TABLE AND CONTENTS

Welcome to State Electric Supply Company's quick reference Utility catalog. This catalog is presented as a tool for our valued customers providing a simple, easy solution for procurement of your Utility needs. It is not intended to be a representation of our complete Utility offering. Should you require additional products that are not represented here, please contact your State Electric Supply Company Utility Sales Representative. Thank you for your continued support.

Sincerely,
Your Utility Sales Team
State Electric Supply Company

Online Ordering To Request a User Name/Password

1. Visit www.stateelectric.com
2. Click "E-Business Center"
3. Click "Log In"
4. Click "Request User Name/Password" and complete the request form. Your request will be processed within 24-48 hours. A confirming email will be sent containing your User Name/Password.

ADAPTERS

THIMBLE

Used to change 1-inch pin insulator thread to 1 3/8-inch pin insulator thread.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Exterior Thread Diameter	Interior Thread Diameter	Overall Length
4257	J4023	1 3/8	1	2 1/4

ARMS

CABLE EXTENSION

For suspending cables at a distance from the pole, a No. 7903 Cable Suspension Clamp is usually used under the arm attached through the center slot to a 5/8" machine bolt with a washer under the bolt head. Cable extension from the pole is 23" for No. 7920, 41" for No. 7921. Cable clamp with attachment bolt and pole mounting bolts, or lag screws, must be ordered separately.

Hubbell Power Systems	MacLean Power Systems
7920	J7920
7921	J7921

BANDS

POLE ACCESSORIES

Deadend clevis has 13/16" hole to match rectangular holes in bands, and is attached with cone head bolt. Guy clips made in two pieces: top, 5/16" x 2 1/2" steel; bottom, 3/16" x 2 1/2" steel. A 3/4" x 2 1/2" machine bolt with cotter pin fastens thimble.

P451016	N/A

BANDS

POLE ADJUSTABLE HEAVY STYLE

These are 3/16" x 4" flat steel bands, shipped assembled with one 3/4 x 4" curved bolt and one 3/4 x 2 1/2" cone head bolt. Hot dip galvanized. Extra cone head bolts, for attaching deadend clevises and guy clips, must be ordered separately. One to eight attachments can be made from each pole band.

POLE ADJUSTABLE

Use steel Pole Bands on wood poles. Take-offs for guy and insulation attachments can be made by using connecting links (see below). Bands are shipped unassembled.

POLE SECONDARY RACK

For attaching secondary racks to tubular metal poles. Bands are equipped with 5/8" x 2" carriage bolts for attaching the racks, and 1/2" x 15/8" oval-shoulder clamp bolts for tightening bands on pole. Hot dip galvanized 1/4" x 1 1/2" steel. Made in two styles, the single type for attaching one rack and the double type for two racks.

POLE CONNECTING LINKS

Designed for use with 4-Way Adjustable Pole Bands, above. For insulator or guy attachments. Has a 1 1/4" diameter hole on one end and 15/16" holes on the other end.

Hubbell Power Systems	MacLean Power Systems	Steel Size (in.)	Length (in.)
C2030183	N/A	1/4 x 3	7 1/2

UTILITY

BAYONETS

GROUND WIRE SUPPORTS, SHIELD WIRE

For supporting overhead ground wire on wood or steel poles. Bayonets have an 11/16" hole and an 11/16" pole-mounting slot to allow for inaccuracy in boring holes. Holes at top of bayonet allow use of groundwire clamps (Not included). Bolts used to fasten corner bayonets together are included. Pole-mounting bolts and ground-wire clamps are not included.

Hubbell Power Systems	MacLean Power Systems	Angle Size (in.)
5436	J1130	2 x 2 x 1/4

C2060190	N/A
C2060192	J26190
C2060193	N/A

CUTOUT, ARRESTERS & POTHEAD

This "D" type bracket is used to mount cutouts and/or arresters directly to the pole. Three brackets may be used for three-phase application. Can be conveniently mounted or removed without removing bolts. Clean, quick mounting for single-phase application without crossarm or special pole bands.

Galvanized 3/8" x 2" steel, 7.25 or 12-inches of clearance to the face of the pole. Mounting holes accept the L portion of the NEMA cutout crossarm bracket. A grounding lug connector is provided (on C2090299/J24665 only), along with two 3/8" x 1 1/2" carriage bolts with nut, round washer and lock washer.

Hubbell Power Systems	MacLean Power Systems
C2060299	J24655
C2060547	N/A

CUTOUT & ARRESTER

Complete with bolts, nuts and washers. Crossarm brackets adjust to fit arms from 3" x 4" to 4" x 5".

CROSSARM BRACKET

POLE BRACKET

EXTENSION

Where obstructions are to be overcome and where proper clearances are required, this bracket is fastened to the pole for mounting secondary racks. Made of hot-galvanized 9-gauge steel, it is equipped with a 5/8" x 2" carriage bolt. Curved back is 3" wide.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Mounting Holes		Extension
		Center	Side	
PS2355	N/A	11/16	9/16	6
2357	J2357	11/16	9/16	9

NEUTRAL OFFSET

Designed to support the neutral wire well away from the pole. Used primarily on rural open wire construction where long spans are common and additional clearance or climbing space is required. Full-threaded 25" rod; 5/8" pin accepts ANSI 53-2 spool insulator.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Arm Length	Rod Diameter	Pole Mounting Hole Diameter
C2060004	J2552	15	5/8	1/2

NEUTRAL WIRE

Used where a neutral wire is used as one of a 3-phase circuit. Has 1 1/16" mounting slots. Non-insulating.

Hubbell Power Systems	MacLean Power Systems	Wire Size (in.)	Length Pole Bearing Surface (in.)
3470	NWB5	1/2 or under	2 1/2

POLE TOP

This bracket can be used with two pole-top pins to give additional clearance from the pole. It is mounted to the pole with 5/8" double arming bolts, extending the spread between insulators by 4" in addition to the pole diameter. The bottom slot is 1 1/16" x 1 1/4" for easy adjustment. Bracket pipe spacers may be required.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)			
		Hole Diameter	Overall Height	Hole Spacing	Steel Size
2157	N/A	11/18	10 1/2	8	1/4 x 3

POST INSULATOR CURVED BASE

This bracket can be used for mounting distribution post-type insulators from 15 kV to 34.5 kV on the side of the pole. The base has a pole-shape back for convenient installation. Brackets can be placed in a phase-overphase arrangement or can be mounted on opposite sides of the pole for "armless" construction. Insulators not included.

Hubbell Power Systems	MacLean Power Systems
C2060009	J25256-2
C2060010	N/A
C2060011	N/A

POST INSULATOR SIDE MOUNTED

The bracket is formed of high-quality 3/8" x 2 1/2" bar. It can be utilized to mount distribution post insulators from 15 kV to 34.5 kV.

Hubbell Power Systems		MacLean Power Systems		Pole Mounting Bolts (in.)	Insulator Stud Bolts (in.)

C2060162	N/A	SFHJB-85-5-30	N/A	Two 5/8	3/4

POST INSULATOR UNI-BRACKETS

Chance Uni-Brackets are a clean-appearing, low-cost method of mounting three post-type insulators atop a pole completely eliminating the crossarm. The brackets can be installed on the pole in less than five minutes, requiring only two 3/4" bolts for attachment. Uni-Brackets fit poles having a pole-top diameter from 6" to 8 1/2". Slot on top is 1 1/16" x 2 1/4".

The brackets can be adapted to a variety of distribution construction using post-type insulators from 15 through 34.5 kV.

Hubbell Power Systems	MacLean Power Systems	Insulator Stud Bolts (in.)
9183	N/A	5/8

SERVICE DEADEND

Attaches to 1 1/4" through 3" diameter service masts. Front strap is rounded to prevent damage to bail of the service clamp. Square hole at end of the front slot captures the carriage bolt head during installation and prevents slippage after installation.

Hubbell Power Systems	MacLean Power Systems	Adjustments (in.)
C2060169	J0590	1 3/4 - 3

TELEPHONE HOUSE

Used where the pole lead attaches to the building at an angle or to carry leads around the corner of a building. Used with porcelain spool insulator and a bolt which are not included.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Mounting Holes	Insulator Holes	Steel Size
8205	J2584	9/32	13/32	1/2 x 3/16

TRANSFORMER SECONDARY LEAD

The Chance Secondary Lead Transformer Bracket is a device that serves as a support for secondary lead wires. Made to clamp over the rolled edge at the bottom of the transformer, it fits all popular distribution transformers with steel tank. Clamp and bolt are hot dip galvanized steel. Bolt end has a plastic cap to prevent scratching the outer surface of the transformer. Furnished as a bracket or with insulator assembled.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Size of Insulator Bolt	Steel Size of Clamp
9113S	J6765A	1/2 x 5	5/16 x 1 1/4
9114S	J6765	5/8 x 6	5/16 x 1 1/4

CLAMPS

BONDING

Bonding Clamps make a dependable mechanical and electrical pressure contact between guy strand and anchor rod, when the guy is part of the grounding system. Used on Thimbleye and Angle-Thimbleye bolts to keep hardware-to-guy contacts tight. Also used to prevent excessive wear on guy strands and protect galvanizing. Maintains electrical continuity.

6450	J930	3	6	1 9/16	1/4 thru 7/16

GUY OFFSET

This two-bolt guy clamp with curved clamping member provides a more positive hold on the guy strand. Available with 1/2" or 5/8" bolts.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Length	Width	Strand Size
6409	J926	3 1/4	1 1/2	3/16 thru 5/16
6410	J927	4	1 5/8	5/16 thru 1/2

CLAMPS

LASHING WIRE

TYPE E

Clamp is fitted with a special clamp bolt formed with a shoulder to prevent turning while tightening. Both ends of the 1/4" bolt are peened to prevent loss of nuts during shipment or handling.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Length	Width	Strand Size
9000	N/A	1	1	1/4 thru 7/16

SUSPENSION

Clamps are used with through bolts to support cable at poles. Through bolt also serves as clamping member. One or more nuts and/or washers are used between the pole and clamp for required spacing.

Hubbell Power Systems	MacLean Power Systems	Type	Dimensions (in.)		Accommodates Strand Size
			Length	Center Hole Diameter

6519	J6550C	5/8
6520	J6551	3/4

GUARDS & STRAPS

CABLE

Protect telephone and power lines where circuits lead from underground to overhead. Guards are 14-gauge hot dip galvanized steel, formed into "U" shape. Straps are made from hot dip galvanized flat steel, shaped to fit the guards.

GUARDS

Hubbell Power Systems	MacLean Power Systems	Length (ft.)	Inside Diameter (in.)

GUY MARKERS

HALF-ROUND MARKERS

Made from an MPO formulation, markers come in yellow only. They resist whitening and have high impact resistance. Markers don't become brittle when cold. They cover completely from the ground up. Markers attach to any 3/16" to 3/4" guy strands. Clamps are located at top, middle and lower end of marker.

Each PBG is furnished with a one-bolt hardware clamp at the lower end to fit all types of guy attachments and two one-bolt strand clamps at the middle that adapts to fit guy wires from 3/16" through 3/4".

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Length	Width
84PBG2Y	N/A	84	2
96PBG2Y	N/A	96	2

ECONOMY FULL-ROUND MARKERS

Bright, high visibility markers neither bleach out to white nor crack from cold temperatures. Made of ultraviolet-stabilized high-density polyethylene, overlapping tube-like design offers full-length coverage.

Easy installation requires no tools. Replaceable standard tie strap allows the markers to be reused. Three holes permit the black self-locking nylon strap (furnished) to secure the lower end in a choice of two attachment methods — either above or over the anchor rod, illustrated below. This fastening design eliminates the cutaway section that would weaken its resistance to breaking.

Hubbell Power Systems	MacLean Power Systems	Length (ft.)	Diameter (in.)
96FRPE	N/A	8	1 1/8

FULL-ROUND MARKERS

Increased Visibility

A full 360° of 1.5" diameter high visibility yellow or orange provides increased visibility to children and adults alike. Also available in green or gray for more aesthetically inconspicuous applications. A 2 1/2" diameter marker is also available.

Increased Vandal Resistance

A unique strand trapping design has been added to the security of a concealed pigtail and a self-locking nylon strap. The guy strand passes easily in one direction only . . . into the marker.

Increased Installation

EaseEasy to install; tough to remove. Simply snap the marker over the guy and lock it in place with the self-locking nylon strap and pigtail.

Increase Installation Range

Fit guy strand diameters from 3/16" to 1/2". Increased Ruggedness for Demanding Service The UV stabilized, high impact, high density polyethylene construction has excellent color retention, cold weather properties and no cutaway sections to weaken its strength.

Decreased Costs

Not only will you save time but you'll also save money with these exceptionally affordable guy markers.

FLAME RETARDENT

SCREWS

LAG

Lag Screws of 1/4", 3/8" and 1/2" diameter have upset shoulders.

GIMLET POINT TYPE

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Diameter	Length
872112GP	J8721-1/2	1/4	1 1/2
8722GP	J8722	1/4	2
872212GP	J8722-1/2	1/4	2 1/2
DF1L3	J8723	1/4	3
DF3L3	J8773	3/8	3

FETTER DRIVE PILOT POINT

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Diameter	Length
508743	J8743P	3/8	3
508744	J8744	3/8	4
508753	J8753P	1/2	3
508754	J8754	1/2	4
508754 1/2	J8754-1/2P	1/2	4 1/2
508755	J8755P	1/2	5

TWIST-DRIVE PILOT POINT

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Diameter	Length
508500	J8754TP	1/2	4

SHACKLES

ANCHOR

Used principally for attaching suspension-insulator units to the pole. Drop forged. RUS Load Rating: 20,000 lbs.

Hubbell Power Systems	MacLean Power Systems
5801	J2742

UTILITY

SIDEWALK GUY FITTINGS

These fittings are used along sidewalks or near buildings where space is not available for standard guying.

Hubbell Power Systems	MacLean Power Systems	Pipe Size (in.)
0501	SWG2054	2
0502	SWG205	2
0512	J1502	2

SLEEVES

SERVING

For holding down the loose end of guy strand projecting beyond the guy clamp. Chance Serving Sleeves, which have a flared end to speed application, are faster to apply than wire-wrap sleeves.

Hubbell Power Systems	MacLean Power Systems	Strand Size (in.)	Overall Length (in.)
6452	J5600	1/4	1 3/8
6453	N/A	5/16	1 1/2
6454	J5602	3/8	1 3/4
6455	J5603	7/16	2
6456	J5604	1/2	2 1/4

SPACERS

PIPE

Hubbell Power Systems	MacLean Power Systems	Length Size (in.)	Pipe Size (in.)
2237	J2031	1 1/2	3/4 I.D.

STEPS

POLE

Steps are made from hot-rolled open-hearth steel. Standard Drive Hook type has fetter drive thread and pilot point for easy starting.

Hubbell Power Systems	MacLean Power Systems	Type Head	Size (in.)
506125	J1118	Hook	5/8 x 10

POLE

DETACHABLE TYPE

Steps make a neat appearance and deter unauthorized pole climbing. Installed by placing plate over lag until plate cuts into pole. Nail driven into bottom hole gives extra rigidity. Step fits on lag head. Order lags and steps separately.

POLE

LADDER-RUNG TYPE, DETACHABLE

Detachable Rung used on metal poles.

Hubbell Power Systems	MacLean Power Systems
FT70025	N/A

WOOD POLE

Hubbell Power Systems	MacLean Power Systems
PS6235	J6235
PS6236	J6236

METAL POLE

Hubbell Power Systems	MacLean Power Systems
T2050425	N/A
T2050426	N/A

POLE

LADDER-RUNG TYPE, DETACHABLE

Detachable Rung used on metal poles.

Hubbell Power Systems	MacLean Power Systems
J600007	N/A

STRAPS

REINFORCING

Used as additional support in attaching cable suspension clamps to pole for heavy loads.

Hubbell Power Systems	MacLean Power Systems
7905	J7905

SUPPORTS

STATIC WIRE

Designed to carry static wires. Load plate is welded to the rods, while the back plate can be adjusted to fit the pole. Includes 1/2" link for wire-clamp attachment.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		For Pole Diameter	Steel Size
5432	J6394	8 to 10	5/8
5433	J6395	10 to 12	5/8
5434	N/A	12 to 14	5/8

THIMBLES

GUY WIRE

Chance Guy-Wire Thimbles are primarily used with Ovaley anchor rods and bolts. Grooved to fit various strand sizes, they are made from crescent-shaped stock to prevent abrupt, strand-weakening kinks. Open end for slipping over rod or eye.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)	
		Strand Size	Guy Rod Clearance
6593	J1057	3/8	1/2 and 5/8
6594	J1058	1/2	5/8 and 3/4
6595	J1059	5/8	1

TONGUES

DEADEND

This forged steel deadend tongue may be used with virtually all strain insulator clevises and clevis type suspension insulators.

Hubbell Power Systems	MacLean Power Systems	Dimensions (in.)		
		Length	Hole Diameter	Steel Size
C2030385	J515	5	1 x 2	3/8

6806	J1089	2 O.D. x 9 Ga.	13/16	3/4

WIREHOLDERS

REINFORCED

Single-point wireholders are strong and compact. Heavy cup-base and strap is a single steel stamping, to which the screw is rigidly assembled. Insulator and strap base are assembled with solid-copper rivet.

Hubbell Power Systems	MacLean Power Systems	Screw or Bolt Size (in.)
31144	J089Z	No. 22 x 2 1/4 Galv. Wood Screw
31145	J0893Z	No. 22 x 3 Galv. Wood Screw
31146	J0894Z	No. 22 x 4 Galv. Wood Screw

UNIVERSAL SERVICE TYPE

These two pipe mounting wireholders will together accommodate a range of pipe sizes from 1 1/4" to 4". Heavy cup-base and strap is a single steel stamping, to which clamp is rigidly assembled. Insulator and strap-base are assembled with a solid-copper rivet. Two carriage bolts are wedged rigidly into the wireholder base on both models.

CLEVIS-TYPE

For use with triplex-type service cable, the No. 0192/J075 Clevis takes one NEMA 53-2 spool insulator. Insulators must be ordered separately.

Hubbell Power Systems	MacLean Power Systems	For Insulators	Dimensions (in.)	
			Mounting Screw Size	Steel Size
0192	J075	NEMA 53-2	No. 24 x 3 1/2	3/16 x 1 1/2

The Chance nylon alloy wireholder is offered as a direct replacement for porcelain wireholders. It has greatly increased fracture resistance, comparable insulation and increased ease of installation. The flat top will let you start lag-screw wireholders using a hammer. Universal installing tool is available for powered installations.

For an introductory period, each box will have two installation tools included with lag-screw wireholders. Installation tool is durable for reusability.

UTILITY

alley-arm-a side arm brace used when cross-arm is not balanced on both sides of pole but extending out on one side only.

alligator-a tie stick.

A.R.-abbreviation for automatic recloser.

baker board-platform board.

baloney-cable.

baloney bender-a wireman who works with heavy cable.

banjo-a shovel, straight blade and long handle.

bear grease-Z.L.N. electric contact aid.

becky-a cable sling.

bell-suspension or deadend insulators.

bell wrench-wrench for tightening various square head bolts.

bender-hammer.

bible-the electrician's code book.

bicycle-a chain drill for boring holes.

boatswain's chair-a small wooden seat supported by four ropes secured to a ring or tied at a common point above the workman's head.

booger wire - a neutral wire.

bookie tool-a staple puller.

bookie wheel-a measuring device.

boomer-1) a lineman who leaves one job to get to the next job. 2) a lineman who always worked on the installation of new transmission lines.

booties-meter clip insulators.

bottles-glass insulators.

box-1) porcelain enclosed type cutout. **box**-2) padmounted transformer or switchgear.

broomsticks - phase spacers, used to keep phases from coming into contact with each other at midspan.

back-to lower or attempt to lower the voltage.

buck arm-two sets of crossarms at 90 degree angles to each other.

bucket truck-an aerial lift truck for raising men high enough to work on lines from the insulated bucket of the truck.

bug-transformer (Northwest U.S. term)

bugs-solderless, usually bolted, connectors.

bug wrench-speed wrench (Fargo box ratchet type) to install bolted connectors ("bugs").

bulldog-a "come-a-long" wire grip for holding conductor or strand under tension.

bulldog wrench-an alligator wrench.

bullhorn-Epoxirod bi-unit.

bull line-heavy line for pulling in wires.

bull pen-where the construction crew gathers before and after work.

bull wheel-a reel device used to hold tension on a transmission conductor during stringing operations.

bundle-multiple strings of conductor.

bust anchor-expanding anchor.

buster-expanding and tamping bar used on expanding anchors.

butterfly-conductor take-up reel.

can-an overhead transformer.

candlestick-fiberglass downlead bracket.

can grabbers-channel lock pliers

cat head-capstan hoist.

cattle guard-a plastic or metal guy guard.

cheaters-channel lock pliers.

cherry picker-bucket truck.

chicken catcher-armsling

chicken tracks-Epoxirod tri-unit

chicken wing-steel post insulator standoff for distribution construction.

chili bowl-an oversized pin-type insulator.

choker-a nylon sling.

christmas tree-pole mounted auxiliary arm used for lifting conductors.

CLF-abbreviation for current limiting fuse.

climbers-hooks for climbing poles.

clum some-a greenhorn lineman, apprentice, helper.

coffin hoist-a chain hoist of any type.

cold-a de-energized line

come-a-long-wire grip for holding conductor or strand under tension. Also spelled *cuma-long*.

corn cob-thimble adapter pin.

coming up easy-pick up load or increase tension.

croby clip-wire rope guy wire clip.

crow's foot-Epoxirod tri-unit.

C.S.P.-completely self-protected transformer.

C.S.T.-customer subsurface transformer.

C.U.F.-current transformer, a device used to transfer current from one value to another.

cum-a-long-a wire grip for holding conductor or strand under tension. Also spelled *comea-long*.

d.a. bolt-double arming bolt.

dead man-1) wood pole, with U-bracket fitting for setting poles by hand without a truck. 2) short wood pole section, buried as an anchor. 3) any kind of earth anchor.

diaper-1) rubber blanket pinned on overhead construction; 2) Seal-A-Conn covering connector.

digging bar-long, round steel bar with 2-in. chisel on one end; ("idiot stick").

dig pole-a transition pole for going from over head to underground distribution.

disc-suspension or deadend insulator.

diving board-a platform board.

DOCO-drop-out cutout; open type cutout.

dog bone-1) special EHV yoke plates, so-called due to their shape; 2) vibration damper.

door-1) the fuse tube on open type cutouts. 2) actual door on enclosed type cutouts.

drifter-a lineman who wants to see the world.

eagle-eye-leveling crossarms by sight with no measuring instruments.

eels-line hose, temporary cover-up.

egg breaker-a guy strain insulator.

egg sucker-Grip-All stick, hot line tool.

E.H.V.-extra high voltage.

elephant ear-a high strength strain insulator.

elephant ears-1) the arc chute on certain types of cutouts for extinguishing the arc while breaking load; 2) a triangular bracket.

EPDM-rubber material used in underground elbow and other connectors (ethylene propylene diene modified).

equalizers-a pair of connectors or club when used in a fight.

eyeball-visual determination without the use of instruments.

fish-a glass strain insulator.

flip-cutout-an open link cutout.

float-1) a lineman who would quit in the middle of a job; 2) a conductor that has become untied from an insulator; 3) a conductor, insulator and pin that has separated from the crossarm and is "floating" rather than tied down.

flower pot-universal bushing well, padmount transformer.

finger-line-1/4" line.

four and a quarter-porcelain dead end insulator.

fuzz box-noisy tester.

gate-an open type cutout's fusetube.

gin-temporary lifting device; see pole buddy.

goathead-an angle-iron punch.

goathorns-guy hooks, iron.

goat-skin-tarp for covering unfinished work for the night.

gopher-a "go for this, go for that" helper.

goulash-insulating compound.

grasshopper-see flip-cutout.

ground hog-a lineman's helper.

grunt-a lineman's helper.

gut-5 kV rubber line hose.

gut wrench-cant hook.

guy jack-a chain hoist.

half-power-a lineman working off a jag.

hand-a tie stick.

hard head-a lag screw.

hard line-steel bull line for pulling in wires

headache-1) vocal warning of danger. 2) anything falling from above on pole.

high pot-to apply high potential to electrical machine, or equipment, normally done during insulation testing.

hog liver-flat porcelain guy strain insulator.

hood-insulator cover.

hooks-climbers, used for climbing poles.

hookstick-insulated disconnect stick.

hose-rubber or plastic cover up equipment

hot-a live or energized line.

hot arm-extension arm.

hot link-ball and socket link or other types of extension links.

house bracket-a secondary rack.

house knob-a wire holder.

idiot stick-see digging bar.

instant foundation-streetlight foundation.

J hook-drive and screw hook.

jack-a cutout.

jack straps - small (2-in.) blocks for pulling up small wire secondary.

jacobs ladder-a portable rope ladder.

jiffy deadend-non-compression deadend for copper.

jiggler-a glow light, secondary voltage tester.

johnny-ball-guy strain insulator.

joy jelly-silicone compound for elbow terminators.

jugs-horizontal post insulators.

juniper-a slack electrical connection between two points.

juniper holding stick-wire holding stick.

kettle-an overhead transformer.

knife switch-hook stick disconnect.

knuckle buster-an adjustable wrench.

lady slippers-name applied to present day climbers by old-timers.

leg irons-climbers, hooks.

lead head-1) nail; 2) pin with threaded lead top for porcelain insulators.

leroy-generator

lid-hard hat.

limberneck-a groundman.

line gut-conductor cover.

line profile-scaled side view drawing of actual line for engineer's review.

liners-cloth glove liners or for hard hats in the winter.

lobster claw-an adjustable insulator fork.

luff blocks-small set of rope blocks.

mac-mechanical load pick up jumper.

mack clamps-insulated jumper clamps.

meat hook-hand line hook.

mickey mouse key puller-cotter key puller.

milking stool-a yoke used on the end of a structure for supporting hot line tension tools.

moles-underground line crew.

music stand-a hot line tool rack.

narrow back-an inside electrician.

nitros-street light bulbs.

nose bag-canvas tool pouch.

nuffy putty-Seal-A-Conn for covering connectors.

O.C.B.-oil circuit breaker.

old man-an "A" frame transformer gin.

pad-a pad mounted transformer.

P.C.B.-1) power circuit breaker; opens the current under fault or overload condition. 2) polychlorinated biphenyl chemical.

pen and pencil set-digging bar and spoon.

persuader-a hammer.

phase-one (single) conductor.

pickle-fork-two or three prong tie stick.

pickles-wire connectors.

pig-cover ups.

pig livers-special yokes used on EHV lines or dead ends.

pig-tail-spiral disconnect or spiral link stick.

pigtail-the leader or cable on fuselinks.

pineapple-a spool insulator.

pistol-elbow terminator.

pistol grip-elbow terminator.

pizza plate-a fork suspension attachment.

pogo stick-telescoping tools.

pole buddy-a transformer gin.

pole crab-wire tong saddle.

pork chop-a "come-a-long"; wire grip for holding conductor or strand under tension.

pot-1) potential transformer; 2) pole-top transformer.

pole stub-pole reinforcer.

potato hook-fixed prong tie stick.

pothead-1) a point where separate or overhead electrical conductors come together and continue as cable. 2) the termination device used on end of an underground cable.

pouch-a tool bag.

P.T.O.-power take off.

rake-tie stick.

red head jumper-insulated jumper clamp.

red one-an extremely short distance.

reptile-insulating line hose.

ridge pin-pole top pin.

riser pole-a transition pole going from overhead to underground distribution.

rough neck-a trouble chaser.

saddle pin-a crossarm type pin, fits like a saddle.

sav-a-climb-universal fitting for laying lines over crossarms and through trees with a stick.

saw dust machine-a brace and bit or drill.

saw dust pump-a brace and bit, hand drill.

service drop-the conductor between pole and terminal on a building.

sharp shooter-a shovel with long narrow blade for digging holes in ground like clay.

sheaves-any type of rope block.

shoe-fly-a temporary line built to bypass a construction area.

short hook-up-cord and clips for electric drill.

shot gun stick-a Grip-All stick.

single jack-a heavy hammer.

sinker-pin pushed down through crossarm and insulator rests on crossarm.

sister eye-eyebolt or anchor rod eye for guy strand or insulator.

skywire-a ground wire on top of poles and towers to protect the lines from lightning.

slave market-an employment agency's office.

sleeve-a splice.

slip stick-a Grip-All stick.

slug-a solid blade on open type cutouts.

snake-an insulating line hose.

spool bolt-an upset bolt used to support spool insulators.

spoon-a shovel; cup-shaped with long handle.

squeeze on-a compression fitting (connectors).

squeeze wrench-hand compression or cutting wrenches.

squirrel cage-a steel bracket mounted on a pole to support line conductors.

staking-to survey and mark location for each new line pole.

slinger-1) wire from cutout to transformer. 2) a boom extension.

strong arm-a chain or strap hoist for pulling wire.

switch stick-a disconnect stick.

tag line-rope used to tie off line or to control load being lifted.

tag-out-link stick.

tap clamp-a hot line clamp.

three-phase set-three shovels; a spoon, a spade, and a shovel; all three are of different design for different uses.

thumper-underground fault locator.

thru-bolt-a machine bolt.

toilet seat-1) insulator retainer for trolley pole. A fork suspension tool attachment.

tongs-1) usually refer to pole tongs, used for controlling pole when setting 2) insulated wire tongs used for supporting or moving energized conductor. transformer 'bank' - two or three transformers at same location connected to the same circuit.

traveling chain-a movable grounding device.

traveling chair-a fabricated aluminum two-wheel trolley with an attached chain.

traveling ladder-wooden ladder with fiber rollers generally used when work or inspection has to be done on transmission hardware or conductor.

tub-pole type transformer.

tube-cable in conduit.

tupperware-plastic protective cover.

turkey wing-steel post insulator standoff for distribution construction.

two pound-a lineman's hammer.

u-bangi-1.5 kV rubber line hose.

upset bolt-see spool bolt.

URD-underground residential distribution.

walking crab-a lever lift.

waterfall-a triple drum pulley.

weatherhead-the top of the conduit that contains the customer service conductors, constructed so it will resist the action of rain, sun, etc.

westerns-also hooks, standard climbers for old-type Western Union.

wire twister-an inside electrician.

widow-a cable grip.

wiggle-a glow light, secondary voltage tester.

wiggle wire-any kind of formed wire used for securing conductors to insulators.

wildcat connection-three-phase four wire delta

wildcat leg-center tap connection on threephase four wire delta

wire bender cutout-an open link cutout.

window pole-a disconnect stick.
