## CR115B

Precision Snap-Acting Limit Switches
15 Amperes Continuous

## AC/DC

Application
Designed for rugged industrial use in a small space and where highly repetitive operation is desired. These highly accurate switches require only a small amount of plunger travel to actuate.
One- and two-pole forms are available.
The basic switch is equipped with a button-type operator.
Plunger-type forms are available for mounting behind the panel with only the button protruding. Roller lever forms are available for applications requiring a transfer of the axis of motion or for detection of objects passing the switch.

Typical applications include controlling solenoids, opening and closing valves, and controlling small horsepower motors.

Features
-Wear-resistant nylon button: retains perfect alignment with operating parts.
-Rugged molded enclosure: resists arc-over and shock.
-Operating head: available in button-, plunger-, and roller-lever types; plunger operator also available as accessory kit.

Contact Ratings-AC

## Single-Pole Forms

|  | Alternating Current | Make |
| :---: | :---: | :---: |
| Volts | Mak |  |
| 115 | 40 amp | 15 amp |
| 230 | 20 amp | 10 amp |
| 460 | 10 amp | 6 amp |
| 575 | 8 amp | 5 amp |

## Double-Pole Forms

| Volts | Alternating Current |  |
| :---: | :---: | :---: |
| $0-115$ | Make | Break |
| $116-600$ | 30 amp | 3 amp |

SPST forms are suitable for control of $1 / 2$-hp motors at $115 / 230$ Volt ac. Double-pole forms are suitable for 10 amperes continuous maximum ac. Single-pole forms-15 amperes maximum ac.

## Contact Ratings-DC

## Forms with 0.02 -inch gap

|  | Direct Current-Break Ratings |  |  |
