Our Company

Since 1958, Himel has always been anxious to remain very close to its customers. The constant innovation in our designs, improvements in our logistics process and the continuous expansion of our world distribution network demonstrate this fact.

We are specialists in the design, production and marketing of enclosure systems which ease the implementation of your installations and protect them under any environmental conditions.

Our products adapt perfectly to each and every one of the necessities of the industrial, tertiary and domestic sectors.

Our values

Over the years, Himel has developed the values that bring it closer to its customers:

- Wide range of enclosures available near you.
- Easily adaptable, flexible universal solutions.
- Enclosures designed to simplify and carry out your installations.
- Reactivity and maximum cooperation.

Himel “Always close to you”

Himel's extensive catalogue offers technical solutions for enclosures in steel, stainless steel, thermoplastic and polyester, including the elements for thermal control in the interior of the enclosure and a very wide range of accessories to facilitate the construction of your equipment.

In this way, we can always be close to your applications, whether they are for electrical distribution, industrial control and automatism or voice and data networks, in the industrial, infrastructure, tertiary or residential markets.

The communication link with our customers is established by means of our extensive sales network, which offers you highly-qualified, professional personal treatment, satisfying all your needs and keeping you constantly informed of our products and services.

Himel in the world

During the last 25 years, Himel has been implanting an intense strategy of internationalisation. This has made it possible for our enclosures today to be protecting thousands of installations in the five continents, with a total guarantee of quality.

Thanks to a wide, professionalized distribution network, we have succeeded in locating our range of enclosures always close to where you are, available for rapid, sure delivery in most of the countries in the world.

A will of iron to achieve quality, service and reactivity to our customers' demands, has allowed us to consolidate a position of leadership in the enclosures market, which permits us to continue developing advanced solutions for protecting your future installations, wherever they may be.

Logistics are the key

One of the reasons for our success is the importance we attach to logistics. Our commitment to serving our customers, in an increasingly efficient manner all over the world, impels us to make efforts in logistical innovations that are applied to all processes of storage, transport, distribution and marketing.

We apply new database, automatic identification, and packaging technologies which ensure that waiting times are minimal, that errors are not produced, that the products are well transported and that handling and storage are simple.

Logistics thus become a competitive advantage, which permits delivery periods to be shortened and, most important of all, allows us to provide customers with an excellent service.

Ranking and classification of the products and their different components

Each product line is composed of different sections: title page, introduction, panorama, explanations, selection table, product and description, panel of models and references, dimensions and diagrams, basic components, installation systems, accessories and complements.

These sections are coded as follows:

Ranking coding:

Colour corresponding to product line

Colour corresponding to systems

Colour corresponding to accessories

Classification of the enclosures in the chapters

Ranking coding:

1. Product lines section

- 1.1. Sub-index.
- 1.2. Introduction.
- 1.3. Tables of description by selection type.
- 1.4. Tables of selection by type.
- 1.5. Main points.
- 1.6. Models, measurements, references, diagrams.

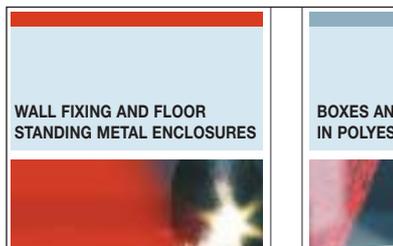

2. Systems section

- 2.1. Selection tables.
- 2.2. Product description, tables, diagrams.

3. Accessories section

- 3.1. Selection tables.
- 3.2. Product description, tables, diagrams.

In the selection tables, you will find, duly indicated, the product's degree of protection, plus a small summary of the page where this enclosure is located, for your complete information.

Detail colour code for title pages

Himel and the environment

At Himel, we are committed to our planet. Therefore, we have a company culture that is absolutely respectful of the environment. We integrate into our strategic decisions the development manufacturing products and processes that optimise energy consumption and permit recycling.

All our factories have obtained the **ISO 14001 Certificate of Environmental Management**, the maximum institutional recognition for Himel's efforts towards the development and application of clean technologies in production processes, which reduce environmental impact and contribute to the conservation of the environment.

At Himel, quality is not improvised

Quality at Himel is an indispensable requirement to guarantee that our customer's needs are met.

It is the result of integral management, which encompasses both the staff of the company and our suppliers in this philosophy. The Company Registration Certificates **ER-008/1/91** and **ER-009/1/91** according to **UNE-EN-ISO-9001** granted by **AENOR**, reaffirm the validity of the management systems for ensuring the quality of our products. Products which have been tested and certified by the most prestigious international organisms.

User's guide

In this section, which we call the "User's Guide", we define the visual codes necessary to better understand and use this catalogue.

Inside, the graphic elements are explained that define the composition, structure, colour and other components of the different chapters, so as to facilitate a rapid and efficient search for anything that may be of immediate interest.

2005 General Catalogue Sectional chapters

This Catalogue, in addition to the different general information sections, consists of 6 chapters, each of which corresponds to a range of our products. You will find these chapters duly paginated in the general table of contents and in the particular sub-indexes.

An identifying colour has been established for each of the sections making up the catalogue and this indicates in which section it is located throughout the catalogue. You will also find this colour coding on the side of the catalogue to help you to look for the different product ranges.

Both the list of contents and the entries to the different chapters include this coding, so that you can always know which section of the catalogue you are reading.

Wall fixing and floor standing metal enclosures

■ **Wall mounting steel enclosures**

CRN: Made from a continuous length of sheet steel.

■ **Control boxes system CM:** Designed to fit human-machine dialogue elements.

■ **Floor industrial enclosures CMO:** Monobloc construction and door reinforcement 11 × 13 mm drilling with a 25 mm pitch for mounting of accessories.

■ **Industrial cubicle system OLN:** Triangular closed profile structure with welded top and base and vertical bolted on profiles for maximum versatility.

■ **Monobloc control desks PK:**

Excellent internal accessibility together with a wide range of applications and installations.

■ **Stainless steel enclosures**

CRSX-CMOX: Made from AISI 304 quality stainless steel with a mechanical polish for an excellent surface quality.

■ **Metal enclosures for electromagnetic protection EMC:**

Made from especial ALU-ZINC 150 sheet metal, which gives good reflection of electromagnetic waves.

ding metal enclosures ss and strenght

CRSX stainless enclosures are particularly suitable for corrosive environments where a high degree of cleanliness is required: food, pharmaceutical, petrochemical industries..., etc.

The main feature of OLN cubicles is that they can be joined together to form large bay switchboards and their full accessibility.

Amongst the various OLN installation systems the PC application is paramount.

CRN wall mounting steel enclo

Front rain gutter avoids the entry of water, oil or liquids which ensures IP66 protection and protects the inside surface when opening the door.

A complete range of mounting plates suitable for most types of installations.

Embedded cable gland plate and entrance, leveled with the base, with a neoprene seal. Insulated cable gland plates with pre-punched holes for easy cable entry available as accessory.

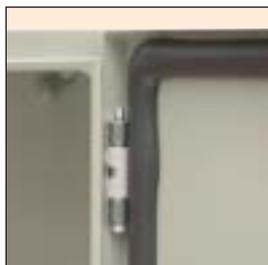

Back of enclosure with four M8 × 15 welded studs with built-in spacers for fixing of mounting plate and adjustable supports. Wall fixing holes sealed with plastic plugs to assure the protection degree.

sures suitable for all applications

Wall fixing brackets fixed from the outside and can be placed both horizontally or vertically. Not included as standard supply.

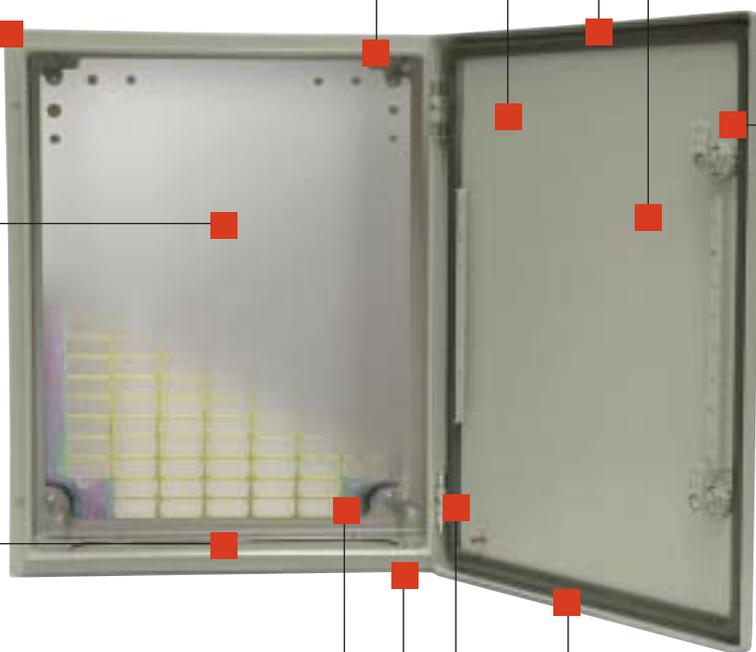

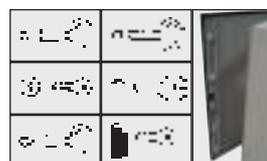

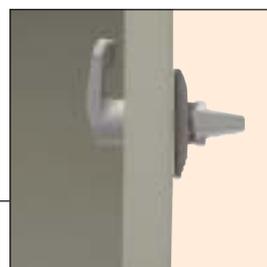

Foamed-in polyurethane gasket guarantees watertightness for years. Perforated door reinforcement profiles allowing fixing of equipment in up to 400 mm high enclosures.

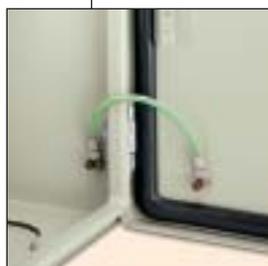

Transparent tempered glass door and fully watertight, maintaining IP66 protection.

Built in standard double bar locking system and three points locking for two doors enclosures and 1200 mm high enclosures. Different lock combinations available.

Depth adjustable support with positions every 12.5 mm.

Two M6 × 15 welded earth studs on the back and one M6 × 15 stud on the door. Easily reversible door, fitted with two or three invisible hinges allowing 120° opening.

IP66 (EN 60529)

**CRN 54/200**

Metal enclosures made from a continuous length of sheet steel double folded at the front, with back welded to the frame. Both externally and internally protected with polyester epoxy resin grey paint to RAL-7032 texturized.

- Concealed and easily removable hinges allowing over 120° door opening.
 - Single plinth **ZUN**, 100 mm and 200 mm high, available for models 600, 800 and 1000 mm width and 300 mm depth.
 - IP66 for one door enclosures.
 - IP55 for two doors enclosures.
- New series **CRN...KT** with transparent security glass door.
 - Depth adjustable mounting plate supports.
 - Perforated door reinforcement profiles allowing fixing of equipment on models up to **CRN-54/150**.

** For 1200 mm width.

Mounting plates

A comprehensive range of mounting plates consisting of 3 models suitable for most types of installations.

- Bichromated zinc-coated metal plates with holes for fixing of accessories and earthing strip.
- Insulating bakelite plates.
- Galvanized steel mounting plates with 3.6 Ø drillings (12.5 mm thread) for fixing of equipment through self-tapping 4.2 Ø mm bolts and M4 trilobular bolts.
- Perforated plates for quick fixing of equipment made of bichromated zinc-coated steel. The perforated plate with fixing nuts ensures that equipment can be fixed in any position.

Dinimel DLM distribution chassis

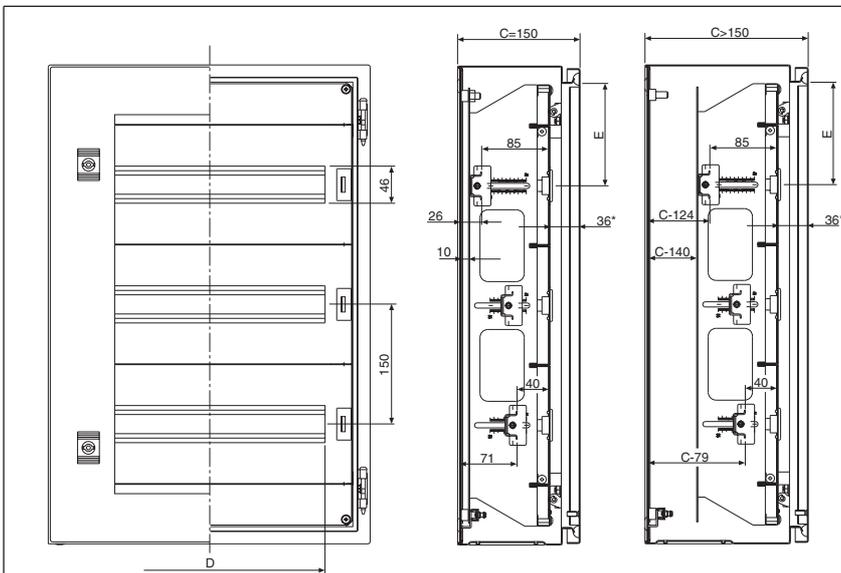

CRN 43/150 + DLM-24P

Distribution chassis assembly for modular equipment, ref.: **DLM-...** with adjustable distance between the 35 mm symmetrical profile and cover plate from 40 up to 85 mm.

- Chassis made of galvanized steel.
- Blank cover plate and metal frame painted to RAL-7032. Quick fixing without screws.
- Identifying circuits system included in the standard supply.
- Terminal blocks for earth and neutral wiring ref.: **RBLZ/21656** supplied as standard.

* For enclosures with KT door remove 4 mm.
 Note: On 150 mm deep enclosures, the DLM chassis can be fixed to the front or the back of the enclosure. For deeper enclosures, a MM, MB, MF... mounting plate can be fixed to the back. In this case, the chassis can be adjusted in depth through the SDCR supports sold separately.

Fixed and swing 19" racks

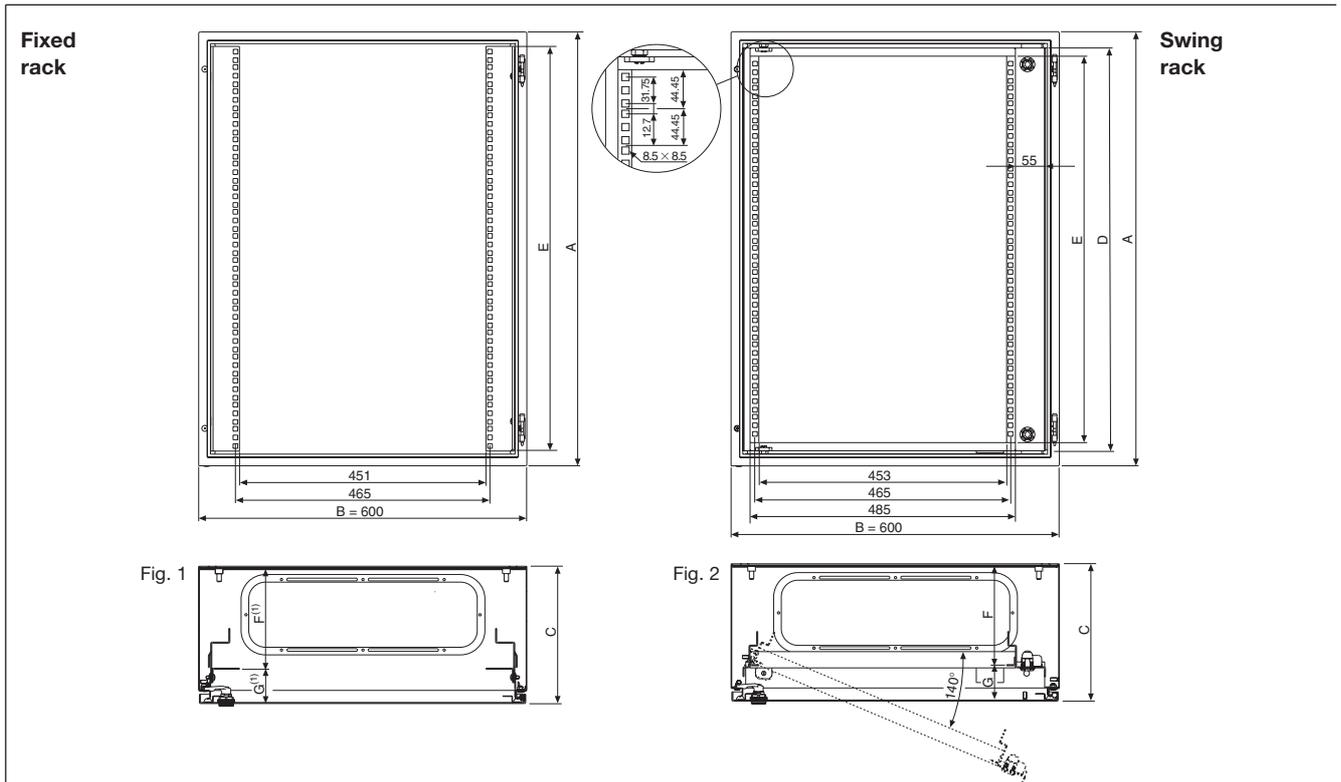

CRN 46/300 KT + BRP 7/CRN

Racks to fit directly to 600 and 800 width CRN enclosures.

- Perforated 19" rack system with □ 8.5 drillings every 44.45 mm.
- Double bar locking mechanism and reversible door.
- Fixed rack made in galvanised sheet steel and swing rack textured epoxy-polyester paint finish colour grey RAL-7032.
- Fixed rack depth adjustable by SDCR adjustable supports.

NOTE: F and G can be modified when fixing BRF racks to the SDCR supports.
Enclosures with aluminium PACRN door G is 15 mm more. Enclosures with glazed KT door G is 4 mm less.

**CRN 86/400 EP KT**

19" metal enclosures for electronic applications with back and transparent **KT**, door that can fit fixed or swing 19" Racks with \square 8.5 mm drillings every 44.45 mm.

- 5 heights: 4, 7, 9, 13 and 16 units for swing racks and 5, 8, 10, 14 and 17 units for fixed racks.
- Depth 400 mm.
- Made of sheet steel painted to RAL-7032.
- **KT** transparent templated glass reversible door.

- 3 points lock from 700 mm height.
- Fixed rack depth adjustable on 25 mm pitch with adjustable supports (to be ordered separately).
- Cable gland plates.
- Earth welded stud.

Fixed chassis

Swing chassis

IP66 (EN 60529)

Two bodies enclosures

**CRN 86/500E 17U KT**

Swing frame metal enclosures for electronic applications with three parts: back, frame and **KT** door, 19" fixed rack with □ 8.5 holes every 44.45 mm.

- 5 heights: 5, 8, 10, 14 and 17 U.
- 2 depths: 400 and 500 mm.
- Made of sheet steel painted to RAL-7032.

REAR PANEL

- Depth 150 mm.
- Internal attachment point for fixing of various supports.
- Hinges and closure system with body.
- Top and bottom cable gland plates.

BODY

- Usable depth 200 or 300 mm.
- Two 19" uprights in treated steel, set back 100 mm from front face.
- Intermediate body mounted on rear panel with 180° hinges.

DOOR

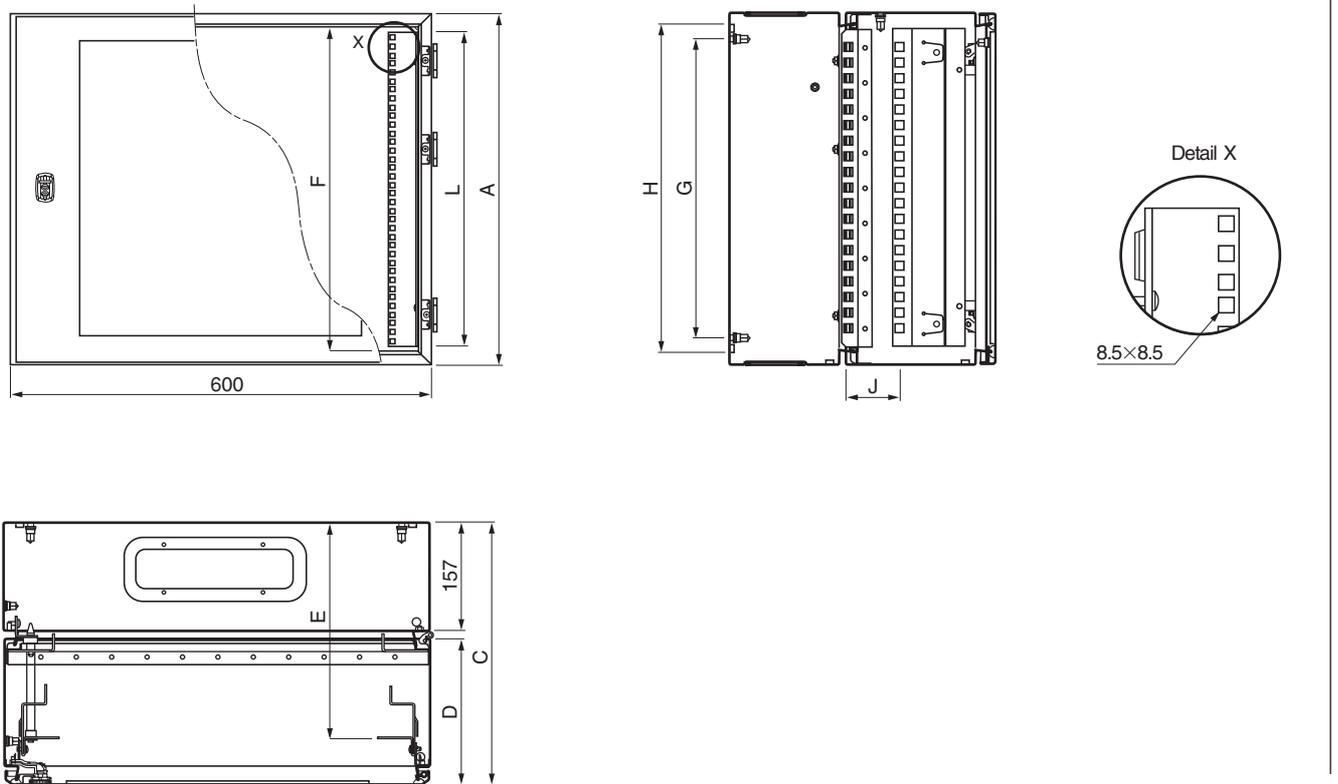

- KT transparent templated glass.
- 120° opening with 2 or 3 hinges.
- 3 points lock from 700 mm height.

Key lock type 405		TEL/ML
Safety cylinder lock		TER/ML

Internal doors

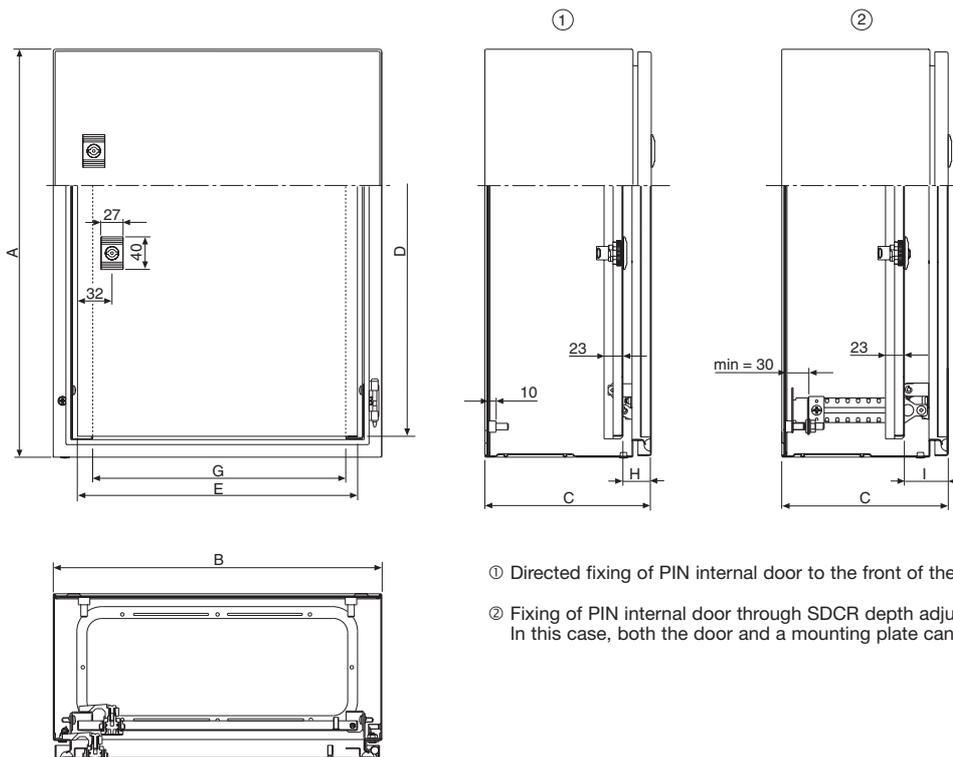

Internal door set for fixing to the front of the enclosure. The internal door can also be adjusted in depth through **SDCR** supports. Enables positioning of the mounting plate by making it depth adjustable. Made of sheet steel protected with polyester epoxy grey paint to RAL-7032. Vertical reinforcing profiles are included on up to 800 mm high doors.

CRN 54/200 + PIN 54

To fit to enclosures		Reference	D	E	G	H	I min.

1200	800	PIN 128	1149	741	708	32	52

For glazed door enclosures, H is 4 mm less.

- ① Directed fixing of PIN internal door to the front of the enclosure.
- ② Fixing of PIN internal door through SDCR depth adjustable supports. In this case, both the door and a mounting plate can be adjusted.

Aluminium glazed door

Polycarbonate transparent doors with anodized aluminium frame of great resistance and lightness. Black paint to RAL-9005.

- Maximum viewing area.
- Excellent finish.
- 120° opening.
- IP40.

Earthing braids

Normally used for the earthing between enclosure door and body and between enclosure body and mounting plate. They include the screws necessary for their use. Ref. **CTAF...**, Earthing braids provide an earthing connection suitable for high frequencies since they prevent disturbing unwanted electrical currents that occur at these frequencies.

CM control box to fit human-machine

Rear door enabling access to the inside of the control box. Double bar lock.

Ergonomic frame trim for the manipulation of the box.

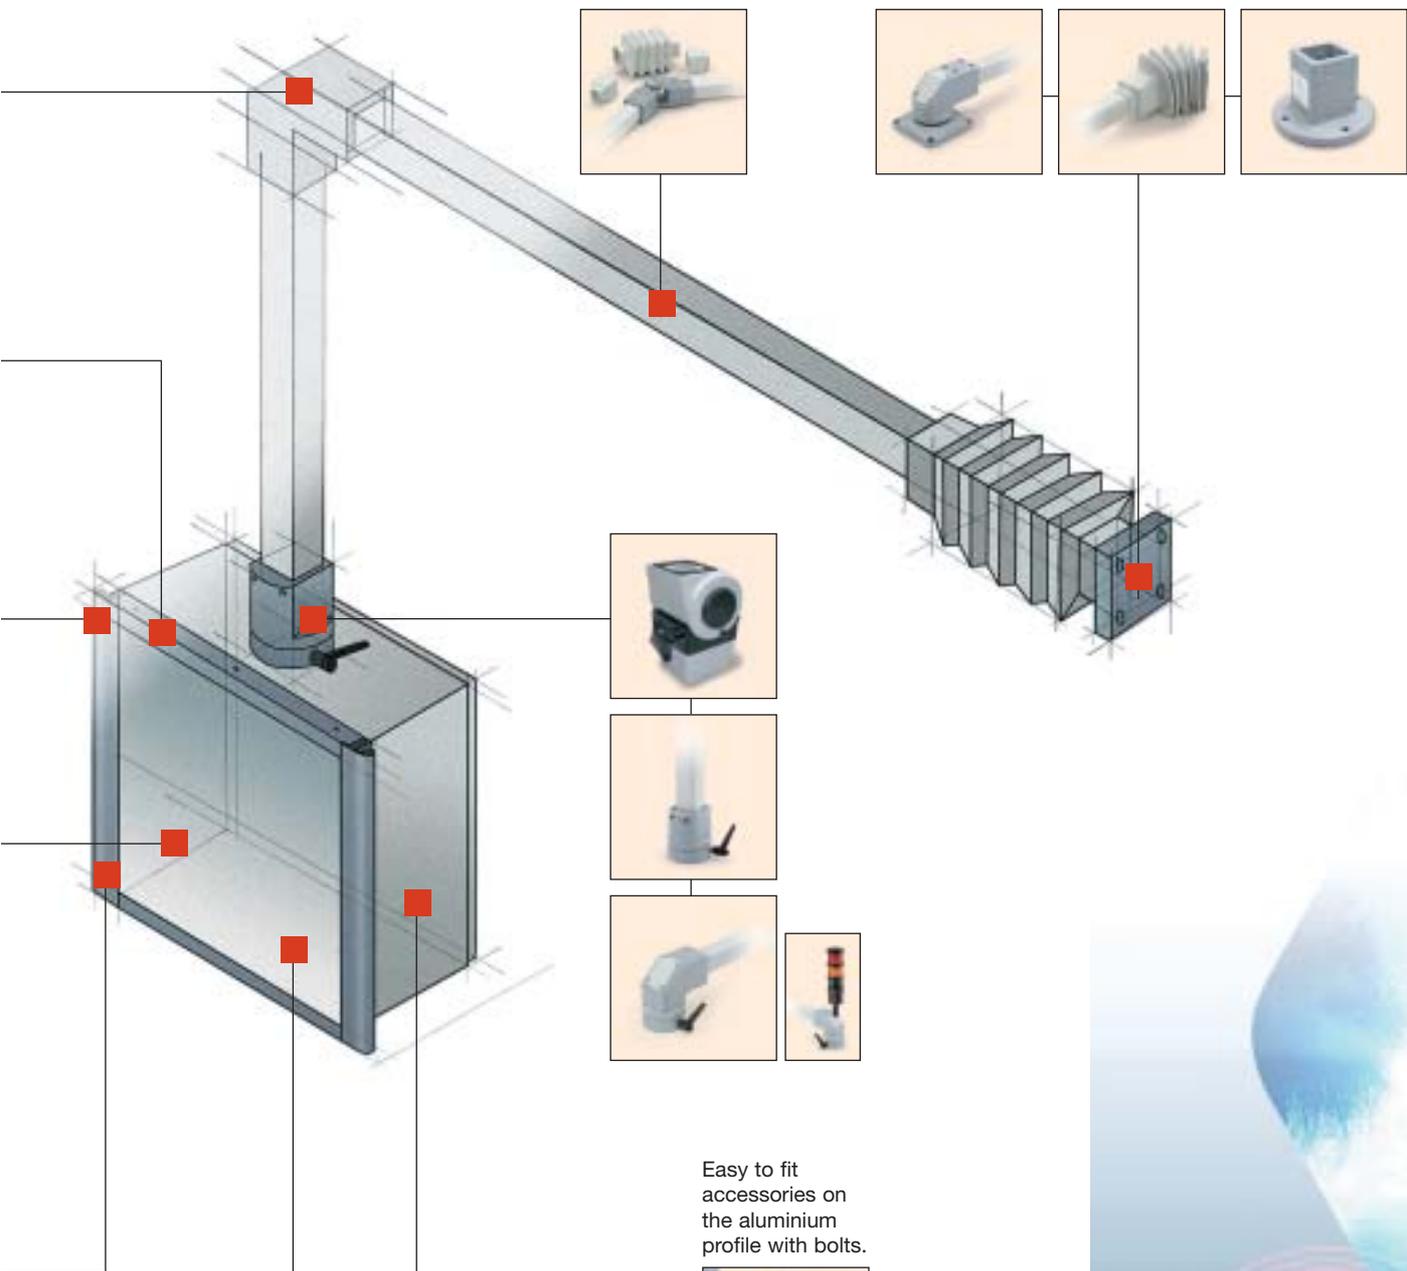

Set of profiles to fit elements inside.

Plastic trim cover to protect the aluminium section.

boxes designed dialogue elements

Easy to fit
accessories on
the aluminium
profile with bolts.

Reinforcement
designed to avoid
deformation of the
box when
suspended.

Aluminium front plate,
for fitting the dialogue
elements.

GENERAL DESCRIPTION

WIDE RANGE

Seven sizes of control boxes plus one box for the keyboard.

CONTROL BOX BASED ON THE STANDARD BOX

The new control box is based on our **CRN** box.

REAR DOOR

The rear door opening 120° allows an easy access to the inside of the box.

INTERIOR PROFILES

Two profiles can be fitted inside, using the bolts welded to the sides.

TRIM FRAME

The ergonomic design of the trim frame makes it very easy to handle.

The trim frame is ready for fitting accessories either when installing or later.

It is not necessary to foresee them from the beginning.

ACCESSORIES

A wide range of easy to fit accessories, lamp, diagram support, keyboard holder tray and PC tray.

RESISTANCE TABLES

SUSPENSION SYSTEM WITHOUT INTERMEDIATE ARTICULATED COUPLING

■ The load (a + b + control box + elements installed) must be below the maximum load.

■ Ex.: If a 50 mm cross section suspension system is used, without an articulated intermediate coupling, with a lever arm of 1200 mm, the maximum load it will support is 80 kg.

Length mm	Cross section 50 Maximum load kg	Cross section 80 Maximum load kg
500	100	150
1000	100	150
1500	60	110
2000	50	80
2500	-	60

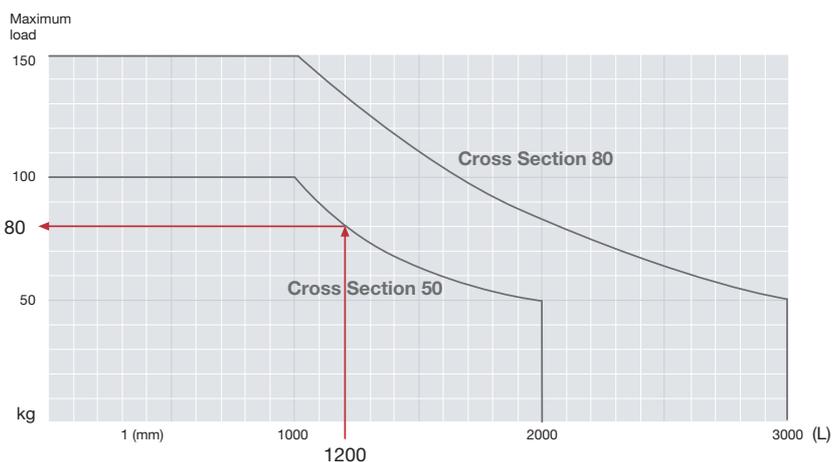

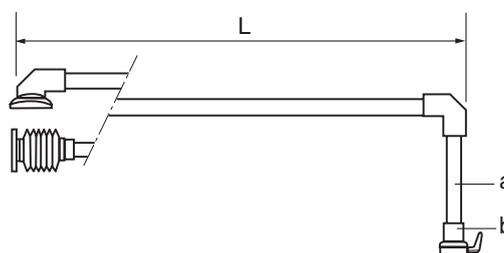

FIG. 1

SUSPENSION SYSTEM

A wide range of accessories to assemble the suspension system, available in two sizes, covering a large number of applications.

DESIGN

The neutral design of the control boxes allows them to be used in a large number of applications.

ADAPTABILITY

The boxes can be painted in other colours on request. The aluminium front plate can be machined to facilitate the fitting of dialogue elements.

SUSPENSION SYSTEM WITH AN INTERMEDIATE ARTICULATED COUPLING

- The load (a + b + control box + elements installed) must be below the maximum load.
- Ex.: If a 80 mm cross section suspension system is used, with an intermediate articulated coupling, with a lever arm of 1700 mm, the maximum load it will support is 80 kg.

Length mm	Cross section 50 Maximum load kg	Cross section 80 Maximum load kg
500	100	130
1000	100	130
1500	55	90
2000	35	60
2500	-	40

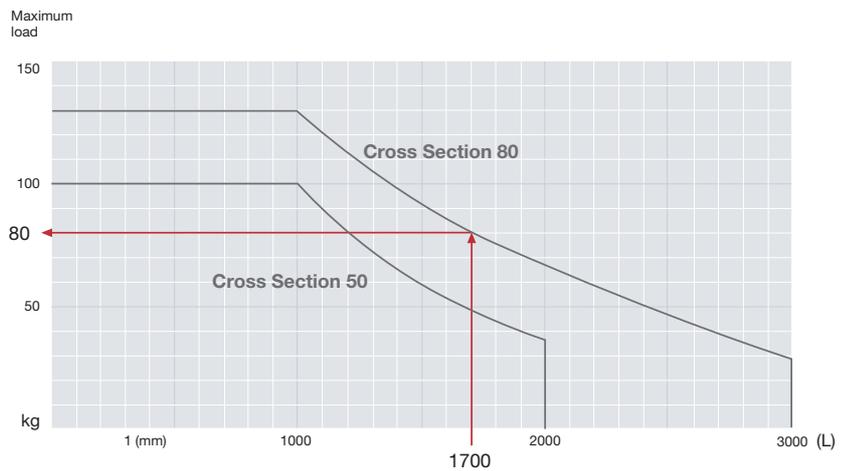

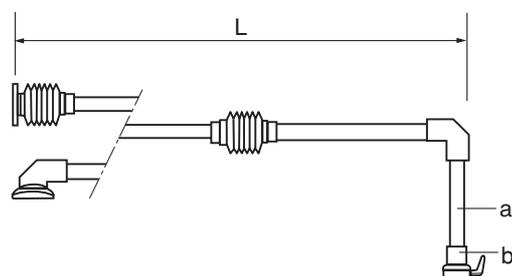

FIG. 1

CM 8060/300

CM 6080/300

CM 4040/200

Control box system designed to fit man-machine dialogue elements, reinforced at the top and drilled to fit articulations.

Boxes 600 mm wide are prepared for fitting a keyboard.

- Anodised aluminium front plate for fitting man-machine dialogue elements.
- Ergonomic extruded aluminium trim frame to facilitate the manipulation of the box.
- 4 bolts M5×15 welded on each side of the box to enable the fitting of profiles for the assembly of elements.

- Rear door opening 120°.
- IP55.
- Box painted in epoxy polyester resin colour RAL-7035 fine texture. Trim frame for securing the front panel in plain RAL-7040 colour.
- For lock changes see **CRN** catalogue.

Basic composition:

- Steel box.
- Steel reinforcement.
- Aluminium trim.
- Aluminium front plate.
- 2 profiles to fit the interior elements.
- Double bar lock.

Keyboard for control boxes

Keyboard prepared for fitting to the control boxes, 600 mm wide. The 120° joint is made by 2 metal brackets and aluminium trim.

- Anodised aluminium front plate to fit the keyboard.
- Side orifice for cables.
- Rear cover, screwed on, totally removable, to facilitate access to the inside.
- Ergonomic extruded aluminium trim frame.
- IP55.
- Box painted in epoxy polyester resin colour RAL-7035 fine texture. Trim frame to secure the plate and aluminium profile in plain RAL-7040 colour.

Basic composition:

- Steel box.
- Aluminium trim.
- Aluminium front plate.
- 2 brackets to join to the control box.
- Trim profile for the joint between the keyboard and the control box.
- Cable conduit.

Low consumption lamp (11 W)

- Provides lighting and a 16 A power socket over the workplace.
- Bracket colour to RAL-7035.
- Articulation colour to RAL-7040.

Reference	HHHCM/LAG	1.5 kg
-----------	-----------	--------

Diagram support

- Holds diagrams or other documents conveniently.
- Colour: RAL-7035.
- Articulation colour: RAL-7040.

Floor standing indus

A complete range of full or partial mounting plates suitable for most types of installations.

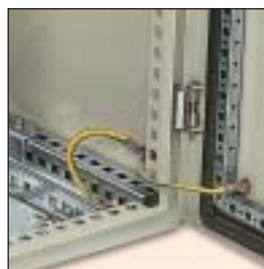

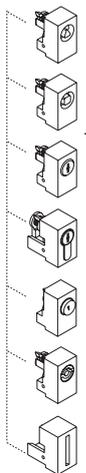

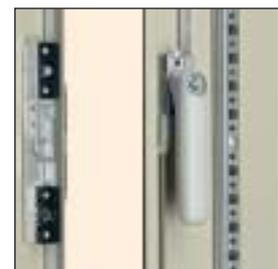

Detail of the tempered glass fixing.

Standard flat lock placed outside the gasketed area. Handle lock and various lock combinations available.

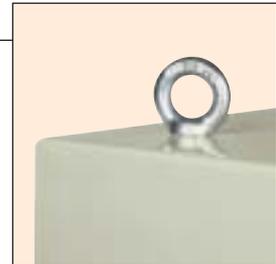

Double door enclosures with an internal locking system to ensure the IP degree.

A complete system to earth the enclosure and components.

trial enclosures CMO

Lifting eyebolts bolted directly to the cubicle structure.

Inside view of the 2 mm thick door with detail of 15 × 20 mm cross section reinforcement frame with Ø 5 and 10 mm drilling every 25 mm.

Door recentering wedge.

Detail of front perforated profile with 25 mm pitch for fixing of accessories, modular distribution chassis, 19" racks, etc.

Detail of profiles with 25 mm pitch for depth adjustment of equipment.

CMO 186/40 PM

CMO 186/40

Monobloc floor standing enclosure made from a continuous length of sheet steel triple folded. Front with perforated profile. Back welded onto a flanged rear profile for higher protection. Painted internally and externally with polyester epoxy powder paint to light grey RAL-7032 and texturized finish.

Easy installation:

- Front frame with $\varnothing 11 \times 13$ mm drillings and 25 mm pitch for fixing of accessories, modular distribution chassis, 19" racks, etc.
- Perforated profiles with 25 mm pitch for depth adjusting of mounting plate and other accessories.
- Front door, 120° opening to right or left with reinforcing profile which can be used for mounting of equipment.

Rigidity and watertightness:

- Double folding of front profile and reinforced fixing of the back.

- Self-centring of door through specially designed lock catches.
- Locking system outside gasketed area.
- Internal handle on left door for 2 doors up to 1400 mm high enclosures.
- 4 point locking on heights 1600 to 2000 mm.
- 2 point locking on heights 1000 to 1400 mm.
- Foamed polyurethane gasket.

Configuration:

- **CMO...PM** version includes mounting plate.
- 4 mounting plate supports.
- Plain front door with reinforcing frame.
- 5 mm double bar locking system.
- 2 parts cable gland plate supplied with a gasket.

ENCLOSURE ASSEMBLY

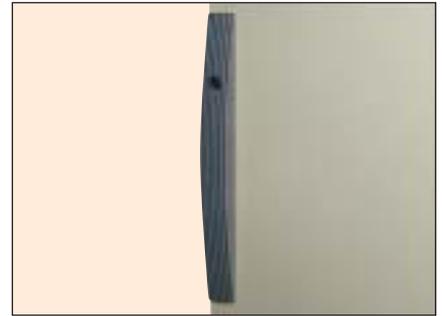

**CMO 20 888/50**

Enclosure assembly of standard **CMO** 2000 mm high enclosures mounted on a 200 mm high plinth. Opening on adjoining sides leaving 45 mm to the edge around their perimeter.

- Plain doors with reinforcement frame.
- 4 mounting plate supports per enclosure.
- 2-part cable gland plate with gasket per enclosure.
- 5 mm double bar locking system.
- Optional intermediate mounting plates.

Detail of inside of enclosure assembly with mounting plates fitted.

Standard flat lock outside the gasketed area. Various lock transformations are available.

Enclosures assembly

Coupling kit for coupling 2 enclosures side-by-side. Kit comprises a sealing gasket and fixings. Ref.: **CUCMO**.

OLN industrial

Displacement of the mounting plate through sliding guide.

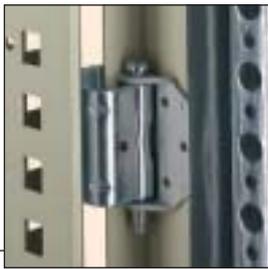

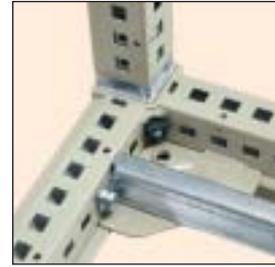

Cubicle suit joining set.

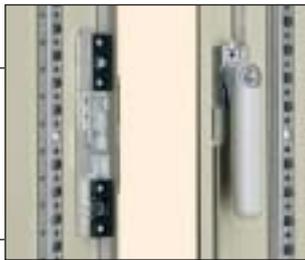

cubicle system

Lifting eyebolts bolted directly to the cubicle structure.

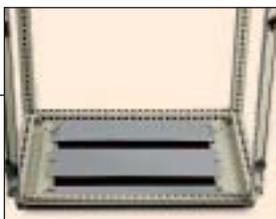

Steel hinge designed for easy door reversing.
4 points locking system to maintain IP degree.
Polyurethane gasket.
120° door opening.

2 doors enclosures with an internal locking system to ensure the tightening.

Standard handle lock system for OLN enclosures. Different lock combinations available.
Closing mechanism outside of the sealed zone.

Cable gland plates for cable entry through the cubicle bottom, with neoprene gasket ensuring good sealing.
Available with one or two entries.

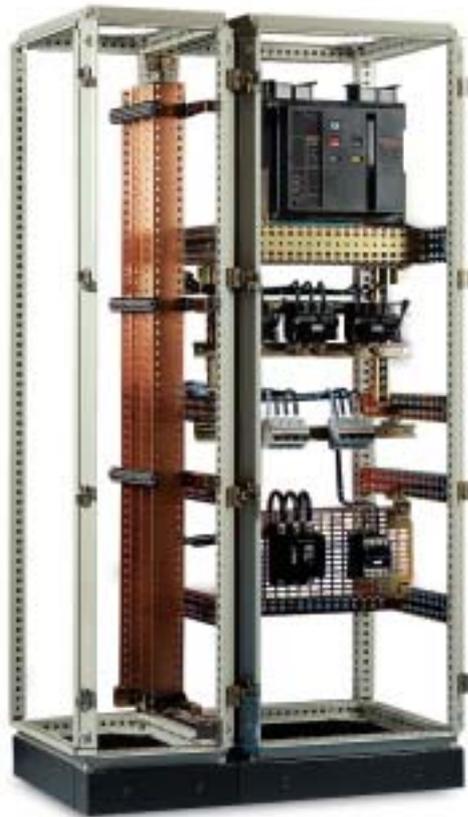

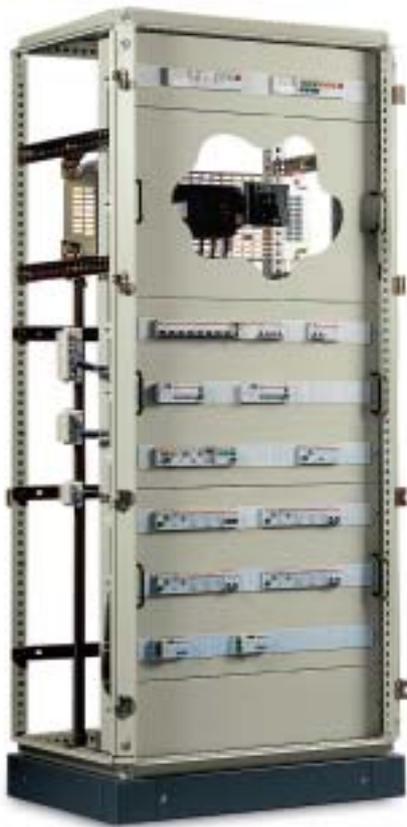

Door recentering wedge.

INSTALLATIONS SYSTEM FOR INDUSTRIAL APPLICATIONS

- Great strength, reliability and rigidity.
- Ergonomic design, easy installation.
- New standard versions available.
- Wide accessories ranges.
- Flexible flat pack kit delivery.

GENERAL FEATURES

System of Modular metal cubicles, consisting of a structure of triangular closed profiles with welded top frame and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility, 1.5 mm thick back and side metal panels, 2 and a wide range of accessories.

The joining of the various parts is done in a simple easy way through the accessories specifically designed to simplify the operations.

Easy access to the inside of the cubicle through removable uprights (even with the unit already assembled) which ensure a great level of accessibility and make working inside the cubicle easier.

Treatment and finish:

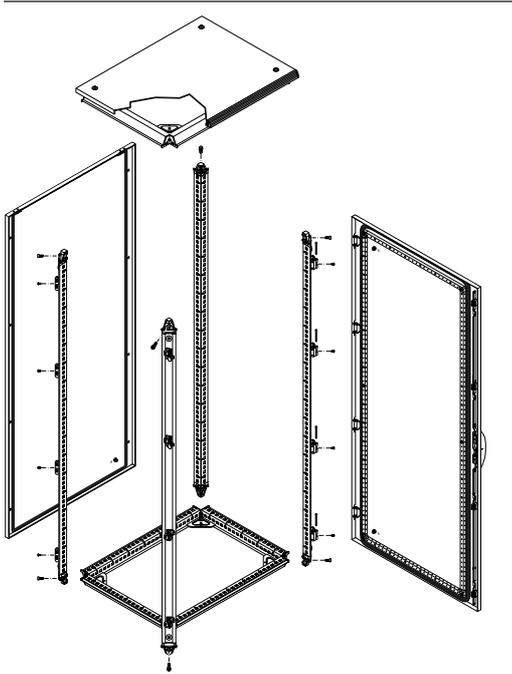

The treatment applied before the final finish ensures a perfect adherence of the paint, which provides a greater protection in harsh environments and whenever drillings are done.

Treatment description:

The steps are as follows: degreasing, phosphating, passivating, drying, powder epoxy resin painting and polymerization.

Final finish:

- Mounting plates (**PMOL, PMP, PMI**) to RAL-2000.
- Plinths (**ZUN, ZUN/T, ZUN/C**) to dark grey RAL-7002.
- Rest of cubicle and components: texturized RAL-7032.
- Other parts such as hinges, locking rods, mounting plate supports, etc., are zinc coated bichromated.

The basic cubicle has the following elements:

- 4 vertical triangular profiles onto which the hinges are fitted. They include a reference drilling every 100 mm which is meant to help the installer to position the equipment.
- Welded top and base to which the vertical profiles are bolted.
- Plain or glazed front door, except for **OLNE.../...SP**.
- Handle double bar locking system with double cylinder delivered disassembled inside the cubicle.
- Top panel with personalized strip, HIMEL tag and clear cover.
- Back panel (two **OLNE** versions).
- Mounting plate fixing supports except for **OLNP, OLNM, OLNE** versions.
- Slidings fixing guide for mounting plates except for **OLNP, OLNM, OLNE**.

Rigidity:

The rigidity of the cubicle is ensured by the welded top and base. The hinges are made of steel for more rigidity and less chances to break.

Universal locking system with many distinct possibilities including double cylinder locking and even magnetic card in the near future.

LIFTING AND TRANSPORT

Whenever forming cubicle suites, the **CPUT** joining set, **TLN/12** eyebolts and joining pieces **PUN** must be used.

Maximum loads are shown on the right. For further information see instructions leaflet provided with each cubicle.

IP55 (EN 60529)

OLN 186/60 PM

OLN 186/60

Metal cubicle consisting of a structure of triangular closed profiles with welded top and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility. Painted internally and externally with polyester-epoxy resin to texturized RAL-7032.

Mounting plate in galvanized steel (for models **OLN...PM**).

- Great accessibility.
- Maximum versatility for all kind of installations.
- 120° door opening.
- 4 point locking system outside the gasketed area. Several transformation and locking possibilities. 

Basic cubicle:

- Welded top.
- Welded base.
- Verticals uprights.
- Removable roof.
- Removable back panel.
- Plain front door with lock.
- Mounting plate supports.
- Mounting plate supplied with **OLN...PM** models.
- Mounting plate sliding guide.
- Door recentering wedge in up to 1400 mm high enclosures.
- Two doors enclosures with internal fixing system for left door.

IP55 (EN 60529)

Metal cubicle consisting of a structure of triangular closed profiles with welded top and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility. Painted internally and externally with polyester-epoxy resin to texturized RAL-7032.

- Great accessibility.
- Maximum versatility for all kind of installations.
- 120° door opening.
- 4 point locking system outside the gasketed area. Several transformation and locking possibilities. 
- Two doors enclosures with internal fixing system for left door.
- The flat pack kit version includes all the necessary elements to form the basic cubicle. These elements can be obtained through independent references.
- The flat pack kit is supplied partly assembled, which reduces greatly the mounting time. It also saves volume substantially, making storage and transport cheaper.

Basic cubicle:

OLMV:

- Vertical uprights including hinges, locking elements and side fixing blocks already fitted.

OLSI:

- Welded top with roof.
- Welded base.
- Mounting plate sliding guide.
- Mounting plate fixing supports.

OLPP:

- Plain door with lock.
- Plain back panel.

OLPU:

- Plain door with lock and internal handle for two doors models.

OLPUKT:

- Glazed door with lock.

OLPO:

- Plain back panel.

ADPUPOL:

- Back door adaptor.

AD2PUPOL:

- Two back door adaptor.

EMBT:

- Roof panel.

IP55 (EN 60529)

Placing and fixing of the 4 vertical uprights to the top and base corner pieces.

Door mounting by inserting pins in to hinges.

Placing of back panel through self-centring hanger provided and screwing.

Detail of self-centering hanger.

Roof panel

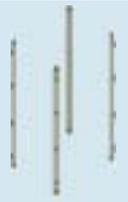

- To be used for lining an enclosure with rear door.
- RAL-7022.
- Supplied with mounting clips.

① Central crossbar for the 1200 width enclosure.

IP55 (EN 60529)

Dimensions (mm)

FIG. 1

* Ground or plinth fixing dimensions.

OLN

BASIC COMPONENTS

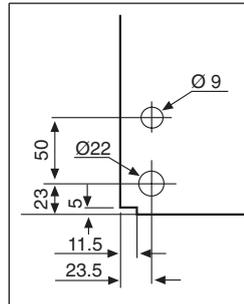

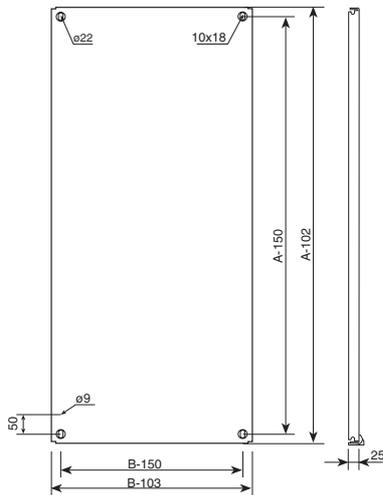

Mounting plates

Made of sheet steel with reinforced edges. Vertical ones are double folded for extra rigidity. Painted to orange RAL-2000. Depth adjustable every 25 mm. Easy mounting by sliding it through the bottom guides.

Whenever mounting plates for suites of two or more cubicles are required, a continuous mounting surface can be obtained by means of intermediate mounting plates.

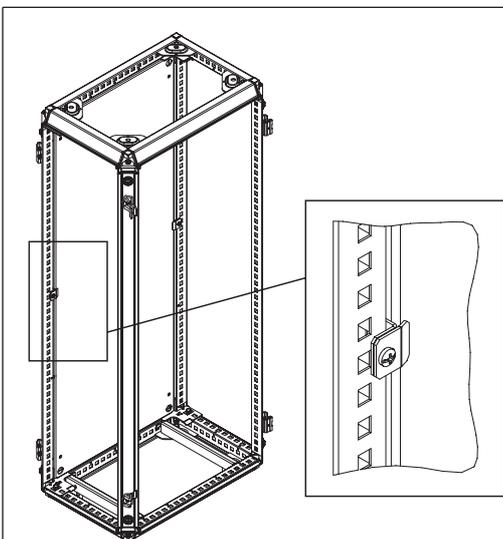

■ Max. load 600 kg (with plate right at the back) and 500 kg if placed in the middle.

Single plinths

To fit directly to the cubicles using the drillings for ground fixing.

- 100 and 200 mm high.
- Front and rear access.
- Can be joined side to side in cubicle suites.
- Dark grey to RAL-7022.

CUBICLE SUITES

The constructive design of the **OLN** cubicles is particularly meant to form suites. The quick easy joining, both in width and depth and the specific elements for making assemblies and transport them allow for the most suitable solution to every electrical installation.

Cubicle suite joining set

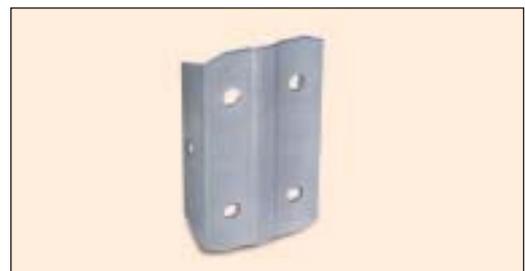

Any enclosure model can be joined by forming suites with the cubicle joining set.
Reference: **CPUT**.

Reinforced joining part

For reinforcing the join between cubicles.
Reference: **PUT**.

Outside cubicle suite joining set

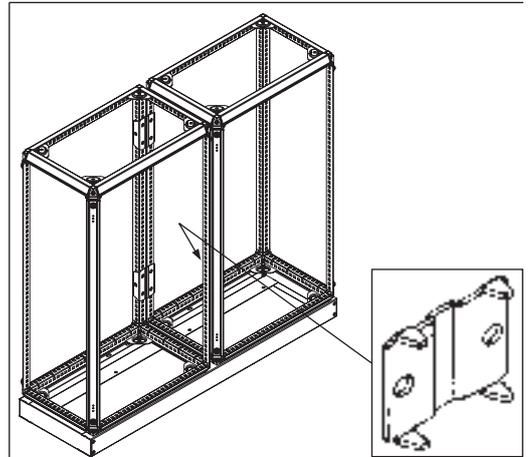

Used to attach cubicles from the outside (if internal joining is impossible).
Reference: **CUNE**.

Inside cubicle suite joining set

Set of 4 brackets to join **OLN** enclosures as a **CPUT** complement when the angles of the enclosure are fitted with accessories (as 19" swing rack or **UNIDIS** chassis) or as other joining system reinforcement.
Ref.: **CSUT**.

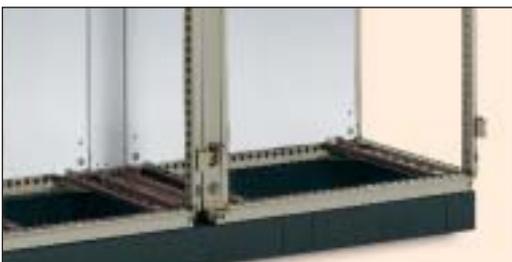

Lifting brackets

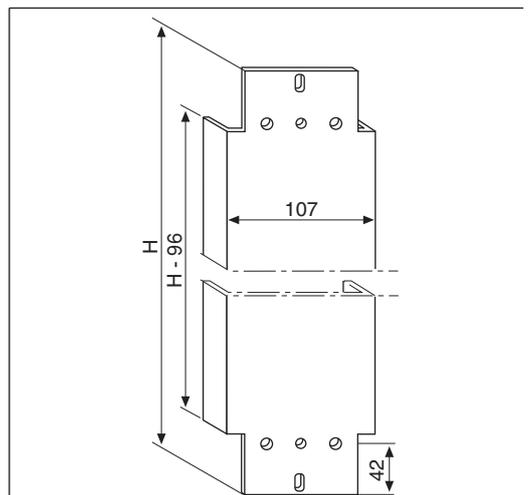

Set of 2 lifting brackets. Attaches across two adjacent enclosures, giving extra rigidity for lifting, using the same holes as for the lifting eyes. Guarantee rigidity of the assembly on lifting. For details of enclosure slinging see page 1/75.
Reference: **PUN**.

Intermediate mounting plate

Galvanised sheet steel intermediate plate to provide a continuous mounting plate surface when joining cubicles. If the **PMOL** mounting plates are located in the bottom of the cubicles, the vertical profiles of the actual cubicle structure are flush with the plates, acting as an intermediate plate. In this case it would not be possible (or necessary) to install the intermediate plate.

Accessories for joining cubicles

Connections for machines, robot outputs, interconnections between cubicles... they all need a partition that makes it possible to assemble with **Harting**-type industrial plug sockets.

- This new partition is adapted to **OLN** enclosures by being attached to the frame structure.
- The sheets available in different dimensions are fitted with a watertight gasket, and feature numerous drillings.
- Unused drill holes can be covered by blankers.
- There are 3 reducer models available for adaptation to the different types of connectors.
- Easy-to-fit sockets.
- Fully watertight.

Connector separation sheets

- Galvanised sheet steel.
- Sheets supplied with gaskets and fixing screws.

Suite plinths

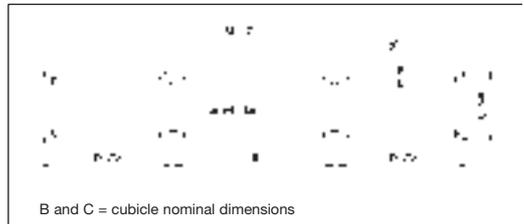

Made of 3 mm thick "U" profiles for cubicle suites up to 3 m wide. Grey colour to RAL-7022.
 ■ Possibility of side joining for wider suites.
 ■ 100 y 200 mm heights.
 Reference: **ZUN/C**.

Transport plinths

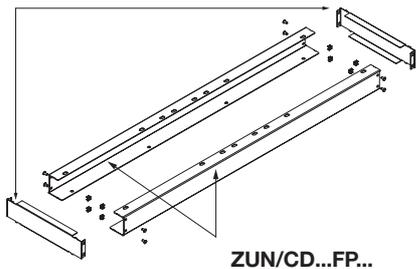

Made of 3 mm thick "U" profile (100 mm high). Supplied with or without painting (to RAL-7022).
 ■ Holes for lifting bars provided
 Reference: **ZUN/T**.
 See "Lifting and transport" on page 1/75.

Modular plinth for joining cubicles

ZUN/CD100/2L...

Set of two "U" profiles and one or two sets of "U" side profiles (for 100 or 200 mm high), 1.5 mm thick. Painted RAL-7022.

* For 200 mm high plinths 2 sets must be ordered.

PC APPLICATION

OLNP 186/60 + ZUN 66/100

Metal cubicle consisting of a structure of triangular closed profiles with welded top and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility. Painted internally and externally with polyester-epoxy resin to texturized RAL-7032.

- Great accessibility.
- Maximum versatility for all kind of installations.
- 120° door opening.
- 4 point locking system outside the gasketed area. Several transformation and locking possibilities. 
- Glazed templated glass door with sliding guides.

Basic cubicle:

- Welded top.
- Welded base.
- Vertical uprights.
- Removable roof.
- Removable side panels.
- Top front glazed door.
- Keyboard panel.
- Plain bottom door.
- Monitor supporting tray.
- Keyboard sliding tray.
- Back door without door reinforcement frame.
- 2 part cable gland plate.

Detail of glazed door for 14" or 17" monitor.

Optional printer tray support.

Compartment with adjustable tray for keyboard and mouse.

INDUSTRIAL CUBICLE SYSTEM FOR MOTOR CONTROL CENTRE

OLNM 208/60

OLNM 206/60 + PPMC 2060 N + PPMC 4060 N KT + PPMC 2060 N + PPMC 4060 N + PPMC 6060 N

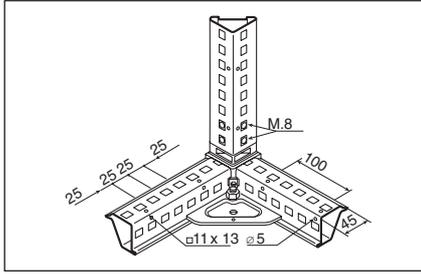

Metal cubicle consisting of a structure of triangular closed profiles with welded top and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility. Painted internally and externally with polyester-epoxy resin to texturized RAL-7032.

The **OLNM** system allows to combine partial doors from 200 mm in height up to 1000 mm (multiples of 200 mm) at the front. Also, 19" racks, depth adjustable mounting plates, back locks and front and rear side covers. Electrical feeding can be done through the top, the base or sides by means of the busbar compartments. This system offers a quick personalized installation.

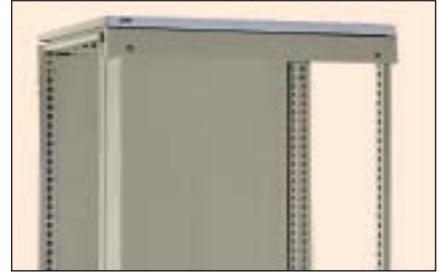

- Great accessibility.
- Maximum versatility for all kind off installations.

Basic cubicle:

- Welded top.
- Welded base.
- Vertical uprights.
- Removable roof.
- Removable back panel.
- Modular top and bottom front panels.

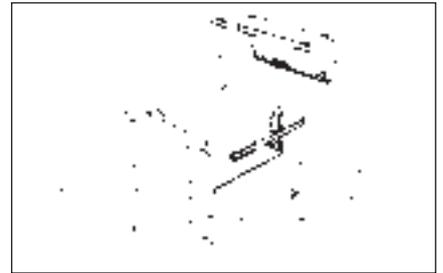

Profile structure with triangular profile drilled 11×13 with 25 mm centres and reference Ø 5 mm hole every 100 mm.

Detail of modular top front panel.

INDUSTRIAL CUBICLE SYSTEM FOR ELECTRONICS

OLNE 186/60 SP

OLNE 186/60 KT

Metal cubicle consisting of a structure of triangular closed profiles with welded top and base and vertical removable bolted profiles, giving the assembly and optimum stability and versatility.

Painted internally and externally with polyester-epoxy resin to texturized RAL-7032.

Basic cubicle:

OLNE.../...SP cubicle

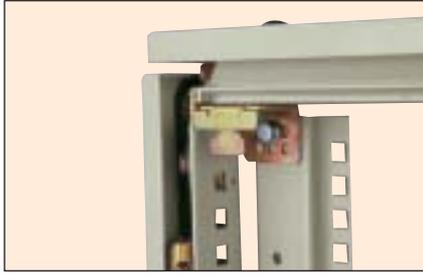

- Welded top.
- Welded base.
- Vertical uprights.
- Removable roof.
- Quick fixing side panels.
- 2 removable back panels.
- Front frame.
- Front and rear 19" profiles.

OLNE.../...KT cubicle

- Welded top.
- Welded base.
- Vertical uprights.
- Removable roof.
- Quick fixing side panels.
- 2 removable back panels.
- Front and back 19" profiles.
- Front glazed door with lock.
- 120° door opening.
- 4 point locking system outside the gasketed area.
Standard  5 mm double bar handle lock.
Several transformation and locking possibilities.

Detail of front frame and lock on removable quick fixing side panel.

Detail of **BRF** profile fixing.

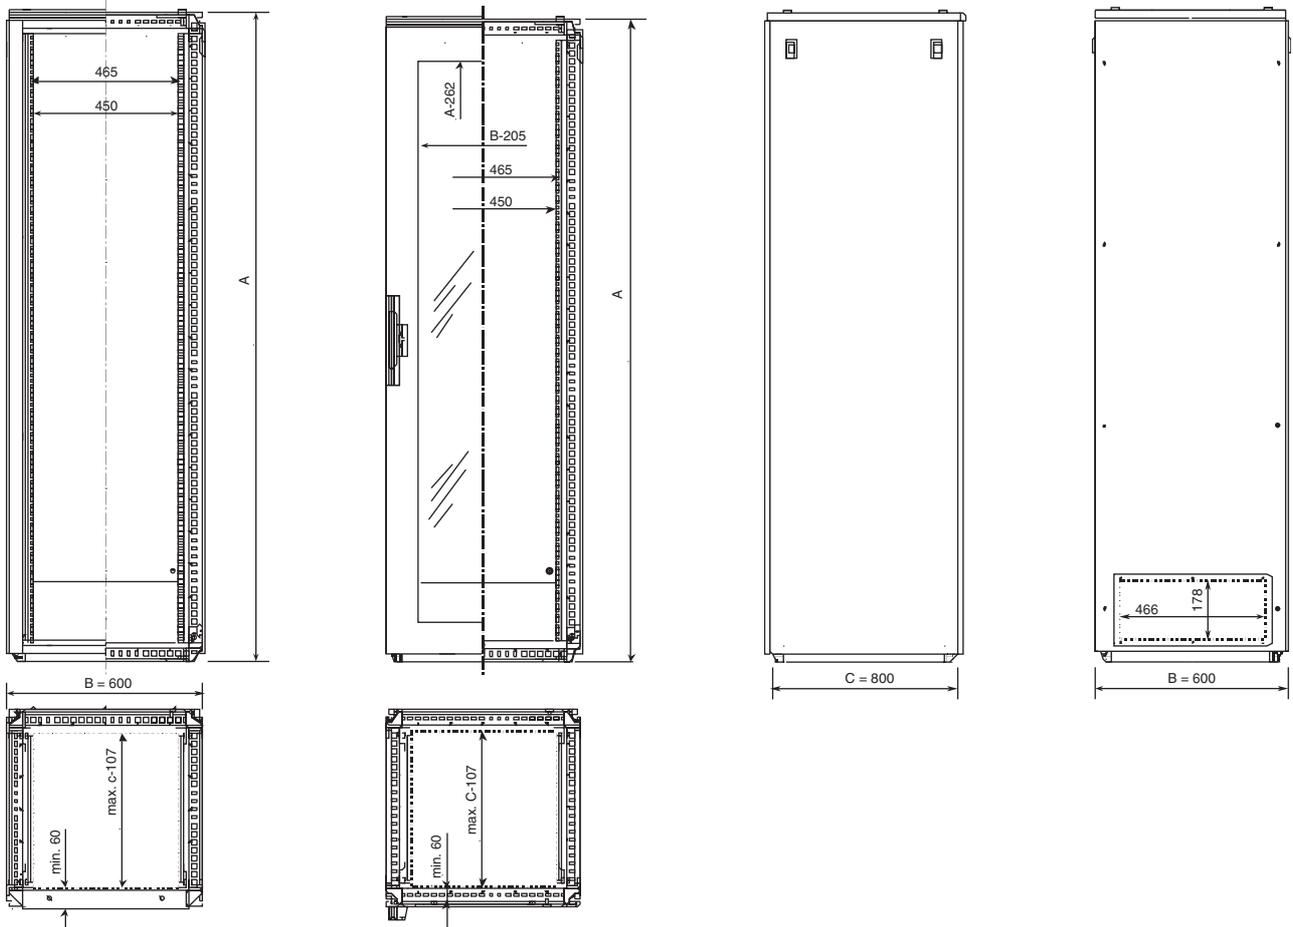

Bottom view of back panel.

DINIMEL 2000 CHASSIS DISTRIBUTION SYSTEM

Dimensions (mm)

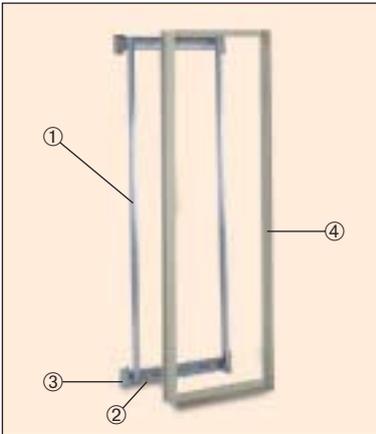

**OLN 186/60 KT + DM/OL 186 + CTLM 1550/0 +
CTLM 3050/4C + PMCD 6050 + CTLM 6050/0**

Coupling **DINIMEL 2000** chassis set for **OLN** cubicles prepared to fit all the necessary components for high capacity distribution boards.

- Dimensional modularity: 150 × 250 mm to DIN 43870.
- Adjustable distance between equipment and cover plate.
- Heavy-duty special supports for fixing of heavy or bulky equipment.
- Easy wiring inside the cubicle thanks to the excellent accessibility of the **OLN** cubicle.

DINIMEL 2000 chassis coupling set

Set consisting of 2 or 4 MCM ①, uprights 2 crossbars ②, adapters ③ cover plate adjustment set ④.

Coupling set for modular chassis prepared to fit all the necessary elements to build large capacity distribution panels.

Coupling front frame allowing for mounting of:

- 600 or 800 mm wide covers (plain or cut-out) with fixed and hinged types, and height up to 600 mm (150 or 200 mm modularity).
- Fixed and depth adjustable support rails for plain or perforated mounting plates.
- Sets for double modular chassis or busbar systems.

- Double chassis are mounted on enclosures 1200 to 1600 mm wide.
- Vertical busbar covers are mounted on enclosures 1000 or 1200 mm wide.
- All accessories, covers, rails and supports are combined in these kits as in the single chassis.

Coupling set for modular chassis

Set of uprights and crossbars for fixing of covers and supports.

Metal covers

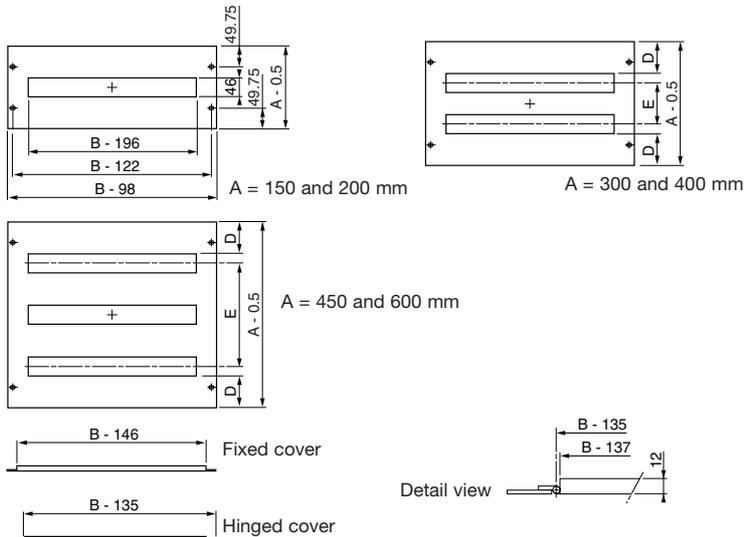

- Plain and cut-out types, fixed or hinged.
- Made of sheet steel and painted with polyester epoxy to RAL-7032.
- 150 and 200 mm modularity.
- On plain covers, cut-outs made by user for protection of control or protection components.
- Cut-out covers for modular equipment ref.: **ATP UND**.
- Hinged covers.
- End covers to fill up the chassis depending on the combination of covers.

* For CMO enclosures, order separately top and bottom DCOL... adjusting rails depending on depth of enclosure.

For enclosure width 1200 and 1600 mm.
Set consisting of:

- 2 modular chassis.
- Central upright.
- All necessary fixings and supports for mounting.

Top and bottom adjustment rails

Folded and welded sheet steel, galvanized.

- Enables central positioning and fixing of vertical rails in 1200 mm wide enclosures.
- Screw fixing to upper and lower parts of enclosure. Fixing included.
- Pack of 4 parts.

Rack 19" system prepared to be fitted directly to **CMO** and **OLN** enclosures: fixed and swing types.

- Fixed racks, polyester epoxy resin paint to RAL-7032, consisting of 2 uprights with fixing hardware.
- Swing racks, polyester epoxy resin paint to RAL-7032, 125° and 180° opening, double bar lock, maximum load 140 kg.
- Partial swing racks, polyester epoxy resin paint to RAL-7032, double bar lock, for enclosures wider than 800 mm.
- Centred swing racks, polyester epoxy resin paint to RAL-7032, double bar lock.

Set of 2 fixed 19" racks

To fit to 600 mm wide **CMO** and **OLN** enclosures. Allows for direct fixing of any 19" modular chassis to the standard drillings. Painted to RAL-7032.

BBH bimetal terminals

Terminals specially designed for the diversion of cables and connection of busbars. BBH terminals are made of a copper alloy. Hot stamped and tin-plated, suitable to connect a copper or aluminium conductor (bimetallic).

Reference	Main cross section mm ²	Diversion cable cross section mm ²

Terminal blocks

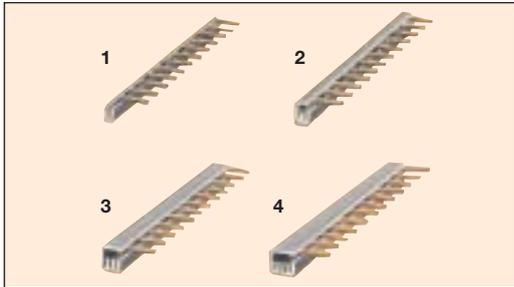

For the diversion of neutrals and earth wires.

- **RBL** models to fit to COMBINORM - DSU - DTU, insulating bottom cases, in the holes prepared for their fixing.
- **RBLZ** models with insulating base to fit onto a 12 × 2 mm profile in the DSU - DTM - CRD/CMD, models, already prepared for fixing of these terminal blocks.
- **RBL/416286 K** model made up of two RBL/216146 M terminals mounted on a bakelite bar, which makes it possible to place the standard supply terminal, RBL/21656 M, on the centre. This allows a total of 6 16 mm² terminals and 33 6 mm² terminals to fit to DSU 15 and 30 modules insulating bottom cases.

ACCESSOIRES AND COMPLEMENTS LOCKING SYSTEM BUILT INTO THE DOORS OF JOINED ENCLOSURES

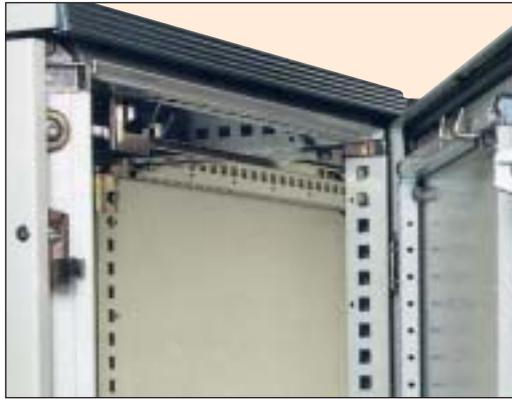

Made to be associated to same breakers or switches:

- Allen Bradley (**1494 VH11**),
- Square D (**9422 A1**),
- Siemens (**FH0H**),
- Telemecanique.

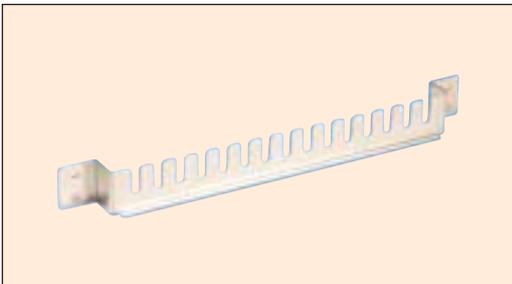

The integrate safety locking system for "incoming" and "outgoing" enclosure doors makes it possible to adapt the **OLN**... enclosures to American standards (automobiles).

- How they work: the "incoming" enclosure doors is locked by means of the breaker control or main switch. A built-in locking system with sliding rods forces the opening of the doors of the "outgoing" enclosures. Access is only possible when the incoming organ is at the "ON" position, the incoming door open, and the remaining rods are manually unlocked and access given.

Optional flat lock

EMP/OLN

Optional **CMO** standard closing mechanism for **OLN**.

Standard two bar mechanism (supplied as standard).

■ Operated by:

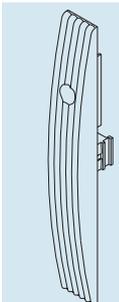

□ **LDB 5** key 

(in accordance with DIN 43668).

■ For conversion to closing mechanisms for internal doors **PIL** see enclosure closing mechanisms section **CRN**.

■ For conversion of closing mechanisms of enclosures for PC applications or motor control centres see panel closing mechanism section **PK**.

		TPC8/OLN 8 mm square key
		TPDB/OLN 5 mm two bar
		TPDES/OLN Screwdriver slot

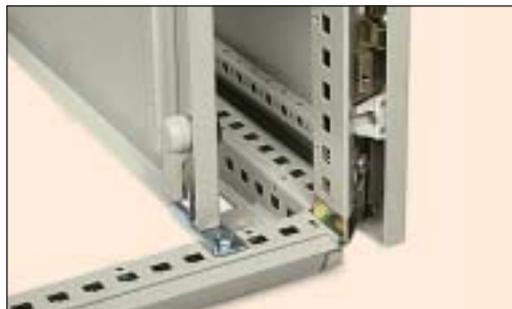

Internal doors

OLN 186/60 + PIL 186

To fit directly into **OLN** cubicles. Made of sheet steel and painted with polyester-epoxy resin to texturized RAL-7032.

- Depth adjustable every 25 mm.
- Reversible door.
- Reinforcement profiles on the back, punched every 25 mm for mounting of equipment.
- Double bar  standard lock. By fixing the wing to the locks, this is transformed into handle lock. Easily change to triangle, square or safety locks. See **CRN** locks.

Side view of internal door installed, with detail of lock.

Two ranges available, 40 mm width (1 row), 65 mm width (2 rows) and 90 mm width (3 rows). Enable depth adjustment of equipment supports, 19" rack, etc. Can be combined to form partial supports or horizontal supports for mounting deep equipment.

■ **TMR**: access to 4 fixing nuts from outside.

■ **TML**: for all kind of assembly.

Direct attachment to framework with **STCMO** brackets.

Delivered in pairs with supports and fixings.

Cross rail brackets

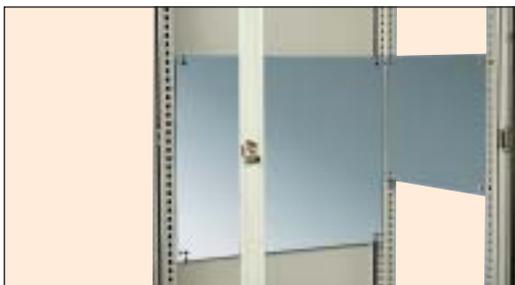

- For mounting profiles in depth.
- Directly fixed to the front of **CMO** enclosure.
- Made of galvanized steel.
Ref.: **STCMO**.

CMO-OLN

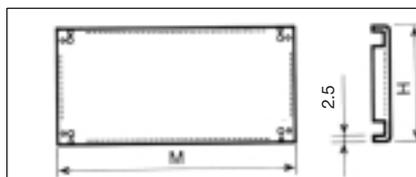

ACCESSORIES AND COMPLEMENTS

Partial mounting plate

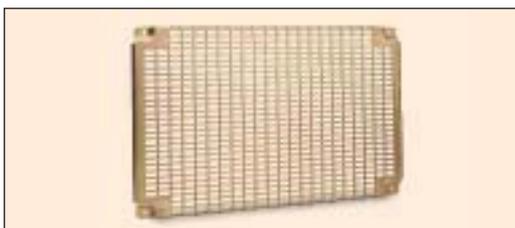

Made of galvanized steel with all edges reinforced. Fixed directly to the enclosure up rights, both at the sides and the back. Depth adjustable by means of **TML** mounting profiles.

180° opening hinges

Made of anodized aluminium in black. Ready to fit to both standard and glazed doors.
Reference: OLN: **BEN 180**
CMO: **BEM 180**

Door retainer

Mechanical and pneumatic door and 19" rack retainers to fit directly to the cubicle structure.

- Easy mounting.
- 90° up to 120° opening depending on models.
- For **19" Rack** retainers see page 1/129.

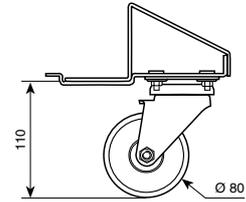

Features	Reference
Mechanical retainer with 2 posiciones (90° and 120°) for standar door (hinges on the right)	RET/OL
Same as above with hinges on the left	RET I/OL
Pneumatic retainer with 90°/120° opening	RETN/OL

Castors

Set of 4 castors, two of them with brakes. Easy quick fixing.
Reference: **RUT/ZUN**.

Max. load:
75 kg per castor.

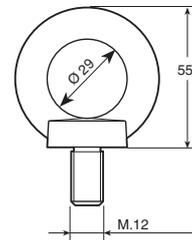

Eyebolts

M12 lifting eyebolts bolted directly to the cubicle structure.

Reference: OLN: **TLN/12**
CMO: **TMO/12**

Set of 2 eyebolts.

Enclosure lighting

Compact fluorescent lamps, specially designed for their use in enclosures. Possibility to fix them with magnet.

- Voltage 220 V/50 Hz.
- Consumption 11 W.
- Power on/off switch.
- Earthed 200 V/16 A plug.
- Max. ambient temperature: 60 °C.
- Lighting performance + 75 W bulb.

Enclosure lighting

Incandescent lamp specially designed to be used in electric enclosures.

- Connection current: 220 V/50-60 Hz.
- Consumption: 60 W.
- Power on/off switch.
- Entry connection terminal.

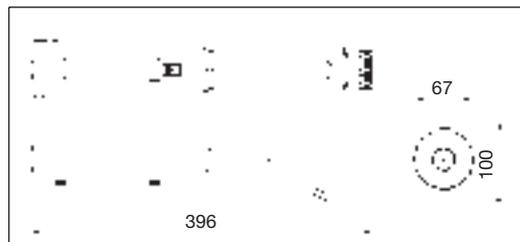

Reference
LAI/OL 68

Enclosure lighting

Lighting specially designed for use in electrical enclosures with various types of fixing and switching.

- Electronic low consumption lamp E27, 20 W, 220 - 240 V/50-60 Hz or 120 V/60 Hz.
- Output equivalent to a 100 W bulb.
- Delivered with power supply cable with either plug and socket (portable inspection lamp), or 2.5 mm² screw terminal block.

- IP20 rating.
- Type II insulation.
- According to standards EN 55014 and EN 50082-1.

Monobloc control desks

PK & PKP

The removal of the front upright allows for a complete access to the inside of the control desks.

A pneumatic retaining stay facilitates opening of the top of the control desk and prevents it dropping down unexpectedly.

PK: back panel.

PKP: removal back panel.

These control desks are equipped with side cross-rails providing support, depth adjustment and fixing for the different equipment mounting accessories through the use of perforations at 25 mm pitch. Installation of two chassis back-to-back is very easy and provides space for maximum of equipment.

The cable entry gland plates at the bottom of the control desk are in two sliding parts to optimise cabling. An adhesive gasket can be added to these plates to ensure dust and damp protection.

Changing the direction of opening of the doors is fast and does not require special tools through the use of screw-fixed hinges.

Modular console for **PKP** control desk.

for customised solutions

PKP... /F

The closing system uses a 5 mm double bar. A wide range of lock combinations is available in the form of accessories.

Upper mounting plate.

Bottom mounting plate.

And accessory is available to support the screen.

The operator panels of the main part of the control desk and the console are equipped with vertical rails for mounting equipment or securing the cables.

Cross rails can be used to accommodate the same component mounting accessories as those used for our standard enclosure ranges.

IP55 (EN 60529)

PK 80-PM + ZUN 84/100

Monobloc sheet steel control desks. Single-piece back and sides. Total accessibility thanks to intermediate crossbeam-free design. Protected on outside and inside with textured grey polyester-epoxy to RAL-7032.

- Mechanical retention support top front and pneumatic on console making opening easier, and preventing abrupt openings leading to falls.
- Double-bar locks on doors.
Can easily be changed to triangular, square or key lock.
- Angular reinforcement on panel to facilitate the fixing of gear, with drillings every 25 mm, with drill holes of Ø 4.25 mm.

- Earthing on door, body and mounting plate.
- 100 mm or 200-mm high U plinth in anthracite grey RAL-7022.
- Cable gland plate with maximum cable access.
- Galvanised steel mounting plate, adjustable at 25 mm.

Basic configuration:

- Plain front door.
- 3 mm double bar locking system.
- 4 plate support brackets.
- Mounting plate (only **PK...PM** references).
- Cable gland plate.

Mounting possibilities

Dimensions (mm)

PKP 80/F30-PM

Compact control desks with top front made of steel sheet. Top part can be accessed via a three-point lock door. Painted on the inside and outside with light grey polyester-epoxy to textured RAL-7032.

- Mechanical retention support top front and pneumatic on console making opening easier, and preventing abrupt openings leading to falls.
- Double bar locking on doors. Can easily be changed to triangular, squared or key lock.
- Angular reinforcement on panels perforated every 25 mm with 4.25 mm Ø crill holes.
- Galvanised mounting plate to be fitted in control console, in top front and in bottom desk or total mounting plate adjustable at 25 mm.

- Earthing on door, body and mounting plate.
- 100 or 200 mm U-profile plinth in anthracite grey to RAL-7022.
- Fully gasketed cable gland plate. Maximum capacity for cable access.

Basic configuration:

- Top front panel.
- Plain front door.
- Plain rear door.
- 3 mm double bar system lock.
- 4 support brackets for bottom plate.
- Bottom mounting plate, removable plate and upper brackets (only with **PKP.../F...PM**).
- 2 parts cable gland plate.

FIAT lock		TFI/OLN
E1 lock		TLE1/OLN
Padlock		BC/OLN

(1) To form the new lock order the panel with handle ref.: **MCS/OLN** plus the operating/locking variant chosen.

IP55 (EN 60529)

Plate support suites

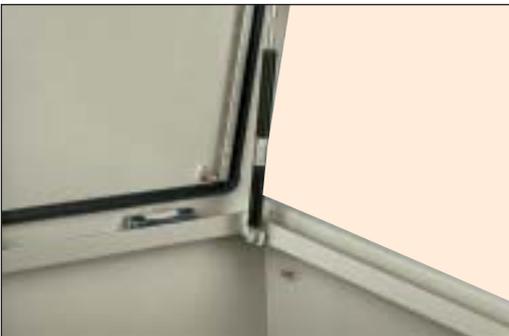

DFPK suite... needed to fix front or total plates to **PKP.../F** control desks.

- Are depth-adjustable.
- For double plates (back-to-back) the 4 loose bracket suite should be ordered. Ref.: **EDF/PK**.

To couple to front of control desk	Reference
PKP.../F30	DFPK-2030
PKP.../F50	DFPK-4050

Pneumatic retainers

Quick-to-mount pneumatic retainers make it easy to open the console while stopping it from dropping abruptly.

Maximum load per retainer	Reference
21 kg	RETN 21/PK
24 kg	RETN 24/PK
29 kg	RETN 30/PK

PC monitor support

Monitor support suite to join to the front of the **PKF.../F** control desks, consisting of guides and horizontal tray.

To couple to control desk	Reference
PKP800/F...	SPC8
PKP1000/F...	SPC10
PKP1200/F...	SPC12
PKP1600/F...	SPC16

Diagram rest

Profile for fixing to the edge of the top tilted panel. Stops diagrams or material from falling.

- Made of **PVC** to RAL-7011.

To couple to width control desk	Reference
600	REP 6
800	REP 8
1000	REP 10
1200	REP 12
1600	REP 16

Stainless steel enclosures

Door reinforcement frame on **CRSX 108** and **128** models.

Polyurethane foamed gasket ensuring full watertightness (IP66).

Back with 4 welded studs for fixing of mounting plate and depth adjustable supports. 4 drillings for direct wall fixing or through brackets.

Vertical door profiles (up from 600 mm high enclosures) for fixing of equipment.

Earthing between body and door through welded studs. Total safety of use. Available as accessory.

Stainless steel hinge bolted to the body of the enclosure for a reversible door and easy machining. Opening angle over 120°.

for permanent protection

Stainless steel inside guide and reinforcement frame with section 18×18 mm, reinforced at 25 mm intervals with Ø 5 and 10 mm drill holes.

Inside view of cable gland plate in stainless steel.

Guide with drill holes every 25 mm to facilitate depth-adjustment of the plate.

IP66 (EN 60529)

CRSX 54/200

The stainless steel Himel enclosures are specially suitable for corrosive environments and installations where hygiene is essential. Also in chemical and food industries, etc.

- Monobloc watertight AISI 304 stainless steel enclosures. Types AISI 304L (resistant against corrosive organic agents) and AISI 316 (resistant to concentrated acids and halogen based agents) also available on request.
- Scotch brite (AST) type mechanical polish for an excellent surface quality and improved protection against corrosion. Electrical polish on request.

- 14 dimensions. Wide range of accessories compatible with the **CRN** enclosures.
- **CMOX** range in stainless steel also available, dimensions up to 2000 high × 1600 wide × 600 deep (mm).

Dimensions (mm)

FIG. 1

- ① 2 mm thick door reinforcement frame in **CRSX 108/300** and **128/300** models. □ 20 × 15 mm cross section with Ø 5 and 10 mm drillings every 25 mm.
- ② Two vertical door reinforcement profiles (models from 600 mm high) with 4,25 mm Ø drillings every 25 mm.

IP55 (EN 60529)

**CMOX 188/40**

Floor standing enclosures made of AISI 304 stainless steel. Polished finish.

- Door in folded and welded 304 stainless sheet steel.
- Door opening 120°, to right or left. Reinforcing frame on door, with 4 stainless steel hinges.
Maximum load 50 kg.
3 locking points. Handle with key 405.

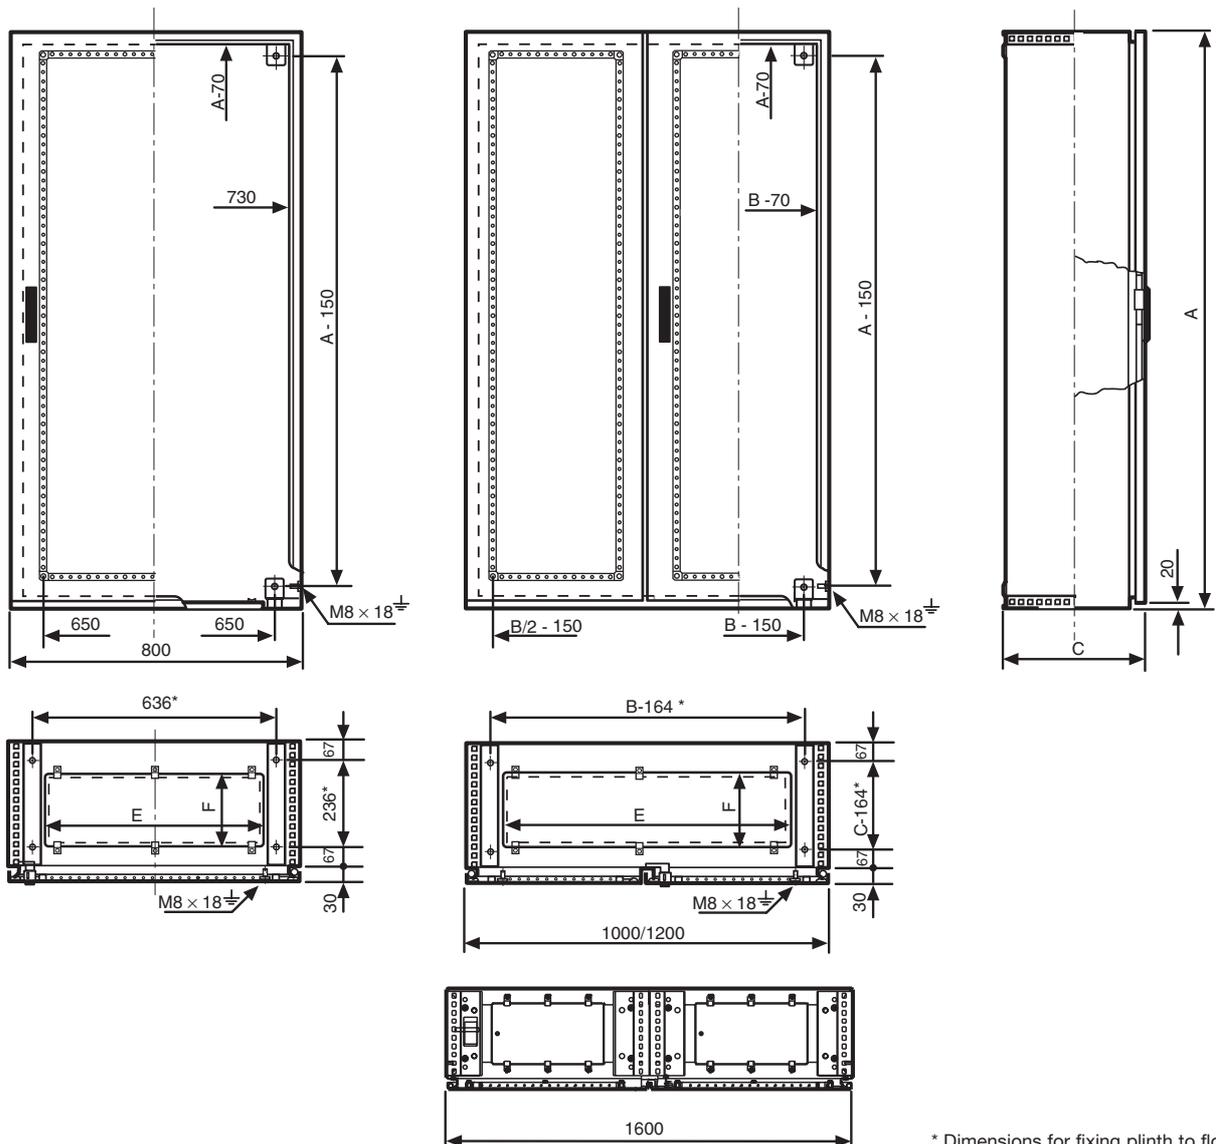

- 4 support brackets included for mounting plate **PMOL**.
- Stainless steel cable gland plate.
- Optional 100 and 200 mm high plinths.
- Optional stainless steel canopies.
- Lifting eyebolts **TMO/12** available.

FUNDAMENTAL COMPONENTS

IP66/IP55 (EN 60529)

Mounting plates

Metallic

Insulating

Perforated

Universal

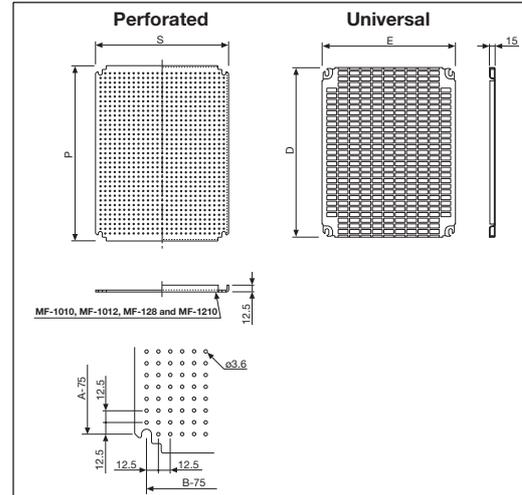

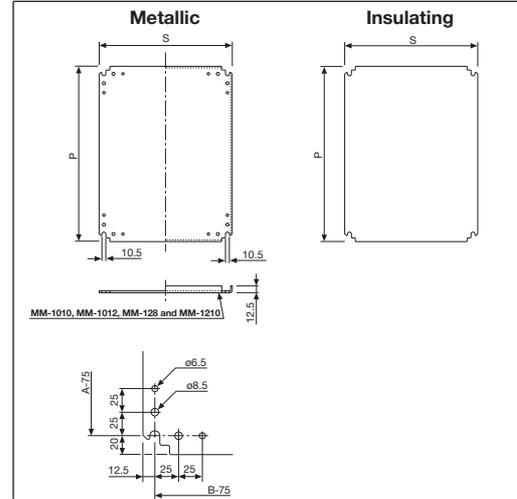

A comprehensive range of plates in three versions solves most installation requirements.

■ Mounting plates in zinc bichromated steel with holes for accessory fixing and earth connection.

■ Insulating plates in bakelite.

■ Perforated plates in galvanized steel, drilled with 3.6 mm Ø holes, 12.5 mm apart.

■ Perforated plates for quick equipment fixing, in zinc bichromated steel. The distribution of them, together with the position of the nuts, cover all the fixing points.

IP66/IP55 (EN 60529)

Locks for CRSX enclosures

STD/CSX

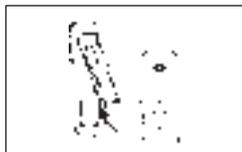

Double bar standard lock, with stainless steel latch and fixing screw. Operation through **LDB3** key (according to **DIN 43668**) (supplied as standard). Reference **STD/CSX**.

Type	Key type / reference	Reference
Stainless steel □ 6 mm square lock	LC-7	TC 6/CSX
Stainless steel □ 7 mm square lock	LC-7	TC 7/CSX
Stainless steel Δ 8 mm triangular lock	LT-8	TT 8/CSX
Key lock type 405	④	CL/CSX
Full stainless catch		CC6/CSX

Locks for CMSX enclosures

Directly operated standard closing mechanism retractable handle with key 405.

Type	Key type / reference	Reference
Double bar lock	LDB 5	TE DB/ML
Δ 7 mm triangular lock	LT-8	TE T7/ML
Δ 8 mm triangular lock	LT-8	TE T8/ML
□ 6 mm square lock	LC-8	TE C6/ML
□ 7 mm square lock	LC-8	TE C7/ML
□ 8 mm square lock	LC-8	TE C8/ML
Key lock type 405	④	TE L/ML
Safety cylinder lock		TE R/ML
Manual lock		TEM/PLD
Padlock fastening		BCME/PL

Wall fixing brackets

Set of 4 stainless steel brackets fixed from the outside vertically or horizontally. Not included in standard supply. Reference: CRSX: **PFCX**. CMOX: **FCMX**.
