibers using MTP-MTP, or 24 fibers using MTP-LC
- All cassettes use either 24-fiber or 12-fiber low-loss MTP connectors
- Bend-insensitive fiber used in OM3/OM4/OM4+ cassettes
- MTP-MTP cassettes are used with MTP array cords on page B60
- See specific enclosure pages for MTP cassette capacity
- Latches are color coded: black = Core, white = Edge
- Unity cassettes are Make-to-Order only

### OPT-X UNITY 40/100G SDX MTP CASSETTES, COMMON CONFIGURATIONS

| DESCRIPTION  | PART NO.       |

### SPOTLIGHT

### 10/40/100G Fiber Performance

**Leviton is the first manufacturer** to have an independent fiber channel verification completed. Our OM3 fiber connectivity has been tested and shown to exceed performance requirements to support 10GBASE-S, and the Opt-X Unity System has been shown to exceed the performance requirements for 40GBASE-SR4 and 100GBASE-SR10 standards. Both tests were performed by Intertek (ETL) to ensure compliance to the maximum insertion loss and link distance requirements specified in the ANSI/TIA-568-C.3 and IEEE 802.3ba standards. The channels were configured to show typical data center applications as well as maximum flexibility. This type of testing assures customers that our fiber solutions will support their needs as they migrate to 10G, 40G, or 100G.

## PRECISION-MOLDED SPLICE TRAYS

- 12-fiber mini and 24-fiber high-density splice trays
- Protect and manage heat-shrink-style spliced fibers
- Heat-shrink splice sleeves included
- Ratchet-action clamps with foam-rubber padding minimize damage to fibers
- Compatible with Leviton SDX 2000i, 1000i, and 1000 Enclosures, plus LightSpace® Wall-Mount Enclosures
- 24-fiber splice tray (T5PLS-24F) compatible with HDX frame splice deck
- 12-fiber splice tray compatible with Leviton network interface devices (NIDs); when stacking splice trays, only use lids on top tray

## SDX 12- & 24-FIBER SPLICE MODULES

- Integrate fiber adapter bulkhead (12 or 24 fibers) and splice holders, eliminating the need of splice trays
- Individual compartments provide slack storage and bend radius guides for respective backbone cable, 900 µm tight-buffer pigtails, and fusion-spliced fibers
- Modular design allows for ease of maintenance of individual spliced fiber and allows for scaling up without impacting existing fibers

### PRECISION-MOLDED SPLICE TRAYS

| DESCRIPTION   | PART NO.  |
|---|-----------|
| <b>[A]</b> 12-Fiber Mini Splice Tray, 3.74" W x 5.59" L x 0.56" H (includes 14 heat-shrink splice sleeves)        | T5PLS-12F |
| <b>[B]</b> 24-Fiber High-Density Splice Tray, 4.5" W x 7.63" L x 0.50" H (includes 26 heat-shrink splice sleeves) | T5PLS-24F |

\* = Additional fiber types and connector combinations are available. For assistance ordering, call 800.824.3005.

x = OM3 (A), OS2 (L), APC OS2 (V), OM4 (4), OM4+ (P)

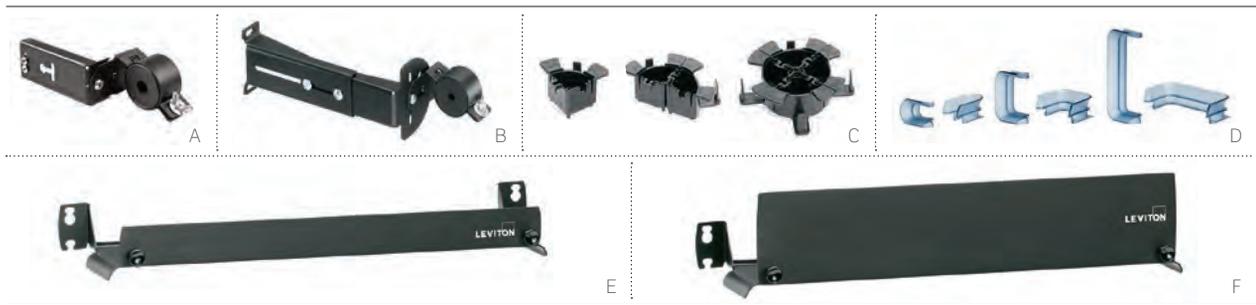

Note: Splice tray mounting hardware sold separately except as noted. Additional configurations available including mechanical splice. Contact Inside Sales at 800.824.3005 for more information.

For assistance ordering your splice trays, visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

## SPOTLIGHT SDX Fiber Splice Modules

**SDX 12- and 24-Fiber Splice Modules** protect and organize heat-shrink fusion spliced fibers inside a fiber enclosure. Splice modules eliminate the need for individual splice trays within a fiber enclosure and provide optimal organization and slack management of fibers. Plus, the modular design enables faster field splicing and simple management of pigtails within the housing.

**SDX SYSTEM ACCESSORIES**

- Cable Clamp Kits minimize excessive pulling, bending, and crushing
- Support easy cable identification and decrease the need for tie-wraps inside the enclosure
- Fiber Cable Management Rings secure fiber slack
- Patch Cord Management Trays help route and organize cables, mount directly to the front of the enclosures, and do not require additional rack space

^ = Minimum order quantity and lead times may apply.

\* = Rack Units: 1RU (1), 2RU (2), 4RU (4)

**SPOTLIGHT**

**Cable Clamp Kits**

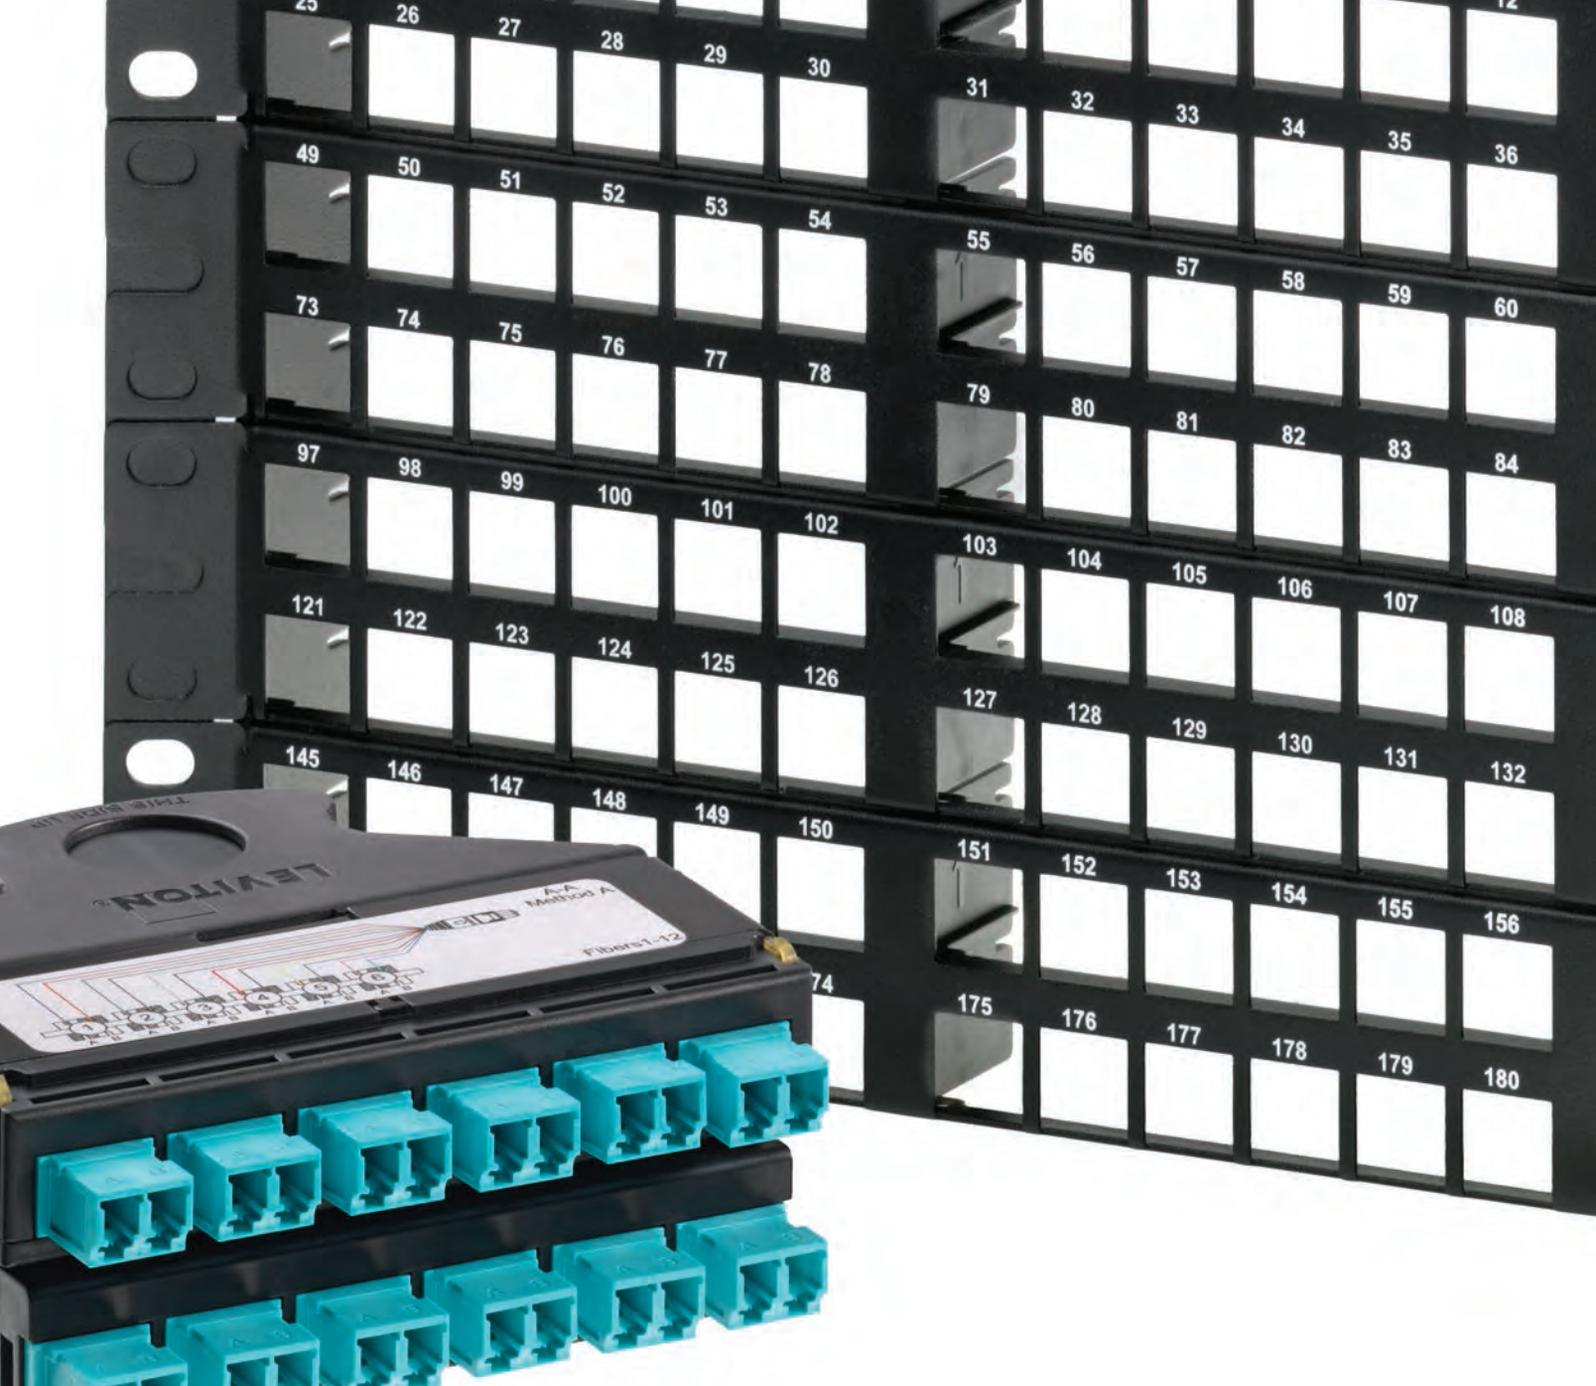

**Cable clamp kits** minimize excessive pulling, bending, and crushing forces on cable. The Enclosure-Mount Universal Clamp Kit makes it easy to identify cables, and decreases the need for tie-wraps inside the enclosure. The kit also creates a transition point from jacketed cable to buffered fiber or subunits. The Rack-Mount Universal Clamp Kit is ideal for vertical strain relief and strain relief at the top or bottom of a rack/cabinet. Use it for installations with minimal vertical cable pathways and little space for an enclosure-mount cable clamp kit.

## e2XHD Snap-In Cassette Patching System

### FEATURED PRODUCTS

Panels **B35**

Cassettes **B36**

The e2XHD Copper and Fiber Patching System is an easy-to-connect, high-density solution for enterprise and data center applications, where fast deployment and simple maintenance are critical. The system includes 1RU and 4RU high-density panels, copper and fiber snap-in cassettes, and accessories for additional cable protection and management. The e2XHD cassettes quickly snap in and pull out of the panels, making installation, moves, adds, and changes easier than ever. For copper cassettes, see page A22.

e2XHD Patching System  
FIBER

## e2XHD HIGH-DENSITY PATCH PANELS

High-density panels allow patching for up to 48 duplex fiber channels in a 1RU panel or 192 channels in a 4RU panel.

e2XHD MTP-MTP Pass-Through Cassette

e2XHD MTP-MTP Fiber Cassette, Core

## e2XHD FIBER CASSETTES

Fiber MTP® Cassettes provide a simple migration path to 40G or 100G networks. The cassettes are pre-terminated and available in 12 or 24 fibers, OM3, OM4, OM4+, or OS2 single mode.

The e2XHD Fiber Cassette features an MTP adapter that swivels to three positions for easier cable routing. Used in conjunction with the patching system's rear cable manager and cable management rings, the adapter delivers an ideal solution for eliminating cable tension and ensuring proper bend radius.

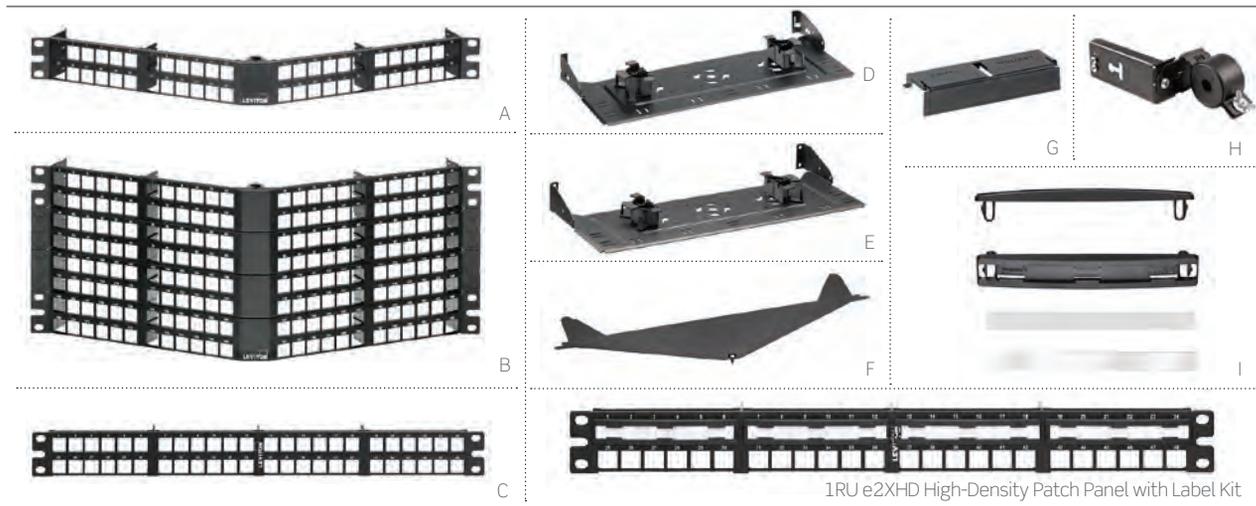

e2XHD 12-Fiber QuickPort® LC Cassette, OM3/OM4 - Aqua

"e2XHD Cassette-Based Patching System"

# e2XHD SNAP-IN CASSETTE PATCHING SYSTEM | Panels, Cable Managers, Covers & Tools

## HIGH-DENSITY PANELS

- Allows for fiber and copper in the same panel
- 1RU panels hold up to 8 single-height fiber cassettes (48 fiber channels)
- 4RU panels hold up to 32 single-height fiber cassettes (192 fiber channels)
- Alignment tabs on panels ensure upright insertion of cassettes
- Mount on standard 19-inch racks or cabinets

## REAR CABLE MANAGERS

- Support both fiber and copper cables
- Cable management rings included to help manage and route incoming fiber cables
- Built-in VELCRO®-Brand tie downs secure cables
- Optional Clamp Kits available to provide cable strain relief for incoming cables
- Flat Panel Manager mounts to rack or cabinet; screws included
- Angled Panel Manager attaches directly to panels

## ANGLED PANEL COVER

- Uses no additional rack space
- Minimizes dust and debris behind panels
- Attaches directly to e2XHD Angled Panel
- Can be retrofitted after panel is installed
- Can be used for top and bottom of panels

e2XHD Snap-In Cassette Patching System for copper applications on page A22.

e2XHD Patching System  
**FIBER**

## FIBER CASSETTES

- Easy to migrate from 10G to 40/100G when used with Opt-X® Unity trunks, harnesses, and patch cords
- Used exclusively with e2XHD panels
- Available in MTP-MTP or MTP-LC
- Available in 12- or 24-fiber, OM3, OM4, OM4+, OS2
- MTP® adapter swivel allows for easy cable routing and proper bend radius
- QuickPort® MTP-LC Cassette uses QuickPort modular fiber adapters; can be removed with QuickPort Connector Removal Tool
- All cassettes use either 24-fiber or 12-fiber low-loss MTP connectors
- Blank cassettes reserve capacity for future cassettes, easily snap into rear of panel to block unused cassette openings
- Conversion cassettes available on page B50 (40G to 10G, 100G to 10G, etc.)

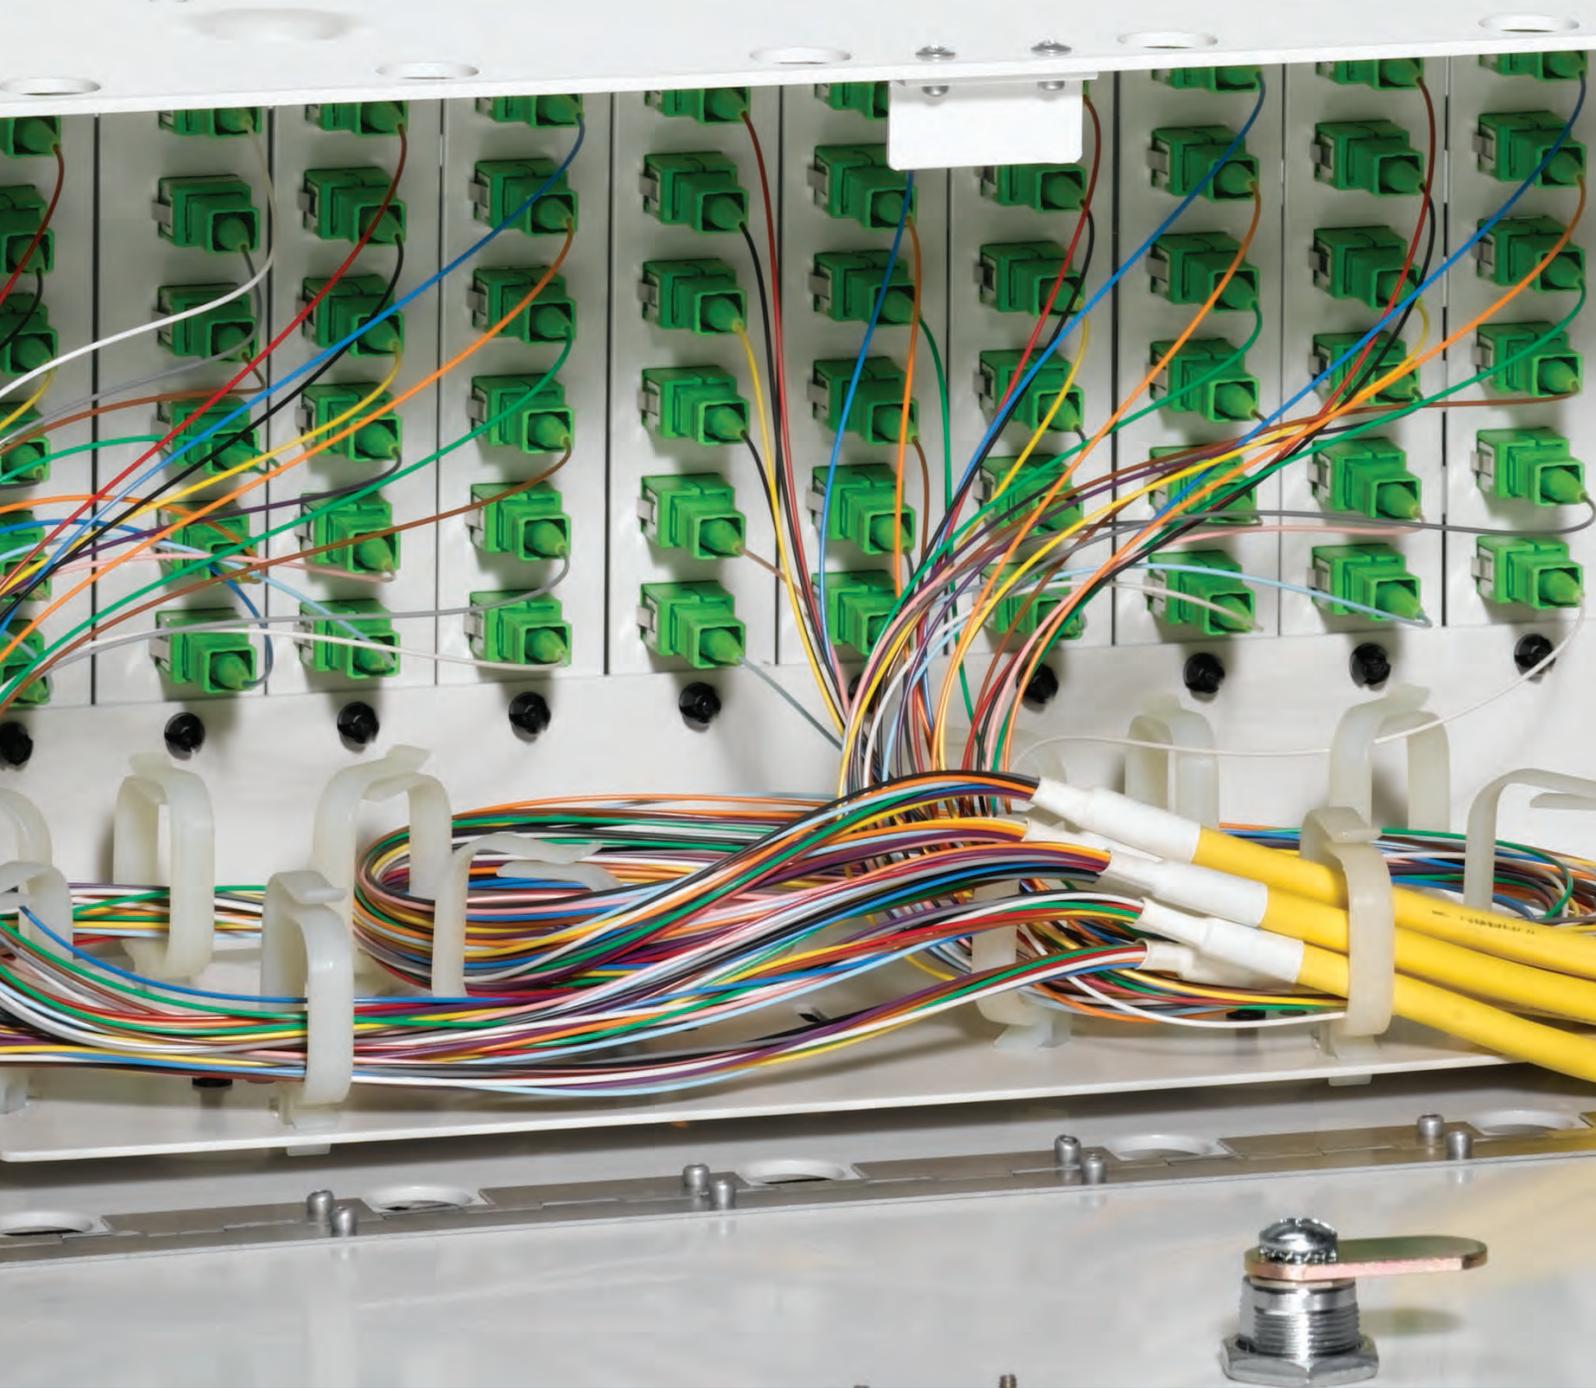

For assistance customizing your cassettes, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

# LightSpace® System

Leviton offers a wide range of enclosures designed to protect, manage, and organize fiber splices across various indoor and outdoor environments. Specifically designed to meet the requirements of service providers large and small, LightSpace enclosures are ideal for central-office, outside-plant, and fiber-to-the-premises applications.

**KEY FEATURES**

- Large cable management rings for enhanced jumper routing
- Front cable management saddles
- Side entry for backbone cable
- Constructed of high-strength aluminum, powder-coated central-office white
- Mounts on standard 19- and 23-inch racks and cabinets
- Accepts LightSpace adapter plates (See pages B41-B42.)

**RECOMMENDED APPLICATIONS:**

Central Office or Head End, CLEC  
19" and 23" Racks and Cabinets

**DP SERIES OPTICAL DISTRIBUTION ENCLOSURES**

- Removable front door
- Rear door with key lock option
- Upper and lower patch cord bend radius brackets

For assistance customizing your enclosures, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

**DPS & DPC SERIES OPTICAL SPLICE ENCLOSURES**

- Front accessibility to splice trays
- Removable front door with key lock option
- Rear door with key lock option
- Connector identification label

FIBER  
LightSpace System

**LIGHTSPACE CPC SERIES CUSTOMER PREMISE ENCLOSURES**

- Wide-swing radius doors provide full access during installation and maintenance
- Double doors with slam latches provide separation between service provider and customer
- Top or bottom cable entry
- Stackable, allowing for additional capacity
- Constructed of 16-gauge steel, powder-coated central-office white
- Accepts all Leviton splice trays
- Accepts LightSpace adapter plates (See pages B41-B42.)

**RECOMMENDED APPLICATIONS:**

Central Office or Head End, CLEC  
Wall Mount

**LIGHTSPACE CPS SERIES CUSTOMER PREMISE SPLICE ENCLOSURES**

- Single-fixed left-hinged door with wide-swing radius design for easy access
- Top or bottom cable entry
- Stackable, allowing for additional capacity
- Padlock provision
- Constructed of 16-gauge steel, powder-coated central-office white
- Accepts all Leviton splice trays

# LIGHTSPACE® SYSTEM | Splice Trays & Holders

## METAL SPLICE TRAYS

- Heat-shrink, heat-shrink foam, and bare-fusion styles available
- Mounting holes with space blocks prevent fiber damage
- Compatible with SDX and LightSpace enclosures
- Splice tray selector is available online at [Leviton.com/configurator](http://Leviton.com/configurator)
- Heat-shrink fusion splice sleeves sold separately

## SPLICE HOLDERS

- 6- and 12-fiber designs in foam and solid plastic options
- Mini, micro, and mechanical options available
- Styles accommodate the entire range of Leviton fusion splice sleeves

For assistance ordering your splice trays, visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

| 12-Fiber LightSpace Splice Holder, bare fusion                        | FSHBF-P12 |
| 6-Fiber LightSpace Splice Holder, heat shrink (LGX® footprint)        | FSHAT-F06 |
| 72-Fiber LightSpace Splice Holder, ribbon, 6 position                 | FSHRB-F06 |

^ = Minimum order quantity and lead times may apply.

Note: Splice tray mounting hardware sold separately except as noted. Additional configurations available including mechanical splice. Contact Inside Sales at 800.722.2082 for more information.

## FUSION SPLICE SLEEVES

- Standard 40 mm and 60 mm sizes, plus mini and micro sleeves for smaller trays and fibers
- Precise lengths free of all burrs and sharp edges
- Clear outer tube for viewing fiber color

## LIGHTSPACE ENCLOSURE ACCESSORIES

Select cable clamp kits, key locks, strain-relief options, or grounding solutions.

#### FEATURED PRODUCTS

Flush-Mount Enclosures & Panels **B46**

## Flush-Mount Enclosures & Panels

Leviton high-density Flush-Mount Enclosures and Panels are ideal for data center server, zone, or MDA cabinet applications where space is crucial. These enclosures utilize MTP® connections on the back with choice of fiber connectors on the front, or can be pre-assembled with harnesses. Panels can accommodate up to 576 multimode or single-mode fibers, depending on connector style, and mount on standard 19-inch racks and cabinets.

1RU Enclosure, 48-fiber OM3, MTP®-LC, front and rear

1RU Panel, 72-fiber OM3, LC

1RU Panel, 72-fiber, OS2, MU

## HIGH-DENSITY FLUSH-MOUNT ENCLOSURES & PANELS

- Staggered, ergonomic design allows easy access to connectors
- Incorporates logical port management (LPM) using custom silk-screening (modular, numeric, and hexadecimal) for easy port identification
- Constructed of 16-gauge steel, powder-coated black
- Panel mounts on standard 19-inch racks and cabinets
- Accepts 1RU Patch Cord Management Tray (5R1UL-CMT)
- Larger enclosures (up to 10RU) are available, contact Inside Sales to order

## RECOMMENDED APPLICATIONS:

- Data Center Server, Zone, or MDA
- Equipment Room
- Telecommunications Room
- 19" Racks and Cabinets

## FLUSH-MOUNT ENCLOSURE & PANEL DENSITY, MAXIMUM FIBER COUNT

For assistance customizing your enclosures and panels, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

## SPOTLIGHT Patch Cord Management Tray

96-F Panel

The Patch Cord Management Tray provides convenient routing and protection using the same rack-unit space as the enclosure. It can also be used with any Leviton 1RU Flush-Mount MTP to LC enclosure. See page B32.

## FEATURED PRODUCTS

Vertical Patching Brackets & Blade Replicators **B48**

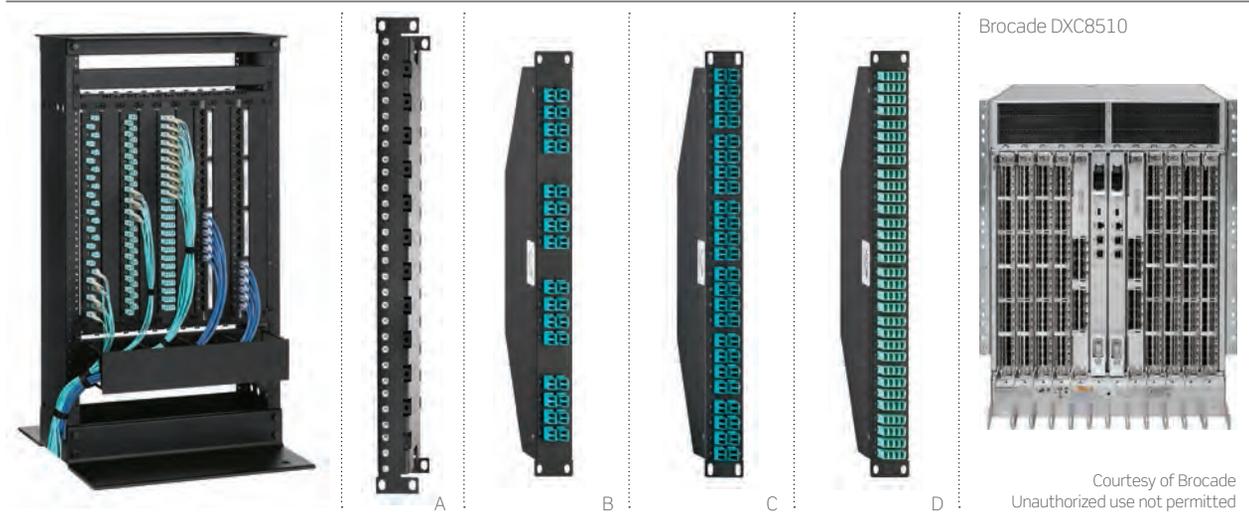

Replicator® Enclosures **B49**

100/40G to 10G Conversion **B50**

# Equipment-Specific Solutions

Leviton works closely with the biggest names in active network equipment to create scalable, high-density data center networks. When combined with the latest data center switches from Arista, Brocade, Cisco, and Extreme Networks, Leviton connectivity provides design flexibility for your equipment architecture. These solutions include conversion harnesses and cassettes that break out 40GbE or 100GbE connections into individual 10GbE channels.

# EQUIPMENT-SPECIFIC SOLUTIONS | Vertical Patching Brackets & Blade Replicators

**FIBER**  
 Equipment-Specific Solutions

## VERTICAL PATCHING BRACKETS

- Enable vertical mounting in a 19-inch rack
- Align or replicate patch panel or adapter plate ports with the ports that reside on servers or switches within the same or adjacent rack or cabinet
- 48-port copper panels replicate typical 1G/10G copper switch blades
- 32, 48, and 64 fiber ports replicate typical fiber switch blades
- Up to ten 1RU copper/fiber patch panels and cable managers can be mounted vertically utilizing 10RU space

## BLADE REPLICATORS

- Replicators provide one-to-one Logical Port Management (LPM) replication for the high-density blade fiber switches
- Blade Replicator supports switches and directors from Cisco, Brocade, Arista, and Extreme
- Mounting can be done horizontally or vertically using Leviton Vertical Patching Brackets
- Blade Replicator supports 32-, 48-, and 64-ports per blade
- Replicator kits simplify ordering: Kits can include the replicated patch panel, associated trunks, MTP® panels, and harnesses

### VERTICAL PATCHING BRACKETS

| DESCRIPTION  | PART NO.  |

## REPLICATOR ENCLOSURES

- Can be configured to replicate any switch, using unique logical port management (LPM) design
- Kits available with trunks, MTP panels, and harnesses
- Full front access to all terminations via fold-down panel
- Shallow depth allows back-to-back mounting in cabinets and 4-post racks for high-density applications
- Up to 384-channel capacity (768 fiber strands)
- Available with LC and MU connector interfaces

For assistance customizing your replicator,  
please call 800.722.2082.

## MTP BRACKETS FOR MAINFRAME SOLUTIONS

- Mount to back rail (right or left side) of racks and cabinets, freeing up valuable space
- Provide direct connection to the mainframe using trunk cables and MTP harnesses
- Available with shutters

### REPLICATOR ENCLOSURES

| DESCRIPTION   | PART NO.          |
|---|-------------------|
| 6-Blade, 48-Port Cisco Replicator, LC (aqua), no internal harness         | FP8-E576CN190N-C  |
| 6-Blade, 48-Port Cisco Replicator, LC (blue), no internal harness         | FP8-A576CN190N-S  |
| 6-Blade, 48-Port Cisco Replicator, LC (aqua), with OM3 internal harness   | FP8-E576CA190N-A  |
| 8-Blade, 48-Port Brocade Replicator, LC (aqua), no internal harness       | FP10-E384CN190N-C |
| 8-Blade, 48-Port Brocade Replicator, LC (blue), no internal harness       | FP10-A384CN190N-C |
| 8-Blade, 48-Port Brocade Replicator, LC (aqua), with OM3 internal harness | FP10-E384CA190N-C |

## 120G-TO-10G & 40G-TO-10G CONVERSION CASSETTES

- For 40G to 10G channels connecting QSFP+ to SFP+ transceivers
- For 120G to 10G channels connecting MXP ports to SFP+ transceivers
- Low-loss MTP® connector 0.35dB Max IL; LC connector at 0.15dB typical IL
- Bend-insensitive fiber lowers risk for pinched cables
- Compatible with reversing polarity LC Uniboot patch cords
- Includes options for HDX and e2XHD systems

## 40G-TO-10G CONVERSION FIBER HARNESSES

- For channels connecting QSFP+ to SFP+ transceivers
- Small diameter cable for dense connectivity
- Uses bend-insensitive fiber; lowers risk for pinched cables
- Available with optional reversing polarity LC Uniboot
- Low-loss MTP connector 0.35dB Max IL
- Includes options for HDX and e2XHD systems

| CONVERSION CASSETTES  |                    |

# Pre-Terminated Cable Assemblies

Simplify fiber connection and termination with Leviton cable assemblies.

Take advantage of our Secure Keyed LC and Opt-X Unity 40/100G assemblies to protect and future-proof your critical networks. Pre-terminated trunk cables and harnesses, plus multimode, single-mode, and pigtail assemblies are all made to customer specifications. Choose cable type, connector combinations, length, mode, and more. Configure online at [Leviton.com/configurator](http://Leviton.com/configurator).

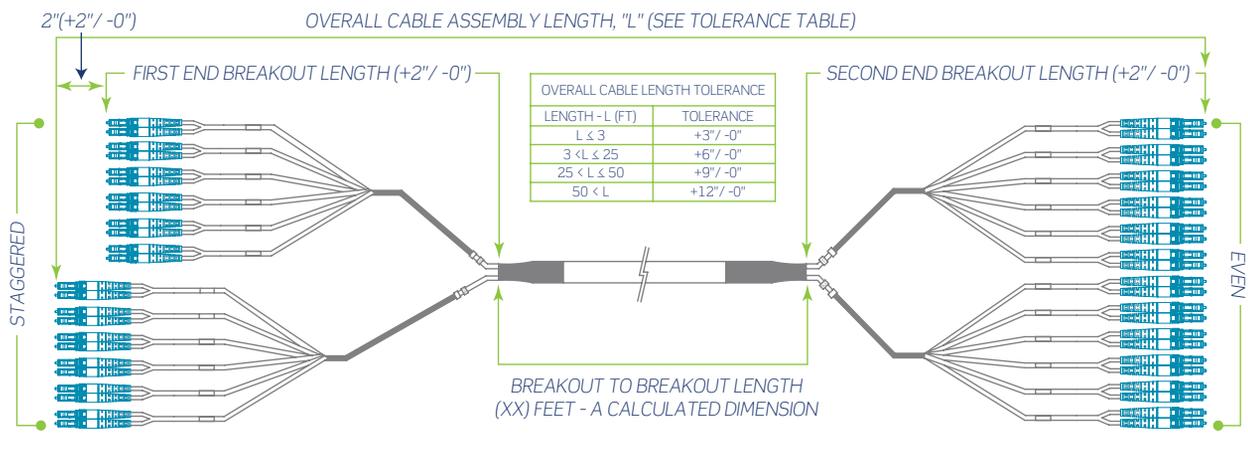

## BUILD YOUR OWN PRODUCTS WITH THE LEVITON MAKE-TO-ORDER PROGRAM

We've made building the exact solution for your network quicker and easier than ever. Rely on our innovative online custom configurators for a wide variety of fiber and copper products.

### MAKE-TO-ORDER CABLE ASSEMBLIES

- Pre-Terminated Fiber Trunks
- Fiber MTP® Harnesses
- Secure Keyed LC Cable Assemblies
- Fiber Optic Patch Cords
- Pigtails

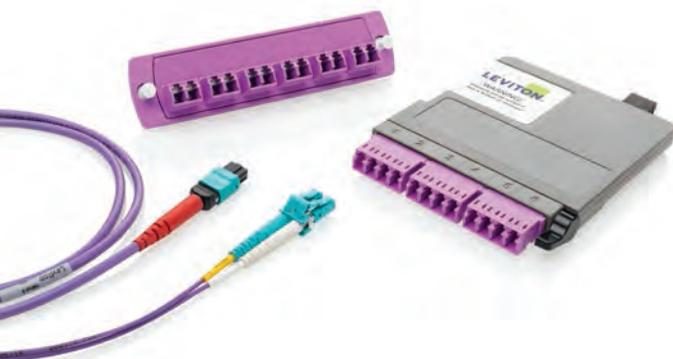

### FIBER TRUNK CABLE DIAGRAM (CUSTOMIZE AT LEVITON.COM/CONFIGURATOR)

Our engineers can also work with you to design and manufacture a solution that meets your specific application needs. For questions or assistance configuring your products, please call Network Solutions Tech Support at **800.824.3005**.

### SPOTLIGHT

### OM4+ Premium Violet System

With the increasing demand for 40GbE and 100GbE, more data centers are choosing OM4+ performance for better bandwidth and link distances. The new Leviton OM4+ Premium Violet System offers the best chance to future-proof data center cabling infrastructure, with the ability to transmit 40/100GbE signals out to an unprecedented 300 meters when using standard 40GBASE-SR4 or 100GBASE-SR10 transceivers. The OM4+ system components — including violet trunk cables, harnesses, patch cords, MTP® cassettes, and adapter plates — create the first violet end-to-end solution in the industry.

## OPT-X UNITY 40/100G PRE-TERMINATED TRUNK CABLES

- MTP-to-MTP trunk cables support 40/100G speeds
- Terminations available in 8-, 12-, and 24-fiber configurations
- Migration solution to 40/100G from existing 10G networks with premium 12-fiber MTP trunk configuration
- Up to 70% faster install than field-terminated trunks
- MTP polarity options are TIA methods A, B, or C (Method B is standard)
- 100 percent factory tested, with test results included for each assembly
- All assemblies labeled with serial number and length for traceability and easy re-order

See page B8 for Opt-X Unity 40/100G system overview.

## SPOTLIGHT Migration Path to 40G & 100G

Leviton pre-terminated MTP solutions offer an ideal migration path from 10G to 40G and 100G channels. The Opt-X Unity 40/100G system features MTP trunks, harnesses, array cords, adapter plates, and cassettes to help future-proof your networks. The Opt-X Unity system is fully compatible with UHDx, HDx, SDx, and e2XHD (shown) footprints.

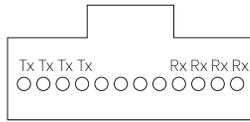

**10G**  
Leviton components for a 10G channel include MTP-LC SDx, e2XHD, or HDx cassettes, and LC duplex patch cords.

**40G**  
Migration from 10G to a 40G system replaces LC with MTP components, such as 2x12-fiber to 3x8-fiber MTP cassettes and 8-fiber MTP array cords.

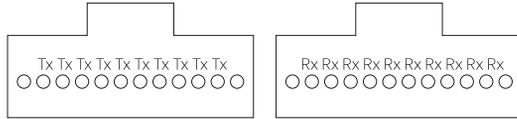

**100G**  
Moving from 40G to 100G replaces MTP cassettes with MTP adapter plates and uses 24-fiber MTP array cords.

# PRE-TERMINATED CABLE ASSEMBLIES | Pre-Terminated Trunk Cables > Secure Keyed LC

Secure Keyed LC to Secure Keyed LC  
12-fiber, 50/125 μm

Pre-Terminated Cable Assemblies

FIBER

## PRE-TERMINATED SECURE KEYED LC TRUNK CABLES

- Locking design prevents unauthorized and inadvertent moves, adds, and changes (MACs)
- Duplex LC connectors can only be removed with matching-color extraction tool
- Choose from eight colors to segregate and secure networks
- Duplex LC connectors plug into any industry-compliant LC adapter or interface
- Standard polarity: A-B or MTP® Method C; others available
- Standard breakout lengths can be staggered for better cable routing and management
- Trunks over 125 feet long are shipped on spools, or upon request for shorter lengths
- Pulling eye option available

For assistance customizing your trunk cables, please call Tech Support at 800.824.3005.

### SPOTLIGHT

Before you Connect – C.L.I.C.

# PRE-TERMINATED CABLE ASSEMBLIES | MTP® Array Harnesses > Opt-X® Unity 40/100G

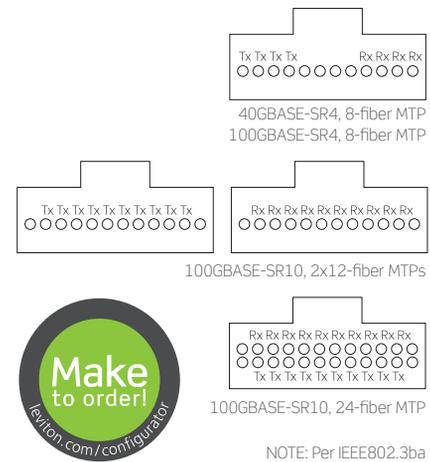

Pre-Terminated Cable Assemblies

FIBER

## OPT-X UNITY 40/100G MTP ARRAY HARNESSES

- For use in attaching directly to 40/100G transceivers
- Pre-terminated MTP-to-MTP connectors in laser-optimized multimode
- MTP Extender Tab option for high-density applications
- Custom short-length cable for cabinet/rack patching
- Custom staggering available
- MTP polarity options are TIA method A, B, or C (Method B is standard)
- Used in conjunction with MTP brackets (Zero-U) or adapter plates
- 100 percent factory tested, with test results included for each assembly
- All assemblies labeled with serial number and length for traceability and easy re-order
- Color-coded boots

## SPOTLIGHT Pulling Eye

The pulling eye protects fiber connectors on 12- through 144-fiber trunk cables. It completely covers the breakout length, transferring any pulling force from the assembly to the pulling eye sleeve. Customers can specify which end to have the pulling eye installed. Also available: a high-tensile load option that attaches to Kevlar®.

Pre-Terminated Cable Assemblies

FIBER

## HARNESSES

- Pre-terminated MTP-to-discrete connectors (LC, SC, ST, MU) in all fiber types
- Custom short-length cable reduces congestion in cabinet or rack patching applications
- Custom staggering available
- Straight polarity configuration
- Used in conjunction with MTP brackets (Zero-U) or Flush-Mount Series MTP 1RU panels
- Used as direct connect into SAN equipment
- 100 percent factory tested, with test results included for each assembly
- All assemblies labeled with serial number and length for traceability and easy re-order
- Small diameter cable for dense connectivity
- Available with optional reversing polarity LC Uniboot

## SPOTLIGHT Conversion Harnesses

**Conversion Harnesses** connect to electronics with LC-style ports. Ideal for channels connecting QSFP+ and SFP+ transceivers, the harnesses can aggregate 10G ports to a 40G or 100G port. Available in 50 μm OM3, OM4, and OM4+ multimode fiber with optional reversing polarity LC Uniboot, conversion harnesses feature a small diameter cable for dense connectivity and bend-insensitive fiber to lower risk of pinched cables. Conversion cassettes are available in an HDX and an e2XHD footprint. More information on page B50.

Secure Keyed MTP®-LC Harness

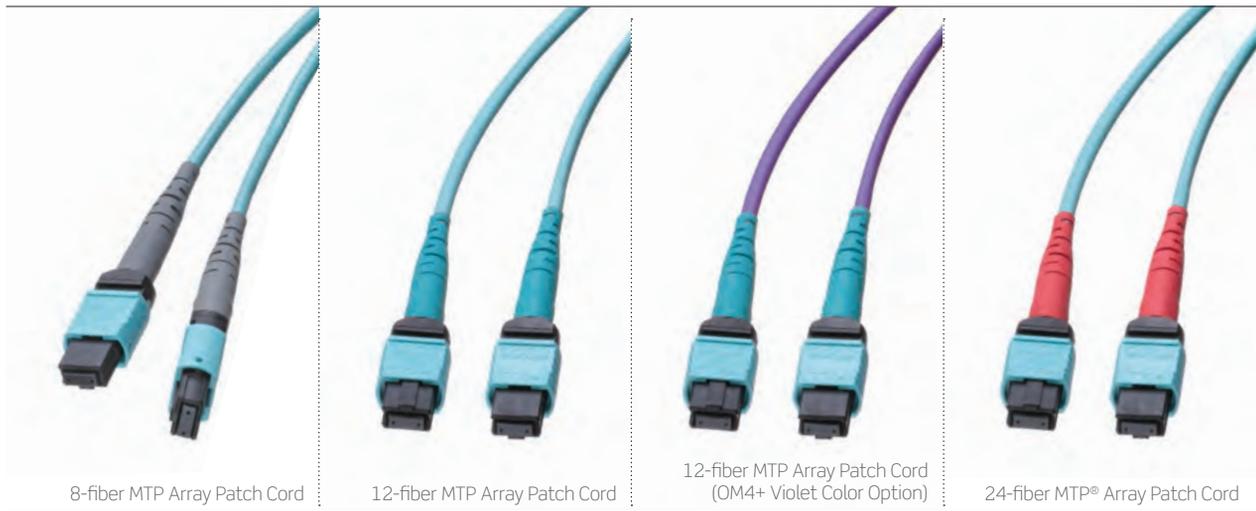

### SECURE KEYED LC HARNESSES

- Locking design prevents unauthorized and inadvertent moves, adds, and changes
- Duplex LC connectors can only be removed with matching-color extraction tool
- Choose from eight colors to segregate and secure networks
- Duplex LC connectors plug into any industry-compliant LC adapter or interface
- Polarity is A to A
- Harnesses are part of the Leviton Make-to-Order (MTO) program

| SECURE KEYED LC MTP-LC HARNESS OPTIONS |                 |             |                                     |                     |                             |

# PRE-TERMINATED CABLE ASSEMBLIES | Opt-X® Unity 40/100G Array Cords

Pre-Terminated Cable Assemblies  
**FIBER**

## OPT-X UNITY 40/100G MTP ARRAY CORDS

- 50/125 µm laser-optimized multimode, OM3 and OM4
- 8-, 12-, and 24-fiber MTP array cords offer migration path from 10G to 40/100G
- Available in lengths of 1, 2, 3, 5, and 10 meters
- See page B8 for Opt-X Unity 40/100G system overview

# PRE-TERMINATED CABLE ASSEMBLIES | Patch Cords & Pigtails > Premium

FIBER  
Pre-Terminated  
Cable Assemblies

## PREMIUM PATCH CORDS

- Available in standard SC, ST, LC, or hybrid options
- Riser, plenum, and Low-Smoke Zero-Halogen (LSZH) cable options available
- < 0.25 dB insertion loss maximum, > 25 dB back reflection for multimode
- < 0.25 dB insertion loss maximum, > 55 dB (UPC)/-65 dB (APC) for single mode
- Polarity reversal LC connector option
- 100 percent factory tested
- Made to order with quick-turn delivery

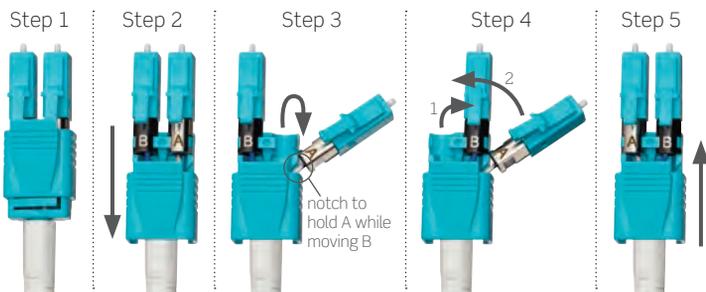

For assistance customizing your patch cords and pigtails, please visit [leviton.com/configurator](http://leviton.com/configurator) or call Tech Support at 800.824.3005.

\* = Reverse polarity is not recommended for use in HDX configurations

## SPOTLIGHT LC Uniboot Polarity Reversal

**LC Uniboot** reversing polarity connector includes a finger-latch release that eliminates the need for tools when making the polarity change. It is color-coded and labeled "A" and "B" to provide visual references when making a polarity flip. The uniboot design is compatible with FOCIS-compliant duplex connectors and transceivers using the LC interface. The uniboot is available on 2.0 mm round cable, and will also support legacy applications using 2.9 mm cable.

**ECONOMY MULTIMODE PATCH CORDS**

- Riser rated is standard, LSZH is optional
- < 0.3 dB insertion loss maximum, > 25 dB back reflection
- 100 percent factory tested
- OM1, OM2, OM3, and OM4
- All cables are pre-labeled and individually bagged
- Stock available for lengths listed

# PRE-TERMINATED CABLE ASSEMBLIES | Patch Cords & Pigtails > Secure Patch Cords

Secure Keyed LC to Secure Keyed LC, 50/125 μm LOMM

Secure Single-Mode Pigtail SC UPC Polish

Secure Keyed SC/APC Patch Cord and Extraction Tool

## SECURE KEYED LC PATCH CORDS & PIGTAILS

- Locking design prevents unauthorized and inadvertent moves, adds, and changes (MACs)
- Duplex LC connectors can only be removed with matching-color extraction tool
- Duplex LC connector plugs into any industry-compliant LC adapter or interface
- All connectors are heat cured and use ceramic ferrules for optimal performance

Please see page B68 for Secure LC Protection Plugs and Extraction Tools.

For assistance customizing your patch cords and pigtails, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call 800.824.3005.

## SECURE KEYED SC/APC PATCH CORDS

- Ideal for FTTX, enterprise GPON, and government or military networks
- Secure design prevents unauthorized moves, adds, and changes
- Cords can only be removed with matching color extraction tool
- Simplex SC/APC cords plug into industry-compliant SC adapters
- A-A polarity

### SECURE KEYED SC/APC PATCH CORDS

Secure Keyed LC  
Connectors &  
Accessories **B68**

# Connectors & Housings

Leviton has everything you need to properly terminate your fiber network. FastCAM® and Fast-Cure® connectors are available in LC, SC, and ST styles. Secure Keyed LC Field-Installable Connectors lock into any industry-compliant adapters and prevent unauthorized moves, adds, and changes. To extend fiber to the workstation, we also offer QuickPort® footprint fiber adapters that fit into our standard wallplates and Multimedia Outlet System (MOS) housings. Go to the Wallplates & Housings section to see our an extensive wallplate selection.

**FASTCAM CONNECTORS**

- Pre-polished, field-installable connectors
- Use precision zirconia ferrules
- Require no polishing or epoxy curing; provide immediate termination
- Precision mechanical termination uses molded v-groove technology to retain and align the fiber
- Terminated on 250 µm or 900 µm buffered fiber and/or 2 or 3 mm jacketed fiber
- Higher yields with Visual Fault Locator (VFL)-compatible LC, SC, and ST connectors
- Available in OM1, OM2, OM3, OM4, OS2 UPC, and OS2 APC (SC only)

\* = Minimum order quantity and lead times may apply.

See pages B73-B76 for FastCAM tools and consumables.

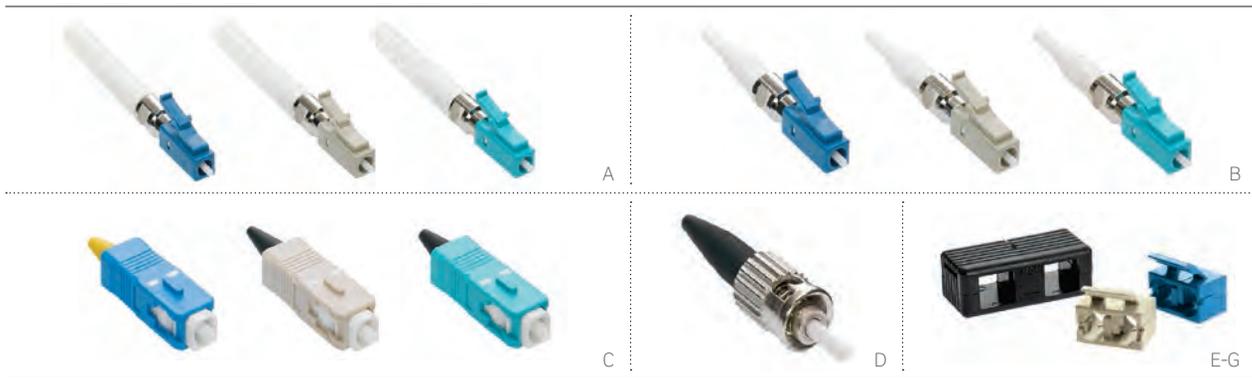

^ = Use APC Angled Cleaver (page B75).

**SPOTLIGHT**

Visual Fault Locator (VFL)

The Leviton Visual Fault Locator (VFL) uses a bright red laser to locate faults in optical fiber, such as bends, breaks, and defective connectors. Included with each VFL are a 2.5 mm ferrule interface, 1.25 mm adapter, and soft carrying case. Use with LC, SC, and ST FastCAM connectors.

## FAST-CURE CONNECTORS

- Anaerobic adhesive-style, field-installable connectors
- Hand polishing required
- Most robust connection, ideal for inside and outside plant applications
- Available in LC, SC, and ST connector styles
- 900 μm and 3-mm boots included with SC and ST connectors

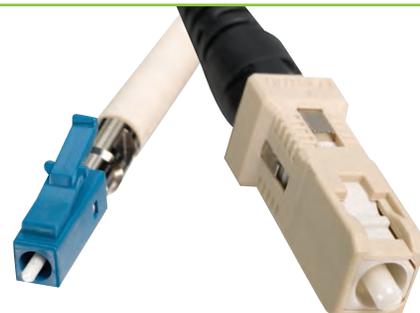

Fast-Cure Components

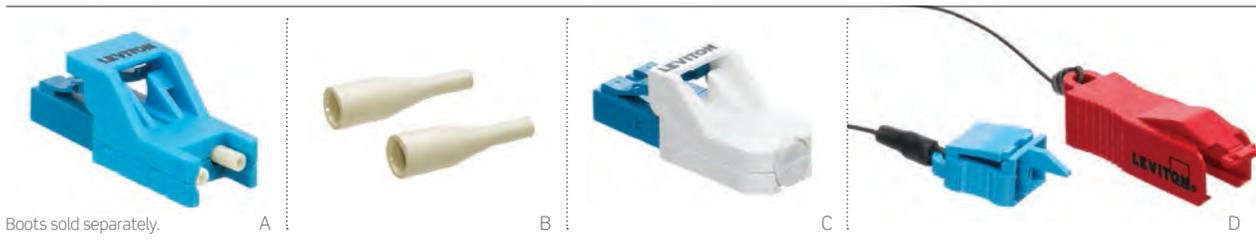

| FAST-CURE ADHESIVE CONNECTORS  |                  |                     |                  |

See pages B73-B76 for Fast-Cure tools and consumables.

## SPOTLIGHT Ceramic vs. Polymer Ferrules

**Fiber optic ferrules**, which ensure accurate alignment of fiber-to-fiber core interfaces, can be constructed of zirconia ceramic or polymer composites. While the two materials offer comparable performance in several areas, ceramic ferrules are superior in the key attributes of reliability (withstanding day-to-day environmental stressors) and durability (withstanding repeated matings/moves, adds, and changes). Leviton builds its connectors using only ceramic ferrules, so our customers can be assured of the best fiber connector performance in any application.

Boots sold separately.

### SECURE KEYED LC CONNECTORS & SYSTEM ACCESSORIES

- Field-installable duplex LC connectors lock into any industry-compliant LC adapter or interface
- Locking connectors can only be removed with matching-color extraction tool
- Anaerobic adhesive-style, requires hand polishing (See page B74 for Polishing Tool Kit 49800-FTK.)
- 900 µm boots identify fiber type
- Port protection plugs enable unused LC ports to be locked
- Dust caps protect connectors upon removal from a port, promoting good fiber discipline

Secure Keyed LC system also includes trunk cables (page B56), harnesses (page B59), patch cords and pigtails (page B64).

## FIBER OPTIC FAN-OUT KITS

- Protect bare fiber and prepare loose-tube cable for direct termination to industry-standard connectors
- Separate 250 μm fibers and route into color-coded 900 μm buffer tubes with no proprietary tools
- Available in 6- or 12-strand kits and 24- or 36-inch lengths
- Works with cabling from any manufacturer (Will accommodate maximum buffer-tube diameter up to 3.5 mm)

## SPOTLIGHT

### QuickPort Wallplates

QuickPort adapters are designed to fit our complete line of QuickPort wallplates found on pages D5-D9.

## FEATURED PRODUCTS

Visual Fault Locator (VFL) **B72**

Cleaver **B72**

## Tools & Consumables

Different termination types require unique tools. Leviton has everything you need to terminate Fast-Cure® (adhesive polish) and FastCAM® (pre-polished) connectors. We also offer cleaning tools for LC, SC, and MTP® connectors. Choose from complete kits, or mix and match individual tools and a wide variety of consumables.

## VISUAL FAULT LOCATOR (VFL)

Quickly locate optical fiber damage with the Leviton Visual Fault Locator (VFL). The pocket-sized tool uses a bright red laser to locate faults, including tight bends, breaks, and defective connectors. Included with each VFL are a 2.5 mm ferrule interface, 1.25 mm adapter, and soft carrying case. Use with FastCAM® LC and SC connectors for enhanced terminations. See page B75 for part numbers.

## LEVITON 200X INSPECTION SCOPES

Reduce the chances of over-polishing with Leviton's high-powered inspection scopes. View single-mode and multimode end-face polishes safely with our oblique viewing technology; full laser eye protection is provided through wavelengths of 850 - 1550 nanometers (nm). Rugged metal and rubber construction stands up to job-site abuse while offering an ergonomic grip. See page B75.

## FASTCAM TERMINATION TOOLS

FastCAM terminations and fusion splicing both require precision cleaving. Get the accuracy you need with the Cleaver. A cleave angle of 90 degree +/- .5 degree is guaranteed; the 16-position blade remains sharp through approximately 48,000 cleaves. Clean-up is eliminated with the built-in waste holder. For a self-contained workspace, mount the Cleaver to the optional work tray and use the gooseneck LED for task lighting. The Leviton APC Angled Cleaver is recommended for APC single-mode FastCAM connectors. See page B75.

## ONLINE TRAINING VIDEOS & ANIMATIONS

Increase your expertise with Leviton's online fiber training. Step-by-step instructions on terminating FastCAM 250 µm or 900 µm fiber, using our fan-out kits, or terminating Fast-Cure® connectors, are all available with just a click of the mouse. All of Leviton's training animations feature clear, easy-to-understand graphics paired with on-screen written instructions for maximum effectiveness. Visit [Leviton.com/support](http://Leviton.com/support).

## FIBER OPTIC LIGHT TOOL KIT

- Essential tool set for quick field-termination of Fast-Cure® connectors
- Terminates both multimode and single-mode fiber

## FIBER OPTIC FAST-CURE TOOL KIT

- All the tools you need for terminating multimode or single-mode LC, SC, or ST Fast-Cure adhesive connectors
- Adhesive/accelerator kit sold separately, see page B76

## FIBER OPTIC FASTCAM® TOOL KIT

- Precision cleaving for guaranteed FastCAM connector performance
- Terminates both multimode and single-mode fiber

Consumables sold separately. See page B76.

## SPOTLIGHT

### RackForce GigaCenter Attracts Cloud and Colocation Clients with Efficient Design, Ideal Location

The RackForce GigaCenter serves more than 1,800 customers, who use from a single cabinet to an entire GigaVault. When choosing network connectivity, the RackForce team decided on Leviton for their products, experienced people, strong logistics support for moving product fast, and the capability to fulfill unique needs for non-standard equipment and make-to-order products. They also took advantage of the Leviton data center team, getting help with network infrastructure design.

As customer needs change and the GigaCenter grows, RackForce continues to rely on Leviton for ongoing assistance with infrastructure changes and additions, delivering the services customers require.

## LEARN: CLEANING INSTRUCTIONS

Protect your investment and make sure you get the network performance you expect when you CL.I.C. - Clean, Inspect, Connect.

See page B56 or visit [Leviton.com/clc](http://Leviton.com/clc) for directions.

### UNIVERSAL CONSUMABLES KIT

All the basic supplies needed to clean and polish fiber optic connectors. Set includes:

- 50 lint-free dry wipes
- 50 alcohol pads
- 30 sheets 12 µm lapping film
- 30 sheets 3 µm lapping film
- 30 sheets 0.3 µm lapping film
- Piano wire

### ADHESIVE/ACCELERATOR KIT

Set includes:

- Loctite 680 adhesive
- Loctite 7649 accelerator with syringe
- Two needles
- Will do approximately 200 terminations

### FAST-CURE® CONSUMABLES KIT

Everything from the Universal Kit, plus specialized supplies for Fast-Cure terminations. Additional included items:

- 25 syringes
- 25 needles
- Adhesive and accelerator
- Will do approximately 200 terminations

### FAN-OUT CONSUMABLES KIT

Kit terminates a minimum of 10 Fiber Optic Fan-Out Kits.

Set includes:

- 20 lint-free dry wipes
- 10 alcohol pads
- 10 D'Gel® packets
- Sealant
- Talc powder

## AV SOLUTIONS

Leviton IT/AV systems combine category-rated structured cabling with audiovisual signal extenders over HDBaseT™ certified links to create plug-and-play solutions with no programming required. The enterprise-grade systems allow contractors to extend AV signals over twisted-pair cabling with the same tools used for installing datacom infrastructure. They can then test and certify the installation to Ethernet standards to ensure high signal performance after they leave the jobsite.

**EXTENDING HIGH-QUALITY AV SIGNALS OVER CATEGORY CABLE**

Deliver the high-quality audio and video required for today's technologies with Leviton IT/AV Systems, which include signal extenders for long distance transmission of HD video. We offer extenders for a variety of connection types that increase cable distance and retain high signal performance.

Below are recommended maximum lengths using Leviton extenders, compared to maximum lengths for different AV cables:

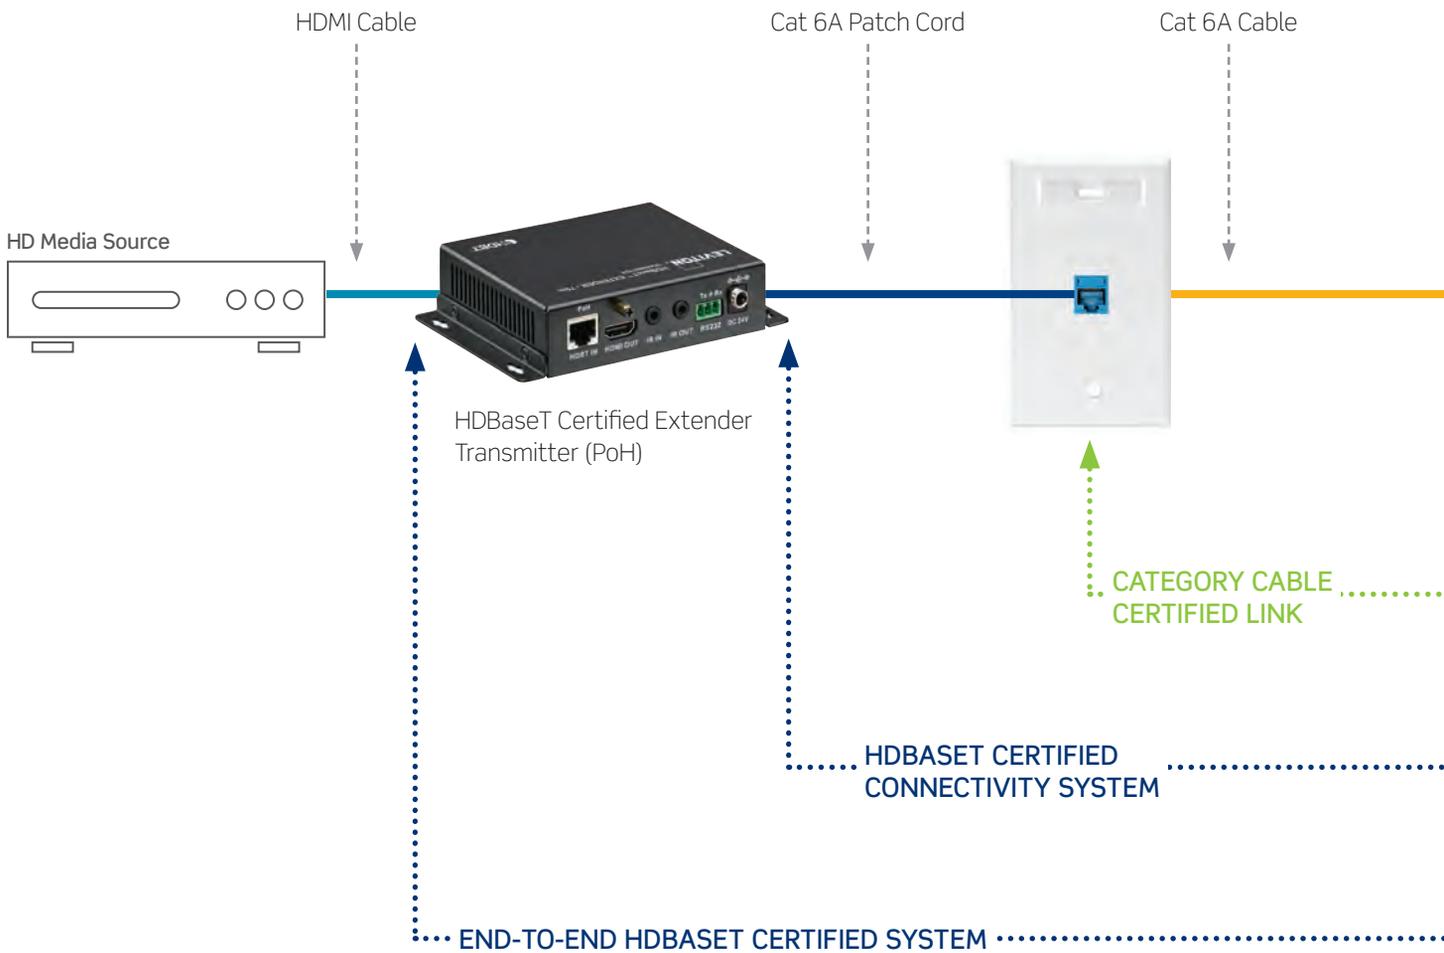

### END-TO-END TESTED AND CERTIFIED AV SYSTEMS

The increasing convergence of AV and data networks has positioned low-voltage, BICSI RCDD contractors as the next generation of AV integrators. Leviton's new IT/AV systems help these contractors be the AV experts for their customers and use an easy-to-install solution that requires no programming and little-to-no training.

An IT/AV System combines Leviton HDBaseT™ HDMI® Extenders, Atlas-X1™ Cat 6A connectivity, and approved Cat 6A cable and patch cords for a complete end-to-end solution. The Cat 6A infrastructure link can be installed, tested, and verified like any other Cat 6A 10GBASE-T link. This system is also certified to HDBaseT Alliance standards.

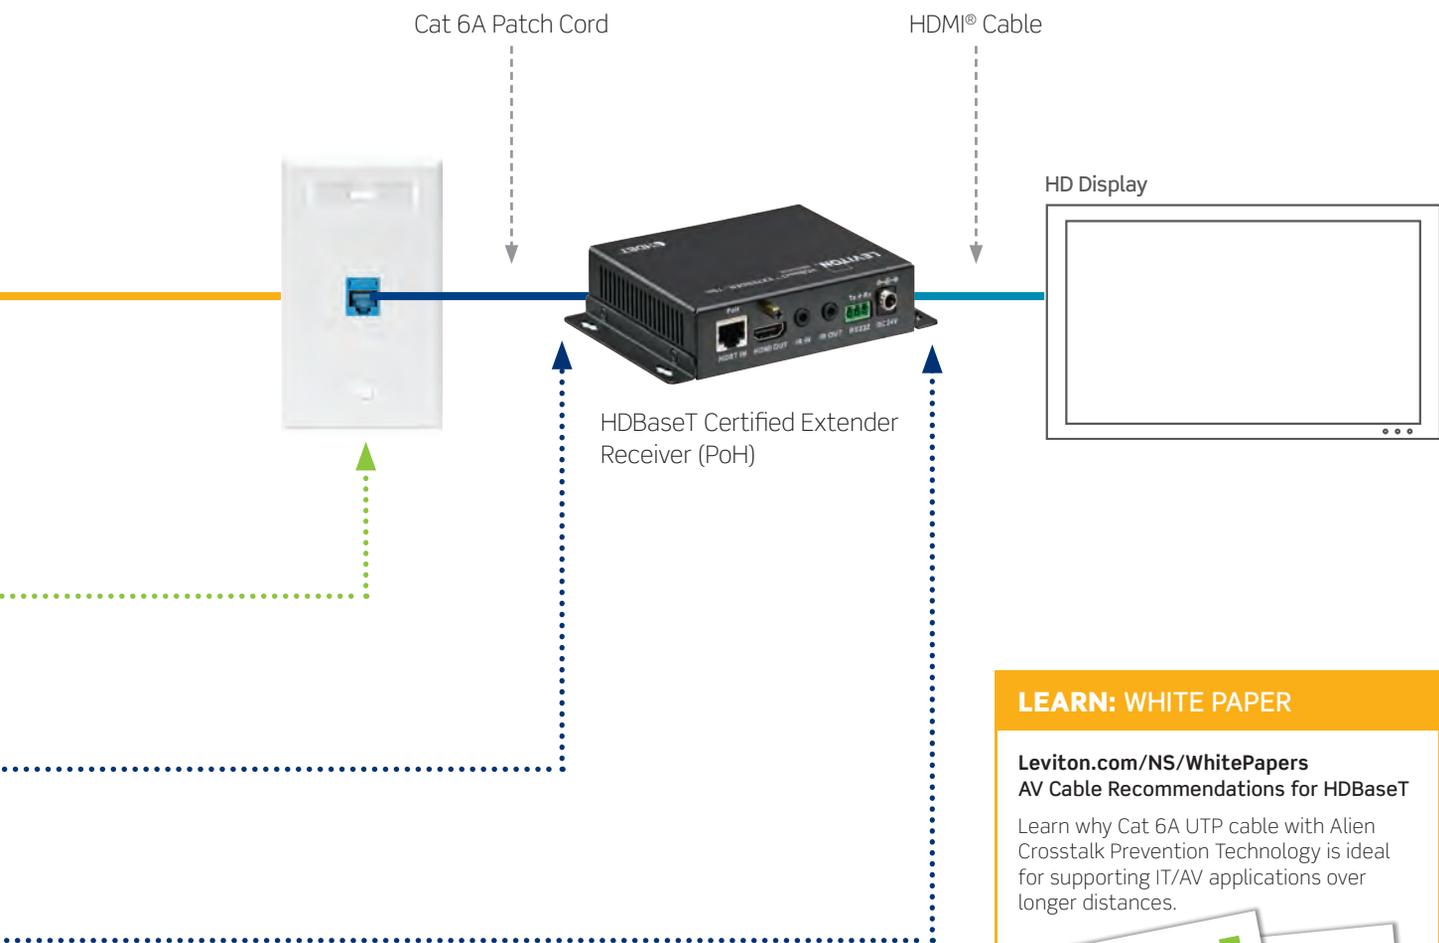

IT/AV System  
AV SOLUTIONS

\*PoH = Power Over HDBaseT

## HDBaseT™ certification offers important benefits:

- System longevity capable of supporting future HD video signal performance requirements
- Installation and testing using the same tools used for datacom infrastructure
- Peace of mind that comes from third-party verification and certification of AV signal transmission performance
- Compatibility with other manufacturer's equipment supporting the same HDBaseT features
- Limited lifetime warranty on the structured cabling system when installed by a Leviton certified contractor

Learn why Cat 6A UTP cable with Alien Crosstalk Prevention Technology is ideal for supporting IT/AV applications over longer distances.

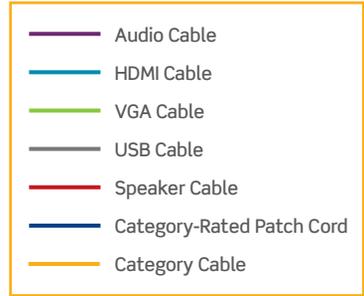

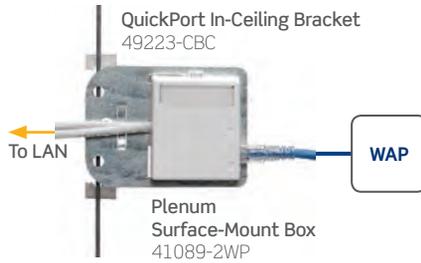

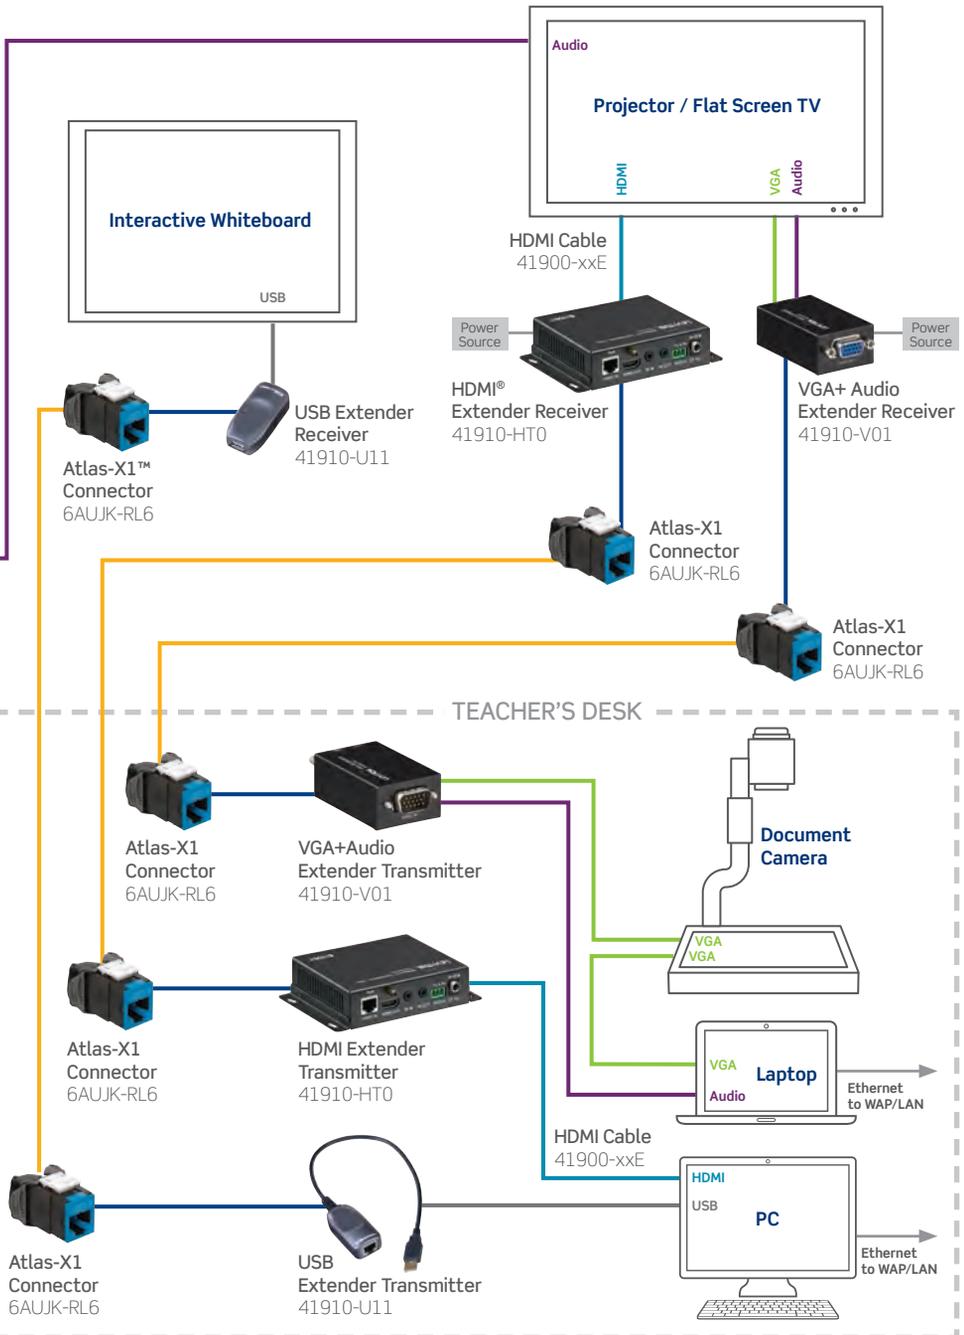

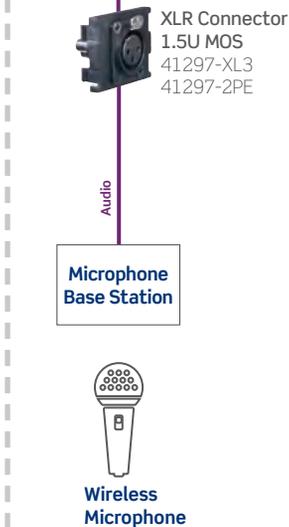

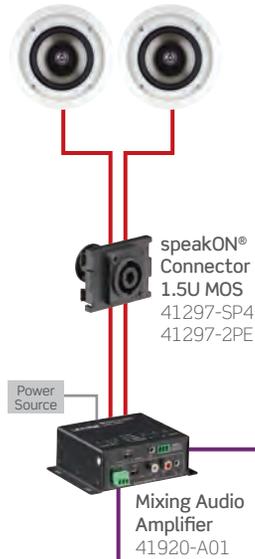

## CLASSROOM APPLICATION

Today's classrooms have evolved from chalkboards and overhead projectors to using connected tools like interactive whiteboards and document cameras. Leviton solutions allow contractors to easily extend HDMI®, VGA, and USB signals from teachers' desks to the latest devices anywhere in the room, all networked over easy-to-install, category-rated cable. These solutions help ensure a quality learning environment throughout all types of learning areas, including lecture halls, libraries, and computer labs, and they prepare schools for more advanced technologies to come. See the following page for typical classroom AV applications with Leviton solutions.

Pair of 6.5" Ceiling Loudspeakers with Plenum Back-Boxes  
AEC65-000 / AEBC6-000

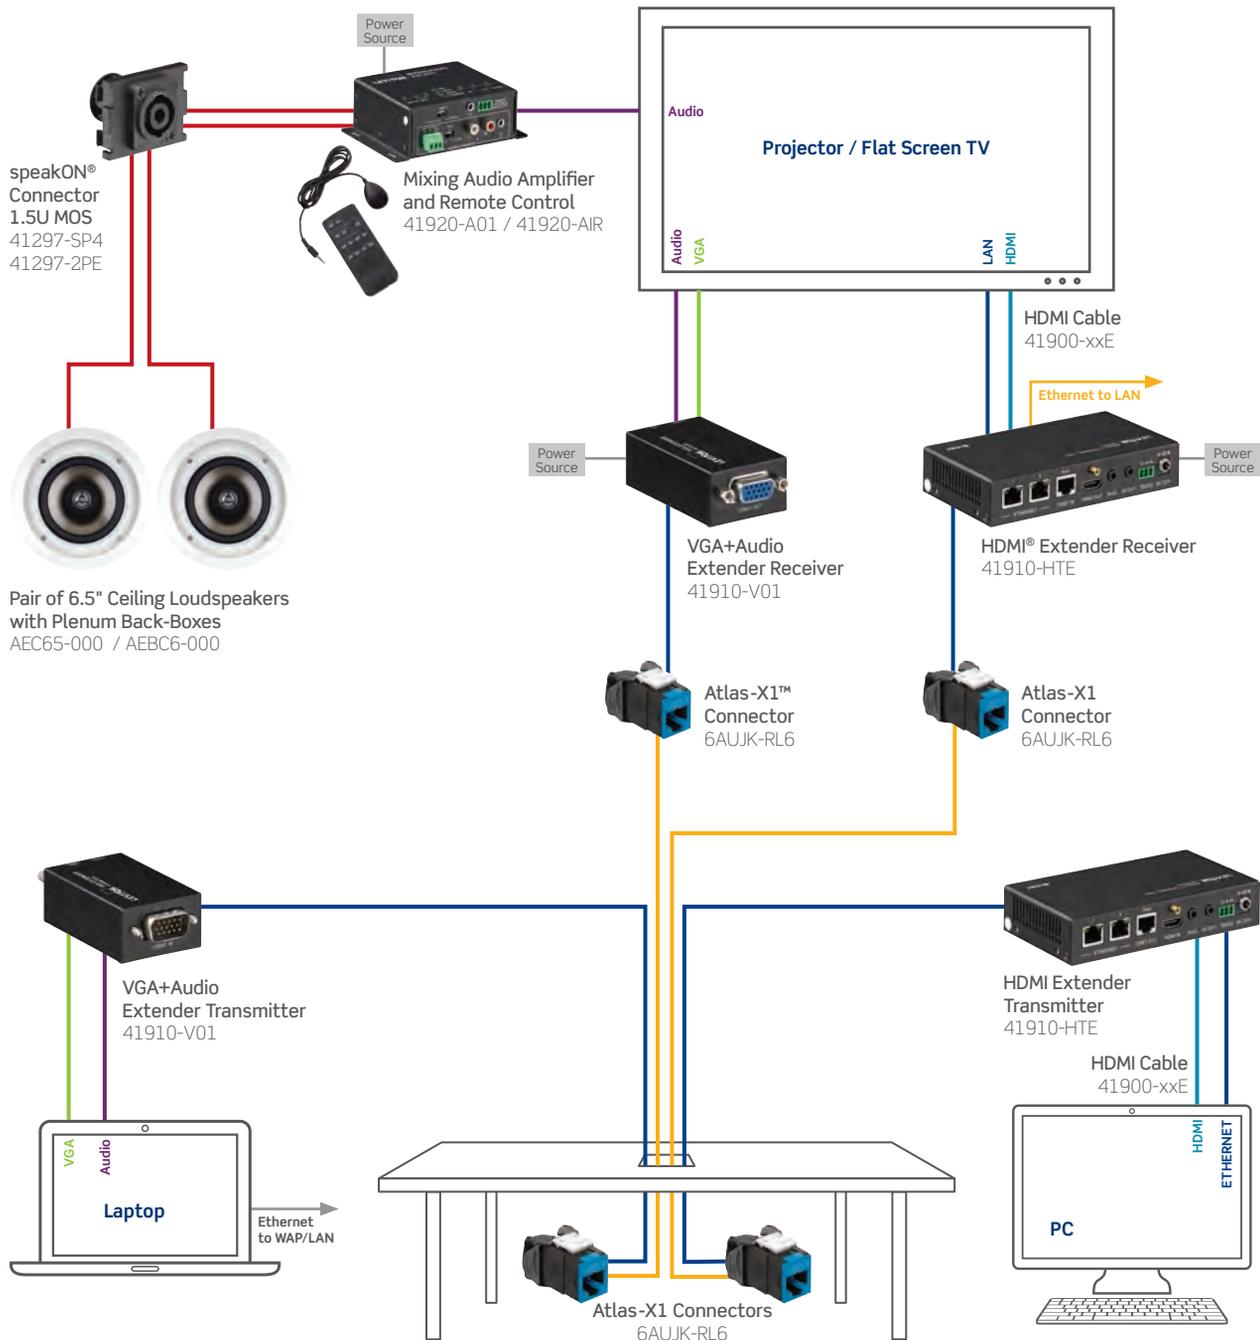

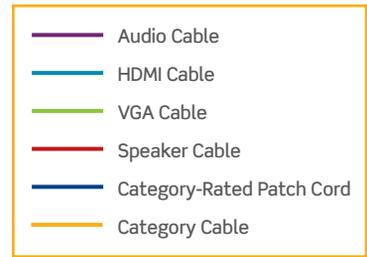

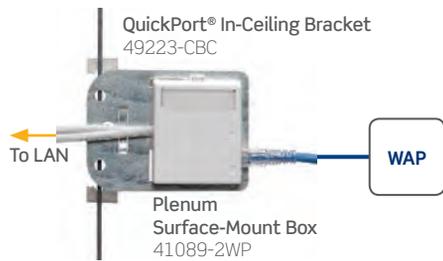

## CONFERENCE ROOM APPLICATION

The best AV installations for conference rooms can adapt to handle future multimedia devices while maintaining a low profile in the room. With help from Leviton AV Signal Extenders, audio amplification, and in-ceiling connectivity for wireless access points — all connected over versatile category-rated cable — you create extra flexibility and a clean look in business, school, or hotel conference rooms. See the following page for typical conference room AV applications with Leviton solutions.

## HDBaseT™ EXTENDER TRANSMITTERS & RECEIVERS

HDBaseT twisted-pair extenders with Power over HDBaseT (PoH) deliver high-performance HDMI®, Ethernet, IR, and RS232 signals for classrooms, conference rooms, command centers, restaurants, home cinemas, and more. The paired transmitter and receiver require only one power adapter that can be connected at either the source or display end. HDBaseT certification ensures compatibility with other HDBaseT certified products.

- Class A Extenders (41910-HTE) deliver 328 ft (100 m) transmission for HDMI, Ethernet, bi-directional IR, RS232
- Class B Extenders (41910-HT0) deliver 230 ft (70 m) transmission for HDMI, bi-directional IR, RS232
- Support key features of HDMI 1.4, including 3D and 4K x 2K, CEC pass through and HDCP compatible
- Locking power supply and HDMI cable connectors
- Power supply, RS-232 cables, and mounting brackets included
- Compact metal housing for mounting with flatscreen displays

## IR EMITTER AND RECEIVER KIT

- Includes IR emitter and IR target, connected to 5-foot cords
- Delivers 5V IR signal transmission
- Works with HDBaseT Extender Transmitters and Receivers

## SPOTLIGHT | HDMI Cable Lock Kit

The **Leviton HDMI Cable Lock Kit** provides a secure connection to all Leviton HDMI Signal Extension devices, making it ideal for in-wall and permanent-system installations.

The kit includes two sets of universal adapters and screws to secure the cable from either the top or side of the connector body.

### HDMI® EXTENDER TRANSMITTER & RECEIVER

The HDMI Extender Transmitter and Receiver extends your HD display up to 130 feet (40 meters) away from your HDMI source using two category cables. They are capable of supporting DVI-D (Single-Link) equipment when used with a HDMI-to-DVI adapter, providing greater flexibility and installation options.

- 8-segment equalization adjustment switch
- Extend 1080p by 40 meters; extend 1080i (HDTV) by 60 meters
- Superior video quality — 1920 x 1200, up to 1080p
- Supports Dolby True HD® and DTS HD Master Audio™
- DDC and HDCP 1.1 compatible
- For commercial use only
- Locking HDMI connector
- Compact metal housings
- Transmitter and receiver power supplies and mounting brackets included

### HDMI CABLES

Leviton high-speed HDMI Cables with Ethernet and Audio Return Channel are ideal for supporting in-wall and permanent installations for education, health care, enterprise, government, and residential applications

- cULus listed
- CL2 rated for in-wall installation
- Compact connector body and flexible cable accommodate common box depths while maintaining minimum bend radius
- Commercial-grade, 28-gauge construction
- Gold-plated connectors for long-lasting performance
- HDMI Cable Lock Kit secures cable to Leviton Signal Extension devices for permanent installations
- Includes two universal adapters, two tie wraps, M3X05, and 4-40 UNC screws

## VGA EXTENDER TRANSMITTER & RECEIVER

The VGA Extender allows you to extend the distance between your AV source and display devices by as much as 328 feet (100 meters). The transmitter and receiver connect over a single category cable, providing an easy way to replace heavy and expensive VGA cables. The extender is a compact, convenient and economical addition to your AV setup.

- Screen resolutions include:  
1920 x 1200 @ 60 Hz (30 meters)  
1600 x 1200 @ 60 Hz (100 meters)  
1280 x 1024 @ 60 Hz (150 meters)
- Adjustable Gain Control lets you manually adjust signal strength to compensate for distance
- Audio enabled (mono)
- No external power supply needed for transmitter
- Receiver powered either by included USB power cable or DC adapter
- Compact metal housing for convenient docking on the display device

## USB EXTENDER

The USB Extender lets you locate your USB device or hub at greater distances from your computer, overcoming the typical 15-foot USB cable limitation. The extenders are ideal for classrooms with interactive board or projector installations.

- Consists of a local unit and a remote unit - no external power supply needed
- Supports USB 12 Mbps data rate
- Extend transmission distance up to 164 ft (50 m) using a single category cable
- No additional software/drivers required
- One-foot USB cable included with local unit

## MIXING AUDIO AMPLIFIER & INFRARED REMOTE CONTROL KIT

Ideal for classrooms and meeting rooms, this Class D mini amplifier includes two line and one MIC inputs, which support EQ control and MIC mixing. With 2 x 20 W at 4 Ohm as default output, it can be switched to 1 x 40 W at 8 Ohm by bridge connection.

- Two switchable analog audio inputs
- One three-level MIC input with mixer function
- Stereo, dual mono, and bridge output mode selectable
- Bass, treble, and volume adjustable for each input
- Loop output to cascade to another amplifier
- Locking power adapter
- Controllable via button, RS232, and IR
- Infrared Remote Control Kit includes remote control, IR sensor, and IR target to control amplifier

## AV CONNECTORS & ADAPTERS

- HDMI® connector works with HDMI Type A connectors
- Binding Post and Banana Jack connectors are excellent for advanced audio
- QuickPort Blanks secure unused ports in wallplates and housings for future expansion
- 3.5 mm Stereo Adapter facilitates classroom, workstation, and computer audio applications
- Use BNC connectors for commercial CCTV or commercial video signals
- S-video for enhanced video streams available in feedthrough and 110 termination
- Decora® wallplate inserts with HDMI and DVI connections provide high-definition video with in-wall wiring
- Decora brush passthrough offers a clean, professional appearance when cables need to pass through a wall opening

**RCA & F-CONNECTORS IN FEEDTHROUGH & 110-STYLE**

Leviton carries a comprehensive selection of RCA and F-connectors in both feedthrough and 110 termination. Body colors match Leviton housings; barrel colors are industry standard.

- RCA Connectors use standard identification colors for component and composite video
- Coax F-Connectors are SCTE-compliant and support signals up to 3 GHz

# AV SOLUTIONS | Multimedia Outlet System (MOS)

## MULTIMEDIA OUTLET SYSTEM (MOS)

The innovative Multimedia Outlet System (MOS) consists of surface-mount boxes and single- and dual-gang wallplates that accept a variety of copper, fiber, and AV connectors. The system is ideal for multimedia applications in conference rooms, training rooms, classrooms, auditoriums, and other areas.

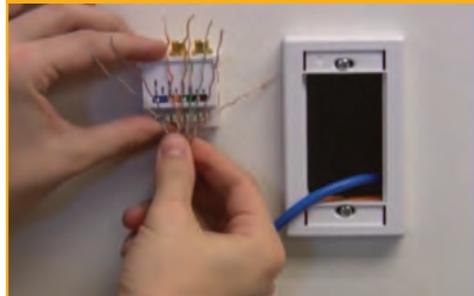

Multimedia Outlet System (MOS)

AV SOLUTIONS

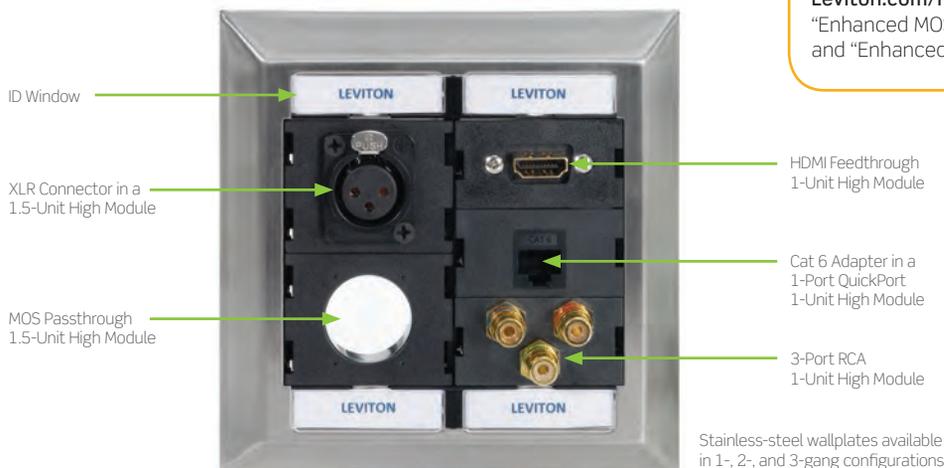

- Front-load installation ensures simple moves, adds, and changes
- Modules are available in 0.5-, 1-, 1.5-, 2-, and 3-unit high sizes
- Accommodates a combination of QuickPort® connectors and larger AV components such as 3-port composite/component RCA and HD-15 connectors
- Large Surface-Mount Box accepts 3 modules (1 unit high only)
- Wallplates accept 3 units high total per gang
- Surface-Mount Housing accepts one 1-unit high module and is plenum rated for use in air handling environments

Stainless-steel wallplates available in 1-, 2-, and 3-gang configurations

## QUICKPORT & MOS COMPATIBILITY

The highly flexible front-loading Multimedia Outlet System (MOS) and QuickPort® Solutions work together to provide hundreds of possible configurations. Select MOS, MOS and QuickPort, or QuickPort only configurations. Blank inserts are also available to create a finished look when building in extra capacity for future growth. For more information about configuring your MOS installation, visit [Leviton.com/MOS](http://Leviton.com/MOS).

**MOS MODULES WILL ALSO WORK WITH DECORA® WALLPLATES**  
Just snap one-unit high modules into Decora inserts.

See page B70 for the complete line of QuickPort fiber adapters.

## SPOTLIGHT | Multimedia Outlet System (MOS) XLR Connector

The Multimedia Outlet System (MOS) XLR Connector is ideal for microphone and audio enhancement connections. The connector is robust, versatile, and easy to terminate. And when installed in a MOS Passthrough module, it can easily mount in any MOS wallplate, offering an aesthetically pleasing means to transition a pre-terminated cable from the back to front of a MOS wallplate.

Note: speakON connector (41297-SP4) and other standard XLR-style chassis connectors use the same mounting method.

## LEVITON ARCHITECTURAL EDITION® POWERED BY JBL IN-WALL & IN-CEILING SPEAKERS

- JBL titanium-laminate drivers maintain accuracy and clarity even at frequency extremes
- Straight-Line Signal Path™ (SSP) crossover network for minimal signal distortion
- Long-excursion woofers with butyl-rubber half-round surrounds and extended pole-piece magnetic structures for maximum bass impact and dynamic range
- Low-diffraction, swivel-tweeter mounting system for optimum stereo imaging
- Heavy-duty push-type input terminals for long-term connection integrity
- Integrated dog-ear mounting brackets (optional rough-in kits available for installation in new homes)
- Acoustically transparent, paintable grills

## LEVITON ARCHITECTURAL EDITION POWERED BY JBL OUTDOOR SPEAKERS

- Elliptical Oblate Spheroidal™ (EOS) Waveguide technology for high-frequency dispersion
- Straight-Line Signal Path (SSP) crossover networks for minimal signal distortion
- 5-way binding post input terminals for long-term connection integrity
- Mounting brackets included

## PRE-CONSTRUCTION KITS

- Pre-construction kits ensure that speaker locations and wiring are preserved and protected during construction, allowing for a cleaner, faster, and more precise installation during the trim-out stage
- Fire-Rated Back Box meets fire code for MDU and residential installations

| LEVITON ARCHITECTURAL EDITION POWERED BY JBL IN-WALL AND IN-CEILING SPEAKERS  |           |
|---|-----------|
| DESCRIPTION   | PART NO.  |
| [A] Pair of 6.5" Two-Way In-Wall Loudspeakers, 80 watts, 8 ohms   | AEI65-000 |
| [B] Pair of 8" Two-Way In-Wall Loudspeakers, 100 watts, 8 ohms  | AEI80-000 |
| [C] Pair of 6.5" Two-Way In-Ceiling Loudspeakers, 80 watts, 8 ohms  | AEC65-000 |

| LEVITON ARCHITECTURAL EDITION POWERED BY JBL OUTDOOR SPEAKERS   |           |
| [E] Pair of Outdoor/All-Weather Two-Way Loudspeakers in Enclosure, 0.50" tweeter, 4" woofer, 200 watts, 8 ohms  | AEAWS-C1W |
| PRE-CONSTRUCTION KITS   |           |
| 6.5" Pre-Construction Speaker Kit for in-wall installations   | AEPI6-KIT |
| 8" Pre-Construction Speaker Kit for in-wall installations   | AEPI8-KIT |
| Fire-Rated Back Box (Required for 6.5" in-ceiling speakers AEC65, AEM65), (See page C22 for photo.)   | AEBC6-000 |

## SPEC-GRADE SOUND SPEAKERS

- AeroNylon tweeter diaphragm provides crystal-clear treble response and exceptionally accurate tracking of even the most challenging musical transients
- Built-in AutoSurge® circuit protection helps prevent speaker damage
- Advanced phase/time alignment guide properly aligns sound without misaligning the tweeters
- Precision dividing network ensures total audio signal electronic integrity up to the last microsecond before the signal is converted into sound
- Inert mounting frame with “dogleg” installation points eliminates any transmitted vibrations that could alter in-wall or in-ceiling sound quality
- Acoustically transparent, paintable grills

## PRE-CONSTRUCTION KITS

- Fire-Rated Back Box meets fire code for MDU and similar commercial installations

### SPEC-GRADE SOUND IN-WALL/IN-CEILING INDOOR SPEAKERS

## SPOTLIGHT

### AV Cable Recommendations for HDBaseT

Using HDBaseT™ technology you can transmit HDMI® signals over category-rated cable, delivering the high resolution needed over distances up to 100 meters. In the white paper “AV Cable Recommendations for HDBaseT,” you’ll learn why Cat 6A UTP cable with Alien Crosstalk Prevention Technology is ideal for supporting IT/AV applications over longer distances. Plus, you’ll also gain a better understanding of HDBaseT standards and applications, as well as be able to review comprehensive test results for different category-rated cables used in HDBaseT certified links. To read the white paper, visit [leviton.com/ns/whitepapers](http://leviton.com/ns/whitepapers).

C

## IN-WALL SPEAKERS

- Straight-Line Signal Path™ (SSP) crossover network for minimal signal distortion
- JBL® titanium-laminate drivers, pure titanium tweeter, and polymer-coated aluminum woofers maintain musical accuracy and clarity, even at frequency extremes
- Low-diffraction, swivel-tweeter mounting system of optimum stereo imaging

## SHELF-MOUNT CENTER CHANNEL SPEAKER

- Straight-Line Signal Path (SSP) crossover network for minimal signal distortion
- Dual 5-inch JBL PolyPlas cone woofers
- FreeFlow flared port for increased bass response without added port noise

## SUBWOOFER

- JBL PolyPlas™ woofer for low frequencies
- High-efficiency, high-current switching amplifier
- FreeFlow™ flared port for increased bass response without added port noise
- Built-in technologies allow simple adjustment for room acoustics and personal preference
- LFE and line level inputs for maximum connection flexibility

### LEVITON ARCHITECTURAL EDITION® POWERED BY JBL HOME THEATER SPEAKERS

| DESCRIPTION  | PART NO.  |
|--|-----------|
| <b>[A]</b> Dual 5" Two-Way In-Wall Center Channel Home Theater Loudspeakers, 120 watts, 8 ohms                       | AEI55-000 |
| <b>[B]</b> Dual-Channel Two-Way Shelf-Mounted Center Channel Loudspeaker, silver grill, 75 watts / 300 watts, 8 ohms | AECCS-VCE |
| <b>[C]</b> Powered 12" Subwoofer with amplifier, silver grill, 400 watts RMS, 700 watts peak, 8 ohms                 | AESUB-012 |
| Pre-Construction Kit, in-wall center channel shelf for use with AEI55-000  | AEPI5-KIT |

## DECORA® STRAUSS™ TRANSFORMER-FREE VOLUME CONTROLS

- Contemporary slider design brings precision and elegance to any installed audio system
- Available in standard and impedance-matched versions
- Volume control uses standard Decora wallplate in a standard J-Box or low-voltage mounting ring
- Color-change kits ensure the right finishing touch for every application

## 1X6 AUDIO DISTRIBUTION MODULE

- Combines with impedance-matching Volume Controls to control up to six speaker pairs from an amplifier or receiver
- Designed to mount in Leviton Structured Media enclosures and connect to six rooms/zones

## SYSTEM MATCHING MODULE

- Combine with non-impedance-matching Volume Controls to control up to six speaker pairs (cannot be used with impedance-matching volume controls)
- AutoSurge® circuit technology protects speakers from potentially damaging transients
- Designed to mount in Leviton Structured Media® Enclosures

### AUDIO SYSTEM VOLUME CONTROLS

| DESCRIPTION   | PART NO.  |
|---|-----------|
| <b>[A]</b> Decora Strauss Transformer-Free Slider Volume Control, analog, 200 watts peak, 100 watts RMS, 4-16 ohms, 8 ohm nominal (for use with SGAMP-000) (Decora wallplate sold separately, see page D10) | SGVST-00W |
| <b>[B]</b> Decora Strauss Transformer-Free Impedance-Matching Slider Volume Control, analog, 200 watts peak, 100 watts RMS, 4-16 ohms, 8 ohm nominal (for use with 48211-06A)                               | SGVSM-00W |
| Decora Strauss Color-Change Kit, converts to light almond   | SGVCK-0LA |
| Decora Strauss Color-Change Kit, converts to ivory  | SGVCK-00I |
| Decora Strauss Color-Change Kit, converts to black  | SGVCK-00E |

### SYSTEM MATCHING MODULE

|  |           |
|--|-----------|
| <b>[C]</b> System Matching Module for impedance-matching passive two-channel multi-room audio systems (for use with SGVST-00W) | SGAMP-000 |
|--|-----------|

### 1X6 AUDIO DISTRIBUTION MODULE

|  |           |
|--|-----------|
| <b>[D]</b> 1x6 Passive Audio Module (for use with SGVSM-00W) | 48211-06A |
|--|-----------|

## SPOTLIGHT | Impedance Matching Difference

When installing an audio system, it is important to have an impedance-matching component paired with a standard component. Failure to do so may have a negative effect on the audio system.

Do NOT use an impedance-matching volume control with an impedance-matching module, and do NOT use a standard volume control with a passive audio module. Doing so, in either instance, could damage the amplifier.

Mobile Device Station and USB Charger/Tamper-Resistant Receptacle

Decora Mobile Device Station

Renu Mobile Device Station

## HOME THEATER, MULTI-ROOM & SPEAKER WALLPLATES

- Designed for easy installation of cables using low-voltage rings and standard low-voltage junction boxes
- Home Theater Interface wallplate (AEHTK) accommodates 5.1 to 7.1 channel surround-sound systems, and features RCA connectors for subwoofer connection and two extra QuickPort® openings
- Multi-room Audio wallplate (AEMRK) accommodates left and right audio speakers (± connections), and two extra openings for additional QuickPort connectors (e.g., adding a subwoofer or 3.5 mm stereo phone jack)
- Speaker wallplate allows for simple, solderless connections to any home entertainment speaker system

## RECESSED ENTERTAINMENT BOX (REB)

- Affordable solution manages home theater electronics in a single location
- Ideal for new construction (stud-mounted) and retrofit (wall-mounted) applications
- Low-profile frame provides neat, recessed installation
- Optional high-profile cover includes sliding plastic front panels, and channels all wires through the bottom of the unit

## RECESSED RECEPTACLES

### Recessed Single-Gang Receptacle

- Fits most standard electrical boxes
- Supplies AC power for one or two components (flat panel TVs and video receiver)
- cULus Approved, code-compliant solution

### Recessed Dual-Gang Duplex Receptacle with Six QuickPort Openings

- Centralizes connection points for AC power, audio, video, data, and phone
- Includes plastic electrical box for use in new and retrofit construction
- UL Approved, code-compliant solution

## MOBILE DEVICE STATION

- Turns a receptacle outlet into a convenient storage location for smartphones and MP3 players
- Installs without creating any new holes in the wall
- Available in both Decora® and Renu® styles
- Integrated cable management keeps charging cables organized and protected
- Requires a Leviton wallplate, sold separately
- Ideal with Leviton USB charger/tamper-resistant receptacle

## USB CHARGER/TAMPER-RESISTANT RECEPTACLE

- USB ports with a combined power of 3.6 A, ideal for charging tablets and other high-draw devices
- Compact design fits in a standard wallbox, is compatible with standard wallplates, and can be multi-ganged with other standard Leviton devices
- Back and side wired for easy installation
- Smart chip designed for recognizing and optimizing the charging requirements of your device
- Tamper-Resistant NEC® Compliant shutter mechanism blocks access to contacts from most foreign objects

## HOME THEATER AND MULTI-ROOM WALLPLATES

| DESCRIPTION   | PART NO.  |
|---|-----------|
| <b>[A]</b> Home Theater Interface Wallplate, 14 gold-plated spring clips, two RCA connectors, two QuickPort® openings     | AEHTK-000 |
| <b>[B]</b> Multi-Room Install Wallplate, two gold-plated spring clips, two QuickPort openings                             | AEMRK-000 |

## SPOTLIGHT

### Recessed Entertainment Box

**For an almost invisible installation** behind wall-mounted TVs, entertainment centers, monitors, and more, connect with the Leviton Recessed Entertainment Box (REB). The REB centralizes AC power and low-voltage connection points for audio, video, data, and phones. It is perfect for supporting any low-voltage application across homes, apartments, co-ops, condominiums, and offices. REBs come with one snap-in cover plate for unused openings, and are available with either a low-profile frame or a high-profile cover that channels all wires through the bottom for a clean, finished look.

- The REB comes with one snap-in plate to cover unused openings; additional plates are sold separately.

# AV SOLUTIONS | BitWise Integrated Controllers

## BITWISE

The Leviton BitWise line offers powerful automation controllers, a completely customizable app interface, and our user-friendly, no-coding-required Project Editor software. From a single, easy-to-use control app, you can manage every aspect of AV and more for a room or campus, even if there's more than one location. For more information, go to [Leviton.com/BitWise](http://Leviton.com/BitWise).

- BitWise control is integrated with Omni Systems for complete control of both security and AV systems
  - Integration into Omni Systems (create custom screens using Project Editor that allow control over AV and security features)
  - OmniTouch 7 graphical elements (icons/backgrounds) can be downloaded for free, enabling custom screens to be built by an integrator using our default components, helping to match themes
  - Intercom support for BitWise — communicate from an OmniTouch 7 to a 2N (third party) door station
  - Omni-Bus Module can connect our popular hard-wired lighting control system without the need for an Omni security controller
- No per-device or per-job licensing fees
- Free Apple and Android control apps that can control more than one location's system on a single device
- U.S.-assembled controllers ensure the highest standards of quality and reliability

## BITWISE AV CONTROLLERS

- Entry-level BC4 is perfect for conference rooms and classrooms
- BC2 includes additional inputs and outputs, including optional Wi-Fi® connectivity
- BC1 controller fits in an AV rack at full width and manages AV components in classrooms, retail, houses of worship, and more

## INTERFACES

- Manage your system via the BitWise control app on iOS and Android devices, available on smartphones and tablets
- RF Room Remote and Remote Receiver control all BitWise connected devices in a room
- Up to 255 remotes can be incorporated into an installation, making it a scalable option for commercial projects

## ACCESSORIES

- Optional power supplies, IR emitters, IR Learners, and Wi-Fi adapters enhance the capabilities of a BitWise control system
- PoE Power Injector provides up to 15.4 watts of power and 10/100M data transmission through category cable
- Both U.S. and international power supplies are available

# HOUSINGS & WALLPLATES | QuickPort® Surface-Mount & DIN Rail-Mount Boxes

## QUICKPORT BOXES, MODULES & ACCESSORIES

- Surface-mount boxes and back boxes have breakouts to match common raceway systems and cable entry
- One- and two-Port surface-mount boxes are plenum rated (compliant with NEC 300-22 (b)(c))
- Can mount with screws or adhesive mounting tape (both provided), or with magnets or modular furniture brackets (sold separately) (page D13)
- 4S089 products are designed to work with Leviton shielded or UTP Cat 6A connectors to allow proper bend-radius control

## QUICKPORT DIN RAIL-MOUNT BOXES

- Provide an ideal network patching location for industrial automation and control panels
- Compatible with standard and low-profile 35 mm symmetrical DIN rails and 32 mm asymmetrical DIN rails
- Accept one QuickPort Decora® Insert with one, two, three, four, or six ports
- Box depth suitable for Cat 5e or Cat 6 applications

# HOUSINGS & WALLPLATES | QuickPort® In-Ceiling & In-Wall Brackets

## IN-CEILING BRACKET

- Helps create a testable permanent link for cabling that terminates above a drop ceiling without using a traditional wallplate
- Brackets available individually or with pre-installed multi-function clip that attaches to standard drop wire or rod
- VELCRO®-brand tie-down points accommodate cabling slack loops
- Plenum-rated QuickPort one-port and two-port surface-mount boxes (sold separately) attach to brackets and are ideal for use in drop ceiling areas

## IN-WALL BRACKET

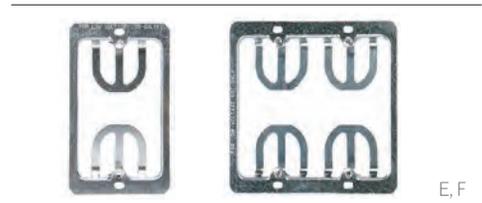

- Helps create a testable permanent link for cabling that terminates in the wall without using a traditional wallplate
- Provides a stable mounting surface for connectors that is recessed behind the wall surface
- Ideal for supporting Ethernet-enabled devices — such as wireless access points (WAPs), cameras, or clocks — that mount to electrical or low-voltage boxes or directly to the wall
- Available as a set of five brackets, or individually kitted with a single-gang

### QUICKPORT IN-WALL & IN-CEILING BRACKETS

| Wallplate Mounting Bracket, single-gang, bag of 10            | C0224-0CP |
| <b>[F]</b> Wallplate Mounting Bracket, dual-gang              | C0225-000 |

## QUICKPORT® WALLPLATES

The QuickPort System allows you to create the perfect mix of voice, data, video, and audio connections. Category-rated copper, fiber, and AV QuickPort connectors are compatible with any QuickPort wallplate or insert.

## QUICKPLATE® TEMPO WALLPLATES WITH ID WINDOWS

QuickPlate Tempo wallplates allow for fast, one-step installations. They feature patented rear wings that tighten the wallplate to wallboard, eliminating the need for a box or mounting brackets.

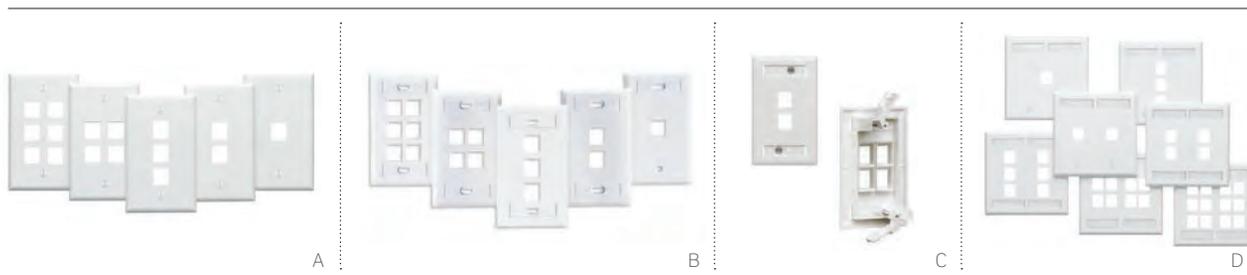

2-Port Wallplate

### WATCH: INSTALLATION VIDEOS

[Leviton.com/ns/videos](https://www.leviton.com/ns/videos)  
"How to Install a QuickPlate Tempo Wallplate"

## QUICKPORT STANDARD PLASTIC WALLPLATES

- Compatible with all QuickPort connectors and adapters
- Manufactured from ABS plastic for superior resistance to impact, chemicals, and solvents, as compared to other plastics
- A variety of color choices, with color-matched screws
- cULus Listed, fire-retardant material rated UL 94V-0
- ID windows aid in port identification
- Country of origin: USA

## SINGLE-GANG QUICKPLATE TEMPO WALLPLATES WITH ID WINDOWS

- Patented rear wings tighten wallplate to wallboard, eliminating the need for a box or mounting brackets and creating a fast, one-step installation
- Wings accommodate wallboard thickness of 5/8 inches or less
- ID windows act as marking template for cutting hole in wallboard
- cULus Listed, fire-retardant plastic rated UL 94V-0
- Country of origin: USA

Wallplates are sold empty. See pages A12-A14, B70, and C14-C15 for QuickPort connectors.  
 \* = Single-gang 1-Port Wallplate has only one ID window on top.  
 † = Dual-gang 1- and 2-Port Wallplates have only two ID windows on top.

## QUICKPORT STAINLESS-STEEL WALLPLATES

- Compatible with all QuickPort adapters and connectors, including shielded
- Manufactured from 304 stainless steel in a brushed finish to provide corrosion resistance in a non-magnetic material
- Available in single- and dual-gang, with or without ID windows
- Angled wallplate ports facilitate proper front and rear cable-bend radius
- Wall-phone wallplates are available in flush and recessed options to accommodate various phone styles
- cULus Listed

Dimensions can be found at [Leviton.com](http://Leviton.com)

| Label Kit for QuickPort Stainless-Steel Wallplates*       | 43080-IDW |
| Pre-printed Port Labels, black ink, 10 sheets per package | 41080-LEB |

See pages A12-A14, B70, and C14-C15 for QuickPort connectors.

See page X14 for more information on stainless-steel materials.

\* = Also applicable to ID window wallplates on page D6. See page A38 for Work-Area Labeling Solutions.

**QUICKPORT ANGLED, MIDWAY & LARGE CONNECTOR WALLPLATES**

- Angled and large connector wallplates are made from high-quality ABS plastic, which provides superior resistance to impacts, chemicals, and solvents as compared to other plastics
- Angled wallplates facilitate optimal cable management and ensure proper bend radius in front and back of connector
- Midway wallplates are durable nylon with a smooth finish and help hide irregular drywall cuts or flaws around outlets
- Large connector wallplates feature increased vertical spacing between ports
- cULus Listed, fire-retardant material rated UL 94V-0

# HOUSINGS & WALLPLATES | QuickPort® Decora® Inserts

## QUICKPORT DECORA & DUPLEX INSERTS

- Combine voice, data, and AV connectors in popular Decora wallplate formats
- Compatible with all QuickPort connectors and adapters
- Compatible with Decora Plus wallplates when used with standard NEMA back boxes and electrical boxes that sit flush or are slightly recessed in the wall (not compatible with Decora Plus wallplates when used with low-voltage box eliminators)
- Passthrough brush insert provides a clean, professional appearance when cables need to pass through a wall opening

Inserts fit Decora Wallplates found on page D11.

## QUICKPORT DECORA MULTIMEDIA INSERTS

Inserts A-G are sold empty. See pages A12-A14, B70, and C14-C15 for QuickPort connectors.

See page A38 for Work-Area Labeling Solutions.

QuickPort Decora Inserts & Floor Box

HOUSINGS & WALLPLATES

## SPOTLIGHT

Temple University

To prepare Temple University for future education demands, they used Leviton products in the completion of their new TECH Center, a 75,000 square-foot, state-of-the-art student workspace. Temple also wanted to transition their data connectivity standard from Cat 5e to enhanced Cat 6, and deploying high-quality products backed by topnotch support services was a must. Leviton was an easy choice.

## DECORA TELEPHONE & VIDEO WALLPLATES

- 6P4C models feature lead-frame design for improved reliability and simple installation
- Decora inserts are compatible with Decora wallplates and Decora Plus screwless wallplates
- Decora wallplate assemblies include a Decora insert and matching Decora wallplate
- Decora Kits include a one- or two-port QuickPort® Decora insert and snap-in USOC or F-type QuickPort connectors
- Inserts, assemblies, and kits are cULus Listed and rated UL 94V-0

Inserts fit Decora Wallplates found on page D11.

# HOUSINGS & WALLPLATES | Renu® Wallplates & Inserts

Mix and match for an upscale finish to your project.

Renu Wallplates snap on and off inserts quickly and easily with no tools, simplifying installation and ongoing maintenance. Choose from wallplates and inserts in White on White, Navajo Sand, Onyx Black, and Stainless Appearance. They are ideal for boardrooms, executive offices, and other applications requiring a high-end finish.

## RENU WALLPLATES AND INSERTS

- Screwless wallplates easily snap on to any Renu insert or device
- Inserts accept all QuickPort® connectors
- Slightly larger size covers wall imperfections
- Tongue- and groove-design simplifies alignment in multi-gang installations
- Adapter ring allows use of Decora® device with Renu wallplates
- Available in four standard colors to coordinate with the commercial-grade QuickPort line (White on White, Navajo Sand, Onyx Black, and Stainless Appearance)
- Additional wallplate colors for switches, dimmers, and outlets available; visit [Leviton.com/redu](http://Leviton.com/redu)
- cULus Listed
- One-year limited warranty

## DURAPORT CONNECTOR HOUSING

- Twist-lock mating allows for easy installation and provides a robust seal
- Compatible with eXtreme® Cat 6 and Cat 5e QuickPort® connectors
- Captive connector cap with retainer protects and seals unused ports

## DURAPORT STAINLESS-STEEL WALLPLATE

- Patented overmolded gasket on wallplates provides a watertight fit
- Safeguards network in severe conditions and resists moisture, dust, corrosion, acids, oils, and vibration
- Provides a complete seal without o-rings
- Compatible with standard NEMA boxes
- Help position and retain screws during installation

## DURAPORT OUTLET KIT

- DuraPort components packaged together for added convenience
- Kits include connector housing, connector cap, and stainless-steel wallplate
- Patch cords and QuickPort connectors are sold separately

## DURAPORT PATCH CORDS

- Available in industrial plug to industrial plug, and industrial plug to RJ-45 plug configurations
- Patch cords are Cat 6 rated

### SPOTLIGHT

### QuickPort® DIN Rail-Mount Boxes

**Compact QuickPort DIN Rail-Mount Boxes** are ideal for network patching inside industrial automation and control panels. The boxes are available empty or with a Leviton 6-Port QuickPort® Decora® insert installed, and can be opened to install other QuickPort Decora inserts. The back panel of each box can be configured to allow cable access at either the top or bottom, increasing flexibility within tight-control enclosures. The box depth is suitable for Cat 5e and Cat 6 connectors. Learn more on page D3.

# HOUSINGS & WALLPLATES | 86 mm x 86 mm Excella® British Standard

## EXCELLA WALLPLATE INSERTS & FRAMES

- All one- and two-port inserts include designation windows
- Inserts accept QuickPort® connectors (sold separately)
- 86 mm x 86 mm frame size conforms to BS 4662 and BS 5733 electrical box standards
- Inserts are white and ship with white wallplate frame
- Colored frames available separately (see colors and part numbers below)

## QUICKPORT® STAINLESS-STEEL WALLPLATE

- Compatible with all individual QuickPort connectors and adapters
- Individual port configurability allows specification flexibility
- Brushed finish to provide corrosion resistance in a non-magnetic material
- 86 mm x 86 mm frame size conforms to BS 4662 and BS 5733 electrical box standards

# HOUSINGS & WALLPLATES | 86 mm x 86 mm French, British & LJ6C Style

## FRENCH-, BRITISH- & LJ6C-STYLE WALLPLATE INSERTS

- Designed to fit matching 86 mm x 86 mm wallplates
- Accept QuickPort® data connectors (sold separately)
- Include ID window kits for port designation
- Spring-loaded shutters protect connector while not in use
- Available in white ABS plastic

## DIMENSIONS

- French-style inserts fit 45 mm x 45 mm openings
- British-style inserts fit 50 mm x 50 mm openings
- LJ6C-style inserts fit 22 mm x 37 mm openings

### [A] FRENCH-STYLE WALLPLATE INSERTS

| DESCRIPTION   | PART NO.  |
|---|-----------|
| French-style Wallplate Insert, 45 mm x 22.5 mm, 1 port, flat, white   | LI145-1W1 |
| French-style Wallplate Insert, 45 mm x 45 mm, 1 port, flat, white   | LI145-2W1 |
| French-style Wallplate Insert, 45 mm x 45 mm, 2 ports, flat, white  | LI145-2W2 |
| French-style Wallplate Frame (for use with French-style LI145 inserts only), single-gang, white (special order) | LF145-01W |

### [B] BRITISH-STYLE WALLPLATE INSERTS

|--|-----------|
| British-style Wallplate Insert, 50 mm x 25 mm, 1 port, flat, white   | LI150-1W1 |
| British-style Wallplate Insert, 50 mm x 25 mm, 1 port, angled, white | LI150-AW1 |
| British-style Wallplate Insert, 50 mm x 50 mm, 1 port, flat, white   | LI150-2W1 |
| British-style Wallplate Insert, 50 mm x 12.5 mm, blank, flat, white  | LI150-0W0 |

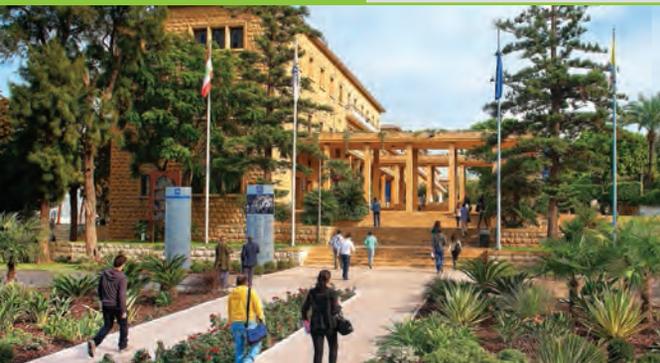

### [C] LJ6C-STYLE WALLPLATE INSERTS

|   |           |
|---|-----------|
| LJ6C-style Wallplate Insert, 37 mm x 22 mm, 1 port, flat, white   | LI137-1W1 |
| LJ6C-style Wallplate Insert, 37 mm x 22 mm, 1 port, angled, white | LI137-AW1 |

Note: French-style, British-style, and LJ6C-style inserts are not compatible with Excella® wallplates.

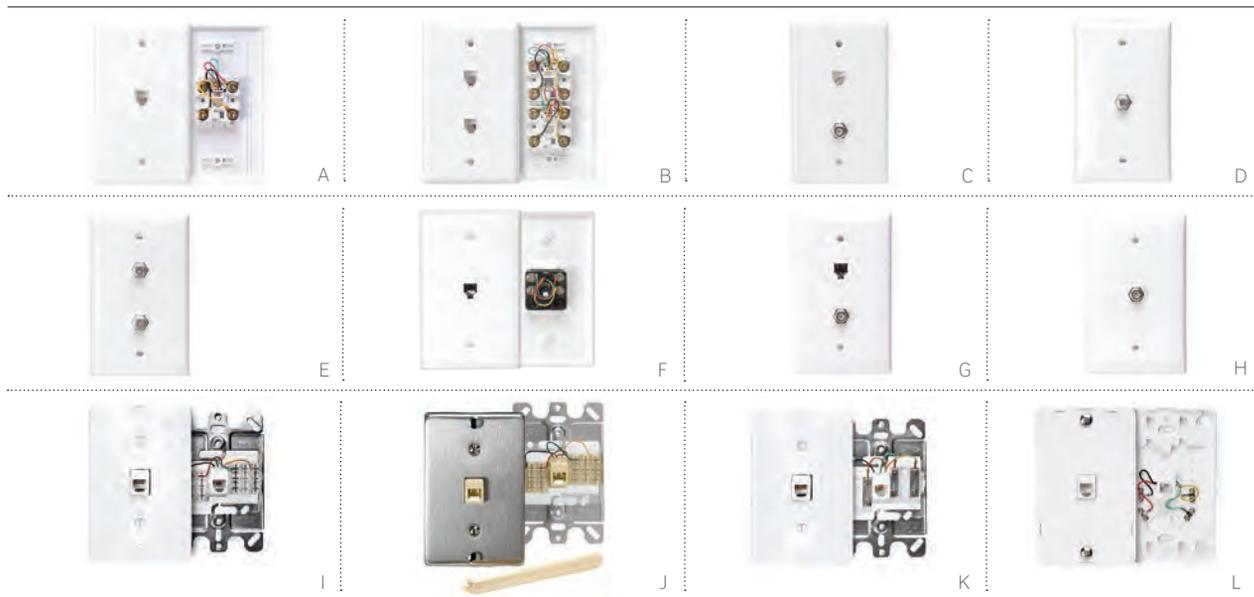

## SPOTLIGHT

### Holy Spirit University of Kaslik (USEK)

USEK is one of the largest universities in Lebanon, educating more than 7,000 students across four campuses each year. When USEK decided it was time for a major voice and data network upgrade, they conducted their own testing of Leviton connectivity. USEK concluded Leviton Cat 6 UTP solutions consistently delivered better margins, and deployed approximately 200 Cat 6 drops and 60 OM2 fiber connections. USEK finalized the completion with a campus-wide, laser-optimized, multimode fiber (OM4) 40GbE backbone network. Using Leviton OM4 Fiber Cable, 500i SDX Fiber Panels, LC connectors, LC cords, and cable managers, USEK efficiently connected all campus buildings within three months.

# HOUSINGS & WALLPLATES | Telephone & Video Wallplates

## TELEPHONE & VIDEO WALLPLATES

- Provide quick at-the-wall connections for RJ-11 telephone and F-connection video applications
- High-quality ABS plastic or nylon, which provides superior resistance to impacts, chemicals, and solvents as compared to other plastics
- Midway wallplates hide irregular drywall cuts or flaws around outlets
- cULus Listed, fire-retardant material rated UL 94V-0

## TELEPHONE WALL-PHONE JACKS

- Wall-phone jacks available in 4- or 6-conductor models
- Screw terminal or quick-connect termination options
- Quick-connect products include plastic punchdown tool

## ROUND TELEPHONE INSERTS & SURFACE-MOUNT BOXES

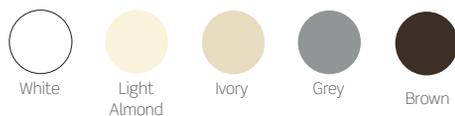

- Round inserts available with screw terminal or 110-style termination
- See page D14 for wallplates with round openings
- Surface-mount boxes feature 4-, 6-, and 8-conductor screw terminal connections
- Shorting bar option for use with monitored home security systems

## QUICKPORT® FLOOR BOX ASSEMBLIES

- Combine voice, data, and AV connectors in convenient in-floor locations
- Floor box assemblies include brass wallplate and screw cap
- Inserts and connectors are ivory

## SPOTLIGHT | Multimedia Outlet System (MOS) XLR Connector

The Multimedia Outlet System (MOS) XLR Connector is ideal for microphone and audio enhancement connections. The connector is robust, versatile, and easy to terminate. And when installed in a MOS Passthrough module, it can easily mount in any MOS wallplate, offering an aesthetically pleasing means to transition a pre-terminated cable from the back to the front of a MOS wallplate.

Note: speakON connector (41297-SP4) and other standard XLR-style chassis connectors use the same mounting method.

# CABLE MANAGEMENT

---

## SECTION E CONTENTS

- E3** Overhead Infrastructure Platform
- E5** Versi-Duct® Cable Management System
- E7** Horizontal Cable Managers
- E8** Rear Cable Managers, Blanks & Transitional Covers
- E9** Rings & Brackets
- E10** VELCRO®-Brand Fasteners
- E12** Zone Enclosures

## OVERHEAD INFRASTRUCTURE PLATFORM

The Overhead Infrastructure Platform provides independent support for cabling pathways, power, lighting, and other infrastructure. Platforms can carry the load of cables and ladder trays while freeing up rack space by adding patching above cabinets or racks. Since cabinets and racks are not attached, power and cabling can be quickly disconnected without removing hardware.

### FEATURES

- Eliminates the need to thread cable through ceiling supports and install suspended ladder trays
- Allows unobstructed access to overhead cabling
- Faster deployment, decommissioning, or replacement of server cabinets
- Reduced installation costs and fewer on-site problems
- Complies with TIA-569, cULus Listed, and meets ANSI STANDARD T1.336-2003 Tier 1 Universal Telecom Framework
- Includes industry-compliant bonding and grounding points

### OVERHEAD INFRASTRUCTURE PLATFORM (Call Inside Sales for ordering assistance)

Custom heights and widths available, please contact Inside Sales at 800.722.2082 for more information. For assembly, floor mounting instructions, VISIO® stencils, and videos go to [Leviton.com/OIP](http://Leviton.com/OIP).

### LEARN: WHITE PAPER

[Leviton.com/NS/WhitePapers](http://Leviton.com/NS/WhitePapers)

### Smart Data Center Tech Refreshes: 24-Fiber Systems for 40G and 100G Network Upgrades

Deployment of 40G and 100G switches has jumped dramatically, and an ever-growing list of transceiver options has emerged to support these speeds in the data center. In this white paper, you'll get an overview of the latest network transceiver options, and learn how you can create a cabling infrastructure that can adapt to support a variety of tech refreshes while providing better fiber utilization, higher density, and a simpler migration.

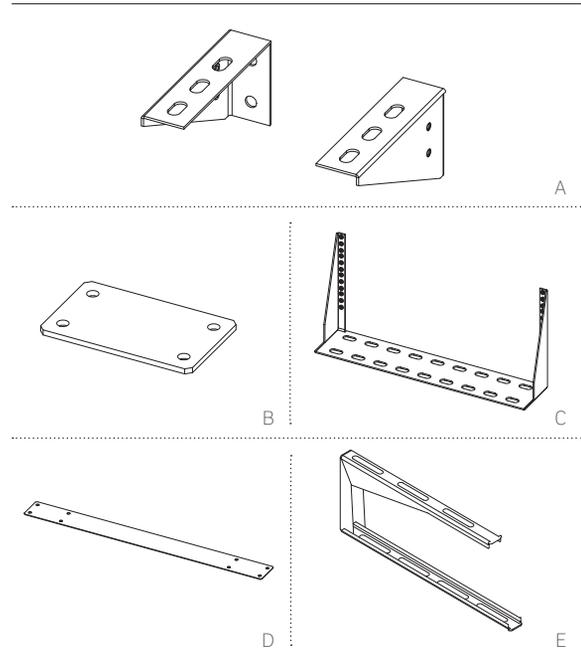

## ACCESSORIES

- **Frame Drill Template** - used to lay out Overhead Infrastructure Platform frame mounting locations
- **Channel Attachment Bracket Kit** - left/right brackets mount to standard steel channel framing to span the platform
- **Sub-Floor Mounting Kit** - plate for bottom of a raised floor tile that accepts standard threaded rod
- **C-Brackets** - creates a two-tier mounting surface for ladder trays or wire baskets; available in a variety of sizes
- **Patch Panel Bracket** - mounted on the steel channel above the cabinet and accepts standard 19-inch patch panels or other fiber enclosures, providing up to 4RU of additional patching capability

# CABLE MANAGEMENT | Versi-Duct® Vertical Management

## VERSI-DUCT CABLE MANAGEMENT SYSTEM

The innovative system for copper and fiber installations fits on any standard equipment rack, and accessories enable a wide range of configurations.

## VERSI-DUCT 8" CHANNEL CABLE MANAGEMENT

- Ideal for today's large-scale deployments and Cat 6A installations with typical larger-diameter cable
- 80-inch channel ships in two 40-inch pieces for easier handling and installation
- Channels available with standard black cover
- Designer cover (grey) available as an accessory
- Channels include mounting bracket kit and two covers, one slack-loop organizer, and one cable retainer, per 80-inch side (front or front/rear)
- Covers feature integrated dual-hinge for easy accessibility
- Channels can be side- or center-mounted for better space utilization
- Large finger-passthrough space aligns with rack units

### VERSI-DUCT 8" CHANNEL VERTICAL CABLE MANAGEMENT & ACCESSORIES

| DESCRIPTION  | FRONT ONLY            | FRONT & REAR         |
|--|-----------------------|----------------------|
| Vertical 80" length, 8" W x 8" D channel, standard black cover, hinged | <b>[A]</b> 8980L-VFO* | <b>[B]</b> 8980L-VFR |
| Vertical 40" Cover, 8" W, black (set of 4)                             | —                     | 8940L-SRC            |

| Vertical Slack Loop Organizer, 8" W channel (package of 2)             | —                     | <b>[D]</b> 89265-SL1 |

\* = Rear retrofit not available.

Standard black replacement covers available through Inside Sales.

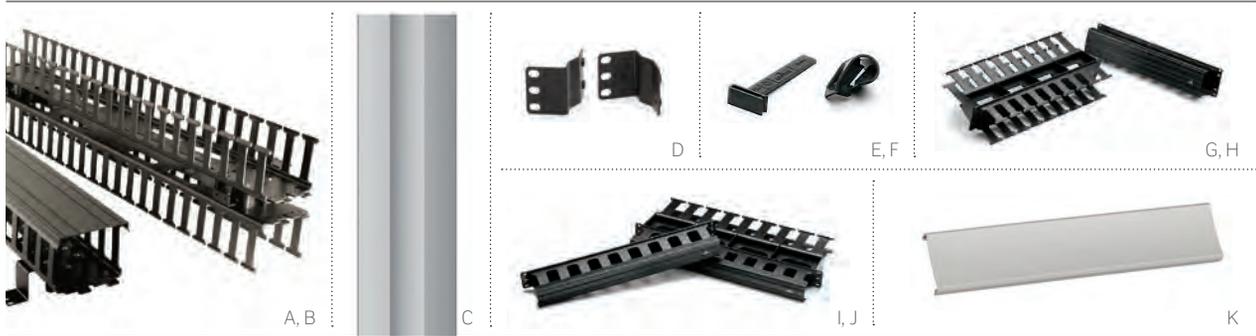

## 8" VERSI-DUCT CAPACITY CHART

Use the chart below to determine maximum recommended cable capacity for 8" Versi-Duct managers, based on average cable outside diameter. To ensure proper bend radius and space for future additions, do not fill to capacity at initial installation.

| FEATURE           | CHANNEL DEPTH (WxD) | USABLE AREA (IN²) | CAT 6A CAPACITY (.330" CABLE) | CAT 6 CAPACITY (.230" CABLE) | CAT 5E CAPACITY (.185" CABLE) |
|-------------------|---------------------|-------------------|-------------------------------|------------------------------|-------------------------------|
| 8" Channel Size   | 7.88" x 6.9"        | 54.3              | 159                           | 327                          | 505                           |
| Finger Spacing    | 5.5" x 1"           | 5.5               | 24                            | 50                           | 77                            |
| Large Passthrough | 4.8" x 2.6"         | 11.2              | 49                            | 101                          | 156                           |
| Small Passthrough | 2.6" dia.           | 5.3               | 23                            | 48                           | 74                            |

CABLE MANAGEMENT Versi-Duct

## VERSI-DUCT 5" CHANNEL CABLE MANAGEMENT

- 80-inch channel ships in two 40-inch pieces for easier handling and installation
- Interlocking tabs maintain flush channel alignment
- Finger spacing aligns with rack units

## VERSI-DUCT HORIZONTAL CABLE MANAGEMENT

- Fits all standard 19-inch racks
- Includes bend-radius-compliant clips
- Finger spacing aligns with patch panel port openings to better manage patch cords

Mount the Slack Loop Organizer on the duct fingers to manage excess cables.

# CABLE MANAGEMENT | Horizontal Cable Managers

## HORIZONTAL CABLE MANAGERS

- Available in 1RU, 2RU, and 4RU sizes
- All mount to standard 19-inch racks and cabinets
- 4RU manager includes a shelf to support patch cords
- Horizontal managers support transition to vertical management
- Combo Manager offers front and rear management
- Composite Blank Panel includes cable managers for high-density installations

| HORIZONTAL CABLE MANAGERS                        |      |                       |           |                 |               |           |   |

# CABLE MANAGEMENT | Rear Cable Managers, Blanks & Transitional Covers

## REAR CABLE MANAGEMENT BARS

- Standard Flat Cable Management Bar attaches to patch panel
- Angled and recessed-angled bars attach to rack
- High-Density Cable Management Bar supports heavy loads of cable and mounts on front or rear of rack
- Rear Cable Management Bar for active equipment offers extended depth for power cord support and cutouts for air circulation
- e2XHD Rear Cable Manager attaches to rack, includes rings to help manage and route incoming fiber cables, and supports any Leviton panel (see page A22 or B33 for more details)

## BLANK PANEL INSERTS

- Provide a seamless look and designate rack space for future expansion

## TRANSITIONAL COVERS

- Provide clean, aesthetic transition from angled patch panels to flat equipment
- Improve thermal management

# CABLE MANAGEMENT | Rings & Brackets

## CABLE MANAGEMENT RINGS

- Vertical Management Rings are an open ring solution that can be installed in tight spaces and smaller deployments
- Mounting Tie Bracket allows rings to be positioned between racks
- Vertical Transition Rings are used for vertical and horizontal cable management and are compatible with flat and angled panels

## HINGED WALL-MOUNT BRACKETS

- Designed for installations where space is constrained and racks are not used
- Six-inch deep brackets allow for proper cable management

## FRONT HINGED BRACKET

- Simplifies process of terminating cables to rear of patch panels when access is limited
- Easy-access quick-release latches drop to 90-degree and 120-degree positions
- Rack or wall mountable

## VELCRO-BRAND TIE WRAPS

- Available in 5-, 8-, and 12-inch lengths (0.5-inch width)
- Slot helps secure fastening without overtightening
- All wraps come with 25 units per roll

Maroon products UL Listed for use in plenum or air handling spaces per National Electric Code (NEC) Section 300.

## VELCRO-BRAND WRAPS - BULK ROLLS

- Available in 15-, 75-, and 600-foot bulk rolls (0.5-inch width)
- Cut to desired length

## VELCRO-BRAND WRAPS - SOFTCINCH LITE ROLLS

- Thinner depth for smaller bundles
- Tear by hand for quick application
- Available in 75-foot roll (0.5-inch width)

## SPOTLIGHT

Cincinnati Bell Technology Solutions (CBTS) Scores with Comprehensive Data Center Services

CBTS counts several hundred Cincinnati-area businesses, from small shops to Fortune 500 companies, among its customers. And with a constant demand for colocation and virtual data center services, CBTS required a top-quality infrastructure to achieve the reliability needed for expanding its critical data center environment. After evaluating several options, CBTS chose Leviton connectivity for its quality, reliability, and outstanding performance. Plus, in addition to meeting needs, Leviton took it one step further by developing its custom solutions for unique data center applications.

## ZONE ENCLOSURES

- Provide flexible consolidation points in ceiling or floor
- Simplify moves, adds, and changes (MACs)
- Plenum rated and includes fire-rated foam sealing kits
- Significant reduction in cable pathway loading
- Use as a telecom enclosure (TE) for cabling flexibility

## 2' X 2' PASSIVE RAISED-FLOOR ENCLOSURES

- Fit in air-handling space under 8-inch raised floors
- House two 4RU (8RU total) racks for standard 19-inch components
- Rotating patch panel mounting provides easy access to rear of panels

## CEILING ENCLOSURES

- Install flush with drop ceiling
- Fully hinged drop-down doors support installed equipment and open to face technician
- Active and passive styles available
- Mount into standard 2' x 2' and 2' x 4' ceiling tiles
- Active enclosures include AC power back box and venting for active equipment

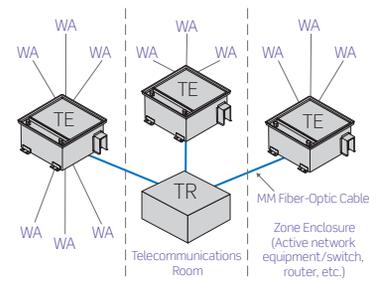

| ZONE ENCLOSURES   |           |
|---|-----------|
| DESCRIPTION   | PART NO.  |
| <b>[A]</b> Active Ceiling Enclosure, 2' x 2', 2RU active and 5RU passive space  | Z1000-AC2 |
| <b>[B]</b> Active Ceiling Enclosure, 2' x 4', 4RU active and 10RU passive space | Z1000-AC4 |
| <b>[C]</b> Passive Raised-Floor Enclosure, 8" depth, 8RU passive space          | Z1000-PF2 |
| <b>[D]</b> Passive Ceiling Enclosure, 2' x 2', 5RU passive space                | Z1000-PC2 |

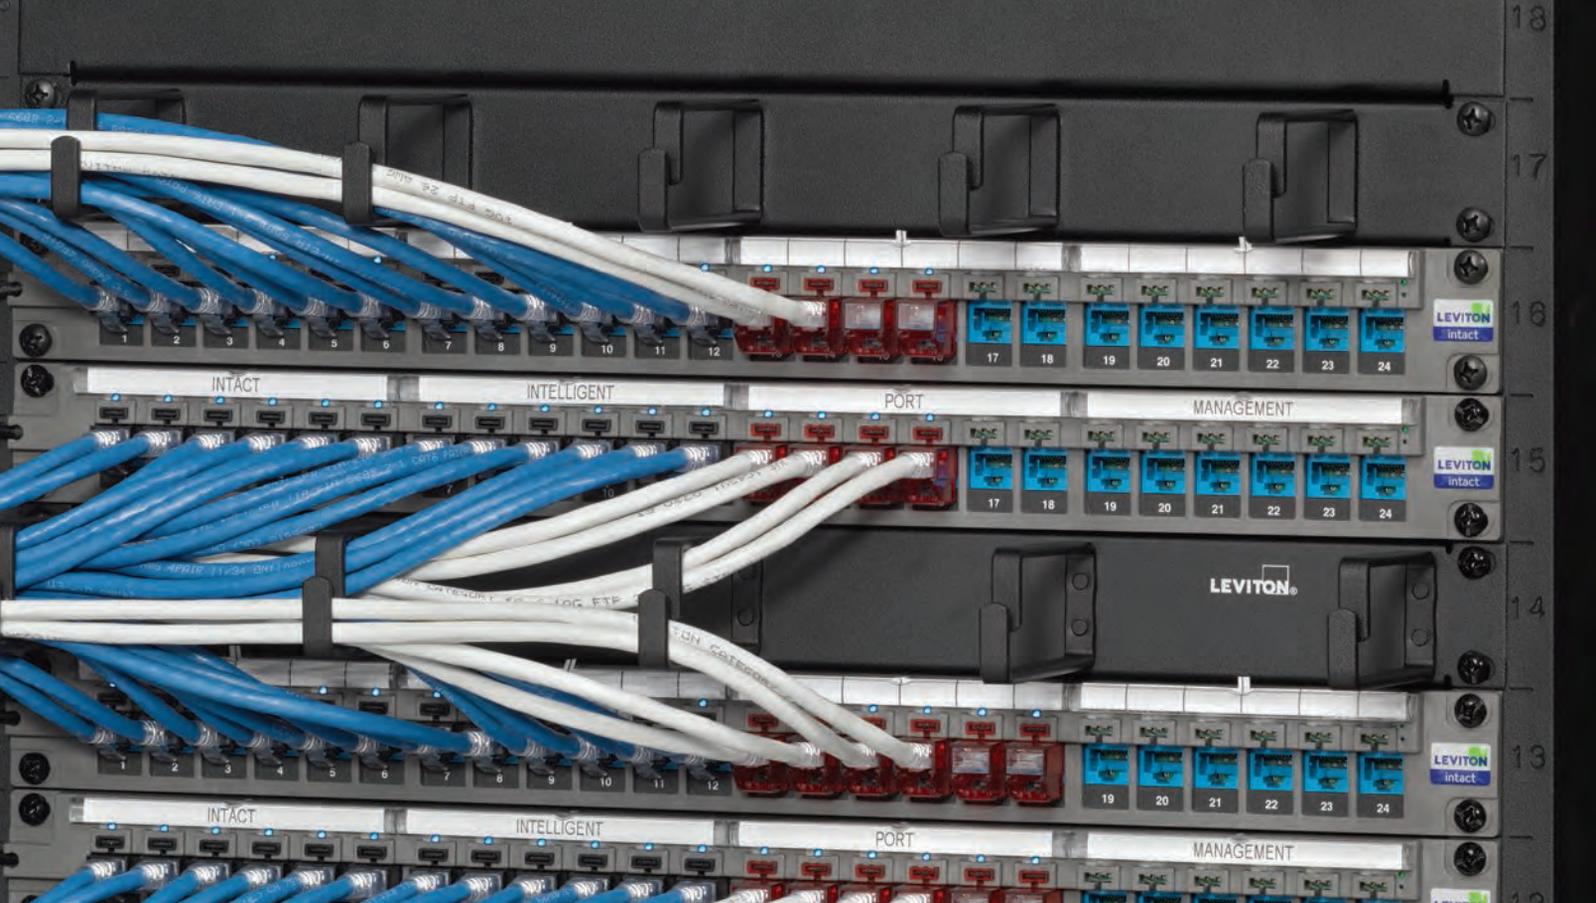

## SPOTLIGHT

### Zone Cabling Design Benefits

In a **zone cabling design**, cables are routed from the telecommunications room (TR) to appropriately placed telecommunications enclosures (TE) to each work area (WA). In an Active Zone Enclosure System, a single fiber run can support dozens of work areas, significantly reducing cable pathway loading and TR space requirements. Zone cabling designs are ideal for open office architecture. Zone cabling benefits include:

- Maximum infrastructure flexibility
- Improved network performance
- Simplified moves, adds, and changes
- Reduced floor space usage
- Significantly reduced cost of ownership

## INTACT INTELLIGENT PORT MANAGEMENT SYSTEM

The Intact Intelligent Port Management System offers a simple, straightforward way to manage network changes. It provides real-time network documentation with alerts for faults or unplanned changes to ports. By focusing on the core change management processes used every day, Intact reduces the complexity found in other systems.

- Receive and maintain accurate, up-to-date network documentation
- Identify and diagnose problems faster, reducing downtime and risk of human error
- Assist technicians through changes and troubleshooting by managing work orders, logging events, and creating visual network topologies
- Improves asset management with the ability to model the end-to-end circuit, identifying the physical location of active equipment

## HOW INTACT WORKS

A microchip is attached to the Intact **Patch Cord** plug, programmed with information unique to each cord.

Intact **Intelligent Panels** monitor port status and communicate with the Intact Device Manager.

The **Device Manager** hosts the pre-installed Intact Software. Multiple Device Managers operate together seamlessly for larger systems.

Intact **Software** is accessed from the corporate network using Web browsers, including those on tablets and smartphones.

## SOFTWARE

Intact software comes pre-loaded on the Device Manager, so there's no set-up or configuring. It can be accessed on any Web browser over the corporate network, including mobile devices like tablets or smartphones. The software manages work orders, event logging, and visual network topology to assist technicians and IT managers through moves, adds, changes, and troubleshooting.

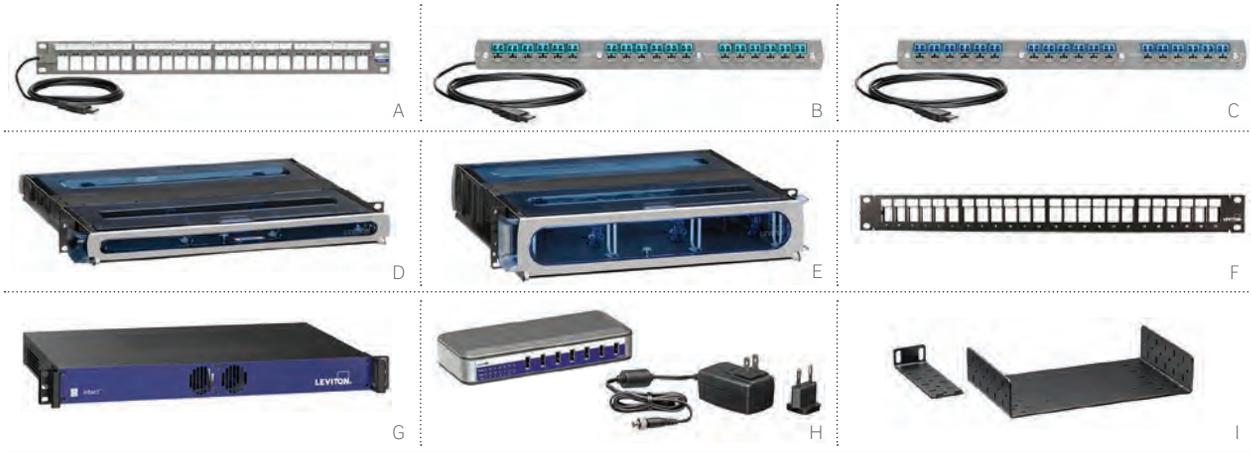

## HARDWARE

The Intact system is available for both copper and optical fiber networks. Standard Leviton patch panels and enclosures can easily be upgraded to Intact intelligent panels, and Intact copper and fiber patch cords are also based on existing standard product designs. The added intelligent technology allows the system to monitor the connection status of ports.

Intact is the only system to provide an extra layer of security, with the ability to lock in patch cords and lock out unused ports. Once plugged in, Intact Secure copper and fiber patch cords can only be removed with a matching-color extraction tool, deterring any unauthorized access.

# INTACT™ | System Components

## FEATURES

- Intact Intelligent Panels send network port status back to the Intact Device Manager, a 1RU Ethernet-enabled controller that hosts the system software
- During work orders and when alarms occur, LED lights provide guidance above affected ports on the panel
- Using Intact Device Hubs, one Device Manager can expand to support over 100 Intact panels
- Multiple Device Managers operate seamlessly, allowing systems to scale easily
- QuickPort® copper panels (1RU, 24-port) and SDX 2000i fiber enclosures (1RU, 2RU) are “intelligent-ready” and can be upgraded to become an Intact intelligent device while remaining on the rack
- Panels and enclosures can be upgraded without removing connectors, preserving the integrity of permanent link testing

For assistance customizing your patch cords, please visit [Leviton.com/configurator](http://Leviton.com/configurator) or call Tech Support at 800.824.3005.

## PATCH CORD FEATURES

- Intact Cat 6 and 6A RJ patch cords are independently tested and verified by Intertek (ETL) for component performance
- Intact fiber patch cords are available in OM4, OM3, OM2, OM1, and OS2
- Intact Secure RJ and LC cords include a patented locking mechanism that cannot be released without a matching-color extraction tool
- Intact Secure Port Blockers prevent unauthorized port access and enable ports to be reserved for future use
- Patch cord insertion loss and return loss tested to industry-leading standards for both copper and fiber

## SWITCHED SERIES

- Securely monitors and controls cabinet power remotely for data center or remote branch office
- Combines remote configuration and management with power distribution and environmental monitoring
- Receive SNMP- or email-based alerts when power or environmental conditions exceed thresholds
- Remote individual outlet control allows shut-down of unused outlets and remote rebooting of attached equipment
- Firmware is easily upgraded via network download to installed units for future product enhancements
- External probe available separately for relative temperature and humidity monitoring
- Power sequencing minimizes in-rush current and prevents circuit overload
- Input current and output current per phase can be monitored remotely or through local display
- Available in single-phase 120V, single-phase 208V, and three-phase 208V configurations
- Available in vertical Zero-U or horizontal rack-mount styles
- Included mounting hardware allows attachment to most common cabinets and racks

## METERED SERIES

- Provides branch circuit protection and reliable power distribution for active equipment
- Current monitoring helps prevent overloads in high-density computing environments
- Local display shows current usage for each phase (three-phase models have three displays)
- Available in single-phase 120V, single-phase 208V, and three-phase 208V configurations
- Available in vertical Zero-U or horizontal rack-mount styles
- Included mounting hardware allows attachment to most common cabinets and racks

# POWER DISTRIBUTION | P1000 Series

Leviton P1000 Series Rack PDUs are designed for data centers, wiring closets, and other environments that require cost-effective, “always-on” power. The robust, compact design ensures that these products can be used wherever reliability and density are important.

## P1000 SERIES

- All models feature circuit breaker protection to prevent current overloads
- Available in 120V or 208V versions with 15, 20, or 30 amps
- 208V PDUs come with 2-pole circuit breakers for added safety
- Surge-protected models prevent damage from transient surges
- LED indicators for power, grounding/polarity, and surge protection where applicable
- Hardwired power input cord
- 18-gauge cold-rolled steel construction
- Available in vertical Zero-U or horizontal 19-inch rack-mount styles
- Mounting hardware included; optional adjustable rack-mounting bracket available

Vertical P1000 units ship with flat brackets, L-brackets, backplates, mounting buttons, screws, and washers to support a variety of workstation options.

## LEARN: WHITE PAPER

## Leviton.com/NS/WhitePapers

### Copper Network Infrastructure in the Data Center: Why BASE-T is Here to Stay

As data centers migrate to 25G and 40G networks, twisted-pair copper structured cabling will continue to offer a flexible, cost-effective, and dependable solution to support higher bandwidths. In this white paper, you'll learn why Category 8 will play a key role in supporting next generation networks and get an overview of the latest standards defining Category 8 and 40GBASE-T.

# POWER DISTRIBUTION | 5500 & 5505 Series

Leviton 5500 and 5505 Series Power Distribution Units (PDUs) help power and protect vital electronic equipment. These PDUs are similar to the 4500 Series, but with the added assurance of surge protection. The 5500 and 5505 Series share several key features, including:

- Resettable circuit breaker to protect against overloading
- 12 receptacles: 10 in back, 2 in front
- 20-amp versions available with either straight blade or locking input plug
- Mounts horizontally on 19-inch racks or cabinets

## STANDARDS & CERTIFICATIONS

UL 1363 RECOGNIZED | #E118936

5500: UL 1449 LISTED 3RD ED. | #E118936/3/1

5505: UL 1449 LISTED 3RD ED. | #E118936/3/2

## 5500 SERIES WITH ENHANCED SURGE PROTECTION

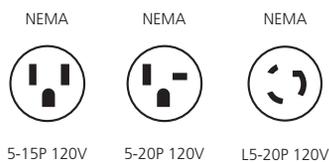

- Peak surge current: 72 kA
- VPR — L-N: 400 Vpk, L-G/N-G: 500 Vpk
- EMI/RFI noise filtering: 100 kHz to 30 MHz, -10 dB to -35 dB
- Type SPD: 4
- Physical dimensions: 1.75" H x 19" W x 4.55" D

## 5505 SERIES WITH SURGE PROTECTION

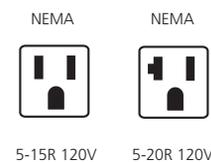

- Peak surge current: 27 kA
- VPR — L-N: 600 Vpk, L-G/N-G: 700 Vpk
- EMI/RFI noise filtering: 100 kHz to 30 MHz, -5 dB to -40 dB
- Type SPD: 4
- Physical dimensions: 1.75" H x 19" W x 2.5" D

## POPULATING THE STRUCTURED MEDIA ENCLOSURE

The Nerve Center of the Connected Home

For every residence — single-family home, high-rise, or hotel — Leviton offers an unparalleled selection of structured wiring solutions for networking, audio, video, and more. And we offer the ideal central distribution point to manage them all.

Populating the Structured Media Encl.

MDU & HOSPITALITY

## THE CONNECTED HOME

Get enterprise-grade, best-in-class broadband network performance capability with Leviton Structured Media components. These solutions are engineered to be an integrated system, providing an organized base and simplifying installation from rough-in through line activation. For enclosure configuration assistance, go to [Leviton.com/homeconfig](http://Leviton.com/homeconfig).

|   |   |  |
|---|---|--|
| 1 | <b>Structured Media Enclosures</b>              | These versatile enclosures allow you to manage and distribute a full range of voice, data networking, audio, and video wiring from one central location. We have enclosure solutions for every construction type: wood, steel frame, concrete, and cinder block construction, and an RF Transparent Enclosure for expanding the reach of a wireless network. |
| 2 | <b>Data Patching and Distribution</b>           | Leviton offers durable Cat 6 and 5e panels and modules for data cable distribution. The high-end Twist & Mount Panel makes installation simple and provides easy access for moves, additions, or changes in the home network.  |
| 3 | <b>Telephone Patching and Distribution</b>      | Choose from a wide selection of telephone distribution boards, modules, or panels for telephone and security systems. Our Telephone Input Distribution Panel (TIDP) supports inputs for use with “triple play” modems and complements the look and simplicity of our Twist & Mount Patch Panels.   |
| 4 | <b>Premium and Passive CATV Splitters</b>       | Distribute the incoming RF signal to locations throughout a home via coaxial cable using Leviton passive CATV splitters, or use Premium splitters to optimize the performance of digital cable signals to handle HDTV.   |
| 5 | <b>Wireless Routers and Switches</b>            | Leviton offers a complete Gigabit solution with high-speed routers and switches. Create a Local Area Network (LAN) in the home or office to network PCs, printers, and other connected devices. Integrate with the Leviton Wireless Router for maximum speeds on wired and portable devices.   |
| 6 | <b>Ultra High-Flex Patch Cords</b>              | Ultra High-Flex Patch Cords allow for tighter radius connections and a cleaner finished appearance inside a dressed Structured Media Enclosure.  |
| 7 | <b>ISP Modem (provided by service provider)</b> | The modem converts DSL, cable, or fiber optic signals for Internet access for triple-play service or pure data connections.  |
| 8 | <b>Integrated Power Supply</b>                  | Structured cabling systems rely on active gear that requires low-voltage power and surge protection. Leviton offers power supplies with extra plugs that eliminate the need for bulky power adapters within enclosures.  |

Leviton Structured Media Enclosures provide a convenient termination location for wiring home runs from wall outlets, creating a distribution point for voice, data, audio, and video applications. Available in compact, 14-, 21-, 28-, and 42-inch sizes to address a broad range of capacities for single-family homes, MDUs, and light commercial applications, Leviton Structured Media Enclosures support new and retrofit installations.

## STRUCTURED MEDIA ENCLOSURES, COVERS & DOORS

- Enclosures are constructed of white, powder-coated 20-gauge steel
- Covers and doors are constructed of white powder-coated 18-gauge steel, and feature 3/4-inch overlap to hide irregular drywall cuts
- Modules mount vertically or horizontally
- Multiple knock-outs on top and bottom facilitate cable entry and routing
- Knockout in base of enclosure accommodates single- and double-gang J-boxes and power modules
- Six 3-inch self-healing foam grommets included to accommodate and protect cable bundles
- Can be surface mounted or recessed
- Mounting tabs on housing sidewalls prevent enclosure from falling through the studs during installation
- Combine two or more enclosures for larger installations or future expansion
- Optional lock and key set available for additional security
- Standards compliance: ACA and cULus Listed:
  - ANSI/UL 1863 - Communication Circuit Accessories
  - ANSI/UL 985 - Household Fire-Warning System Units
  - ANSI/UL 1023 - Household Burglar-Alarm System Units

## 14" & 21" ENCLOSURES, COVERS & DOORS

- Entry-level home network enclosures create a central distribution point for low-voltage cabling
- Ideal for apartments, condos, and smaller homes
- 14" enclosure accommodates basic residential networking systems and accessories
- 21" enclosure provides additional room for larger modules and equipment

## COMPACT STRUCTURED MEDIA MDU ENCLOSURES

- Economical solution for MDU connectivity
- Flexibility to accommodate a variety of telephone/video distribution configurations
- Snap-on cover requires no tools or fasteners
- Molded-in brackets provide quick snap-in convenience for expansion boards
- Angled video-splitter shelf for easy installation
- Hosts three expansion boards and one TV splitter
- Constructed of sturdy white ABS molded plastic

## 28" & 42" ENCLOSURES, COVERS & DOORS

- Command central for virtually all technology, including networking, DSL, cable Internet modem, satellite video, security, VoIP, fax, telephone, intercom, and audio
- Available in MDU and mixed-use configurations
- 28" enclosure accommodates up to 8 distribution modules
- 42" enclosure accommodates up to 12 distribution modules

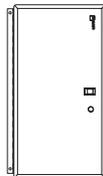

### SPOTLIGHT

Choosing Your Structured Media Enclosure Cover or Door

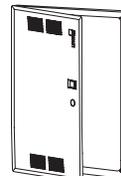

#### Flush-Mount Cover

Screws directly to enclosure frame.

#### Economy Hinged Door

Hinged flange attaches to left or right side of enclosure.

#### Premium Vented Hinged Door

Full-frame design. Ventilated door hinges from left or right.

### \*STRUCTURED MEDIA ENCLOSURE END CAPS

**Leviton Extender Brackets** provide an additional 2 inches of depth and enhanced ventilation for active gear within Leviton 28" and 48" Structured Media Enclosures. The brackets attach between the enclosure and the cover to form a 2-inch deep, vented frame. The increased depth also allows space for better cable management and for larger modules, such as audio amplifiers, to be mounted within the Structured Media Enclosure.

\*\*Extender Bracket (enclosure sold separately)

## CONCRETE-MOUNTABLE STRUCTURED MEDIA ENCLOSURES

- Designed to withstand added weight during concrete pouring
- Moisture-resistant powder coating binds with treated steel to provide multiple levels of corrosion protection and durability
- Knockouts on the top and bottom support conduit up to 1.5 inches in diameter and facilitate cable routing and entry
- Power knock-out located on side panel for increased vertical cable routing capacity
- Optional duplex receptacle power box constructed using same steel as enclosures for protection of electrical wiring components
- Flush-mount covers and doors overlap ¾ of an inch to hide uneven concrete/mortar finishing (sold separately)
- Durable powder coating withstands ¼-inch dent test (per ASTM D 522-93A standard) and minimizes scratching, cracking, or peeling during shipping or installation
- Use with standard covers or doors (See pages H5-H8.)

C

## RF TRANSPARENT WIRELESS STRUCTURED MEDIA ENCLOSURE

- Expands the reach of wireless signals by diminishing the effect of interference with the ABS polymer construction
- Improves system access with a 180-degree hinged cover, allowing for quick and easy access to network equipment
- Makes servicing and expansion easy with twelve 1-inch entry/exit ports and additional ¼-inch knock-outs and conduit adapters
- Compatible with most Structured Media patch panels, voice, data, video, and audio quick-connect distribution modules
- Ensures safety with UL Compliant, ABS flame-retardant polymer
- Vented doors allow for better airflow and cooling of active equipment
- Accepts Structured Media Enclosure Lock & Key Set

### RF TRANSPARENT STRUCTURED MEDIA ENCLOSURE

| DESCRIPTION  | PART NO.  |
|--|-----------|
| <b>[C]</b> RF Transparent Wireless Structured Media Enclosure with Vented Hinged Door, 30" | 49605-30W |

This integrated network system delivers a seamless experience that combines the wired performance of Gigabit Ethernet with the mobile-ready convenience of Wi-Fi® networking inside an innovative RF Transparent Structure Media enclosure.

47611-WG4

Concrete-Mountable & RF Transparent Encl.

MDU & HOSPITALITY

## FTTH POINT OF ENTRY BOX

- Provides convenient staging for terminating incoming fiber from service provider
- Can mount inside the Structured Media® enclosure or as a stand-alone unit on a wall
- Includes magnet for easy installation and place adjustments
- Includes an SC/APC adapter with two dust caps and two splice sleeves
- Made of ABS plastic

## MULTI-BAY FTTH ENCLOSURES

Multi-Bay Enclosures provide excellent termination and mounting locations for both in-home structured wiring and fiber-to-the-home (FTTH) components. Structured wiring components typically mount in the upper section of the dual enclosure and optical network termination (ONT) mounts in the lower section. The dual enclosure can be surface mounted or mounted between metal or wood wall studs using provided screws.

- Allow separate lockable sections for FTTH integration
- In a separate bay, a full Leviton structured wiring system can be easily connected and optimized up to gigabit speeds to maximize incoming fiber optic connection
- Ideal for new installations or retrofits
- Use multiple covers or doors to provide access and security
- Flush-mount cover, economy-, and premium-vented doors available

# MDU & HOSPITALITY | Routers & Switches

## GIGABIT ROUTER

- Compliant with IEEE 802.11a/b/g/n dual band (2.4 GHz & 5 GHz simultaneously) wireless technology capable up to 300+300 Mbps data rate
- Advanced security: 64/128-bit WEP, WPA/WPA2 and WPA-PSK/WPA2-PSK (TKIP/AES encryption)
- Supports Wi-Fi® Protected setup (WPS), NAT firewall, IP/port/URL-based access control, and MAC address filtering
- Includes Gigabit RJ-45 ports (10/100/1000 Mbps) of 1 WAN and 4 LAN ports
- Supports dual-SSID to access different networks through a single AP
- Supports NTP, Virtual Server, UPnP, and DMZ for various networking applications
- Includes USB port for sharing printers and USB mass storages

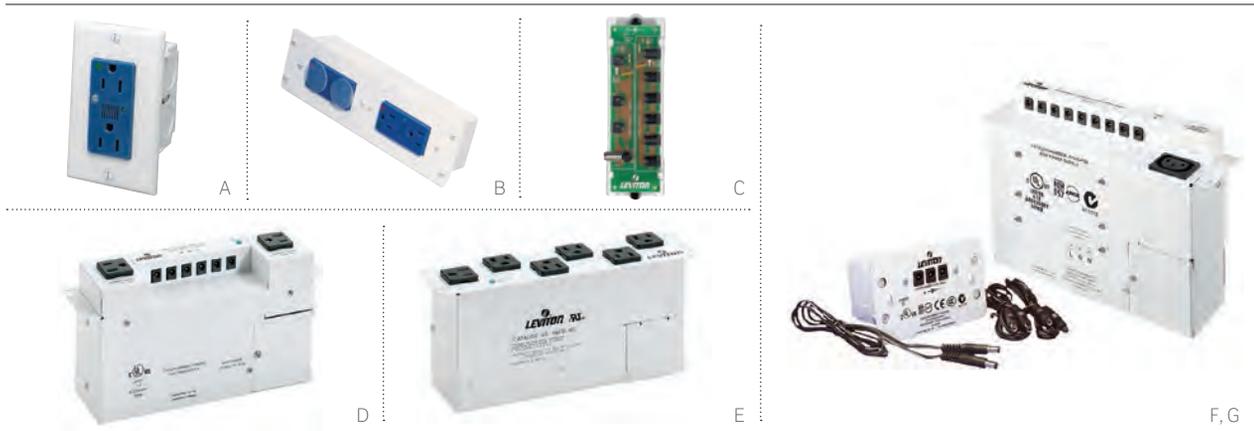

## GIGABIT ETHERNET SWITCHES

- 10/100/1000 Mbps data transfer rate
- Power button arrows for easy power down
- LEDs indicate power; LINK/Activity; and 10, 100, or 1000 Mbps
- Auto detect uplink to easily cascade additional hubs, switches, and routers from any port
- Features high-performance, store-and-forward switching architecture with CRC

## 100 MBPS ETHERNET SWITCHES

- 10/100 Mbps data transfer rate
- Network additional PCs, printers, and other peripherals beyond router capacity
- Connects to many home office Ethernet devices
- Available in five- and eight-port versions

## SURGE-PROTECTION, STANDARD AC POWER MODULES & J-BOX KITS

- Fit in standard 14"-, 21"-, 28"-, and 42"-Structured Media® Enclosures
- Surge-protected versions provide enhanced protection and EMI/RFI filtering per UL 1449 standard

## DC BUS MODULE

- Eliminates need for more than two bulky AC/DC power adapters
- Contains six 12 VDC power outputs at up to 1500 mA total
- Contains three 24 VDC power outputs at up to 1000 mA total, including one F-connector
- Output power cables included for all except 24 VDC F-connector connection

## VERSATILE DC POWER SUPPLIES

- 120 VAC, 60 Hz input
- Includes NEMA 5-15 AC receptacles at 15A total
- Eliminates the need for multiple bulky AC/DC power adapters

## AC SURGE MODULES

- Includes six surge-protected NEMA 5-15P receptacles
- Allows six AC/DC power adapters to fit easily into Structured Media Enclosures
- Powers routers, switches, modems, volume controls, camera hubs, and other Structured Media mounted devices

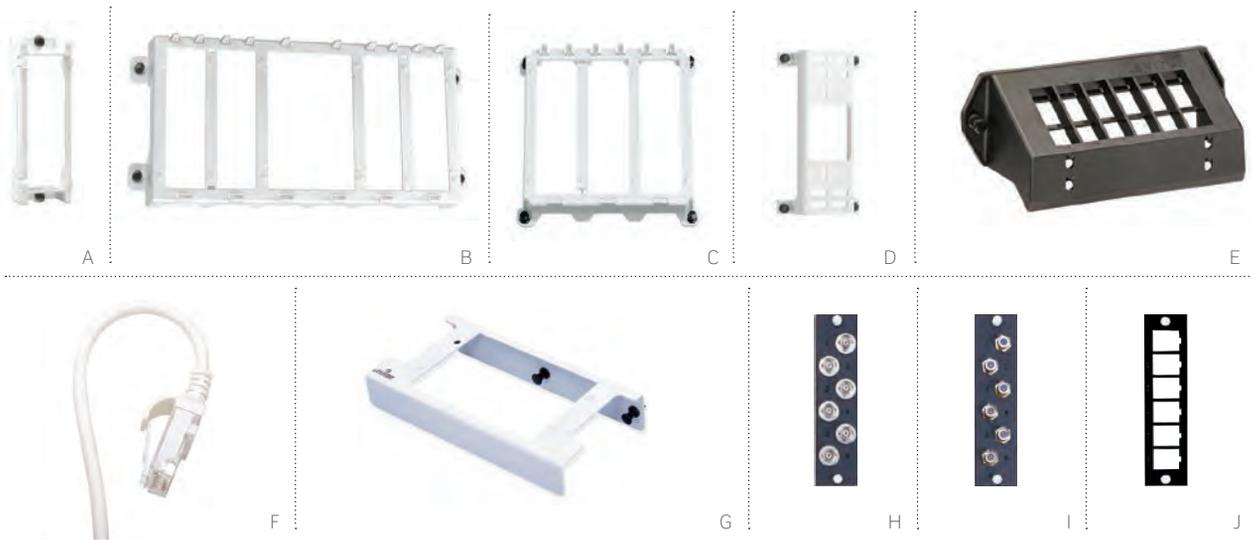

## UNIVERSAL MINI DC POWER SUPPLIES

- 90 - 264 VAC, 50/60 Hz input
- Provides three 12 VDC outputs with surge protection at 833 mA total
- Eliminates the need for multiple bulky AC/DC power adapters

## UNIVERSAL DC POWER SUPPLIES

- 100 - 240 VAC, 50/60 Hz input
- Provides nine 12 VDC outputs with surge protection at 3.34A total
- Includes one IEC AC power receptacle
- Eliminates the need for multiple bulky AC/DC power adapters

## MULTIMEDIA ADAPTER BRACKET & MOUNTING PLATES

- Bracket is constructed of white powder-coated steel
- Plates are constructed of black powder-coated steel
- Bracket includes push-lock pins for mounting in Structured Media Enclosures

**UNIVERSAL SECURITY & SHELF BRACKETS**

- **Universal Shelf Bracket** allows security batteries and other active products to be mounted inside any Structured Media® Enclosure
- **Shelf Bracket** includes four 8-inch long VELCRO®-Brand strips, ensuring vertical and horizontal stability
- **Universal Security Board Mounting Plate** includes four adhesive clips for mounting within any Leviton Structured Media Enclosure
- **Combo Bracket** allows Leviton products to be installed in most non-Leviton structured wiring enclosures
- **Universal Mounting Brackets** allow an unlimited number of upgrades (limited only by enclosure size) to be added to an existing security system terminated within any Leviton Structured Media Enclosure
- **Universal Brackets** are sold in pairs with self-tapping screws and spacers to easily connect the largest number of security alarm manufacturers' panels

MDU & HOSPITALITY

# MDU & HOSPITALITY | Twist & Mount, TIDP & Compact Structured Media® Panels

## TWIST & MOUNT PATCH PANELS

- Low-profile, high-density, component-rated patching for voice and gigabit ethernet connections
- Feature simple twist- and mount-installation
- Universal T568A and T568B wiring labels ensure compatibility in residential and commercial installations
- Available in 12- and 24-port versions

## TELEPHONE INPUT DISTRIBUTION PANELS (TIDP)

- Support four-line telephone distribution
- Offer choice of inputs and outputs: one 4-pair 110-style IDC input, four industry-standard RJ-11 connector inputs, or 12 modular industry-standard RJ-45 connector outputs
- Security jack for interface with security systems
- Test and auxiliary disconnect outlet (ADO) ports for isolation and testing of telephone line connections

## PRE-CONFIGURED COMPACT STRUCTURED MEDIA PANELS

- Compact series (six-inch width) pre-configured panels are an ideal solution for basic telephone, data, security interface, and TV distribution in MDUs where space and budget are of primary concern
- Space-saving profile provides four to nine bridged telephone connections, up to four Cat 5e data connections, and up to eight video connections

### PRE-CONFIGURED COMPACT STRUCTURED MEDIA PANELS — COMPACT WIDTH (6")

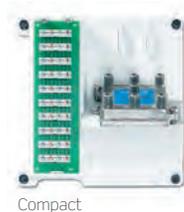

| DESCRIPTION  | PART NO.  |
|--|-----------|
| 1x9 Bridged Telephone and 4-way 1 GHz TV Splitter                      | 47603-1G4 |
| <b>[D]</b> 1x9 Bridged Telephone and 6-way 1 GHz TV Splitter           | 47603-1G6 |
| 1x9 Bridged Telephone and 8-way 1 GHz TV Splitter                      | 47603-1G8 |
| <b>[E]</b> 1x4 Bridged Telephone, 4 Data, and 6-way 1 GHz TV Splitter  | 47603-DP6 |
| 1x7 Bridged Telephone, Security Interface, and 6-way 1 GHz TV Splitter | 47603-TSV |

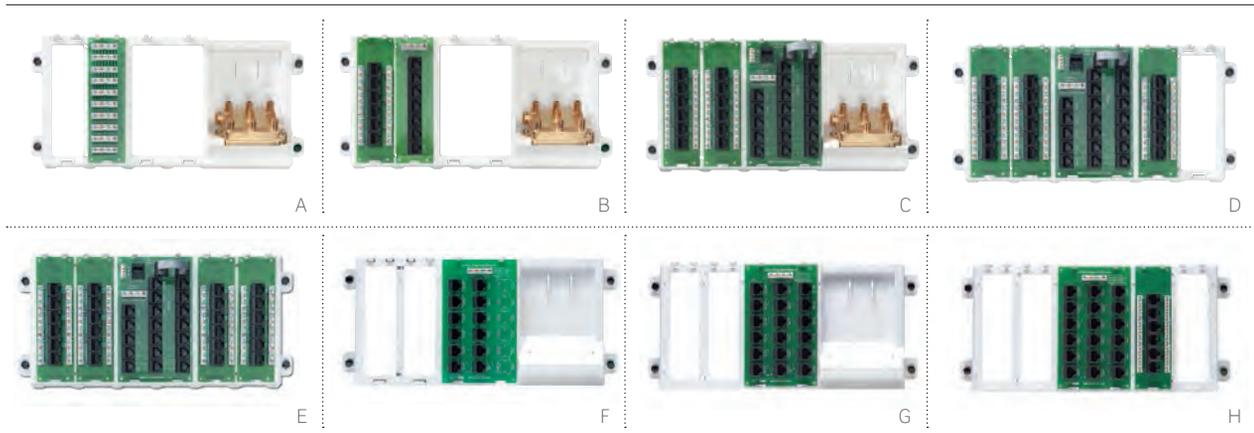

## SPOTLIGHT

### Compact vs. Standard Structured Media Panels

**Compact Structured Media Panels** offer a space-saving profile is half the size of standard panels, and is ideal when space and budget are a primary concern.

**Standard Structured Media Panels** combine multiple modules into a simple distribution point, and provide greater versatility when it comes time for customization or expanding.

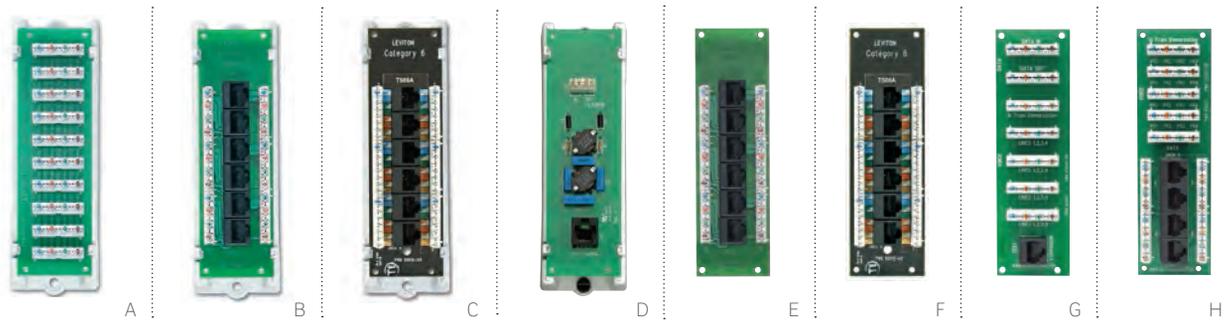

## PRE-CONFIGURED STANDARD STRUCTURED MEDIA PANELS

- Standard series (twelve-inch width) pre-configured panels combine voice, data, and TV modules into a single, simple distribution point
- Several pre-configured options are available with room for customization with additional expansion boards

## SPOTLIGHT Panels, Modules, Boards: What's the difference?

**Pre-configured Structured Media® Panels** include multiple expansion boards combining voice, data, and TV boards into a single distribution point.

**Modules** include an expansion board on a single ABS mounting bracket.

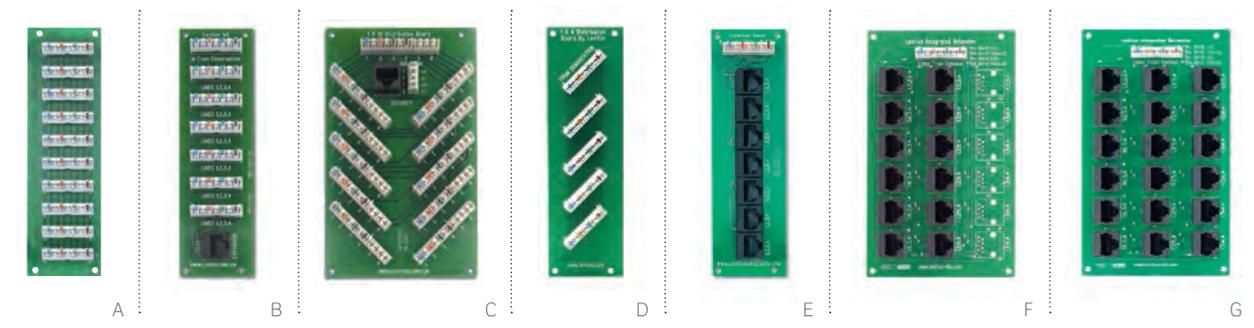

**Expansion Boards** mount in Structured Media Panels or Mounting Brackets (see page H13).

## PREMIUM AMPLIFIED CATV/HDTV MODULE

- Splits and/or amplifies signal to one, eight, or sixteen TVs throughout the home
- Bi-directional circuitry supports advanced interactive applications, as well as standard TV and video inputs
- Forward path internal amplifier provides equal input and output level on all ports; reverse path is not affected
- Unity gain eliminates the need to manually adjust attenuation
- HDTV and digital cable-ready SCTE- and DOCSIS-compliant

## 3X1 PASSIVE COMBINER MODULE

- Digital CATV compatible
- Provides bi-directional signal path to support cable modem or digital cable communications
- F-ports provide up to fifteen psi weather sealing

## PASSIVE CATV/HDTV SPLITTERS

- Split signal to six or eight TVs throughout the home
- Provide digital cable, cable TV, and other TV services via coaxial cable
- Lightweight, strong die-cast housing
- HDTV and digital cable-ready; SCTE-compliant
- Available with and without Structured Media® Enclosure mounting bracket

Additional video and home theater solutions located in Section C.

**SPOTLIGHT** A Connected Home Begins with Planning

The number of connected devices in the home has grown significantly over the last few years. Too often, homeowners knowingly accept poor network reliability and quality for the convenience of a wireless system. While wireless technology has improved, the hunger for bandwidth outpaces it. Having a strong structured wiring backbone in an organized central hub is crucial to supporting high-bandwidth demands and optimal wireless performance.

To see the full article detailing how a well-planned structured cabling system can optimize your wireless network, visit: [Leviton.com/chbackbone](http://Leviton.com/chbackbone)

## TECHNICAL RESOURCES YOU'LL FIND AT **LEVITON.COM**

To find product information, simply type the product name or part number into the search tool at Leviton.com. You can also find extra technical assistance using the links below, including guides, drawings, videos, and more.

### 1. KNOWLEDGEBASE & FORUMS

[communities.Leviton.com](http://communities.Leviton.com)

At Leviton's Knowledgebase, you can get answers to your technical questions or post your own inquiries. You'll find a unique community hub for Network Solutions as well as Leviton's other business units.

### 2. TRAINING VIDEOS

[Leviton.com/ns/videos](http://Leviton.com/ns/videos) & [youtube.com/LevitonMfg](http://youtube.com/LevitonMfg)

Leviton training videos and animations offer simple step-by-step instructions for installations and terminations.

### 3. BIM OBJECTS

[Leviton.com/bim](http://Leviton.com/bim)

Building Information Modeling (BIM) is an important program for design and project coordination in construction projects. Incorporate Leviton images and added intelligence into infrastructure design drawings with our library of free BIM objects.

### 4. VISIO® STENCILS

[Leviton.com/visio](http://Leviton.com/visio)

Download Microsoft® Visio stencils of Leviton products, including connectors and wallplates, copper and fiber components, residential/MDU products, and cable management solutions.

### 5. MANUALS & GUIDES

[Leviton.com/ns/techlibrary](http://Leviton.com/ns/techlibrary)

Here you'll find helpful material, such as the Patch Panel Selection Guide and popular Cat 6A Reference Guide, as well as installation manuals for Connected Home products.

### 6. NETWORK PLANNING TOOLS

[Leviton.com/homeconfig](http://Leviton.com/homeconfig) & [Leviton.com/smallbiztool](http://Leviton.com/smallbiztool)

Fill out a simple online questionnaire and our technical experts will quickly identify the products that meet the needs of your home or small business network.

### 7. MDU INSTALLATION DIAGRAMS

[Leviton.com/connectedhome](http://Leviton.com/connectedhome)

Find helpful wiring diagrams for multi-room audio and home theater MDU projects.

### 8. APPLICATION/TECH NOTES

[Leviton.com/ns/techlibrary](http://Leviton.com/ns/techlibrary)

Application notes provide extra instruction for using and installing products such as copper trunk cables, and 66 connecting blocks. Tech notes offer a deeper look into the unique technology behind many of our products.

### 9. INDEPENDENT TESTING INFORMATION

[Leviton.com/ns/testresults](http://Leviton.com/ns/testresults)

Find independent test results for Leviton products, including Cat 6A component performance, pre-terminated OM3 MTP® System performance, and channel performance of Leviton connectivity paired with qualified cables.

### 10. LITERATURE LIBRARY

[Leviton.com/ns/litlibrary](http://Leviton.com/ns/litlibrary)

Refer to our Lit Library for additional systems and product information, including brochures, case studies, line cards, spec sheets, and an electronic version of this catalog.

### 11. SPEC TOOLS

[Leviton.com/specteam](http://Leviton.com/specteam)

Download spec tools for use in bids, design plans, and specification documents at the Spec Team web page, including sample bid spec forms and RFP documents.

### 12. CUSTOMIZED PRODUCT SOLUTIONS

[Leviton.com/configurator](http://Leviton.com/configurator)

Configure enclosures, MTP cassettes, and fiber and copper cable assemblies through the Leviton Make-to-Order program.

### 13. LIVE CHAT

[Leviton.com/support](http://Leviton.com/support)

Get fast, easy help when you need it. Connect with Leviton's technical experts for a quick response and knowledgeable answers to your product and application questions.

### 14. EZ-LEARN™

[Leviton.com/ezlearn](http://Leviton.com/ezlearn)

Acquire the skills and abilities you need to compete in today's dynamic and ever-evolving electrical industry.

## T568A OR T568B — WHICH ONE SHOULD YOU CHOOSE?

- If the installation is residential, choose T568A unless other conditions apply (see below).
- If there is pre-existing voice or data wiring (remodel, moves, adds, changes), duplicate the existing wiring scheme on any new connection.
- If project specifications are available, use the specified wiring configuration.
- If components used within the project are internally wired with either T568A or T568B, duplicate this wiring scheme. Leviton residential applications use T568A in all of their circuit boards.

## STANDARDS

- TIA-568-C Commercial Building Telecommunications Cabling Standard lists both wiring configurations. T568B is the most prevalent for commercial installations.
- TIA-570-B Residential Telecommunications Cabling Standards recommends T568A.

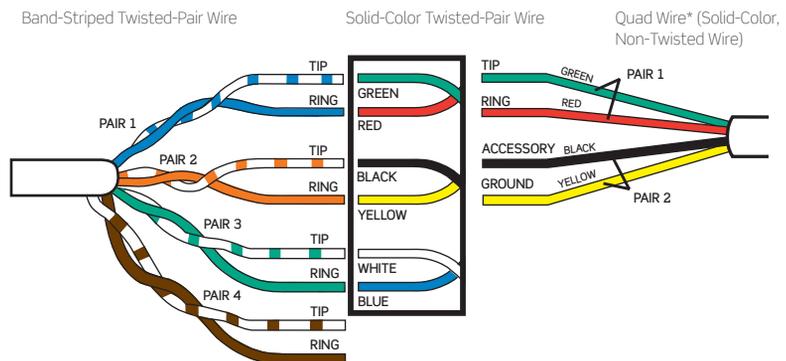

## T568A & T568B WIRING STANDARDS IDC COLOR ASSIGNMENTS

| CONNECTOR PIN NUMBER | T568A WIRE COLORS   | CONNECTOR PIN NUMBER | T568B WIRE COLORS   |
|----------------------|---|----------------------|---|
| 1                    | White/Green    | 1                    | White/Orange   |
| 2                    | Green          | 2                    | Orange         |
| 3                    | White/Orange   | 3                    | White/Green    |
| 4                    | Blue           | 4                    | Blue           |
| 5                    | White/Blue   | 5                    | White/Blue   |
| 6                    | Orange       | 6                    | Green        |
| 7                    | White/Brown  | 7                    | White/Brown  |
| 8                    | Brown        | 8                    | Brown        |

For some cables, wires for connector pin numbers 2, 4, 6, and 8 may have a white stripe. This is equivalent to cables with solid wires for the same pin numbers.

## WIRING POTS (PLAIN OLD TELEPHONE SERVICE) WIRE TO CATEGORY-RATED WIRE

| STANDARD 4-PAIR WIRING |                                     |
|------------------------|-------------------------------------|
| Pair 1                 | Tip - White/Blue<br>Ring - Blue     |
| Pair 2                 | Tip - White/Orange<br>Ring - Orange |
| Pair 3                 | Tip - White/Green<br>Ring - Green   |
| Pair 4                 | Tip - White/Brown<br>Ring - Brown   |

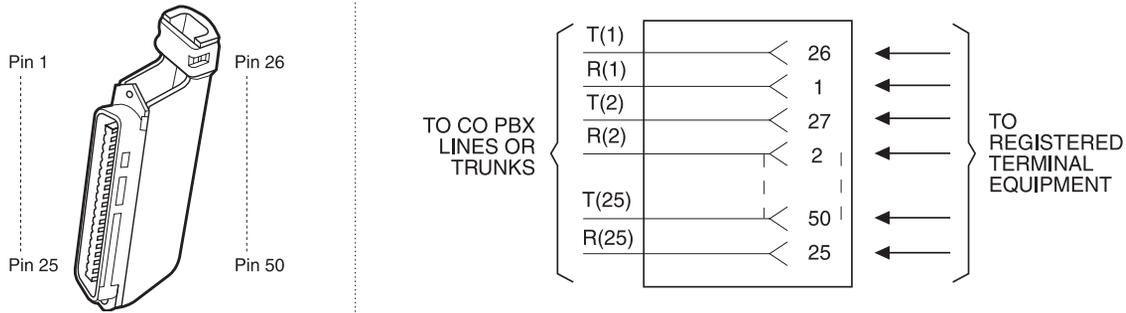

For 6-wire connectors use pair 1, 2, & 3 color codes. For 4-wire connectors use pair 1 & 2 color codes.

For some cables, wire for even connectors pin numbers may have a white stripe. This is equivalent to cables with solid wires for the same pin numbers.

**\*Caution:** Quad wire is no longer acceptable for installation in multi-line environments. If encountered during a retrofit, quad wire should be replaced with 100 ohm UTP. Connecting new quad to installed quad will only amplify existing problems and limitations associated with quad wire; leaving existing quad in place and connecting 100 ohm UTP to it may also be ineffective, as the quad wire may negate the desired effect of the UTP.

Visit [Leviton.com/ns/support](http://Leviton.com/ns/support) for more wiring diagrams and technical information.

# TECHNICAL INFORMATION | Wire Color Codes & Connector Pin Designations

## WIRE COLOR CODES & PIN DESIGNATIONS

### Electrical Network Connection

From 1 to 25 single or multiple-pair circuits bridged to the network or other connected equipment.

### Mechanical Arrangement

Circuits are provided on numbered tip and ring positions on a miniature 50-pin ribbon telco connector (Amphenol™-type). Pins 1 (ring) and 26 (tip) are considered position 1. Pins 2 (ring) and 27 (tip) of the ribbon connector are position 2. This pairing continues through 25 pairs.

### Typical Usage

Many key and PBX systems specify the RJ-21X, or "Amphenol-type" as the network interface device. Many of these systems also use the RJ-21X as a connector for stations or telephone sets, wired from the KSU or PBX main distribution frame.

Many Leviton connectors can be used for the RJ-21X configuration where intermixing is permitted. Substitution of these special connectors is often both economical and practical. Contact Network Solutions Tech Support for information about versions to meet your requirements.

Sometimes an RJ-11 or RJ-14C can be installed in place of an RJ-21X. While many smaller systems that require only a few lines may show the RJ-21X as the "official" connector required under registration, less complex connectors such as the RJ-11 or RJ-14C can often be specified (perhaps in multiples). If the system requires only a few lines but the RJ-21X is specified on the registration label, under FCC Part 68 you may specify the RJ-11C, RJ-14C, RJ-25C, or RJ-61X instead.

| Wire Color    | 1 R  | T 26 | Wire Color    |
|---------------|------|------|---------------|

25-Pair Color Coding/ISDN Contact Assignment RJ-21X

## CONTACT ASSIGNMENTS FOR PLUGS AND CONNECTORS

(ISDN Assignment of Contact Numbers as Specified by ISO Document 8877: 1987 (E))

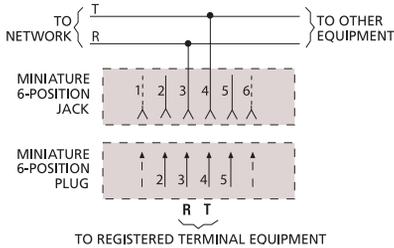

| CONTACT NUMBER | TE             | NT             | POLARITY |
|----------------|----------------|----------------|----------|
| 1              | Power source 3 | Power sink 3   | +        |
| 2              | Power source 3 | Power sink 3   | -        |
| 3              | Transmit       | Receive        | +        |
| 4              | Receive        | Transmit       | -        |
| 5              | Receive        | Transmit       | +        |
| 6              | Transmit       | Receive        | -        |
| 7              | Power sink 2   | Power source 2 | +        |
| 8              | Power sink 2   | Power source 2 | -        |

For use in TE to TE interconnections, power source/sink 3 shall conform to the requirements specified in CCITT Recommendation 1.430, Section 9.2 for power source/sink 2.

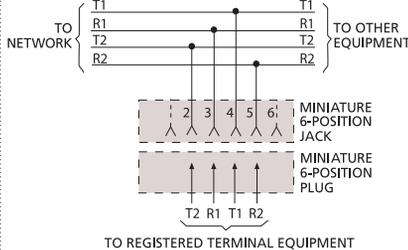

Visit [Leviton.com/ns/support](http://Leviton.com/ns/support) for a detailed port-pin configuration chart.

## USOC CODES

These Universal Service Order Codes (USOC) for connecting telephone instruments and related equipment to telephone lines are based on Part 68, Subpart F, Section 68.502 of FCC regulations, and as described by the T1E1.3 Working Group on Connectors and Wiring Arrangements.

USOC codes were developed years ago by the Bell operating companies to identify service or equipment under tariff. Information on USOC codes is provided here should you run across these in your work.

Registered RJ Jack numbers end with a letter that indicates the wiring or mounting method. "C" identifies a surface or flush-mounted connector, "W" identifies a wall-mounted connector, "X" identifies a complex multi-line or series-type connector, and "S" identifies a single-line connector.

# TERMINATION INSTRUCTIONS | Cat 6A/6/5e UTP Connectors

## ATLAS-X1™ UTP CONNECTOR TERMINATION INSTRUCTIONS

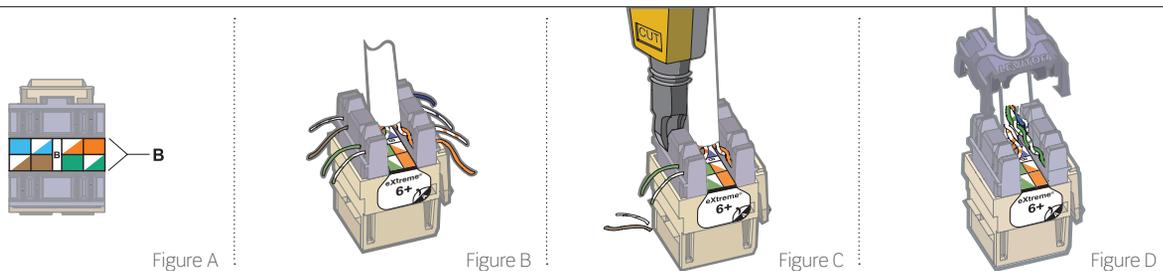

- Using a cable stripper, remove 1.5 inches of cable jacket. At the strip point of the cable, use flush cutters to carefully remove strip string, Mylar® tape, cross-shaped pair separator, or any other cable fillers or spacers, where applicable. (Figure A)
- Line up the wire manager with the blue pair indication on the label in line with the blue pair of the cable. Ensure that the end of the cable jacket is at the cable jacket stop inside the wire manager, and click the wire manager closed (Figure B).
- Observing pair polarity and T568A or T568B wiring pattern, seat the four pairs into the wire manager. Note: Pairs must be completely and securely seated into wire manager wire channels (Figure C).
- Check polarity by making sure the white wire of each pair will be closest to the guide pinhole in the face of the wire managers (Figure D).
- Using a flush cutter, trim all pairs flush with sides of wire manager. Note: Wire ends must be cut flush: use of snips or side cutter is not recommended and may cause test failures (Figure E).
- Align the prepared wire manager with the rear of the connector, matching "UP" on the wiring label to "UP" molded into the connector retaining tab (Figure F). Close connector doors to complete the termination. To rewire, depress the connector door-release tabs simultaneously.

### T568A & T568B WIRING STANDARDS IDC COLOR ASSIGNMENTS

| PIN # | T568A<br>WIRE COLORS | T568B<br>WIRE COLORS |
|-------|----------------------|----------------------|
| 1     | White/Green          | White/Orange         |
| 2     | Green                | Orange               |
| 3     | White/Orange         | White/Green          |
| 4     | Blue                 | Blue                 |
| 5     | White/Blue           | White/Blue           |
| 6     | Orange               | Green                |
| 7     | White/Brown          | White/Brown          |
| 8     | Brown                | Brown                |

To help determine whether to use T568A or T568B, see page X4.

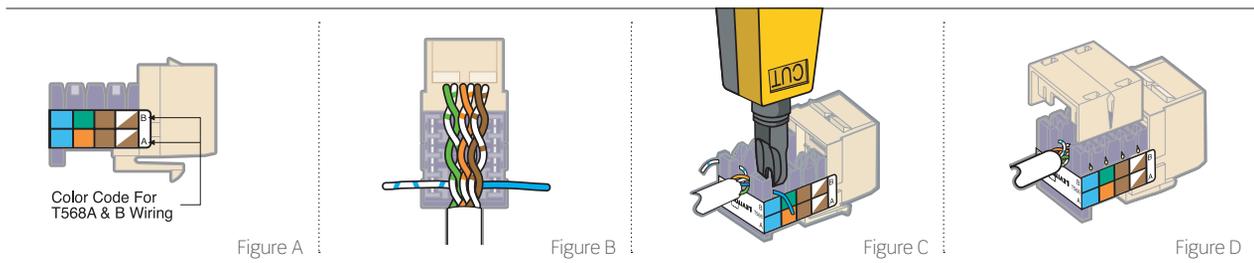

Note: Icons may be removed from the front of the connector by inserting the end of a paper clip into the icon release hole and gently prying outward.

## EXTREME® CAT 6A/6/5E CONNECTOR TERMINATION INSTRUCTIONS

- Remove about 3 inches of cable jacket and center spline (stiff "t"-shaped plastic separator inside cable).
- Determine which wiring scheme to use, T568A or T568B. (See chart on page X4.) Note the associated color codes and connector pin numbers on the label located between the IDC connector slots (Figure A). Peel back label for T568A wiring.
- Leave the cable jacket within 1/8" of the connector side, then route the wires for termination using the selected wiring scheme (Figure B). **Route cable perpendicular to the IDC field. Ensure there is enough slack in the twisted pairs, and do not place the cable jacket into the termination field.**
- Use your fingers to carefully seat the wires into the IDC slots. Set a 110-style impact tool to low impact and position it perpendicular to the connector. **Maintain wire-pair twisting to within less than 1/2" of the IDC contact;** then, seat and trim the cable one pair at a time to prevent crushing the inside pairs (Figure C).
- Place the dust cap over the terminated wires for secure connection (Figure D).

# TERMINATION INSTRUCTIONS | Cat 5e UTP & Cat 6A/6/5e Shielded Connectors

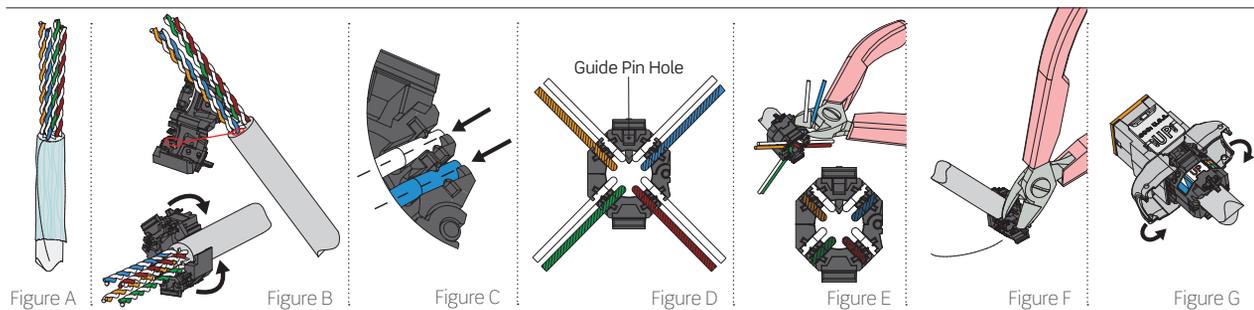

## GIGAMAX® CAT 5E CONNECTOR TERMINATION INSTRUCTIONS

1. Remove about 3 inches of jacket from the cable to expose the wires.
2. Determine which wiring scheme to use, T568A or T568B. Note the associated color codes and connector pin numbers as labeled on the sides of the connector (Figure A).
3. Route the wires for termination according to the chosen color code. Place the cutting side of the tool on the outside to trim the excess wire flush with the connector body as you punch the wires down (Figure B). Terminate and trim one pair at a time, starting from the rear of the connector (Figure C). Terminating each pair after placement will prevent crushing the inside pairs with the punchdown tool. **Maintain cable jacket as close to termination as possible.**
4. Place the dust cap over the terminated wires to ensure a secure connection and added strain relief (Figure D).
5. Noting the "UP" orientation of the connector, insert the terminated connector into the desired QuickPort® housing.

### T568A & T568B WIRING STANDARDS IDC COLOR ASSIGNMENTS

| PIN # | T568A WIRE COLORS | T568B WIRE COLORS |
|-------|-------------------|-------------------|
| 1     | White/Green       | White/Orange      |
| 2     | Green             | Orange            |
| 3     | White/Orange      | White/Green       |
| 4     | Blue              | Blue              |
| 5     | White/Blue        | White/Blue        |
| 6     | Orange            | Green             |
| 7     | White/Brown       | White/Brown       |
| 8     | Brown             | Brown             |

To help determine whether to use T568A or T568B, see page X4.

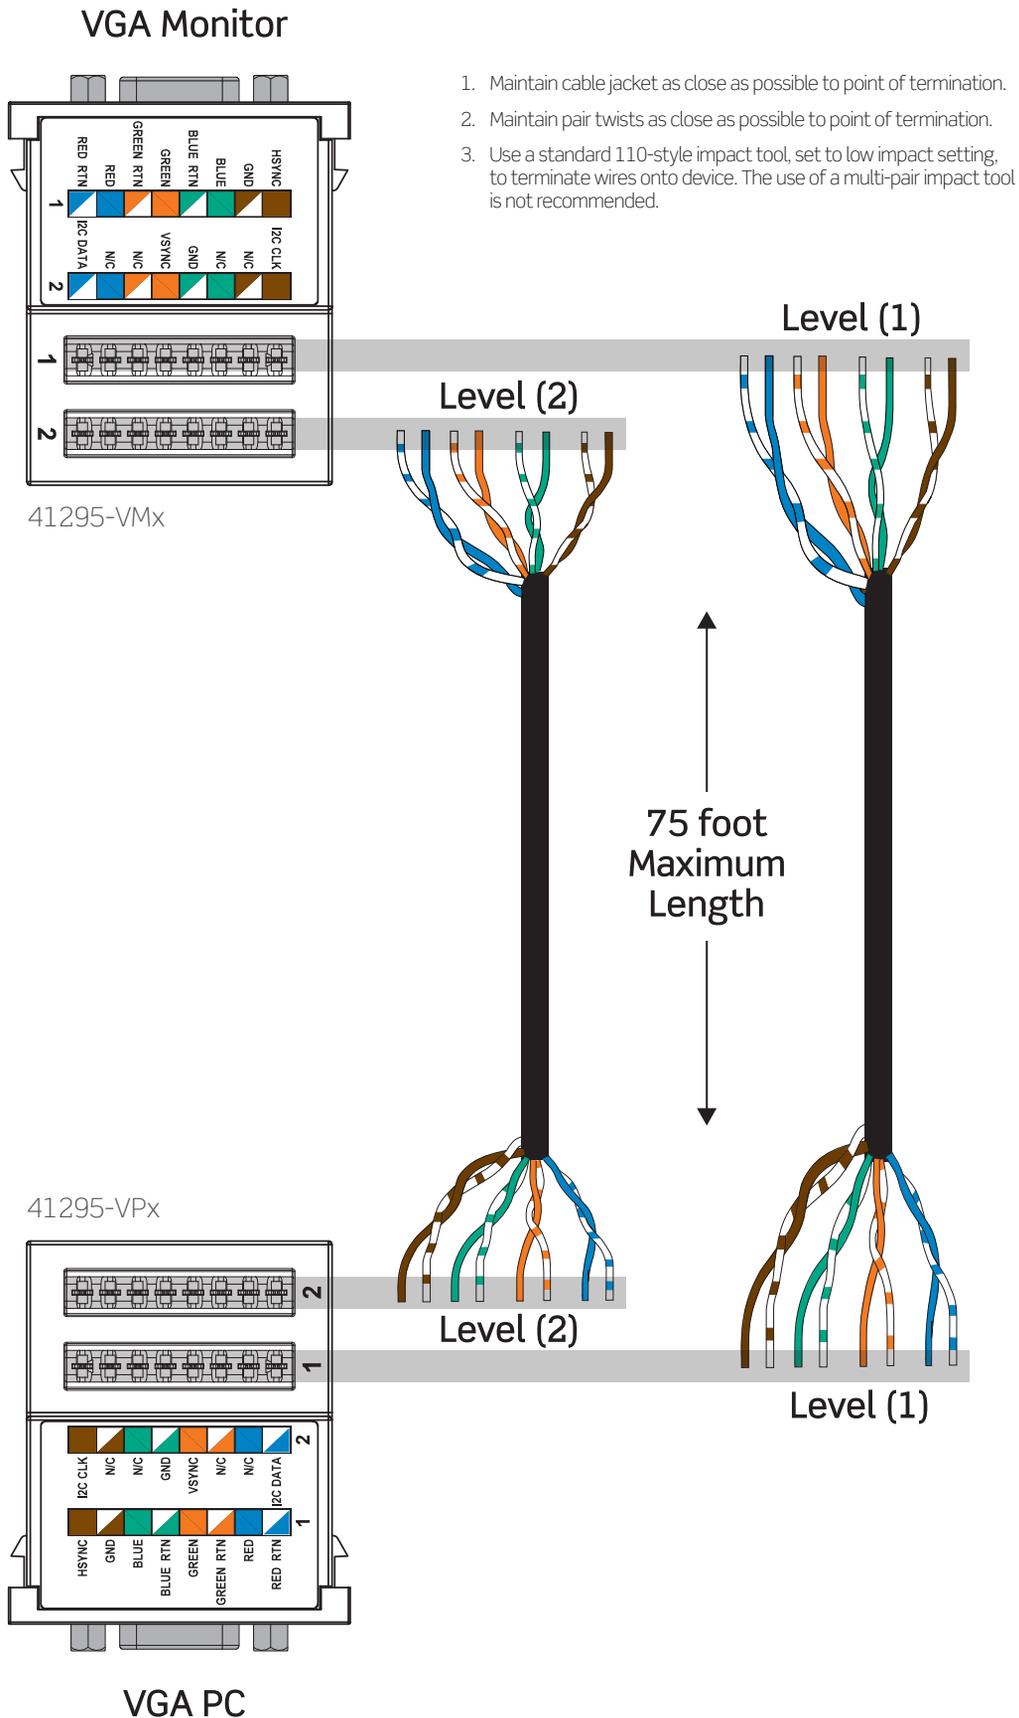

## ATLAS-X1™ CAT 6A/6/5E SHIELDED CONNECTOR TERMINATION INSTRUCTIONS

1. Using an appropriate cable stripper, remove about 1.5 inches of cable jacket. Inspect shield foil and pairs to ensure no foil or insulation damage.
2. At the strip point of the cable, use flush cutters to carefully remove strip string, if one is present. Spare back the foil metal side outward. Spare back the drain wire (Figure A). Use flush cutters to remove mylar® tape, cross-shaped pair separator, or any other cable fillers or spacers.
3. Line up the wire manager with the blue pair indication on the label in line with the blue pair of the cable. Ensure that the end of the cable jacket is at the cable jacket stop inside the wire manager, and click the wire manager closed (Figure B).
4. Observing pair polarity and T568A or T568B wiring pattern, seat the four pairs into the wire manager. Note: Pairs must be completely and securely seated into wire manager wire channels (Figure C).
5. Check polarity by making sure the white wire of each pair will be closest to the guide pinhole in the face of the wire managers (Figure D).
6. Using a flush cutter, trim all pairs flush with sides of wire manager. Note: Wire ends must be cut flush: use of snips or side cutter is not recommended and may cause test failures (Figure E).
7. Pull drain wire into drain wire capture notch and trim flush with flush cutter. Use flush cutter to nick edge of foil, and tear foil off flush with rear of wire manager (Figure F).
8. Align the prepared wire manager with the rear of the connector, matching "UP" on the wiring label to "UP" molded into the connector retaining tab (Figure G). Close connector doors to complete the termination. To rewire, depress the connector door-release tabs simultaneously.

For T568A & T568B Wiring Standards IDC Color Assignments, see the Atlas-X1 UTP Terminations Instructions on page X7.

# TERMINATION INSTRUCTIONS | Multimedia Outlet System VGA Modules

Termination Instructions

TECH INFO

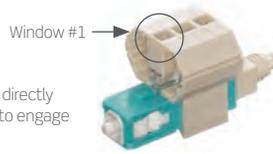

# TERMINATION INSTRUCTIONS | FastCAM® Fiber Connector Termination

## FastCAM Wedge Clip

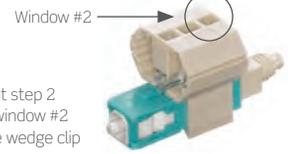

Step 1: Squeeze each side to release the wedge clips

Step 2: Squeeze directly over window #1 to engage the wedge clip

Step 3: Repeat step 2 directly over window #2 to engage the wedge clip

## FASTCAM SC, ST, & LC TERMINATION INSTRUCTIONS

Before beginning termination, identify the components of your connector tool kit. (See page B73- B74 for options.) To ensure the FastCAM connector is prepared for termination, remove and reinstall the wedge clip and then press down on the clip at the ferrule side (first click) and then press down on the fiber insertion side (second click). See our install video at [Leviton.com/ns/videos](http://Leviton.com/ns/videos).

### FIBER TERMINATION - 250 µm

Tools required: Cleaver\* and a fiber stripper. (See pg. B74)

1. Slide the protective tubing, 900 µm boot, and 250 µm protective tube (in order) onto the fiber.
2. Strip the fiber to a length of 40 mm by removing 10 mm at a time.
3. Clean the stripped fiber with an alcohol wipe to remove any debris. Check the fiber integrity by bending the stripped end slightly to 60°.
4. Set fiber onto cleaver such that 250 µm coating edge is at 10.5 mm position and cleave.
5. Wedge clips are engaged at shipment. If they have become dislodged, squeeze the top and bottom of the wedge clip, ensuring it is inserted in the connector body. A click will be heard for each wedge.
6. Slide the 250 µm protective tubing towards the end 250 µm coating.
7. Insert cleaved fiber into rear of connector until connection is made. Make a slight bend in the fiber to maintain connection.
8. OPTIONAL: Use the Visual Fault Locator (VFL) as an aid to determine that the cleaved fiber and stubbed fiber are connected properly.
- 8A. Remove the dust cap and insert connector into VFL. Turn VFL power on: look for red glow in Position 1 of the wedge clip.
- 8B. Insert cleaved fiber into rear of connector until the red glow dims in Position 1 of the wedge clip. Make a bend in fiber to maintain connection.
9. Maintaining a slight force on the fiber, release the wedge clip by squeezing both sides until the clip dislocates from connector body. Remove the clip. If using a VFL, remove it from connector and place dust cap back onto connector's ferrule.
10. Slide the boot up and over the rear of the connector body. Slide the clear 900 µm protective tubing - over the black 250 µm protective tubing - to the back of the connector's boot.
11. For ST connectors, push ST housing over body of connector.

### FIBER TERMINATION - 900 µm

When using a 900 µm Fan-out/Break-out kit to unjacketed 250 µm fiber, follow the manufacturer's instructions. After the kit is installed, use the following procedures for FastCAM termination.

Tools required: Cleaver\* and a fiber stripper. (See pg. B74)

1. Slide the 900 µm boot onto the fiber.
2. Strip the fiber to a length of 40 mm by removing 10 mm at a time.
3. From the end of the 900 µm buffered fiber, place a mark at 15.5 mm for SC/ST or at 11.5 mm for LC.
4. Clean the stripped fiber with an alcohol wipe to remove any debris. Check the fiber integrity by bending the stripped end slightly to 60°.
5. Set the stripped fiber onto the cleaver such that the 900 µm buffered fiber's edge is at the 10.5 mm position and cleave.
6. Wedge clips are engaged at shipment. If they have become dislodged, squeeze the top and bottom of the wedge clip, ensuring it is inserted in the connector body. A click will be heard for each wedge.
7. Insert the cleaved fiber into the rear of the connector until the connection is made and the mark is inside the connector. Make a slight bend in the fiber to maintain connection.

8. OPTIONAL: Use the Visual Fault Locator (VFL) as an aid to determine that the cleaved fiber and stubbed fiber are connected properly.
  - 8A. Remove the FastCAM connector dust cap and insert the connector into the VFL. Turn the VFL power on and there will be a red glow in Position 1 of the wedge clip.
  - 8B. Insert the cleaved fiber into the rear of the connector until the red glow dims in Position 1 of the wedge clip. Make a slight bend in the fiber to maintain connection.
  9. Maintaining a slight force on the fiber, release wedge clip by squeezing both sides until the clip dislocates from the connector body. Remove the wedge clip. If using a VFL, remove it from connector and place dust cap back onto connector's ferrule.
- NOTE: The ferrule's dust cap should remain in place until you are ready to insert the connector.
10. Slide the boot up and over the rear of the connector body.
  11. For ST connectors, push ST housing over body of connector to complete assembly.

### FIBER TERMINATION - 2 mm and 3 mm

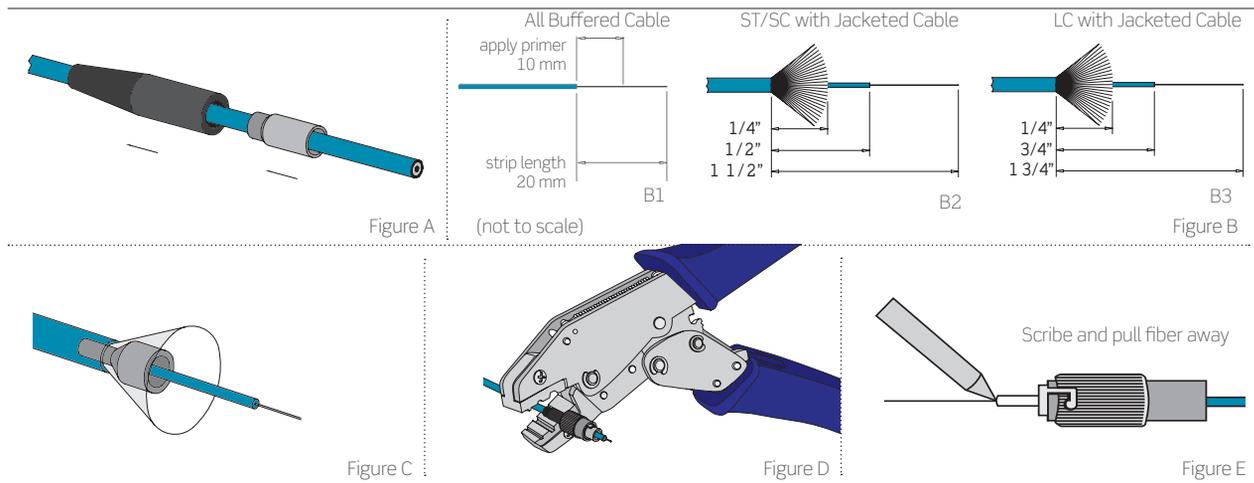

Tools required: Cleaver\* and a fiber stripper. (See pg. B74)

1. Slide 2 mm or 3 mm boot onto cable.
2. Remove 70 mm of cable jacket.
3. Strip the fiber to a length of 40 mm by removing 10 mm at a time.
4. From the end of the 900 µm buffered fiber, place a mark at 15.5 mm for SC or ST or a mark at 11.5 mm for LC.
5. Clean the stripped fiber with an alcohol wipe to remove any debris. Check the fiber integrity by bending the stripped end slightly at 60 degrees.
6. Set the stripped fiber onto the cleaver such that the 900 µm buffered fiber's edge is at the 10.5 mm position and cleave.
7. Wedge clips are engaged at shipment. If they have become dislodged, squeeze the top and bottom, ensuring the wedge clip is inserted into the connector body. A click will be heard for each wedge.
8. Insert fiber slowly into connector until connection is made and marking is hidden. Form a slight bend in fiber to maintain connection.
9. OPTIONAL: Use the Visual Fault Locator (VFL) as an aid to determine that the cleaved fiber and stubbed fiber are connected properly.
- 9A. Remove the FastCAM connector dust cap and insert the connector into the VFL. Turn the VFL power on and there will be a red glow in Position 1 of the wedge clip.
- 9B. Insert the fiber into rear of the connector until red glow dims in Position 1 of the wedge clip. Make a bend in fiber to maintain connection.
10. Maintaining a slight force on the fiber, release the wedge clip by squeezing both sides until the wedge clip dislocates itself from the connector body. Remove wedge clip unit from connector. If using a VFL, remove it from the connector and place the dust cap back onto the connector's ferrule.
11. Fan Kevlar® around connector.
12. Grip Kevlar on both sides of the connector to maintain tension. Screw boot onto back of connector to fix Kevlar firmly.
13. Cut Kevlar from around the connector.
14. For ST connectors, push ST housing over body of connector.

\*Cleavers with a guaranteed maximum 1 degree cleave angle for single-mode fibers and a maximum 2 degrees cleave angle for multimode fibers provide acceptable results.

For additional tech tips on this product, visit [communities.Leviton.com](http://communities.Leviton.com).

# TERMINATION INSTRUCTIONS | Fast-Cure® Fiber Connector Termination

## FAST-CURE ASSEMBLY INSTRUCTIONS

### PREPARE - All Connector Types:

If using 900  $\mu\text{m}$  buffered fiber, do not use crimp tube in step 1.

- Slide boot and crimp tube onto fiber, small end inserted first. **(Fig. A)**  
**For 3 mm Jacketed Fiber:** Use ribbed boot, provided.  
**For 900  $\mu\text{m}$  Buffered Fiber:** Use smooth boot, provided.  
*If using an SC connector on 900  $\mu\text{m}$  buffered fiber, you must install SC body into housing before continuing to step 2. Align body with connector housing, then insert body into housing until it snaps into place. Use dust cap to push body into housing.*
- Strip jacket and/or buffer using the measurements provided in the figure above, stripping in increments of  $\frac{1}{4}$ ". If using jacketed cable, trim aramid strands as indicated above. **(Fig. B1-3)**
- Clean exposed fiber with a 99% isopropyl alcohol wipe, followed by a lint-free wipe, both before and after stripping.
- SC & FC Connector on 3 mm Jacketed Fiber ONLY:** Insert spacer over buffer and push until it contacts jacket. **(Fig. C)**

### ASSEMBLE - All Connector and Fiber Types:

- Remove the dust cap from the connector.
- Dry fit the fiber by inserting it into the connector. This will ensure that all coating has been removed and the fiber can be inserted into the connector ferrule.
- Shake the adhesive bottle before using. Remove the cap from the adhesive bottle, and attach the needle by pressing it gently onto the top of the bottle until you feel it set into place.

NOTE: Syringes are also available for inserting adhesive.

- Insert the needle and firmly hold it against the back of the connector while filling it. Being careful not to overfill the connector, squeeze the bottle gently, injecting the adhesive into the connector. Continue until a dot of adhesive is visible at the other end, then remove the needle. Wipe away excess adhesive from the end of the ferrule.
- Using the brush attached to the lid on the bottle of primer, apply the primer to the first 10 mm of the exposed fiber. **(Fig. B1)**
- Insert the fiber into the back of the connector. To prevent premature bonding, use continuous motion until the fiber is fully seated in the connector. The primer will activate adhesive and begin the bonding process.

NOTE: The fiber should be inserted within 45 seconds of priming.

- Hold the fiber in place for 10-20 seconds, and allow up to 3 minutes for the adhesive to bond.
- If using any cable type but jacketed fiber, slide the boot back up over the back of the connector now. If using jacketed fiber, follow the steps below.

### Additional Steps For 3 mm Jacketed Cable ONLY:

- Arrange the aramid strands evenly around the end of the connector, then slide the crimp tube over the aramid strands and connector. Using a crimp tool, crimp the tube at both the large end (step 1) and the small end (step 2). **(Fig. D)**

**ST/SC - large end:** Use the .178" hex die.

**ST/SC - small end:** Use the .151" hex die.

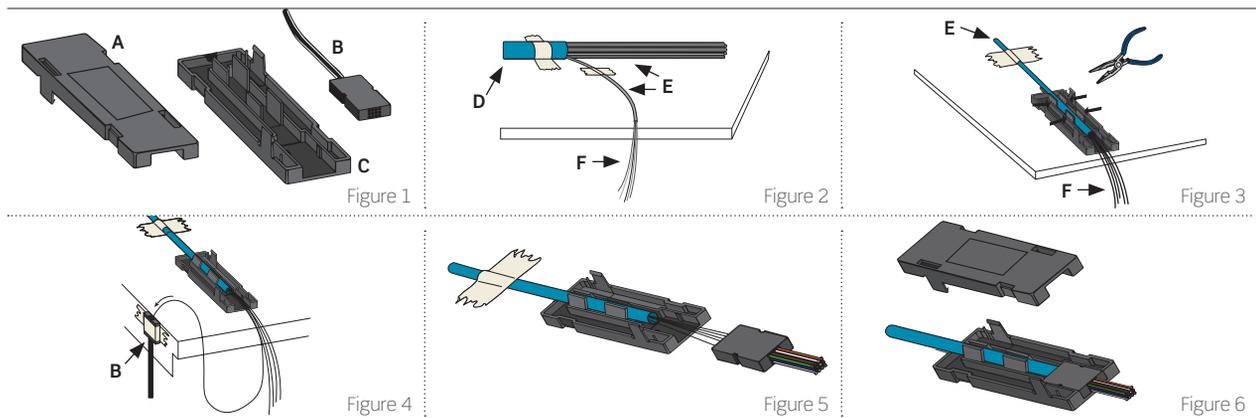

**LC:** Use the .128" hex die.

### CLEAVE AND POLISH - All Connector and Fiber Types:

- When adhesive is cured (no longer wet), scribe fiber where it meets bead of adhesive at end of ferrule. **(Fig. E)**
- Pull fiber away from connector, then properly dispose of fiber debris.
- 12  $\mu\text{m}$  "AIR POLISH" FOR SM AND MM FIBER - Begin by "Air Polishing" connector with 12  $\mu\text{m}$  polishing film. Hold edge of film with thumb and forefinger. Gently touch connector to film and rotate using approximately 18-20 one-inch circles to remove fiber stub. Scraping sound of fiber on film will cease when polishing process is complete. 12  $\mu\text{m}$  film is dark pink in color.
- Holding a lint-free wipe across fingertips, gently press connector's endface against wipe. Twist connector in place to remove any debris. Do not drag connector across the lint-free wipe.
- 3  $\mu\text{m}$  AIR POLISH FOR SM AND MM FIBER - Wipe the bottom surface of polishing puck and surface of polishing pad with a 99% isopropyl alcohol wipe.
- Place 3  $\mu\text{m}$  film on polishing pad, dull side up, then carefully set polishing puck on film. Gently insert connector into puck, and using light pressure, trace 15-20 "figure 8s" on film. Test to ensure fiber is completely polished.
- Also check to ensure that fiber is polished flush by dragging gently across lint-free wipe. Fiber should not snag. If fiber snags, continue polishing. Remove any debris using a lint-free wipe.
- Repeat steps 5 and 6 with the .3  $\mu\text{m}$  film. Leviton's 3  $\mu\text{m}$  film is yellow and .3  $\mu\text{m}$  film is light blue in color.

For additional tech tips on this product, visit [communities.Leviton.com](http://communities.Leviton.com).

# TERMINATION INSTRUCTIONS | Fiber Optic Fan-Out Kit

## FIBER OPTIC FAN-OUT KIT ASSEMBLY INSTRUCTIONS

Each kit breaks out six or twelve individual 250  $\mu\text{m}$  fibers from a loose buffered multifiber tube into individual 900  $\mu\text{m}$  buffer tubes. The fibers can then be terminated using the Fast-Cure<sup>®</sup> Connector termination procedure for 250  $\mu\text{m}$  fiber.

One fan-out kit is required for each loose buffered multi-fiber tube being terminated. Leviton recommends you read these instructions thoroughly prior to installation of the fan-out kit.

### Contents (Figure 1):

- A. Top Cover
- B. 6- or 12-Fiber Terminal Assembly Unit (24" or 36")
- C. Base

### Recommended Tools (not included with Fan-Out Kit)

Electrical or Masking Tape  
Needle Nose Pliers  
Indelible Marker  
Buffer Tube Stripper

### Also Recommended Consumables (available in Leviton's Consumables Kit PN# 49800-FAN)

Silicone RTV Sealant  
Gel Cleaner  
Alcohol Pad  
Lint-Free Wipes  
Talc Powder

### Determining Strip Length

Locate your work surface as close to the enclosure location as possible, to minimize strip length. Route the cable sheath through the enclosure to the work surface.

On the cable sheath (D), measure the length of the fan-out tube (B) plus six to twelve inches. Mark this length with a piece of tape — this is the strip point for the fiber cable sheath. (Figure 2)

### Cable End Preparation

Following your cable manufacturer's recommended stripping procedures, strip the cable sheath back to the tape mark. Secure the cable to the enclosure, then, using lint-free wipes or a gel cleaner, clean any dirt or gel surrounding the loose-buffered multifiber tubes (E). (Figure 2)

NOTE: Quantities of loose-buffered multifiber tubes may vary among cable manufacturers.

### Loose Buffered Fiber Tube Preparation

Measure the tube back 3 inches longer than your fan-out tube (B). Mark with an indelible marker, score, and strip, exposing the 250  $\mu\text{m}$  fibers (F) inside the buffer tube. Tape the buffered fiber tube to the work surface roughly 2 inches from the stripped end. (Figure 2) Wipe all gel from the exposed 250  $\mu\text{m}$  fibers using a gel cleaner.

Place buffered fiber in the base of the fan-out kit. Using needle-nose pliers, press both pairs of the crimping fixture to hold the tube. Crimp only enough to start to deform the tube. Twist and pull the fan-out tube to check if the crimp is secure. The tube should not slip or move in the crimp fixture. (Figure 3)

NOTE: For added retention, secure with a few drops of silicone RTV sealant on the crimp points of the fixture.

### Fiber Threading Procedure

Tape the terminal assembly unit (B) in the vertical position, 75 mm (3 inches) to the side of the loose buffered fiber tube. (Figure 4)

Untangle the fibers and make sure they are completely free of gel filling compound. Leviton recommends using alcohol pads or gel cleaner to remove the gel.

NOTE: To more easily thread the fiber, cup talc powder in your hand and apply to the length of the fibers.

Starting with the blue fiber, thread 150 mm (6 inches) of the fiber into the corresponding color tube of the terminal assembly unit (Figure 4). Repeat this procedure for the remaining fibers, making sure the color-coded fibers match the color-coded 900  $\mu\text{m}$  tubing.

When all the fibers have been threaded, push the fibers as a group until they start to protrude from the end of the 900  $\mu\text{m}$  fan-out tubes. Gently pull the fibers through the tubing, leaving sufficient slack so the fibers are not stressed. DO NOT PULL TAUT.

NOTE: While threading fibers through the 900  $\mu\text{m}$  tubing, gently pull the tubing straight with one hand to remove any coil.

Untape the terminal assembly unit and slide the assembly toward the loose buffered fiber tube while pulling the fibers from the end of the 900  $\mu\text{m}$  tubing. If the fibers twist, rotate the terminal assembly in the opposite direction of the twist. (Figure 5)

Place the terminal assembly unit into the mating feature in the base. For added protection, add a small bead of silicone RTV where the 250  $\mu\text{m}$  fibers enter the terminal assembly, securing the assembly and sealing the water-resistant gel (icky-pick) inside the fiber cable.

Align the top cover and snap into place (Figure 6). Remove the tape from the loose buffered fiber tube and repeat this procedure for any remaining loose-buffered multifiber tubes. Once complete, snap the cover in place.

### Fiber Enclosure Installation

Hold the fan-out kit and buffered fiber together at the point where the tube enters the fan-out kit. Install terminated connector into respective adapter port. Route 900  $\mu\text{m}$  buffered fiber around cable managers (for slack and storage). Peel tape off adhesive (on bottom of base) and place between the cable managers (or where appropriate). Route loose tube subunit around cable managers (for slack and storage), and secure loose tube cable as required.

# SPLICE TRAYS | Dimension & Selection Guide

## CHOOSING YOUR SPLICE TRAYS

Leviton offers several styles of metal and injection-molded splice trays. Use this chart to help determine which style will fit your specific needs. See pages B31, B43, and B44 for complete descriptions of splice trays, splice holders, and sleeves. For additional selections, capacity, and installation information, visit [leviton.com/splicetraysselector](http://leviton.com/splicetraysselector).

Splice Trays

TECH INFO

**NEMA AND IEC ENCLOSURE CLASSIFICATIONS**

**NEMA and IEC Enclosure Classifications Comparing NEMA Enclosure Type Numbers and IEC Enclosure Classification Designations (IP Suitability Rating)**

**NEMA**

NEMA Standards Publication 250 defines the NEMA Enclosure Type Numbers. Unlike the IEC Enclosure Classification Designations, NEMA Standards Publication 250 tests for environmental conditions such as corrosion, rust, icing, oil, and coolants. For this reason, and because the tests and evaluations for other characteristics are not identical, the IEC Enclosure Classification Designations cannot be exactly equated with NEMA Enclosure Type Numbers. The table below provides an equivalent conversion from NEMA Enclosure Type Numbers to IEC Enclosure Classification Designations. Note that the NEMA Types meet or exceed the test requirements for the associated IEC Classifications. Therefore, this table cannot be used to convert from IEC Classifications to NEMA Types.

**IEC**

IEC Publication 529, "Classification of Degrees of Protection Provided by Enclosures," defines the IP (Ingress Protection) Suitability Rating. The IP Suitability Rating is a system for classifying the degree of protection provided by enclosures of electrical equipment. The higher the number in the rating, the greater the degree of protection provided by the enclosure. The first numeral of the code indicates the degree of protection for persons against access to hazardous parts inside the enclosure or against the ingress of solid foreign objects. The second numeral indicates the degree of protection of equipment inside enclosures against damage from the ingress of water. The IP Suitability Rating defined by IEC 529 does not specify any degree of protection against mechanical damage of equipment, risk of explosions, or conditions such as moisture (i.e., condensation), corrosive vapors, fungus, or vermin.

**CONVERTING NEMA TO IEC**

| NEMA Enclosure Type Number | Equivalent IEC Enclosure Classification Designation |
|----------------------------|---|
| 1                          | IP10  |
| 2                          | IP11  |
| 3                          | IP54  |
| 3R                         | IP14  |
| 3S                         | IP54  |
| 4 and 4X                   | IP56  |
| 5                          | IP52  |
| 6 and 6P                   | IP67  |
| 12 and 12K                 | IP52  |
| 13                         | IP54  |

**IEC INGRESS PROTECTION RATING**

| Protection against solid objects |                                   |
|----------------------------------|-----------------------------------|
| 0                                | None                              |
| 1                                | Solid objects larger than 50 mm   |
| 2                                | Solid objects larger than 12.5 mm |
| 3                                | Solid objects larger than 2.5 mm  |
| 4                                | Solid objects larger than 1.0 mm  |
| 5                                | Dust                              |
| 6                                | Dust tight                        |

| Protection against water |  |
|--------------------------|--|
| 0                        | None   |
| 1                        | Vertically falling water drops                   |
| 2                        | Vertically falling water drops (up to 15° angle) |
| 3                        | Spraying water                                   |
| 4                        | Splashing water                                  |
| 5                        | Water jets                                       |
| 6                        | Powerful water jets                              |
| 7                        | Temporary immersion in water                     |
| 8                        | Continuous immersion in water                    |

**WALLPLATE MATERIALS**

**The material used to manufacture a wallplate will have a significant impact on the product's durability and suitability for certain applications.**

**THERMOSET**

Thermoset products are manufactured by applying pressure to powdered material. These types of products do not provide a high degree of resistance to impacts, chemicals, and solvents; therefore they are not suitable for heavy-duty applications. Urea is a thermoset material, and is commonly used to manufacture wallplates for use in residential or light-duty commercial applications.

**THERMOPLASTIC**

Thermoplastic products are manufactured by heating pellets of material into a liquid for injection into a mold. These materials are the preferred choice for heavy-duty applications because they provide superior resistance to impact, chemicals, and solvents. ABS, nylon, and polycarbonate are thermoplastic materials that are used to manufacture wallplates for use in commercial applications.

**STAINLESS STEEL**

Leviton manufactures wallplates from type 304 and type 430 stainless-steel materials. Type 430 stainless steel is resistant to the corrosive effects of moisture, and as such is suitable for exterior or wet applications. Type 430 stainless steel has magnetic properties that may interfere with certain equipment, such as hospital MRI and marine navigation equipment. Type 304 stainless steel is non-magnetic and is also more corrosion-resistant than type 430 stainless steel, and as such is the preferred choice for commercial applications. All QuickPort® and telephone wallplate products are manufactured from type 304 stainless-steel material. Standard wallplates are also available in type 304 stainless-steel material by using the suffix "040" in the part number.

# STANDARDS | Applications

**Leviton products and guidelines are developed consistent with all known applicable practices as defined by the following:**

- ANSI/TIA-607-C Generic Telecommunications Bonding and Grounding (Earthing) for Customer Premises
- ANSI/BICSI 002-2011, Data Center Design and Implementation Best Practices
