The Cree Advantage

PROVEN, REVOLUTIONARY TECHNOLOGY

As the leading fully-integrated innovator of LED chips, components and complete lighting systems, Cree is continuously advancing our state-of-the-art LED lighting products to provide energy-efficient lighting that will look and operate as expected for years to come.

TRUE INNOVATION, SUPERIOR VALUE

Innovation — it's what drives everything we do. Cree's leadership begins with innovative materials that provide high-efficiency performance for each lamp and luminaire found within our product portfolio. With over a quarter century of experience, Cree has a deep understanding of the science behind LED lighting and provides a complete collection of indoor and outdoor LED lighting solutions to match your application.

With a large installation base of our flagship LED troffers and our industry-leading LED roadway lighting fixtures installed around the globe, Cree has a solid reputation for delivering top-performing LED lighting.

Cree remains at the forefront today, dedicated to developing new LED solutions that improve both our customers' spaces and their bottom lines. As our product lines grow, we not only build on our history of innovation, we also extend our record of delivering superior value with beautiful, energy-efficient lighting.

The Cree Advantage

CREE WAVEMAX™ TECHNOLOGY

Cree WaveMax™ Technology is a breakthrough in the execution of waveguide technology that challenges industry-standard assumptions of how light is delivered. Featuring up to 90% optical efficiency and precise optical control, Cree WaveMax™ Technology enables customers to obtain unmatched visual comfort and improved color quality without sacrificing performance. This transformative technology redefines the limits of fixture design to optimize performance and provides more aesthetic options at an unmatched customer value.

Harnessing the Benefits of Total Internal Reflection

In developing WaveMax™ Technology, Cree engineers leveraged a property known as Total Internal Reflection that captures light within the internal geometry of the optical waveguide platform. To release and control the light, Cree engineers devised yet another innovation: DiamondFacet™ optical elements – unique microscopic features located within the optical waveguide platform that extract and deliver light with exceptional control, uniformity and efficiency.

Featuring Cree DiamondFacet™ optical elements to achieve up to 90 percent optical efficiency and precise optical control, Cree WaveMax Technology can deliver unmatched visual comfort, uniform illumination and improved color quality while enabling unprecedented design capabilities and energy-saving potential for modern LED luminaires. As a result, high-CRI (color rendering index) lighting and warmer color temperatures can be achieved without sacrificing efficacy and enhancing the ability to achieve USGBC LEED® certification.

WATCH THE VIDEO

Visit www.cree.com/wavemax to watch the video.

The Cree Advantage

CREE SMARTCAST® TECHNOLOGY

Cree luminaires and dimmers enabled with SmartCast® Technology deliver essential lighting control without the complex design, installation and setup of today's lighting control systems. Integrated ambient and occupancy sensing and wireless communication are incorporated to deliver exceptional lighting performance, achieve additional energy savings over non-controlled solutions and extend product life. And now, the CR Series troffers with Cree SmartCast® Technology offer field-adjustable color temperatures that make "smart" lighting design a cinch. Projects are simplified by allowing one troffer to be used in any space regardless of color temperature preference.

Integrated Sensors

SmartCast Technology products incorporate integrated ambient light and motion sensors to achieve energy savings. Embedded sensors in each luminaire eliminate the need for up-front sensor layout design and allow for reliable detection of occupants and ambient light.

OneButton™ Setup

SmartCast Technology luminaires and dimmers automatically create intelligent groupings with OneButton Setup. The result is smart lighting that meets existing and emerging building codes and installs and sets up easier than comparable lighting control systems.

Wireless Communication

SmartCast Technology luminaires and controls require minimal additional labor to install compared to non-dimming solutions. In new construction and upgrade applications, installers can rely on a secure wireless communication between luminaires and dimmers, eliminating the need for control wiring.

WATCH THE VIDEO

Visit www.cree.com/smartcast to watch the video.

Cree LED Luminaires

High-performance LED luminaires enhanced with SmartCast® Technology.

Dimmer

Add controls where needed for building code compliance.

Motion Sensing

Prevent idle spaces from wasting energy.

Daylight Harvesting

Reap the benefits of natural light while reducing energy consumption.

Intelligent Color

Field-adjustable color temperature enables easily customizable lighting experience (in select models).

SEAMLESS INTEGRATION

Easily transform the lighting of existing or new buildings into an energy-efficient, code-compliant space.

Comparison:
Fluorescent Lighting vs. Cree
TrueWhite® Technology LED Lighting

Before: Fluorescent Lighting

Like Halogen, But Better

The Spectral Power Distribution (SPD) curves shown here provide a great way to compare the color characteristics of Cree TrueWhite® Technology with traditional technologies. At each point across the visible color spectrum, the height of the SPD curve correlates with how accurately that color is rendered by the light source. The fuller, more continuous curve of Cree TrueWhite® Technology enables our LED luminaires to precisely render a much larger color set than CFLs. The similarities in the Cree TrueWhite® Technology and incandescent SPD curves also give our luminaires their signature halogen-like light, while still using a fraction of the energy of even CFLs.

After: Cree TrueWhite® Technology LED Lighting

The Cree Advantage

CREE TRUEWHITE® TECHNOLOGY

Color is a critical element in every interior; it establishes the personality and tone of a space. It not only shapes our moods, it can influence our buying decisions and enhance our ability to learn and interact with others.

In these ways, the color rendering property of light plays a powerful role in creating spaces that appeal, inspire and inform. Fixtures powered by Cree TrueWhite® Technology use an exclusive combination of 90+ CRI, high R9 values, beautiful light characteristics and lifelong color consistency to render the true colors of everything from fresh fruit to school books, delivering value far beyond financial savings.

And unlike with other white LED technologies, the luminaire efficacy of Cree TrueWhite® products does not diminish at lower color temperatures or with higher CRI. This means our luminaires can provide warm white light with high color rendering, all with maximum luminaire efficacy – a true no-compromise solution.

The Cree Advantage

NANOOPTIC® TECHNOLOGY

Over 20 Optic Choices for the Flexibility You Need

Traditional technologies offer limited choices when it comes to optical selections. Cree has changed this with our patented and highly-efficient NanoOptic® refractor technology. Our wide range of NanoOptic options provides new possibilities for highly-optimized target illumination performance and the flexibility needed for application-specific requirements. Our NanoOptic refractor system provides superior light control with:

- More lumens delivered in the target area
- Improved uniformity ratios
- Controlled high angle brightness
- Over 20 optical distribution patterns to choose from

NanoOptic® Technology Explained

The illustration below represents the LED optical fine-tuning range that Cree outdoor luminaires can provide. The gray area shows Type II short optic coverage. The short optic can be utilized to comply with more stringent light spill and high angle brightness specifications or codes by incorporating a lower main beam. The wider blue area indicates the Type II Medium optic coverage. This optic incorporates a slightly higher main beam to allow for wider and more economical pole spacing.

The Cree Advantage

COLORFAST DELTAGUARD® FINISH

Premium Protection with Proven Results

Colorfast DeltaGuard® Finish is the finest industrial-grade finish available, is exclusive to Cree exterior products and poles, and carries an industry-leading 10-year limited warranty. Each product follows an immersion process that includes six cleaning stages, eight pre-treatment stages and an epoxy e-coat before the topcoat is applied. A baked-on ultra-durable powder topcoat is the last step to a truly outstanding finish that provides:

- Ultraviolet light resistance
- Hard surfacing
- Superior adhesion
- Corrosion resistance
- Fade protection
- Multiple finish options
- Endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions (ASTM Standard B117)

Proven Results - Salt Fog Test Results

The same 3mm thickness of powder topcoat was applied to each of these four pole section samples, which were then scored and exposed to a salt fog test for 2,500 hours. The results are clear – our Colorfast DeltaGuard finish stood up to the test, proving our ability to protect your investment even in the most grueling conditions.

Color Finish Options

Colorfast DeltaGuard is available in four colorfast finishes providing design freedom on top of premium protection.

The Cree Way

A TOTAL SYSTEMS APPROACH

Our total systems approach is a comprehensive engineering philosophy that combines the most advanced LED sources, driver technologies, optics and form into each product. The result is highly-reliable luminaire solutions for both indoor and outdoor that reduce energy consumption, extend lifetimes and maximize illumination performance and quality.

Advanced LED Technology

Inside every Cree® luminaire are top-quality Cree® LEDs, made from the finest materials and grown by experts in our very own labs. With over one billion hours of reliable LED operation logged, our proven track record explains why we offer the industry's broadest warranty.

Specialized Optics

From our patented NanoOptic® refractor system to our WaveMax™ optical design, Cree luminaires feature individually optimized optics designed for both visual appeal and precise control, maximizing photometric performance, aesthetics and color mixing all at once.

Modular Design

We do not take a one-size-fits-all approach. Rather, Cree strives to create application-specific solutions, such as our modular outdoor light engines, which can be fine-tuned to meet any illumination requirement while consuming the least amount of energy possible.

Progressive Product Development

As technology leaders, we are continuously advancing our state-of-the-art LED lighting systems to gain the highest efficiency and quality light from our luminaires. Dynamic R&D focuses on maximizing efficiency in every part of the luminaire, while Cree world-class engineering, highly experienced manufacturing teams and overall operational excellence combine to produce our distinctive top-performing LED lighting products.

Thermal Management

Excellent thermal management contributes to optimal illumination, reliability and longevity. From advanced heat sink technology to our vented outdoor housings, Cree® luminaires are designed to maximize cooling, making their unmatched performance and longevity possible.

Reliable & Optimized Drivers

The drivers utilized in Cree luminaires are extremely reliable and are specifically designed to our high-efficiency standards. A variety of drive current options provide flexibility, while our integrated sensors and controls can offer total system solutions.

Style & Performance

Cree luminaires incorporate all the critical design elements needed to deliver exceptional performance and easy installation, all without compromising style. Our modern yet low-profile designs and high quality finishes offer beautiful aesthetics to any application, indoors and out.

The Cree Advantage

BENEFITS AT EVERY TURN

Cree is the originator of today's LED lighting technology and is 100 percent committed to the continued advancement of solid state lighting. From growing our patented Silicon Carbide (SiC) materials, to developing the components, to manufacturing complete lighting systems, our entire portfolio benefits from Cree's unrelenting pursuit of developing the most advanced LED lighting available.

Proven Quality & Performance

A leading innovator of LED chips, components and lighting, Cree has over a quarter century of experience in LED lighting development. As a leading vertically-integrated LED lighting company, Cree is revolutionizing the lighting industry with the development of sustainable lighting technology that provides superior lighting performance.

Ultra-Efficient Lighting

Lighting accounts for approximately 20 percent of electricity use in both residential and commercial applications. Cree offers a complete line of indoor and outdoor LED lighting solutions that significantly reduce electricity consumption and operating costs for commercial and residential applications.

Lifetime Energy Savings

One of the main advantages of LED lighting is reduced power consumption. Cree® LED lamps and luminaires use just a fraction of the energy required to operate traditional lighting; as energy demands rise, the cost savings and carbon reduction from upgrading to LED lighting will continue to reduce operational costs.

Reduced Maintenance Costs

Maintenance cost savings is one of the major benefits realized when making the switch to LED lighting. Designed for extended life, Cree® LED lamps and luminaires will last much longer than conventional lighting, which equates to fewer replacements over time and less money spent on maintaining your lighting system.

Easy Installation & Upgrading

The products found in this catalog have all been designed with ease of installation in mind. From the standard Edison bases found on the lamps to the traditional mounting options available for our troffers and outdoor products, Cree® LED lamps and luminaires can work as a direct replacement or as a perfect fit for new lighting install opportunities.

Long-Term Financial Benefits

Cree offers some of the most energy-efficient and long-lasting LED lighting in the industry. This translates to financial savings through reduced operational costs and less money spent on maintenance due to extended product life. Depending on the application, the payback period for LED lighting typically ranges from one to three years.

Cree Quick Ship Program

AVAILABLE AND READY TO SHIP

The Cree Quick Ship Program is designed to help you receive your orders for our LED lighting products fast! When you need the highest quality LED lighting products, count on Cree Quick Ship to deliver items quickly.

Cree Quick Ship products are our most popular indoor and outdoor products ready to ship to you. No more waiting for these items to be built-to-order, as we target having them in-stock and ready to ship.

- Serve quick turn jobs and orders with products that are available to ship.
- Accelerate LED adoption by matching/beating incumbent technology availability.
- Increase your sales and create happy customers with fast shipping.

We've now added the Quick Ship logo designator on our spec sheets and website to help you readily identify qualifying products.

For more information and a complete list of Quick Ship available products, please visit:

www.cree.com/lighting/quickship

Industry-Leading Limited Warranty

Cree offers a standard 10-year limited warranty that covers the broadest product range in the industry. This covers nearly all Cree globally available commercial-grade indoor and outdoor fixtures. We also offer an industry-leading standard 10-year limited warranty covering our Colorfast DeltaGuard® Finish on all outdoor fixtures and poles. To learn more about the products covered under our standard warranty, please visit:

www.cree.com/lighting/products/warranty

INDOOR LED PRODUCTS

Cree is committed to delivering the best solutions on the market, inspired by the needs of our customers and perfected by the knowledge and expertise of our engineers. We recognize the importance of beautiful energy-efficient lighting and aspire to improve every business with uncompromising performance and payback.

INDOOR APPLICATIONS

As consumer expectations evolve, so should the environment and experiences we offer. Cree helps businesses overcome the challenges of an ever more demanding marketplace with a broad set of world-class LED fixtures that offer uncompromising performance, style and affordability.

Architectural

Cree® interior architectural lighting is both crisp and warm. With 90+ CRI and superior color rendering, your space appears vibrant, comfortable, clean and inviting.

Corporate Campus

For corporations planning newly-constructed or renovated campuses, Cree is the lighting product of choice for up to 80 percent energy cost savings and contributions toward LEED credits from the U.S. Green Building Council.

Healthcare

With healthcare ranking as the second largest energy consumer in the U.S., energy cost-saving technology like Cree's efficient LED luminaires is essential to achieve Department of Energy initiatives.

High-Bay/Low-Bay

Cree® interior high-bay lighting is the ideal source for energy-efficient illumination in large spaces and provides improved, lasting performance in cold storage facilities.

Museum & Amusement

Enhance the illumination of your exhibits and all of your guest spaces with soft accents or dramatic highlights. Significantly reduce the need for lighting maintenance and associated labor costs.

Convenience Store

Petroleum stations are attracting customers with improved Cree lighting that creates a safe environment with dramatically better visibility and the added benefit of tremendous energy cost savings.

Residential

Create a comfortable, inviting experience in your home with beautiful LED lighting — better quality light and better for the environment. With normal home usage, LED lighting typically lasts more than 20 years and uses significantly less power than traditional lighting.

Restaurant & Hospitality

Cree® luminaires are the ideal solution for multiple-location franchise installations because they offer the versatility of optical selections and upgradable modular LED lightbars to meet different lighting ordinances.

Retail & Grocery

From a safe and inviting parking area to an appealing sales floor to a well-lit warehouse, Cree offers a complete line of LED luminaires that will enhance the atmosphere throughout your entire store.

School & University

The U.S. Green Building Council sees school construction and renovation as a sector that has potential for tremendous energy cost savings by implementing environmental solutions. Schools and universities looking for sustainable lighting alternatives are selecting Cree.

LED ARCHITECTURAL DOWNLIGHTS

Cree® LED architectural downlights allow designers to meet interior lighting performance specifications while achieving beautiful color consistency. With Cree's wide range of LED lighting options, commercial and high-end spaces can achieve bright beautiful light and significant energy cost savings — a true no-compromise solution.

KR Series

p.22

- Minimum 90 CRI
- CCT: 2700K, 3000K, 3500K, 4000K or 5000K
- Up to 2650 lumens
- Utilizes Cree TrueWhite® Technology
- 5% Triac Dimming, 10% 0/1-10V Dimming; 1% Lutron EcoSystem Dimming and Lutron Forward Phase Dimming
- 4" and 6" sizes
- Cree SmartCast® Technology, Triac, 0-10V and Lutron® controls options available

LR4 Series

p.24

- Minimum 90 CRI
- CCT: 2700K or 3500K or 5000K
- 515 or 540 lumens
- Utilizes Cree TrueWhite® Technology
- 15° or 30° shield angles
- 20% dimming at 120V

Essentia® Series Recessed

p.26

- Minimum 80 CRI
- CCT: 2700K, 3000K, 3500K or 4000K
- Utilizes BetaLED® Technology
- NanoOptic® Technology for precise optical control
- 0-10V dimming
- Available as downlight, adjustable and lensed wall wash

Essentia® Series Surface Cylinder

p.28

- Minimum 80 CRI
- CCT: 2700K, 3000K, 3500K or 4000K
- Utilizes BetaLED® Technology
- NanoOptic® Technology for precise optical control
- 0-10V dimming
- Multiple light distributions available

KR Series Downlights

KR4™ Round

KR6™ Round

KR4™ Square

KR6™ Square

EXCEPTIONAL LIGHT QUALITY, CONSISTENT PERFORMANCE AND UNBEATABLE VERSATILITY.

Available in a 4-inch and 6-inch aperture, a variety of color temperatures with high-quality anodized aluminum reflector finishes and out-of-the-box dimming compatibility, the KR Series is a great solution for specification-quality downlighting.

BENEFITS

- Up to 30 percent more efficient than CFL
- Cost-effective from day one
- Reduced maintenance cycles
- High color quality

FEATURES

- 4" and 6" round or square apertures
- Efficacy up to 67 LPW
- Utilizes Cree TrueWhite® Technology
- Active color management
- Standard 10-year limited warranty
- 50,000-hour rated life
- 10% Cree SmartCast® Technology, 5% Triac, or 10% 0/1-10V dimming options
- Emergency battery backup

APPLICATIONS

- Airports, interior architectural, corporate campus, municipal, museum & amusement, restaurant & hospitality, retail & grocery

CR SERIES TROFFERS
High-Efficiency, Affordable Troffers

LR Series Downlights

SMOOTH, HIGH-END APERTURE APPEARANCE WITH A LOW-PROFILE FOUR-INCH DESIGN.

The LR4™ architectural downlight features a clean, architectural-grade aperture appearance, with up to 30-degree shield angle. Designed for use with an H4 4" architectural housing and the LT4 trims, the LR4 fixture is suitable for new construction applications. The LR4 downlight provides higher efficacy and longer life than Compact Fluorescent Lamps with the beautiful light quality that you would expect from an incandescent.

BENEFITS

- Up to 50 percent more efficient than CFL
- Reduced maintenance cycles
- High color quality
- Small 4" aperture

FEATURES

- Efficacy up to 51 LPW
- Utilizes Cree TrueWhite® Technology
- Active color management
- Standard 10-year limited warranty
- 50,000-hour rated life
- Dimmable to 20%

Essentia® Series Recessed Downlights

A COMPLETE RANGE OF PRODUCTS TO FILL THE DESIGN REQUIREMENTS OF TODAY'S COMMERCIAL SPACES AND HIGH-CEILING APPLICATIONS.

A wide product offering of Essentia® recessed downlight, adjustable and wall-wash luminaires fills architectural design requirements. Impressive lumen packages beyond 5,000 initial lumens delivered allow designers to meet strict interior lighting performance specifications with a complete LED solution. Achieve beautiful color consistency in any space when you choose Essentia luminaires.

BENEFITS

- Greatly reduced maintenance cycles
- Reduce energy consumption by up to 50 percent
- Precise optical control
- Tight color consistency

FEATURES

- Unbeatable LED lumen package
- Replaceable light source
- Upgradable optics
- Multiple color temperatures
- Narrow, medium and wide distribution patterns
- Standard 0 to 10 volt dimming control
- 4-, 6- and 8-inch square and round apertures
- 45° cut-off
- 50,000-hour rated life

Essentia® Series Surface Cylinder

Essentia® Surface Cylinder

STYLISH SURFACE CYLINDER LUMINAIRE THAT PROVIDES COLOR POINT STABILITY AND DESIGN INTEGRITY THROUGHOUT THE LIFE OF THE APPLICATION.

Interior architectural design options now include a stylish surface cylinder luminaire with the high performance and light blending flexibility that only an LED solution can provide.

The stylish cylinder luminaires feature 45-degree visual cut-off to the source. A state-of-the-art flow-through design includes an integrated heat sink for superior thermal management to optimize lumen maintenance and reliability of the luminaire.

BENEFITS

- Greatly reduced maintenance cycles
- Reduce energy consumption by up to 50 percent
- Precise optical control
- Tight color consistency

FEATURES

- Surface, pendant, cable or wall-mount options
- Variety of LED counts: 28, 42 and 56
- Wide selection of optic distributions: wide, medium, narrow and narrow spot
- Standard color temperatures: 2700K, 3000K, 3500K, 4000K

LED DOWNLIGHTS

Cree® downlights blend beauty and performance with the same superior light quality as traditional fixtures but at a fraction of the energy used. With a wide variety of configurations, Cree downlights are ideal for all recessed lighting applications — from new construction to retrofit and commercial to residential settings.

**DR Series (DR4™ / DR6™)**

p.32

- Minimum 90 CRI
- CCT: 2700K or 5000K
- 575 or 625 lumens
- Utilizes Cree TrueWhite® Technology
- 4" and 6" sizes
- Dimmable to 5%

**LR Series**

p. 34

- Minimum 90 CRI
- CCT: 2700K, 3000K, 3500K or 4000K
- 650, 1000 or 1800 lumens
- Utilizes Cree TrueWhite® Technology
- Shallow and deep recess options
- Dimmable with Triac dimmers at 120V

**CR Series (CR4™ / CR6™)**

p. 36

- Minimum 90 CRI
 - CCT: 2700K, 3000K, 3500K or 4000K
 - 575, 625 or 800 lumens
 - Utilizes Cree TrueWhite® Technology
 - 4" and 6" sizes
 - Dimmable with Triac dimmers at 120V
-

DR Series Downlights - DR4™ / DR6™

A REMARKABLE COMBINATION OF PRICE AND PERFORMANCE.

Built with Cree TrueWhite® Technology, the DR4™ and DR6™ retrofit downlights consume up to 81% less energy than traditional incandescent and halogen sources while achieving better color quality with a CRI of 90+. Dimmable to 5% with widely available traditional dimmers and ENERGY STAR® qualified, this product is ideal for use in both residential and light-commercial new construction and retrofit applications.

BENEFITS

- Instant on to full brightness and dimmable to 5%
- Exceptional light quality
- Easy installation
- Greater than 80% instant energy savings when replacing traditional incandescent sources.

FEATURES

- 575 or 625 lumens
- CCT: 2700K or 5000K
- Utilizes Cree TrueWhite® Technology
- Designed to last 35,000 hours
- 5 year limited warranty

APPLICATIONS

- New construction or upgrade for residential and commercial lighting

LR Series Downlights

UPGRADE YOUR SPACE WITH INDUSTRY-LEADING EFFICACY AND EXCEPTIONAL LIGHT QUALITY, BUILT UPON A PROVEN LED LIGHTING PLATFORM.

The LR6™ downlight delivers up to 1800 lumens of exceptional 90+ CRI light while achieving efficacy of 90 lumens per watt. This breakthrough performance is achieved by combining the high efficacy and high-quality light of Cree TrueWhite® Technology, allowing incandescent light to be replaced using 85% less energy. Available in a warm or neutral color temperature with a variety of snap-in reflector options, the LR6™ fixture is designed to easily retrofit into new or existing 6" housings, for commercial or residential use.

BENEFITS

- Up to 85 percent more efficient than incandescent
- Reduced maintenance cycles
- High color quality
- Fits in existing 6" housings

FEATURES

- Efficacy up to 90 LPW
- Utilizes Cree TrueWhite® Technology
- Active color management
- Standard 10-year limited warranty
- 50,000-hour rated life
- Standard 5% dimming

APPLICATIONS

- Airports, municipal, school & university, corporate campus, restaurant & hospitality, retail & grocery, government

LR Series Troffers

LR22™

A TROFFER DESIGN SO QUIET YOUR CEILINGS WILL WHISPER ABOUT IT FOR DECADES.

The architecturally designed recessed flat panel of the LR22™ LED troffer blends seamlessly into any ceiling and offers soft, smooth, fully-luminous light, creating a quiet ceiling that keeps spaces bright and vibrant. The innovatively thin 3.6" depth easily accommodates narrow plenums and is ideal for both retrofit and new construction. The LR22 LED troffer delivers 3400 lumens of exceptional 90 CRI light while achieving an efficacious 100 lumens per watt. This breakthrough performance is achieved by combining the high efficacy and high-quality light of Cree TrueWhite® Technology. Delivering 0-10V continuous dimming on every luminaire allows for further energy savings when utilized for even faster payback.

BENEFITS

- Beautifully soft, balanced light without the glare
- Up to 40% energy cost savings
- Payback in less than 2.5 years
- Eliminates up to 6 maintenance cycles
- DLC qualified

FEATURES

- Utilizes Cree TrueWhite® Technology
- Ultra-thin 3.6" form factor
- 100 LPW
- 10-year limited warranty
- Continuous dimming to 5% with 0-10V controls
- Designed to last for 75,000 hours L70 @ 25°C
- Recessed mounting

APPLICATIONS

- Airport, corporate campus, healthcare, municipal, restaurant, retail & grocery, school & university, government

ZR22™

EXCEPTIONAL PERFORMANCE AT AN UNEXPECTED PRICE.

The ZR Series LED troffer portfolio offers 2x2, 1x4 and 2x4 options targeted for both new construction and renovation. The ZR Series troffer delivers up to 5000 lumens of 90 CRI color quality with a pleasing aesthetic look and includes Cree SmartCast® Technology or 0-10V dimming, which increases energy savings and helps meet local energy codes. The ZR Series troffer embodies a breakthrough in balancing energy savings, visual comfort and payback.

BENEFITS

- Cree TrueWhite® Technology or 80+ CRI
- Targeted for both new construction & renovation
- Balances energy savings, visual comfort & cost payback
- Easy installation
- Superior watts per square foot

FEATURES

- 90-150 LPW
- CCT: 3500K, 4000K or 5000K
- Delivered light output of 3200, 4000 or 5000 lumens*
- 2x2, 1x4 and 2x4 options
- 0-10V dimming control (standard) or SmartCast® Technology (optional)
- Recessed mounting
- Designed to last up to 75,000 hours (standard) and 100,000 hours (HE)

*50L in 80 CRI only

APPLICATIONS

- Use in new construction or retrofit applications
- Environments where specification grade requirements meet limited budgets
- Ideal for healthcare, education, office and pharmaceutical applications

CR22™

A NO-COMPROMISE ALTERNATIVE WHEN UPGRADING OVER FLUORESCENT LIGHTING.

The CR Series architectural LED troffers deliver up to 5000 lumens of exceptional 90+ CRI light with up to 130 lumens per watt. This breakthrough performance is achieved by combining the high efficacy and high-quality light of Cree TrueWhite® Technology with a unique thermal management approach. Their compact, lightweight design easily accommodates recessed, surface mount or suspended installations. The CR Series troffers are available in a variety of color temperatures and have step, 0-10V or Lutron EcoSystem® Enabled or Cree SmartCast® Technology dimming options. With Cree SmartCast® Technology, the CR Series offers field-adjustable color temperatures that enable simplified specification, ordering and installation to provide a new level of configuration options.

BENEFITS

- Significant energy savings
- Years of near-maintenance free service
- Superior color accuracy and consistency
- Easily designed into any space; a variety of lumens, color temperatures and control options

FEATURES

- Utilizes Cree TrueWhite® Technology or 80+ CRI
- Efficacy up to 130 LPW

UR Series 4' LED Upgrade Kit

p.50

- Minimum 80 CRI
- 2- or 3-lamp configurations
- CCT: 3500K or 4000K
- 4500 lumens
- Step level to 50%; 0-10V dimming to 5%

UR Series 2' LED Upgrade Kit

p.50

- Minimum 80 CRI
- 2- or 3-lamp configurations
- CCT: 3500K or 4000K
- 3600 lumens
- Step Level to 50% or 0-10V dimming to 5%

UR Series LED Retrofit Kit

A BREAKTHROUGH IN DESIGN THAT ENABLES LED ADOPTION WITH IMPRESSIVELY FAST RETROFITTING OF T8/T12 BASED FLUORESCENT FIXTURES.

The UR Series LED Upgrade Kit delivers from 3600 to 4500 lumens of 80 CRI light while achieving up to 102 lumens per watt. The kit is available in 2' or 4' lengths equipped with an LED Driver, 2 or 3 lightbars and specially designed mounting hardware to expedite installation. The UR Series works with nearly all industry-standard 2' and 4' fixtures in various optical configurations: prismatic, parabolic, volumetric, surface wrap, etc. The energy-efficient UR Series delivers 50,000 hours of lighting for worry-free maintenance.

BENEFITS

- Non-disruptive, easy-installation
- Broad range of applications
- Significant energy savings
- Years of near-maintenance free service
- UL 1598C (retrofit) certified

FEATURES

- 80 CRI
- Efficacy up to 102 LPW at source level
- Step Level to 50% or 0-10V dimming to 5%
- 7 year limited warranty
- 50,000-hour rated life

APPLICATIONS

- Airport, corporate campus, healthcare, municipal, restaurant & hospitality, retail & grocery, school & university, government

LED SUSPENDED AMBIENT INDIRECT/DIRECT

Utilizing WaveMax™ Technology, the LN Series features an architectural, sleek design with an indirect/direct lighting system offering superior ceiling uniformity and up to 90% optical efficiency with 110 LPW at 90+ CRI. Boasting a modular light engine and optional integral SmartCast® Technology controls, design and installation are quicker and easier.

LN Series

p.54

- Utilizes Cree WaveMax™ Technology
 - 110 LPW
 - 90+ CRI
 - CCT: 3500K or 4000K
 - 3400 lumens (60% uplight, 40% downlight)
 - Utilizes Cree TrueWhite® Technology
 - Cree SmartCast® Technology or 0-10V continuous dimming to 5% (standard)
-

LN Series Suspended Ambient Indirect/Direct

LN4™

A SUSPENDED LUMINAIRE FOR THE MASSES

The LN Series features an architectural, sleek design with an indirect/direct lighting system that delivers superior ceiling uniformity and creates a comfortable visual environment. The LN4™ suspended ambient luminaire delivers up to 110 lumens per watt of Cree TrueWhite® Technology 90+ CRI illumination utilizing Cree Wavemax™ Technology and is available with up to 3400 lumens in both 3500K and 4000K color temperatures. The LN Series offers standard 0-10V dimming as well as the option for Cree Smartcast® Technology for even more energy-saving opportunities. With a modular light engine and integral SmartCast® Technology lighting controls to eliminate unnecessary parts, wiring and labor, design, ordering and installation are also drastically simpler and quicker.

BENEFITS

- Sleek and elegant architectural design
- More uniform ceiling and task illumination
- Highly efficient system with up to 90% optical efficiency and precise optical control
- Exceptionally low ceiling contrast ratio and excellent spacing between fixtures of 16+ feet
- Unique modular light engine and integral SmartCast® Technology controls simplify design and installation
- Up to 136 feet of continuous rows with one power feed
- 0-10V or SmartCast® Technology dimming control for increased energy savings

FEATURES

- Utilizes Cree TrueWhite® Technology and WaveMax™ Technology
- Efficacy: 110 LPW
- Delivered Light Output: 3400 lumens (60% uplight, 40% downlight)
- CRI: 90
- CCT: 3500K or 4000K
- Controls: Cree SmartCast® Technology or 0-10V continuous dimming to 5% (standard)

APPLICATIONS

- Grocery, industrial, education, office, retail

-

LS Series Surface Ambient

GRACEFUL DESIGN. STRIKING VERSATILITY.

Powered by Cree TrueWhite® Technology, the Cree® LS Series LED linear luminaires deliver 90+ CRI illumination and 90+ lumens per watt. Designed in a slim architectural form factor, and available in 4' and 8' lengths, the LS Series offers lumen packages of 2,500, 4,000, 5,000, 8,000 and 10,000 lumens. Flexible mounting allows for individual mount or continuous row applications for surface and suspended mount and cove installations. Optional reflectors add a streamlined appearance, enhancing the LS Series design.

BENEFITS

- Delivered lumens up to 5000 for 4 foot and up to 10,000 for 8 foot
- Exceptional light quality
- Precise optical control
- Constructed of durable 22 gauge steel
- Reflector options allow for multiple design aesthetics

FEATURES

- 90 CRI
- Cree TrueWhite® Technology
- Acrylic lens delivers a low-glare, diffused light distribution
- Surface or suspended mount
- Efficacy up to 100 LPW
- Standard 10-year limited warranty

APPLICATIONS

- Grocery, industrial, education, office, retail

WS Series

WS4™

DURABLE AND ROBUST – IDEAL FOR ENVIRONMENTALLY-DEMANDING LOCATIONS.

Constructed of one-piece molded, rugged and durable fiberglass reinforced polyester and UV stabilized impact-resistant diffused acrylic shielding, Cree WS Series meets the IP65 mechanical requirements to enable wet location installations providing protection from external elements. WS Series is ideal for low to medium mounting heights and is suitable for operating temperatures ranging from -25°C to 35°C, allowing for cold or hot weather climate installations—both new construction and upgrade applications.

BENEFITS

- Wet location listed
- Delivered lumens up to 6300
- Excellent illumination with no hot spots
- Simple, secure and durable design
- Robust construction

FEATURES

- IP65 rated
- Ceiling or wall mounting
- Efficacy up to 100 LPW
- Standard 10-year limited warranty
- 100,000-hour rated life at 25°C
- Made in the USA of U.S. and imported parts

APPLICATIONS

- Airport, Auto Dealership, Education, Government, Healthcare, Industrial & Warehouse, Municipal, Petroleum & Convenience Stores, Recreation & Public Venues, Restaurants & Hospitality, Retail & Grocery

- CCT: 4000K or 5700K
- Utilizes BetaLED® Technology
- UL damp listed
- Two-Level options
- Modular, low-profile design

Cree CXB Series High-Bay

CXB Series High-Bay Luminaire with Conical Bottom Lens

DELIVERING THE HIGHEST LUMENS PER DOLLAR AMONG COMPETING LED HIGH-BAY FIXTURES.

The CXB Series LED Low-Bay/High-Bay luminaire delivers 18,000 median and 24,000 median lumens with illumination performance to allow one-for-one replacement of 250W and 400W HID luminaires and multi-lamp fluorescent low-bay and high-bay fixtures. With exceptional rated lifetimes, zero restrike time and a compact lightweight construction, the CXB Series is a direct replacement for incumbent HID and fluorescent light sources that provides additional benefits of energy savings and significantly reduced relamp maintenance costs.

BENEFITS

- Low-profile, lightweight design
- One-for-one replacement of 250W MH, 400W MH & multi-lamp fluorescent high-bay fixtures
- Flexible mounting choices

FEATURES

- 18,000 and 24,000 lumens
- 80 CRI
- 100+ LPW
- CCT: 4000K, 5000K
- DLC qualified
- Multi-level option

APPLICATIONS

- Interior high-bay & low-bay, auto dealership, education, municipal, retail & grocery, industrial & warehouse

Cree Edge™ Series High Output

Cree Edge™ High Output

LOW COST, HIGH OUTPUT ILLUMINATION.

The Cree Edge™ High Output High-Bay luminaire is designed to deliver high lumen packages with precise optical control. Upgrade-friendly unit features a slim, low-profile design. Luminaire mount options include direct surface mount, hook and cord mounting or pendant mount. Also available with Cree TrueWhite® Technology, the Cree Edge™ High Output High-Bay helps to beautifully render true colors and deliver value beyond energy savings.

BENEFITS

- Significant energy savings potential
- Ideal for high-bay applications
- Flexible LED configurations
- Multiple mounting options

FEATURES

- 70 CRI (4000K & 5700K); 90 CRI (5000K)

CS Series Linear

DELIVERS HIGHER CRI, BETTER ENERGY SAVINGS, LONGER LIFE AND BROADER COLOR RENDERING THAN TRADITIONAL FLUORESCENT LAMPS.

The CS Series LED linear luminaire uses a highly-efficient optical design approach that integrates an upward-facing LED light strip with Cree TrueWhite® Technology and an ultra-lightweight upper reflector featuring Cree MicroMixing™ Optics. Cree MicroMixing™ Optics are formed with tiny impressions on the highly-reflective polymer material. Combined, these individual optics form a complex multi-faceted pattern that blends and redirects the light into space with precise control and color-mixing. Other additions to the advanced optics are the intelligent design and inherent features of the CS Series LED linear luminaire. The housing and reflectors are constructed of high-strength, lightweight polymers resulting in a durable and lightweight design. The multi-functional heat sink is designed to maximize cooling effectiveness by allowing free air movement around and through the luminaire. This breakthrough design enables the LEDs to consistently run cooler, providing significant boosts to lifetime, efficacy and color consistency. The heat sink also doubles as a channel for through wiring which simplifies installation, making continuous row illumination quick and easy.

BENEFITS

- Delivered lumens up to 8000
- Unmatched lightweight design
- Tool-less electrical access
- Cree SmartCast® Technology to 10% or standard dimming to 5%

FEATURES

- 90 CRI
- Cree MicroMixing™ Technology
- Active color management
- Efficacy up to 115 LPW
- Made in the U.S.A. of U.S. and imported parts
- Standard 10-year limited warranty
- 50,000-hour rated life (100-LPW units); 75,000-hour rated life (115-LPW units)

APPLICATIONS

- Retail, education, office, warehouse, light industrial, low-bay lighting

304 Series™ Interior

304 Series™ Interior

ARE YOUR CANOPY LIGHTS SAVING YOU MONEY?

304 Series™ recessed canopy luminaires are available in both IC and non-IC versions and add significant value to such applications. Available in multiple optics, LED counts and power conditions, the 304 Series™ offers design flexibility to precisely meet varying illumination requirements with the potential to reduce energy and maintenance costs in the process. Non-recessed versions are also available for pendant-mount applications such as convenience stores and warehouses.

BENEFITS

- Significant energy savings potential
- Greatly reduced maintenance cycles
- High-quality, white light
- Controlled light distribution

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Multi-Level options
- IC rated and non-IC rated available
- Adjustable mounting brackets
- Modular, low-profile design

APPLICATIONS

- Interior high-bay & low-bay, school & university

- 27° or 47° beam angles
- Dimmable with select dimmers and transformers

T8 Series

p.92

- Replaces 25 watt to 32 watt T8 fluorescent lamps
- As low as 16.5 lamp watts
- >90 CRI at 3500K or 4000K
- Compatible with multiple fluorescent T8 electronic ballasts

LBR Series Lamps

LBR-30™

BEST-IN-CLASS PERFORMANCE AND BEAUTY FOR A TRUE NO-COMPROMISE RETAIL AND ACCENT LIGHTING SOLUTION.

The LBR-30™ LED BR30 lamp delivers 600 lumens of exceptional 94 CRI light while achieving 50 lumens per watt. This breakthrough performance is achieved by combining the high efficacy and high-quality light of Cree TrueWhite® Technology. The LBR-30™ lamp is available in a warm color temperature of 2700K, is offered in 25-degree and 50-degree beam angles, and is available in both Edison and GU24 bases. The LBR-30™ BR30 LED lamp delivers higher CRI, better energy savings, longer life and broader color rendering than traditional 65-watt BR30 halogen lamps.

BENEFITS

- ENERGY STAR® qualified to last at least 25,000 hours
- 50,000-hour lifetime design in open fixtures
- 35,000-hour lifetime design in non-IC recessed downlights
- California Title 24 compliant (GU24 base)

FEATURES

- Utilizes Cree TrueWhite® Technology
- Active color management
- 1940 CBCP (25°); 785 CBCP (50°)
- Dimmable to 20% with ELV dimmers
- Suitable for damp locations
- Standard 3-year limited warranty

APPLICATIONS

- Accent, track and downlighting ideal for retail, grocery, restaurant, museum and commercial applications

MR16

FINALLY, A TRUE LED 50W MR16 REPLACEMENT LAMP.

The Cree® MR16 Series TrueWhite® LED Lamp is a true 50W halogen MR16 equivalent that delivers up to 584 lumens of superior 90 CRI with R9 >50 color quality while achieving up to 67 lumens per watt. This MR16 boasts a slim design to allow universal form and fit into most global MR16 fixtures and is available in a variety of beam angles with a color temperature of 3000K. The Cree MR16 Series TrueWhite® LED Lamp's impressive combination of greater than 80% energy savings, significant maintenance savings and pending ENERGY STAR® qualification* makes it a perfect solution for track and accent lighting.

BENEFITS

- Smaller, "perfect" fit design for increased track head compatibility
- Up to 80% energy cost savings
- Payback in less than one year
- ENERGY STAR® qualified excluding the 540 lumens (15°) version

FEATURES

- Utilizes Cree TrueWhite® Technology
- Beam Angles: 15°, 25° and 40°
- >90 CRI
- Input Power: 8.7 watts (50W eq)
- 5% dimming
- Delivered Light Output: 540 lumens (15D), 580 lumens (25D), 584 lumens (40D)

APPLICATIONS

- Accent, track and downlighting ideal for retail, grocery, restaurant, museum and commercial applications

A19P

BRILLIANTLY DESIGNED, ENERGY-EFFICIENT, LONG-LASTING LED BULBS.

The Cree LED A19 bulb delivers up to 1100 lumens of warm 2700K light or cool 5000K light, while consuming up to 85% less energy than the incandescent bulbs they replace. These lamps feature a consistent and balanced omni-directional light, turn on instantly, and are compatible with most standard incandescent dimmers. Powered by Cree's LED Filament Tower™ Technology, the Cree LED A19 bulbs are ENERGY STAR® qualified and are designed to last 25,000 hours.

BENEFITS

- ENERGY STAR® qualified to last at least 25,000 hours
- Consumes up to 85% less energy
- Instant on and mercury free

FEATURES

- 80 CRI
- 75 watt equivalent (13.5W, 1100 lumens) at 2700K
- 75 watt equivalent (13.5W, 1100 lumens) at 5000K
- 60 watt equivalent (11W, 815 lumens) at 2700K and 5000K
- 40 watt equivalent (6W, 450 and 460 lumens) at 2700K and 5000K
- Dimmable with most standard dimmers
- Shatter resistant coating or robust shatter-proof plastic for safety
- 3-year limited warranty
- Suitable for damp locations
- CCT: 2700K, 5000K (40W, 60W and 75W equivalents only)

APPLICATIONS

- Hospitality, restaurant, healthcare and residential applications

A21 Series Lamps

A21

A 100-WATT EQUIVALENT BULB THAT SIMPLY GLOWS WHILE SIPPING ENERGY.

The Cree® LED A21 bulbs deliver up to 1600 lumens of warm 2700K light or cool 5000K light, while consuming at least 82% less energy than the incandescent bulbs they replace. These lamps feature a consistent and balanced omnidirectional light source within a real glass bulb, turn on instantly, and are compatible with most standard incandescent dimmers. Powered by Cree® LED Filament Tower™ Technology, the Cree® LED A21 bulbs are designed to last 25,000 hours.

BENEFITS

- Innovative design provides omnidirectional light
- Consumes up to 82% less energy than an incandescent
- Long-lasting, ambient instant-on illumination
- Suitable for damp locations

FEATURES

- 80 CRI
- 18 watts (100 watt equivalent)
- 1600 lumens
- CCT: 2700K, 5000K
- Dimmable with most standard dimmers

APPLICATIONS

- Hospitality, restaurant, healthcare, government and residential applications

A21 3-Way Series Lamps

THREE BEAUTIFUL LIGHTING OPTIONS FOR THE PRICE OF ONE.

The Cree± 3-Way LED bulb delivers three distinct levels of beautiful, warm 2700K incandescent-like light. The Cree 3-Way LED bulb looks and lights like a traditional 3-Way incandescent bulb, but uses up to 90% less energy and is designed to last 25 times longer. Delivering 320, 820, and 1620 lumens (30W/60W/100W replacement), each step of light output is distinct and visible to the naked eye. Plus, unlike traditional incandescent 3-Ways, you can use the Cree 3-Way LED bulb in any orientation.

BENEFITS

- Innovative design provides omnidirectional light
- Consumes up to 90% less energy than an incandescent
- Long-lasting, ambient instant-on illumination
- Suitable for damp locations
- Designed to last 25,000 hours

FEATURES

- 80 CRI
- 3/8/18 watts (30/60/100W eq)
- CCT: 2700K
- For use in three-way light fixtures (non-dimmable)

APPLICATIONS

- Hospitality, restaurant, healthcare and residential applications

BR30

REMARKABLE COMBINATION OF HIGH-EFFICACY LED TECHNOLOGY AND INNOVATIVE BULB DESIGN DELIVERS THE LIGHT QUALITY YOU EXPECT FROM AN INCANDESCENT AND LASTS 25 TIMES LONGER.

The Cree LED BR30 flood light delivers 650 lumens of warm 2700K or cool 5000K light while consuming at least 85% less energy than the incandescent floods they replace. These lamps blend seamlessly into the ceiling and provide smooth, highly diffused light, and are perfectly designed for recessed cans or track lighting. The Cree LED BR30 flood lights are ENERGY STAR® qualified, dimmable, and designed to last 25,000 hours.

BENEFITS

- Softly diffused warm light
- ENERGY STAR® qualified to last 25,000 hours
- Consumes up to 85% less energy
- Instant on and mercury free

FEATURES

- 80 CRI
- 65 watt equivalent (9.5W, 650 lumens)
- Dimmable with most standard dimmers
- Shatter resistant coating for safety
- 3-year limited warranty
- Suitable for damp locations
- CCT: 2700K, 5000K

APPLICATIONS

- Commercial offices, hotels, restaurant, healthcare and residential applications

T8 Series

T8

THE MOVE TO LED JUST GOT A WHOLE LOT SIMPLER.

The Cree® linear LED T8 lamp delivers up to 2800 lumens of enhanced spectrum 90+ CRI light while achieving up to 110 lumens per watt at the system level. The innovative design allows more uplight than standard LED tubes, thereby providing a more uniform light output. The T8 lamp is available in a wide array of color temperatures and operates using existing fluorescent T8 electronic instant start, programmed/rapid start and dimmable fluorescent ballasts. The T8 lamp is easy to install and fits into linear fluorescent fixtures, making it a perfect upgrade solution where energy savings and long life are critical.

BENEFITS

- Compatible with multiple electronic T8 ballasts, including instant start, programmed/rapid start and dimmable fluorescent ballasts
- Offers up to 30% energy cost savings and payback in less than 3 years when compared to 32W fluorescent T8s
- DLC qualified (2100 lumen only)
- Designed to last 50,000 hours
- Dimmable (ballast dependent)

FEATURES

- Utilizes Cree TrueWhite® Technology
- 90 to 110 lumens per watt at system level
- Lamp Delivered Light Output: 1700-2800 lumens per LED lamp
- Lamp Watts: As low as 16.5 watts
- Input Voltage: 120—347 VAC, determined by fluorescent ballast
- CRI: 90+
- 3000K, 3500K, 4000K, 5000K
- Controls: Dimmable (ballast dependent)
- 5-year limited warranty

APPLICATIONS

- Commercial offices, hotels, restaurant, healthcare and residential applications

LED CONTROLS

At Cree, innovation doesn't stop at our world-class LED luminaires because we aim to deliver more — enhanced performance and savings from your entire lighting system. That's exactly what our new embedded digital control options offer — intelligent, fully-integrated solutions.

Cree SmartCast® Technology

p.96

- Fully-integrated solution
- Compatible with CR Series troffers, ZR Series troffers, CS Series linear luminaires, KR Series downlights and LN Series suspended ambient
- Enables continuous dimming
- Robust set of control capabilities
- Field-adjustable color temperatures with CR Series troffers

Lutron EcoSystem® Enabled

p.98

- Compatible with CR Series troffers and KR Series downlights
 - Enables continuous dimming
 - Robust set of control capabilities
-

Cree SmartCast® Technology

SIMPLY ALL YOU NEED FOR OPTIMUM LIGHTING PERFORMANCE.

Cree luminaires and dimmers enabled with SmartCast® Technology deliver essential lighting control without the complex design, installation and setup of today's lighting control systems. And now, the CR Series troffers with Cree SmartCast® Technology offer field-adjustable color temperatures that enable simplified specification, ordering and installation to provide a new level of configuration options.

BENEFITS

- Up to 70 percent savings in energy consumption compared to fluorescent*
- Up to half the cost of traditional lighting control systems
- Guaranteed compatibility
- Simplified installation and setup

FEATURES

- Innovative OneButton™ Setup
- Secure, wireless communication
- Integral ambient light and motion sensors
- Daylight harvesting
- Motion sensing

APPLICATIONS

- Currently compatible with CR Series troffers, ZR Series troffers, CS Series linear luminaires, KR Series downlights and LN Series suspended ambient
- Ideal for healthcare, hospitality, education, commercial and government applications

*Compared to traditional fluorescent luminaires without SmartCast® Technology.

Lutron EcoSystem® Enabled

ENJOY SUPERIOR QUALITY AND PERFORMANCE ADVANTAGES, PLUS ALL OF THE SCALABLE SAVINGS SOLUTIONS THAT COME WITH LUTRON ECOSYSTEM® CONTROLS.

Lutron EcoSystem® Enabled Cree® LED luminaires are designed with an intelligent, pre-tested microprocessor directly integrated into the Cree® LED driver. This design eliminates the need for additional interfaces, enabling the fixture and controls to communicate directly with each other for instant and seamless interoperability.

BENEFITS

- Guaranteed compatibility
- Simplified installation and commissioning
- Increased savings by 70 percent compared to baseline*
- Increased lifetime by 50 percent compared to baseline*
- Improved end-user experience

FEATURES

Control capabilities include:

- Continuous dimming to 5 percent
- High-end trim
- Personal control
- Occupancy sensing
- Light level scheduling
- Daylight harvesting
- Demand response

APPLICATIONS

- Currently compatible with CR Series troffers and light engines and KR Series downlights
- Ideal for healthcare, hospitality, education, commercial and government applications

*Consult www.Lutron.com for details.

OUTDOOR APPLICATIONS

Cree® outdoor luminaires offer significant energy and maintenance savings compared to traditional light sources and provide a budget-sensitive alternative to help stretch your outdoor lighting budget.

Airports

Cree® luminaires lower energy consumption and costs, reduce maintenance expenses and provide a tremendous improvement in lighting performance at airports throughout the world.

Auto Dealerships

Showcase your dealership and attract more customers with beautiful LED lighting.

Corporate & Office

For corporations planning newly-constructed or renovated campuses, Cree is the lighting product of choice for up to 80 percent energy savings and contributions toward LEED credits from the U.S. Green Building Council.

Education

The U.S. Green Building Council sees school construction and renovation as a sector that has potential for tremendous energy savings by implementing environmental solutions. Schools and universities looking for sustainable lighting alternatives are selecting Cree.

Government & Municipal

Cree products can help you meet your high-performance building goals through energy reduction and maintenance elimination.

Healthcare

With healthcare ranking as the second largest energy consumer in the U.S., the industry is turning toward energy-saving sources like Cree efficient luminaires to meet Department of Energy initiatives.

Pedestrian & Recreation

Illuminated walkways are energy-efficient, architecturally pleasing and create a safe environment.

Petroleum & C-Store

Petroleum stations are attracting customers with improved Cree lighting that creates an inviting environment with dramatically better visibility and the added benefit of tremendous energy savings.

Retail & Hospitality

Cree luminaires are the ideal solution for multiple location franchise installations because they offer the versatility of optical selections and upgradable modular LED light bars to meet different lighting ordinances.

Street & Roadway

Offering an unmatched range of lumen and optical packages for streets and roadways, Cree has the versatility needed to provide exceptional value on most streets.

LED AREA

A space can be transformed with the right outdoor area lighting. Cree's modular design and multiple choices of power condition offer the ability to fine-tune a solution that provides precisely the right amount of light in precisely the right location, all with unmatched value and energy efficiency.

OSQ Series Area

ADVANCING LIGHT THROUGHOUT YOUR SITE.

The OSQ Series blends extreme optical control, advanced thermal management and light quality to bring you the latest advancements in LED technology. And we didn't stop there — we added a clean, modern housing and versatile mounting options all with an attractive price point. Whether you have a new construction or upgrade application, the OSQ Series is perfect for parking lots, internal roadways and general site lighting.

BENEFITS

- Suitable upgrade for HID applications up to 750 Watts
- Versatile mounting configurations offer simple installation
- Slim, low-profile design minimizes wind load requirements
- Improved energy and maintenance savings
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI (4000K & 5700K); 80 CRI (3000K)

XSP Series Area

MAKING THE SWITCH TO LED LIGHTING IS AN EASY DECISION.

Designed to replace up to 400W metal halide pole-mounted area lights, the Cree XSP Series Area light provides an excellent alternative to traditional HID lighting with superior optical control to put the light exactly where it needs to go. The XSP Area leverages Cree's innovative technology, developed for the industry-leading XSP Series street lights, offering customers a premier area lighting solution covered by a 10-year limited warranty.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Field Adjustable Output option for increased flexibility
- 10-year limited warranty

Cree Edge™ Series Pole-Mounted

Cree Edge™ Area Square

Cree Edge™ Area Round

THE PRODUCT THAT HELPED START A REVOLUTION.

Successfully launched in 2007, Cree Edge™ Area luminaires helped set the standard for performance and value. Available in a variety of LED counts, multiple power conditions and more than 20 optical distributions, Cree Edge™ Area luminaires offer a scalable solution that provides exacting illumination performance. And with several upgrade-friendly mounts to choose from, product advances and the expansion of the line that now includes a truly high output solution, Cree Edge™ Area luminaires offer more value and versatility today than ever before.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI (4000K, 5700K), minimum 90 CRI (5000K)

Cree Edge™ High Output

Cree Edge™ High Output Area

IT'S A BRAND NEW NIGHT IN HIGH OUTPUT LIGHTING

With no viable alternatives, projects that required high output and high mounting height solutions were left using technologies of the past. Today, the Cree Edge™ High Output luminaire is not only able to replace up to 1000W HID, it's significantly better. Powered by Cree TrueWhite® Technology, the Cree Edge™ High Output area and flood luminaire delivers uncompromising color for outdoor spaces. With 90+CRI, true-to-life color never looked so good.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

Cree Edge™ Series Pathway

Cree Edge™ Pathway

A PATHWAY TO STYLE AND PERFORMANCE.

Cree Edge™ Pathway luminaires combine style and performance to provide unmatched value in pathway and pedestrian lighting. Available in 13", 18", 36", 42" and 8' lengths, Cree Edge™ Pathway luminaires provide shadow-free illumination in both symmetric and asymmetric distribution patterns. In addition, its lens-free design means no yellowing lens or other lens-related issues that can be typical of more traditional designs. Cree Edge™ Pathway luminaires are simply designed to provide more than a decade of near maintenance-free service.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Two-level options
- Multiple height options:
 - 13" and 18" landscape fixture
 - 36" and 42" pathway fixture
 - 8' pedestrian fixture

APPLICATIONS

- Airport, auto dealership, corporate & office, education, government & municipal, healthcare, industrial & warehouse, pedestrian & recreation, petroleum & convenience store, restaurant & hospitality, retail & grocery

LED STREET & ROADWAY

Street lighting is an important and significant investment for most municipalities. Unfortunately, high energy and maintenance costs associated with operating HID systems offer no relief to already tight budgets. Cree® LED street light products provide budget-friendly solutions that significantly reduce energy and maintenance costs without sacrificing illumination performance. You get proven energy and maintenance savings from the proven lighting leader, Cree.

RUL Series

p.118

- Minimum 70 CRI
- CCT: 4000K (+/- 300K)
- UL wet listed
- Improved illumination performance
- Significant energy and maintenance savings
- Easy Installation

XSP Series

p.120

- Minimum 70 CRI
- CCT: 3000K (+/-300K), 4000K (+/-300K), 5700K (+/-500K)
- NanoOptic® Precision Delivery Grid™ optic
- UL wet listed
- IP66 available

LEDway® Series High Output

p.122

- Minimum 80 CRI (3000K); 70 CRI (4000K & 5700K)
- CCT: 3000K (+/-300K), 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- IP66 available
- All aluminum housing

LEDway® Series

p.124

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- IP66 available
- All aluminum housing

Cree Edge™ Series

p.126

- Minimum 70 CRI (4000K & 5700K); 90 CRI (5000K)
- CCT: 4000K (+/- 300K), 5000K (+/- 300K), 5700K (+/- 500K)
- UL wet listed
- Mounting options: direct, hook & cord, catenary or pendant

RUL Series Rural Utility Luminaire

RUL Series

SUPERIOR UTILITY LED LIGHTING FOR LESS

The LED Rural Utility Luminaire provides innovation through LED technology that maximizes both the total cost of ownership and return on investment for end users requiring a 70-100W HPS or 100-175W Mercury Vapor replacement solution. By providing industry-leading efficacy of 110 lumens per watt and an industry-leading 10-year limited warranty, Cree is changing the assumptions associated with purchasing and maintaining utility and residential security lighting. While its lightweight design, tool-less entry, and easy installation make the RUL™ LED Rural Utility Luminaire an ideal solution for any contractor.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Easy Installation
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/- 300K)
- UL wet listed
- Meets CALTrans 611 Vibration Testing
- Certified to ANSI C136.31-2001, 3G Bridge and Overpass Vibration
- 10K surge suppression protection tested in accordance with IEEE/ANSI C62.41.2

APPLICATIONS

- Industrial & Warehouse, Municipal, Government, Retail & Grocery, Roadway

XSP Series Street Lights

THE SHAPE YOU KNOW WITH THE PERFORMANCE YOU NEED.

Designed to resemble traditional cobra heads but with the performance only a Cree® LED solution can provide, the XSP Series is the result of a from-the-ground-up design that provides unmatched illumination performance and value at the street level. Beyond substantial energy and maintenance savings, Cree achieves better optical control with our NanoOptic® Precision Delivery Grid™ optic than other street lighting solutions. The Cree XSP Series street light is an affordable LED solution that doesn't sacrifice performance.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Field Adjustable Output option for increased flexibility
- 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 3000K (+/-300K), 4000K (+/-300K), 5700K (+/-500K)

LEDway® Series Street Lights

LEDway - HT Mount

PROVEN PERFORMANCE, PROVEN VALUE.

Launched in 2008, LEDway® LED street lights are arguably the most successful street light in the world. Our LEDway street light has built a reputation based on performance and value. Available in 10-LED increments (20 to 120 LEDs), flexible drive currents and more than 20 optical distributions, the LEDway street light can be "right-sized" to provide exacting illumination performance that minimizes first cost while maximizing energy savings. While others can make performance promises, the LEDway street light has already delivered proven performance.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)

LED DECORATIVE STREET & ROADWAY

With the Cree® LED lighting solutions, there is no need to change the historical ambiance of the streetscape. You can simply transform existing inefficient metal halide, high pressure sodium and mercury vapor post-top luminaires into energy-efficient, low-maintenance LED luminaires. The result is improved optical control and target efficacy that combines a classic day-form style with a beautiful nightscape appearance.

DPT Series LED Post-Top Luminaire

p.130

- Minimum 70 CRI
- CCT: 3000K (+/-175K)
- Made with Cree® LED Technology
- Utilizes a standalone UL 1598 compliant light engine
- Suitable for damp locations
- 6kV surge suppression protection tested in accordance with IEEE/ANSI C62.41.2

LED Upgrade Kit

p.132

- Minimum 70 CRI
- CCT: 2700K (+/-300K), 4000K (+/-300K)
- 0-10V dimming option
- Field Adjustable Output for increased flexibility
- Reuses most of existing luminaire for little waste

DPT Series Post-Top Luminaire

DPT Series Post-Top Luminaire

MAINTAIN YOUR DAY FORM. MODERNIZE THE POST-TOP WITH EASE.

Don't get fooled into purchasing new luminaires or losing compliance with other decorative post-top lighting solutions. With the DPT Series, you can have all the great benefits of performance, energy savings and reduced maintenance of a LED luminaire, because it's designed to be a "luminaire within a luminaire." Designed to replace up to 70W Metal Halide or High Pressure Sodium and up to 175W Mercury Vapor lamps, the DPT luminaire utilizes a standalone UL 1598 compliant light engine and a universal mounting base that can be mounted in new or existing installations with both medium and mogul base sockets. Preserve the historic look of the streetscape, maintain safety and eliminate compliance hurdles with the DPT Series.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate compliance hurdles
- Reduce waste by using the existing luminaire
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 3000K (+/- 175K)
- Made with Cree® LED Technology
- Utilizes a standalone UL 1598 compliant light engine
- Suitable for damp locations
- 6kV surge suppression protection tested in accordance with IEEE/ANSI C62.41.2

LED CANOPY & SOFFIT

Commercial and retail canopy lighting plays a vital role in the appearance and perception of a business. Traditional lighting products can leave businesses looking unsafe and uninviting due to reduced light levels and random lamp outages over time. Cree® LED products can offer a better approach resulting in significant energy and maintenance savings while improving illumination performance and appearance of a business during nighttime hours.

CPY Series Canopy & Soffit

"BEST IN CLASS" PERFORMANCE STANDARD.

When compared to similar LED solutions in a typical canopy application, the CPY250™ fixture delivers up to 15% increased performance under the canopy while consuming 5 to 15% less power. Available in both flat and 1" prismatic drop lens, the CPY250™ fixture provides two illumination aesthetics to meet both the visual, as well as the vertical and horizontal illumination performance needs of a typical canopy/soffit application.

BENEFITS

- Superior illumination performance
- Quick and easy installation
- Low total cost of ownership
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- UL listed
- Flat or drop lens option
- 0-10V dimming option (120W)
- Direct surface mount or pendant mount
- Slim, low-profile design
- Exclusive Colorfast DeltaGuard® Finish

APPLICATIONS

- Airport, healthcare, petroleum & convenience store, restaurant & hospitality

228 Series™ Recessed Canopy and Soffit

INNOVATIVE MODULAR DESIGN AND EASY INSTALLATION.

228 Series™ luminaires dramatically improve site appearance while substantially reducing energy and maintenance costs. The 228 Series™ luminaires are designed for multi-purpose use in exterior canopies such as petroleum stations, drive-thru banks and restaurants, and indoor retail or industrial spaces. The flexible 30- to 90-LED configurations allow for increased visibility and safety below canopies and around building perimeters. The 90-LED luminaires are ideal for areas requiring high illuminance levels.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty
- Designed for easy installation
- Suitable for use in single or double skin canopies with 12" or 16" panels
- Serviceable from below the canopy deck

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Serviceable from below the canopy deck
- Field adjustable drive current
- Modular, low-profile design

APPLICATIONS

- Airport, auto dealership, corporate & office, education, government & municipal, healthcare, petroleum & convenience store, restaurant & hospitality, retail & grocery

304 Series™ Recessed Soffit

AN INVESTMENT IN SAVINGS THAT LOOKS GREAT FOR YEARS.

The 304 Series™ canopy luminaire can dramatically improve illumination performance while saving significant energy consumption. In addition, since it is designed to operate nearly maintenance-free for more than a decade, routine service calls and disruptions required of traditional technologies can be a thing of the past. Available in 40- or 60-LED configurations, multiple optical distributions, drive currents and mounting options, the CAN-304 is an affordable solution that's not short on performance.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- International Dark Sky Association approved
- Centrally-located driver provides ease of installation and through-wiring (daisy chaining luminaires)
- Convenient electrical inspection access from below the luminaire

APPLICATIONS

- Airport, auto dealership, corporate & office, education, government & municipal, healthcare, industrial & warehouse, pedestrian & recreation, petroleum & convenience store, restaurant & hospitality, retail & grocery, roadway

Cree Edge™ Series Surface Mount Canopy

Cree Edge™ Surface Mount Canopy

THE PRODUCT THAT HELPED START A REVOLUTION.

Successfully launched in 2007, Cree Edge™ canopy products helped set the standard for performance and value. Available in a variety of LED counts, multiple drive currents and more than 20 optical distributions, Cree Edge™ canopy luminaires offer a scalable solution that provides exacting illumination performance. Built utilizing BetaLED® Technology, Cree Edge™ canopy luminaires have continued to advance over the years and offer more value today than ever before.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle

LED PARKING STRUCTURE

There are few better opportunities for LED lighting than parking structures. Typical parking structures operate 24 hours a day, seven days a week. That's a lot of wasted energy and maintenance costs when using traditional light sources. Cree® LED solutions in this space can provide significant energy and maintenance savings, as well as improved illumination performance and reliability.

IG Series Parking Structure

IG Series

LOW-GLARE ILLUMINATION WITH HIGH-ENERGY EFFICIENCY

Lighting the parking garage presents particular challenges, and the IG Series with WaveMax™ Technology is built for the job. WaveMax™ Technology provides unmatched low-glare comfort and decreased LED source luminance to cast rich illumination that maximizes detail and defeats shadows. The IG Series delivers unprecedented low-glare illumination, exceptional energy efficiency and fast payback, redefining how you think about parking garage lighting.

BENEFITS

- Low-glare illumination
- Low energy consumption
- Easy installation
- Standard 10-year limited warranty on luminaire

FEATURES

- Minimum 80 CRI
- CCT: 4000K, 5700K
- Initial Delivered Lumens: 4,000 or 7,500 lumens
- Efficacy: 118 or 115 LPW
- Utilizes WaveMax™ Technology
- Acrylic Lenses with DiamondFacet™ optical elements
- Low profile, lightweight design
- 8% Uplight
- IP66 rated

APPLICATIONS

- Parking garage luminaires for Retail, Healthcare, Airport, Education and Government

304 Series™ Parking Structure

304 Series™ Parking Structure

AN OPERATING BUDGET'S NEW BEST FRIEND.

Although LED solutions are well-suited for many applications today, few have the potential to match the opportunity parking structures offer in terms of energy and maintenance savings. Our 304 Series™ luminaire is uniquely qualified to meet the needs in this space, providing improved illumination performance while significantly reducing energy and maintenance costs. Available in 40- or 60-LED configurations, three power conditions and multiple optical distributions, the 304 Series Parking Structure luminaire is an affordable solution that's not short on performance. Add our optional integrated occupancy sensor and make a great energy savings story even better.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K, 5700K

VG Series Vehicle Garage Luminaire

VG Series

REIMAGINE PARKING STRUCTURES WITH UNIFORM LED LIGHTING.

The VG Series parking structure luminaire delivers optimal, low-glare illumination by intelligently eliminating direct view of the LEDs with a revolutionary optical system. The state-of-the-art optical system combines the use of indirect view LEDs, an internal reflector and a precision designed lens to distribute illumination at key angles with low glare, exceptional uniformity and desirable uplight. Whether it's an existing parking structure or new construction, the VG Series with its high-performance optical system, architectural aesthetic design and low initial cost delivers where it matters.

BENEFITS

- Indirect view optical system
- Low glare and exceptional uniform lighting
- Easy and quick installation
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K, 5700K

LED FLOOD

The term flood lighting seems to imply limited optical control. Not from a Cree® lighting solution. Cree LED Flood products featuring patented BetaLED® Technology provide exacting control to meet a wide range of applications. From general illumination for parking lots to tight beams of light that precisely accent architecture and flags, Cree has the optical choices and control needed to effectively illuminate most any application.

OSQ Series

p.154

- Minimum 70 CRI (4000K, 5700K), 80 CRI (3000K)
- CCT: 3000K (+/- 300K), 4000K (+/- 300K), 5700K (+/- 500K)
- Utilizes NanoOptic® Technology
- Wattages: 112W to 223W
- cULus Listed

Cree Edge™ Series

p.156

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Modular, low-profile design

304 Series™

p.158

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Low-profile design

OL Series™

p.160

- Minimum 70 CRI
- CCT: 3500K (+/-100K), 4000K (+/-100K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Step and continuous dimming options
- 360° adjustability in 5° increments
- Available in 2-, 4- and 8-foot lengths

OSQ Series Flood

FAÇADES THAT INVITE AND IMPRESS.

Improve the overall look of your facades and signage with the OSQ™ LED luminaire. The slim, low profile design adds architectural appeal to any general flood lighting application with crisp uniform white light. With remarkable color quality and smooth white light, buildings and signage will stand out in the crowd.

BENEFITS

- Suitable upgrade for HID applications up to 750 Watts
- Simple installation and angle adjustment
- Slim, low-profile design
- Improved energy and maintenance savings
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI (4000K & 5700K); 80 CRI (3000K)
- CCT: 4000K (+/- 300K), 5700K (+/- 500K)
- Utilizes BetaLED® Technology
- Utilizes NanoOptic® Technology
- cULus Listed

APPLICATIONS

- Airport, Auto Dealership, Corporate & Office, Education, Government, Healthcare, Industrial & Warehouse, Municipal, Pedestrian, Petroleum & Convenience Stores, Recreation & Public Venues, Restaurants & Hospitality, Retail & Grocery, Roadway

Cree Edge™ Series Flood

A FLOOD LIGHTING SOLUTION WITH PRECISE OPTICAL CONTROL.

Featuring BetaLED® Technology, Cree Edge™ Flood products offer precise optical control that is not typically synonymous with flood lighting solutions. Available in multiple optical distributions as well as LED counts and power conditions, Cree Edge™ Flood luminaires offer exacting illumination performance that also maximizes energy savings.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
- Utilizes BetaLED® Technology
- UL wet listed
- Two-Level options
- Modular, low-profile design

APPLICATIONS

- Airport, auto dealership, corporate & office, education, government & municipal, healthcare, industrial & warehouse, pedestrian & recreation, petroleum & convenience store, restaurant & hospitality, retail & grocery, roadway

OL Series™ Linear Flood

OL Series™ Linear Flood

AN OUTSIDE-THE-BOX APPROACH TO FLOOD LIGHTING.

Who says floodlights can't be elegant? Our OL Series™ takes the floodlight away from the old "shoe box" design and into an aesthetically pleasing form that doesn't sacrifice performance. Available in 2-, 4- and 8-foot lengths, the OL Series is durably built for outdoor applications, but with an architectural appeal not found in many solutions today. With multiple optical distributions, LED counts and power conditions, the OL Series is versatile enough for both accent lighting or general illumination needs.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

 - UL wet listed
 - Multi-Level options
 - Modular, low-profile design
-

XSP Series Wall Pack

XSPW™

SITE SAFETY WITH LOW COST OF OWNERSHIP.

The XSPW™ LED Wall Pack leverages Cree's innovative technology, developed for the industry-leading XSP Series street lights, offering customers a premier site lighting solution that incorporates exceptional thermal management with high-quality components and an unmatched paint finish, making Cree® LED solutions highly reliable. The result is an LED system capable of providing more than a decade of near maintenance-free service.

BENEFITS

- Upgrade existing wall packs with ease
- High-quality, even illumination that is virtually maintenance free
- Up to 65% energy savings compared to Metal Halide
- Eliminate the relamping cycle
- Combine with the XSP Area for a complete site lighting solution

FEATURES

- Minimum 70 CRI
- Utilizes BetaLED® Technology
- NanoOptic® Precision Delivery Grid™ optic
- Exclusive Colorfast DeltaGuard® Finish
- Photocell, Dimming and Multi-Level options available

APPLICATIONS

- Airport, auto dealership, corporate & office, education, government, healthcare, industrial & warehouse, municipal, parking, petroleum & convenience stores, recreation & public venues, restaurants & hospitality, retail & grocery

Cree Edge™ Series Security

Cree Edge™ Security

BEING SAFE DOESN'T MEAN YOU HAVE TO SACRIFICE STYLE.

Successfully launched in 2007, Cree Edge™ security luminaires helped set the standard for performance and value. Available in 20-LED increments (20 to 120 LEDs), multiple power conditions and optical distributions, Cree Edge™ security luminaires offer a scalable solution that provides precise illumination performance. Built utilizing BetaLED® Technology, Cree Edge™ Security luminaires have continued to advance over the years and offer more value today than ever before.

BENEFITS

- Improved illumination performance
- Significant energy and maintenance savings
- Eliminate the relamping cycle
- Standard 10-year limited warranty

FEATURES

- Minimum 70 CRI
- CCT: 4000K (+/-300K), 5700K (+/-500K)
