## PRODUCTS IN PERSPECTIVE

For proof of Allied Moulded's quality, just look to our SLIDERBOX® — a product that repositions **without removing or relocating the mounting screws**. It's not something you'd expect in just any adjustable wall box, but then again, that's why it's from Allied Moulded.

LISTED  
E30594

## ALLIED MOULDED'S NON-METALLIC ADJUSTABLE WALL BOX

Simply loosen the two screws and slide the box forward until it's flush with the additional wall substrate.

### PRODUCT FEATURES

- Internal rails guide slider for smooth mounting adjustability in wall substrates from 1/2" to 1 3/8" thick
- Square corner design allows for easy cut-in for old work applications; includes molded spline device holes
- Exclusive patented (6365831 B1) molded in Speed Klamps™ in multi-gang and ceiling boxes
- Patent pending slider plate holds screws in ready position for faster mounting
- Notched on side of box for straight sliding action; heavy-duty, non-slip pad for solid mounting
- Internal screws recessed in slider plate pockets per UL 514C requirements

# FiberglassBox™ Features:

fiberglassBOX™  
From Allied Moulded Products

Allied Moulded switch and outlet boxes are molded of impact-resistant, high-strength fiberglass reinforced thermoset polyester material. Our FiberglassBox™ “Premier Series” line of products was created for the electrical contractor looking for non-metallic outlet boxes with “hard box” characteristics. Allied Moulded’s FiberglassBox™ line offers the following advantages.

- Non-corrosive
- Non-conductive-no ground required
- Non-distorting in high heat
- Will not melt
- Shatter resistant in cold temperatures
- Lightweight
- Heat insulator

## 2-Hour Wall and Ceiling Fire Classification

All Allied Moulded fiberglass boxes, including our 5305 five gang, are classified by Underwriters Laboratories for use in 2-hour rated walls or ceilings. During an actual fire test set up in a UL® laboratory, Allied boxes passed all of the test criteria outlined in UL® Standard 263 for both walls and ceilings.

Backed by even more UL® testing, the horizontal box separation requirement outlined in the Uniform Building Code™ can be reduced to as little as three inches without using any additional fire resistive protection. Allied Moulded fiberglass boxes, up to and including two three-gangs, can be mounted in the same stud cavity of fire rated walls **with absolutely no additional fire resistant protection needed.** In fact, only Allied has documentation covering all 52 U300 Series wall configurations, eliminating the need for additional putty pads, mineral wool insulation or alternate construction saving the contractor both time and money. See pages 4 and 5 for more information.

Look for our classification CEYY “Outlet Boxes and Fittings Classified for Fire Resistance” on our web site at [www.alliedmoulded.com](http://www.alliedmoulded.com) or in the UL® online certification directory at [www.ul.com](http://www.ul.com). Additional documentation from these testing processes is available for examination upon request.

## Labor Saving Features

With innovative products designed for the electrical contractor, Allied offers the largest, most complete line of box sizes and attachment brackets in the industry for a wide variety of applications. A few of the most popular attachments are:

1. The “S” snap bracket or a “W” wing bracket for secure old work box installation.
2. “BH” and “16” adjustable bar hangers for maximum support of ceiling boxes used for fixture support.
3. “Z” brackets with metal spurs to fasten wall boxes to wood or steel studs.
4. The “B” adjustable stabilizing bar, available on 2, 3, 4 or 5 gang boxes, for more secure mounting used in conjunction with nails or “Z” brackets.

- A. Offset gauge marks on box give positive stop for the proper wall thickness.
- B. Bright common nails or pierce-point screws fit securely in specially designed supports and are angled for easy installation.
- C. Tapered and machine tapped device holes allow device screw to be started by hand and speed installation time with high torque screwdrivers.
- D. Cubic inch capacity clearly marked and easy for contractor and inspector to locate and identify.
- E. Proudly UL® listed.
- F. Knockouts on fiberglass boxes are complete, reducing drafts and easily removed with wire for no tools installation.
- G. Leveling ribs position face of box parallel to wall surface.
- H. “Z” brackets are designed to securely hold box to wood or steel studs. Brackets also provide proper 1/4” or 1/2” offset.
- I. 2-Hour Fire Rated clearly marked for easy inspector identification.
- J. Patented non-metallic Speed “K” Klamps™ dependably secure wire in box. Should a knockout be inadvertently opened and not used, the Speed “K” Klamp™ is considered sufficient closure of the opening per UL®.

# We Can Stand the Heat:

**Now you can mount Allied Moulded outlet boxes\* in the same stud cavity without any additional fire resistive protection!**

We've been telling you for years that Allied fiberglass outlet boxes can truly take the heat. Now there's solid proof backed by Underwriters Laboratories test results. When penetrating all U300 Series fire resistive wall assemblies (including staggered stud) with Allied outlet boxes, up to and including our three gang, you can now mount two boxes in the same stud cavity on opposite sides of the wall without using any additional protection. That's right—no mineral wool batt or putty pads needed to insulate the box. **Absolutely no additional fire resistant protection required!** Prime application examples include a wall between multi-family dwellings.

In this or any other application, Allied Moulded outlet boxes are proven so reliable you can feel confident using them for all your outlet box needs. Look for our classification CEYY "Outlet Boxes and Fittings Classified for Fire Resistance" on our web site at [www.alliedmoulded.com](http://www.alliedmoulded.com) or in the UL® online certification directory at [www.ul.com](http://www.ul.com). Additional documentation from these testing processes is available for examination upon request.

# Frequently Asked Questions:

## Reduction in Horizontal Box Separation in Fire Resistance Rated Walls

### 1. In what type of construction would this rating apply?

This rating applies where non-metallic sheathed cable is used and walls are constructed of wood and non load bearing steel studs and gypsum.

### 2. If the box is marked with a 2-hour wall rating, is this the same thing?

A box that is marked with 2-hour wall rating means that you can install the box in a 2-hour fire resistive wall or walls with less than 2-hour rating. To find out details of the installation, you must read the instructions found in the UL® Fire Resistive Directory or from the UL® card provided by the manufacturer.

The Directory or UL® card describes the following:

- Those boxes suitable for use in the wall by basic model number
- The maximum size opening in square inches
- The maximum openings in total square inches per 100 square feet
- The maximum clearance around the box
- The type construction of the wall assembly – “wood studs and gypsum”
- The wall designs such as “U-300 Series” meaning all wall designs found in the UL Fire Resistive Directory from U-301 through U-370, including those staggered stud designs and separated wall designs
- Horizontal separation when mounted on opposite sides of the wall
- Cover plate material (when limited)

### 3. What is the maximum size box that can go into the same stud cavity?

Paragraph #2 of the card states for those fire resistive wall designs with or without insulation, the maximum size box is a 3 gang 3300, 3303, 9313 (22.0 sq. in.). These boxes can be mounted in all U-300 Series walls with a horizontal separation of three inches when boxes are mounted on opposite sides of the wall. **Note: This does include staggered stud construction.**

### 4. Does this rating apply to staggered stud configuration?

Yes. U-300 Series walls have both staggered stud designs in addition to separated type walls.

### 5. Will I still need to use mineral wool or fiberglass insulation?

The wall assembly design dictates the need for insulation. The wall design does not change when penetrated by Allied Moulded outlet boxes.

### 6. What if I am actually putting double drywall in the middle to help with sound?

If the wall is constructed of wood studs and gypsum board and is a 2-hour or less fire resistive rated, the penetration with an Allied Moulded outlet box will not cause the wall to be derated as long as it is installed according to instructions.

### 7. Can I put the boxes back to back?

The Fire Resistive card says the boxes must be separated by three inches horizontal separation but not back to back.

### 8. Do you still have to caulk the knockouts that are penetrated by the wire?

Boxes were tested with non-metallic sheathed cable installed. No caulk is necessary where knockouts are penetrated by the non-metallic sheathed cable.

### 9. If I accidentally open a knockout I do not need, do I need to caulk it?

The National Electrical Code requires all unused open knockouts to be closed. Allied Moulded's Speed “K” Klamp™ is an accepted means of closing the knockout (documentation available upon request). Open unused knockouts in boxes without Speed “K” Klamps™ would need to be closed.

### 10. Is there a rating that relates to vertical separation?

Not to our knowledge.

### 11. Does this apply to ceiling configurations, as well?

The instructions for ceiling penetrations are found on the same documentation as the wall boxes; however, the instructions are different.

### 12. Does this apply to low voltage devices?

The fire resistive rating is for Allied Moulded boxes penetrating fire resistive walls classified at 2 hours or less. What is placed inside the box is covered by the National Electrical Code and does not affect the fire resistive rating of the box.

### 13. Which inspector will be enforcing this code? Electrical or Building or Fire?

Minimum horizontal box separation is a requirement of the applicable building code. Generally, the electrical inspector will view the installation first, but final compliance falls on the building inspector.

Please contact our Technical Support Department for clarification on this listing or to address any further questions.

# Speed "K" Klamp™:

## Cubic Inch Requirements

Virtually eliminate clamp breakage during knockout • Easy "no tools" installation • Secures wires quickly and dependably

Punching through the knockouts on ordinary electrical boxes often requires a screwdriver and leads to damaged clamps that compromise a box's safety and code compliance.\* But Allied Moulded's patented Speed "K" Klamps™ eliminate the risk and problem of broken clamps. Fast, easy entry knockouts can be pushed through with the wire. No tools required. No broken clamps. It's a one-two punch that leaves the competition down for the count.

Allied offers a unique non-metallic wire clamping system featuring UL® listing, faster installation, and a no cost way of meeting National Electrical Code requirements. Should a knockout be inadvertently opened and not used, the Speed "K" Klamp™ is considered sufficient closure of the opening per UL®. Documentation is available upon request.

\*Reference 2005 NEC 314.17(C)

2. Insert the conductors from the outside of the box into the appropriate knockout and **OVER THE TOP** of the Speed "K" Klamp™ until the outer jacket extends at least 1/2" past the top of the klamp.

1. Remove the knockout and prepare the conductors to enter the box per NEC.

3. Bend wire 90° over Speed "K" Klamp™.
4. Pull wire from outside of box to ensure Speed "K" Klamp™ engagement.

# Attachment Codings:

## Component Descriptions and Ordering Information

We want it to be as easy as possible for you to locate the right outlet boxes to meet your needs. Most Allied Moulded boxes can be manufactured with these letter coded components. For example, steel stud screws may be ordered when applicable by adding the suffix "SS" to the basic catalog number, i.e., 1098-SS.

**B** The adjustable stabilizing bar is available on the 3, 4 and 5 gang boxes and used in conjunction with Nails or Z hangers.

**G** The grounding strap on outlet boxes permits the lighting fixture to be grounded when necessary. Available on round boxes.

**S** Snap bracket pushes through opening in wallboard, then snaps out on the back side.

**Z** The "Z" hanger which mounts on stud face has spurs to secure the hanger to wood and steel studs.

**HL** "HL" hanger which mounts on the side of the stud or joist, has spurs which hold the hanger to the joist for easier nailing.

**SS** Pierce point sheet metal screws are installed for easy penetration of non-load bearing steel studs 22 gauge or lighter.

**2Z** "Z" hangers are installed on both sides of the box.

**V** "V" Polyurethane seal for use in single sheet drywall applications.

**E** Metal ears are securely molded into the box.

**N** Nails are installed as fastening devices. Fetter ring nails, when offered, allow for extra strength when nailed into stud or joist.

**W** When wing bracket screws are tightened, the box is drawn firmly against the wall.

**HF** "HF" hanger which mounts flush on the side of the stud, has spurs which hold the hanger to the stud for easier nailing.

**HN** With the "HN" hanger, application is quick and easy because nails are installed.

**BH** "BH" Bar Hanger adjustable bar assembly for either 16" or 24" joist spacing.

**16** "16" bar hanger is specifically designed for box location in max 16" joist spacing.

**V2** "V2" Polyurethane seal for use in double 5/8" drywall applications.

### Factory Installed Clamps

**SPEED "K" KLAMP™**

Catalog numbers with the suffix "K" indicates factory installed non-metallic Speed Klamps™.

**"C" CLAMP**

Catalog numbers with the suffix "C" indicate factory installed wire clamps. The number following the "C" indicates the number of wire clamps i.e., "C4" = 4 wire clamps.

## Residential Switch or Receptacle Box

### Series 2300-2Z2

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
32.5	2300-2Z2	1/4" offset, "Z" hanger each side of box, Speed Klamps™-bulk packed	3	4	3-3/4	12500	12	11
32.5	2300-2Z2K*	1/4" offset, "Z" hanger each side of box, Speed Klamps™-factory installed	3	4	3-3/4	12501	12	11

### Series 2300-N

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
32.5	2300-N	Angled mid-nails, Speed Klamps™-bulk packed	3	4	3-3/4	12125	50	29
32.5	2300-NC2	Angled mid-nails, 2 wire clamps-factory installed	3	4	3-3/4	12135	50	31
32.5	2300-NC4	Angled mid-nails, 4 wire clamps-factory installed	3	4	3-3/4	12145	50	31
32.5	2300-NK*	Angled mid-nails, Speed Klamps™-factory installed	3	4	3-3/4	12127	50	30

### Series 2300-SS

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
32.5	2300-SS	Steel stud screws for use with non-load bearing studs 22 gauge or lighter, Speed Klamps™-bulk packed	3	4	3-3/4	12202	50	31
32.5	2300-SSK*	Steel stud screws for use with non-load bearing studs 22 gauge or lighter, Speed Klamps™-factory installed	3	4	3-3/4	12203	50	32

### Series 2300-Z2

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
32.5	2300-Z2	1/4" offset, "Z" hanger, Speed Klamps™-bulk packed	3	4	3-3/4	12400	50	35
32.5	2300-Z2K*	1/4" offset, "Z" hanger, Speed Klamps™-factory installed	3	4	3-3/4	12401	50	36
32.5	2300-Z4	1/2" offset, "Z" hanger, Speed Klamps™-bulk packed	3	4	3-3/4	12700	50	38
32.5	2300-Z4K	1/2" offset, "Z" hanger, Speed Klamps™-factory installed	3	4	3-3/4	12701	50	39

### Series 2302-N

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
37.0	2302-N	Angled mid-nails, Speed Klamps™-bulk packed	3-7/16	4	3-3/4	13060	50	31
37.0	2302-NC2	Angled mid-nails, 2 wire clamps-factory installed	3-7/16	4	3-3/4	13065	50	33
37.0	2302-NC4	Angled mid-nails, 4 wire clamps-factory installed	3-7/16	4	3-3/4	13070	50	35
37.0	2302-NK*	Angled mid-nails, Speed Klamps™-factory installed	3-7/16	4	3-3/4	13075	50	32
	2302-NKRED	Same as 2302-NK but molded in red for fire circuits				96501	12	8

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
94.0	5305-NK* (Top photo)	Angled mid-nails, Speed Klamps™-factory installed	3-9/16	9-1/4	3-3/4	18001	6	8

### Series 5305-NB

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
94.0	5305-NBK* (Top photo)	Angled mid-nails, adj. stabilizing bar, Speed Klamps™-factory installed	3-9/16	9-1/4	3-3/4	18002	6	10

### Series 5305-Z4B

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
94.0	5305-Z4BK	1/2" offset, "Z" hanger, adj. stabilizing bar, Speed Klamps™ -factory installed	3-9/16	9-1/4	3-3/4	18003	6	11

### Low Voltage Partition

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
LVP-1	Low voltage divider plate for use with 2302, 3303, 4304, 5305 Series only. See 2005 NEC 800.133(A)(1)(c).	80000	50 Consists of five (5) packages of 10 pieces each.	3

\* Indicates model shown • See page 7 for Attachment Coding descriptions

# SLIDERBOX®:

## Non-Metallic Adjustable Wall Box for Both New & Old Work Construction

Un-like Other Adjustable Boxes, With SLIDERBOX® There's No Need To Remove Or Relocate Mounting Screws To Re-position The Box.

SLIDERBOX® Installed with 1/2" Drywall

SLIDERBOX® Adjusted for Additional Ceramic Tile

## SLIDERBOX® Features

- Slots retain slider plate and guide it in a straight motion.
- Internal rails guide slider plate for smooth mounting adjustability in wall substrates from 1/2" to 1 3/8" thick, and ceiling substrates from 1/2" to 1 5/32".
- Square corner design allows easy wall cut-in (Old work applications).
- Molded spline device holes for quick device screw installation in wall boxes and machine tapped threads for ceiling fixture support in round ceiling boxes.
- Allied Moulded exclusive patented (U.S. Pat. #6365831 B1) molded in Speed Klamps™ in multi-gang and ceiling boxes.
- Molded of engineering grades of non-metallic thermoplastic.
- SB-2, SB-3 are UL listed for 2HR fire resistive walls
- SB-1, SB-1H, SB-CB and SB-CBFR are UL listed for 2HR fire resistive walls and ceilings.

- Slider plate holds screws in ready position to enable contractor to mount boxes faster.
- Patent pending design allows for adjustments in new or old work installations.

- Heavy-duty non-slip pad to ensure box and slider assembly solidly hold mounted position.
- Tested to hold 50 lbs. hung on box to simulate power cord pull-out strength.

- Fan support product has steel bracket and mounting bolts for secure paddle fan mounting.

- Multi-gang boxes consist of internal holding slots for LVP-2 low voltage partitions and dual voltage applications.

Slider plate in full forward position sets box for 1/2" drywall.

Slider plate retracted sets box in fully adjusted forward position for maximum wall substrate thickness of 1 3/8".

## Installation Instructions:

1. Position slider plate forward so box will mount in its normal position for nominal drywall thickness.

2. Attach SLIDERBOX® to wood stud by driving screws in tight.

3. Wires should be installed and drywall hung and trimmed according to building code.

4. SLIDERBOX® will be mounted flush with drywall at this point.

## Adjust Box for Additional Wall Substrate:

1. Once additional wall substrate is applied, the SLIDERBOX® will need to be adjusted flush to the new surface.
2. Make sure there is clearance around the box prior to adjustment.
3. Loosen the two mounting screws until box moves freely in the slider mechanism and will slide forward.
4. Grab box interior or the installed wire and pull forward until top edge is flush with the new surface.

5. Re-tighten the slider plate mounting screws.
6. Install wire device and cover plate.

# Vapor Seal: Forms Energy Efficient Vapor Seal

Allied Moulded's patented\* vapor seal boxes are designed to meet state and local energy savings requirements. When used in conjunction with the building interior insulation material, the flexible polyurethane flange around the box forms an energy efficient vapor seal that provides an air barrier in exterior walls and ceilings. The benefits of using these boxes in areas of the country without energy requirements can also be realized by preventing air leaks in exterior walls. Allied Moulded vapor seal boxes can help stop warm air leaks during the winter and, conversely, cool air leaks during the heat of summer making for a more energy efficient home.

# FLEXBOX® Features:

## Residential Units

## Material Characteristics

Allied Moulded Flexbox® switch and outlet boxes are molded of engineering grades of non-metallic thermoplastic materials. Our Flexbox® line of products was created for the electrical contractor looking for non-metallic outlet boxes with “soft box” characteristics. Allied Moulded’s Flexbox® line offers the following material advantages:

- Non-corrosive
  - Light weight
- Non-conductive
  - No accessory clamps
- Splined thread holes – wall boxes
  - Machine tapped holes – ceiling boxes

## Labor Saving Features

- A. Patented integral Speed “K” Klamps™.
- B. Molded thread device holes for wall boxes.
  - a. Optional Quick Thread™ device holes.
- C. Machine tapped thread holes for secure fixture installation.
- D. Proudly UL® listed
- E. 2-Hour Fire Rated clearly marked for easy inspector identification.
- F. Large cubic inch capacity clearly marked and easy for contractor and inspector to locate and identify.
- G. Stabilizing bracket for maximum support and flush face alignment of wall boxes.
- H. Molded wallboard tabs for securing multi-gang boxes on the opposite end of the framing stud.
- I. Wall box face brackets for steel or wood stud construction.
- J. Offset gauge marks on box give positive stop for the proper wall thickness.
- K. Square corner design for easy wall cut-in.
- L. Steel wing brackets for secure box mounting.
- M. 1/2” knockouts in multi-gang old work boxes for use with wire/conduit connectors.
- N. Molded flange and steel snap bracket for secure old work box installation.
- O. Round exterior for easy wall cut-in.

## Flexbox® Attachment Codings

- B** – Stabilizer bracket
  - G** – Ground strap
  - R** – Reverse nail mounting option
  - BH** – Adjustable bar hanger for 16” to 24” joist spacing
- N** – Nail on mounting
  - H** – Face bracket for steel and wood stud mounting
  - QT** – Quick Thread™ device hole option
  - 16** – Bar hanger max 16” joist spacing

# Installation Instructions:

## Installation Instructions for Single Gang Boxes

### Old Work Single Gang Boxes with "E" Ears

• Part Numbers: 9331-EK, 9363-EK, 9368-EK

The Allied Moulded 9331-EK, 9363-EK and 9368-EK can be mounted two ways, either through the holes in the metal plaster ears or through the hole provided in the bottom of the box.

#### Ear Mount Instructions

1. Cut an opening in the wall to comply with NEC 314-20. Allied Moulded Products' template #1TP is designed to provide the guide for such a hole and allows 1/16" clearance around the outside of the box.
2. Using two (2) #8 sheet metal screws at least 3/4" in length, attach the box to the substrate. One screw should be located at each end of the box. UL® has tested these boxes in 3/8" thick plywood which is the substrate used for their standard test. The strength of the substrate must be equal to 3/8" thick plywood.
3. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

#### Bottom Mount Instructions

1. Cut an opening in the wall to comply with NEC 314-20. Allied Moulded Products' template #1TP is designed to provide the guide for such a hole and allows 1/16" clearance around the outside of the box.
2. Secure mounting block scab in wall.
3. Using one (1) #8 sheet metal screw at least 3/4" in length, mount box to the scab through the hole in the bottom of the box. UL® has tested these boxes in 3/8" thick plywood which is the substrate used for their standard test. The strength of the scab must be equal to 3/8" thick plywood.
4. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

### Old Work Single Gang Boxes with "W" Wing Brackets

• Part Numbers: 9331-EWK, 9363-EWK, 9368-EWK, P-1220W  
The Allied Moulded 9331-EWK, 9363-EWK\* and 9368-EWK are mounted identically. (1a.) P-1220W (1b.)

- 1a. Cut an opening in the wall to comply with NEC 314-20. Allied Moulded Products' template #1TP is designed to provide the guide for such a hole and allows 1/16" clearance around the outside of the box.

- 1b. Cut an opening in the wall to comply with NEC 314-20. Using the box as a template, place the box open face against the wall surface where the box is to be installed. Draw a line along each long side and each short side stopping at the molded ears. Remove the box and with a straight edge, complete the rectangle. Cut along the line of the rectangle using the appropriate tools.
2. Insert box into opening. Tighten wing screws to secure box to wall substrate. UL® has tested these boxes in 3/8" thick plywood which is the substrate used for their standard test. The strength of the substrate must be equal to 3/8" thick plywood.
3. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

\*Allied Moulded Products has had the 9363-EW style box tested in wall assemblies that use 5/16" thick gypsum board covering. This test was conducted by a testing laboratory that has been evaluated by BOCA as an independent testing and inspection agency for manufactured buildings. This report is available upon request.

## Installation Instructions for Two Gang Boxes

### Old Work Two Gang with "W" Wing Brackets

• Part Numbers: 9312-EWK, 9329-EWK (1a.), P-2400W (1b.)

- 1a. Cut an opening in the wall to comply with NEC 314-20. Allied Moulded Products' template #2TP is designed to provide the guide for such a hole and allows 1/16" clearance around the outside of the box.
- 1b. Cut an opening in the wall to comply with NEC 314-20. Using the box as a template, place the box open face against the wall surface where the box is

to be installed. Draw a line along each long side and each short side stopping at the molded ears. Remove the box and with a straight edge, complete the rectangle. Cut along the line of the rectangle using the appropriate tools.

2. Insert box into opening. Tighten wing screws to secure box to wall substrate. UL® has tested these boxes in 3/8" thick plywood which is the substrate used for their standard test. The strength of the substrate must be equal to 3/8" thick plywood.
3. If the wall assembly is not accessible from the back

side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

• Part Numbers: 9372-NMHK

1. Locate and position leveling rib on surface of box to the framing member. This will position box at a depth of 7/16 to 1/2 inch.
2. Hold box at desired position and drive nails into stud with hammer.
3. Install non-metallic sheathed cable through knockout.

## Installation Instructions for Three Gang Boxes

### Old Work Three Gang Box with "W" Wing Brackets

• Part Numbers: 9313-EWK (1a.), P-3520W (1b.)

- 1a. Cut an opening in the wall to comply with NEC 314-20.
- 1b. Cut an opening in the wall to comply with NEC 314-20. Using the box as a template, place the box open face against the wall surface where the box is

to be installed. Draw a line along each long side and each short side stopping at the molded ears. Remove the box and with a straight edge, complete the rectangle. Cut along the line of the rectangle using the appropriate tools.

2. Insert box into opening. Tighten wing screws to secure box to wall substrate. UL® has tested these boxes in 3/8" thick plywood which is the substrate

3. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

## Installation Instructions for 3-1/2" Round Boxes

• Part Numbers: 9305-K, 9355-K, PC2230W

The Allied Moulded 9305-K and 9355-K can be mounted two ways, either through the holes in the flange or through the holes provided in the bottom of the box.

#### Flange Mount Instructions

1. Cut a 3-5/8" diameter circular hole in the wall or ceiling board. The box diameter is nominally 3-1/2" and the 3-5/8" diameter hole allows 1/16" clearance around the outside of the box.
2. Using two (2) #8 sheet metal screws at least 3/4" in length, attach the box to the substrate through two (2) of the holes provided diagonally across from each another. **Note: Wall substance must be capable of supporting the box with the rated load.**
3. If the wall assembly is not open to the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

#### Bottom Mount Instructions

1. Cut a 3-5/8" diameter circular hole in the wall or ceiling board. The box diameter is nominally 3-1/2" and the 3-5/8" diameter hole allows 1/16" clearance around the outside of the box.
2. Secure mounting block scab in wall. For a 9305-K, the scab is to be installed 1-13/16" from the substrate surface into the wall section. A 9355-K would require the scab to be mounted in the wall section 2-13/16" from the substrate surface. A PC2230W would require the scab to be mounted 2 13/16" from the substrate surface into the wall section.
3. Using two (2) #8 sheet metal screw at least 3/4" in length, mount box to the scab through the two (2) holes in the bottom of the box. **Note: Wall substance must be capable of supporting the box with the rated load.**
4. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

### Old Work Round Boxes with "S" Snap Bracket (Wall applications)

• Part Numbers: 9305-SK, 9338-ESK, 9355-SK, PC2230W

1. Cut a 3-5/8" diameter circular hole in the wall board. The box diameter is nominally 3-1/2" and the 3-5/8" diameter hole allows 1/16" clearance around the outside of the box.
2. Insert box into opening. Bracket will automatically compress and snap back into position. Tighten snap bracket screws until bracket is drawn snug to the back of the wallboard. **Note: Wall substance must be capable of supporting the box with the rated load.**
3. If the wall assembly is not accessible from the back side to complete the wiring, the wires must be secured to the box with Speed Klamps™ before installing the box in the wall assembly.

# Structured Cable/Low Voltage:

## Low Voltage Partition

Cu. In. Volume	Catalog Number	Component Description	D	W	H	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
----	LVBOW-1	Single gang, old work, structured cable box with ears and wings	3 1/16	2 3/10	3 11/16	80003	24	4
----	LVB-1	Single gang, angled mid-nails, structured cable box	2 3/4	2 1/4	3 3/4	80002	48	10
----	LVPR-1	Single gang plaster ring, 1/2" offset, structured cable bracket for steel or wood stud face mounting	1/2	4	4	80001	50	4
----	LVP-1*	Low voltage divider plate for use with 2302, 3303, 4304 and 5305 series only.	----	----	----	80000	50*	3
----	LVP-2*	Low voltage divider plate for use with P-2400W, P-3520W, SB-2, SB-3, and SB-4	----	----	----	80005	50*	3

\* Consists of 5 packages of 10 pieces each

## Features and Benefits:

### LVBOW-1

#### LVBOW-1 Features and Benefits

- Old work structured cable box
- Sturdy construction with “box like” **strength and rigidity**
- Molded thread device holes provide for secure mounting of structured cable devices and cover plates
- Eliminates the need to modify single gang outlet boxes
- Open back design for generous cable bend radius
- Holes in back section provide a **means to secure the cable** allowing cable accessibility later (fig. A)
- US Patents D531,128 and 7,179,994

fig. A

### LVB-1

#### LVB-1 Features and Benefits

- New work structured cable box
- Sturdy construction with “box like” **strength and rigidity**
- Eliminates need to modify single gang box
- Open back for generous cable bend radius
- Easy nail-on mounting design
- Holes on back provide a **means to wire tie the cable** allowing cable accessibility later (fig. A)
- Open back channel to **store and protect cable** during drywall phase (fig. B)
- US Patents D531,128 and 7,179,994

fig. A

fig. B

### LVP-1, LVP-2 & LVPR-1

LVP-1

#### LVP-1/LVP-2 Features and Benefits

- **Separates line and low voltage** within the same electrical box
- Use LVP-1 with Allied Moulded's deep series 2302, 3303, 4304, & 5305 fiberglass boxes
- Use LVP-2 with Allied Moulded's Flexbox® Old Work boxes P-2400W & P-3520W and SLIDERBOX® Products
- Allows for a reduced number of wall box installations
- Fast, easy and **convenient to install**
- Complies with article 800.133(A)(1)(c) from 2005 NEC
- For low voltage **applications in fire rated walls**. Utilize the LVP-1 partition with the Allied Moulded deep series fiberglass wall boxes which carry the industry exclusive rating for reduced horizontal separation in the same stud cavity

# Accessories:

## Bulk Clamps, Ground Straps, Panel Stops, Low Voltage Partition, Templates

### Single Speed Klamp™

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
1K-100	Single Speed Klamp™	88011	100	1

### Wire Clamp

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
WIRE CLAMP	Wire clamp with screw	88010	100	2

### Ground Strap

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
GRD STRAP	Ground strap with screw	88020	100	2

### Panel Stop

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
50PANST	Panel stop to square up box in misaligned walls	17546	50	1

### Single Gang Template

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
1TP	Metal template for single gang old work box: 9331-E Series, 9363-E Series, 9368-E Series	88015	1	1

### Two Gang Template

Catalog Number	Component Description	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
2TP	Metal template for two gang old work box: 9312-E Series, 9329-E Series	88016	1	1

# Lampholders:

## Keyless MEDIUM BASE

Catalog Number	Component Description	Outside Diameter	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
LH-11P*	Keyless lampholder, 660W/250V, 4 terminal screws	4-9/16	87000	48	13
LH-11WP	Keyless lampholder with wire leads, 660W/250V	4-9/16	87001	48	14

## Pull Chain

Catalog Number	Component Description	Outside Diameter	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
LH-12P*	Lampholder 660W/250V, 3' pull cord, 2 terminal screws	4-9/16	87002	48	14
LH-12WP	Lampholder with wire leads, 660W/250V, 3' pull cord	4-9/16	87003	48	15

## Pull Chain with Grounded Outlet

Catalog Number	Component Description	Outside Diameter	UPC# 85339	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
LH-13P*	Lampholder, 660W/250V, 3' pull cord, grounded outlet, (125VAC/15A)	4-9/16	87004	48	15

**LAMPHOLDER  
3MHN**

Designed in USA  
Made in China

## Lampholder Mounting and Wiring Features

**LH-11P**

**LH-11WP**

**LH-12P**

**LH-12WP**

**LH-13P**

All models accept various manufacturers' bulb protective cages.

# Compact Fluorescent Luminaire

## LH-CFL1

### Luminaire Design Features

- For use in attics, basements, closets and garages
- Energy savings of up to 75% compared to incandescent bulbs
- 10,000 hour bulb life
- Fully assembled with GU24 - 13W bulb and polycarbonate lens
- 13W CFL bulb produces same light as 60W standard incandescent light bulb
- Lens securely locks to base with spring-loaded tabs
- Lamp Base mounts to most 3 1/2" and 4" ceiling boxes

Supplied with compact fluorescent bulb, mounting screws, and wire nuts.

Prepackaged in a blister pack with bi-lingual installation instructions.

CF Luminaire	Bulb Wattage	Catalog Number	Component Description	Base Dia.	Asm. Height	UPC# 85339	Pkg. Qty.	Std. Pkg. Wt. (lbs.)
	13 W	LH-CFL1	Compact fluorescent luminaire with wire leads (mounting screws included)	5.06"	3.04"	87005	12	9
	13 W	LH-CFL2	Compact fluorescent luminaire with wire leads and pull chain (mounting screws included)	5.06"	3.82"	87006	12	11

#### Replacement Bulb Part Numbers:

MaxLite; MLS13FUSWW, 13 Watt, GU24 fixture base, M.O.L. = 2.52"

TCP; 33213SSP, 13 Watt, GU24 fixture base, M.O.L. = 2.3"

Golo; GU241327, 13 Watt, GU24 fixture base, M.O.L. = 2.36"

Designed in USA  
Made in China

Compact Fluorescent Luminaire

# Floor Box Assemblies: Wood Floor Cut-In Application

## FLOOR BOX FEATURES:

- Designed for use in wood floor construction (Can be installed with multiple floor substrate materials (ceramic, hardwood, laminate, or carpet))
- Extra deep wiring capacity
- UL® listed; 514C floor box scrub water test
- Provisions for cable entry through molded-in Speed Clamps™ or 1/2" KO's
- Steel wing brackets for secure installation
- Basic rectangular or round exterior profile for quick and easy cut-in installation

### Rectangular Floor Boxes

Cu. In. Volume	Catalog Number	Component Description	UPC#	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
24.5	FB-1	Rectangular floor box assembly, simplex device, flange and wing brackets	94123	12	15
24.5	FB-2	Rectangular floor box assembly, duplex device, flange and wing brackets	94124	12	16

### RECTANGULAR FLOOR BOX SPECS:

- Cut-in hole size: 2.625" x 4.437"
- Box size (no flange): 3.410" (D) x 2.498" (W) x 4.312" (H)
- Flange outside dimension: 3.250" x 4.883"
- Cover dimension: 0.217" (D) x 3.500" (W) x 5.125" (H)
- Box volume cu. in.: 24.5
- (2) 1/2" KO's on bottom and (2) 1/2" KO's on the side wall
- (2) molded-in Speed Clamps for NM cable
- Part material types:
  - ~ Cover: Brass, brushed finish
  - ~ Gasket: closed-cell polyurethane
  - ~ Screws & wings: galvanized steel
  - ~ Device: non-metallic with copper terminals and brass ground
- Receptacle rating: 15 amp, 125V tamper resistant (2008 NEC Article 406.11 requirements for receptacles in dwellings)
- Assembly meets UL514C scrub water test

### Round Floor Box

Cu. In. Volume	Catalog Number	Component Description	UPC#	Std. Pkg. Qty.	Std. Pkg. Wt. (lb.)
24.5	FB-3	Round floor box assembly, simplex device, flange and wing brackets	94125	12	18

### ROUND FLOOR BOX SPECS:

- Cut-in hole size: 4.000" Dia. (standard hole saw size)
- Box size (no flange): 2.900" (Deep) x 3.936" dia.
- Flange outside dimension: 5.000 dia.
- Cover dimension: 5.250" dia. x 0.217" thickness
- Box volume cu. in.: 24.5
- (2) 1/2" KO's on bottom
- (4) molded-in Speed Clamps for NM cable
- Part material types:
  - ~ Cover: Brass, brushed finish
  - ~ Gasket: closed-cell polyurethane
  - ~ Screws & wings: galvanized steel
  - ~ Device: non-metallic with copper terminals and brass ground
- Receptacle rating: 15 amp, 125V tamper resistant (2008 NEC Article 406.11 requirements for receptacles in dwellings)
- Assembly meets UL514C scrub water test

Made in China

# PARA-form® Siding Boxes:

## AC9500

Cu. In. Volume	Catalog Number	Component Description	Fixture Rating	UPC# 85339	Std. Pkg. Qty.	Std. (lb.)
12.0	AC9500	One-piece 4" dia. x 1-1/4" high round outlet box with 7" square mounting flange, construction prevents water from running behind box, "pop-in" non-metallic sheathed cable clamp included	15 lb.	09500	20	12

## AC9501

Cu. In. Volume	Catalog Number	Component Description	Fixture Rating	UPC# 85339	Std. Pkg. Qty.	Std. (lb.)
12.0	AC9501	One (1) AC9500 outlet box and one (1) siding installation block, outside dim.: 6-1/2" x 6-1/2", 4" dia. opening, "pop-in" non-metallic sheathed cable clamp included	15 lb.	09501	20	15

## AC9502

Cu. In. Volume	Catalog Number	Component Description	Fixture Rating	UPC# 85339	Std. Pkg. Qty.	Std. (lb.)
12.0	AC9502	One (1) AC9500 outlet box and one (1) siding installation block, accommodates larger fixture base, outside dim.: 6-7/8" x 10-3/4", 4" dia. opening, "pop-in" non-metallic sheathed cable clamp included	15 lb.	09502	12	12

### Mounting outside light fixtures is now as easy as one-two-three!

- Mount electrical box to exterior wall and feed wiring through knockout prior to siding.
- Affix mounting brackets, and caulk around box after siding is installed.
- Fit **PARA-form** block to siding box and install light fixture.

PARA-form® Siding Boxes

# TWO GREAT PRODUCT LINES FROM ONE GREAT COMPANY

Allied Moulded Products, Inc. is your single source solution for electrical outlet boxes. Whether you need premier “hard” fiberglass boxes or “soft” thermoplastic boxes, we’ve got you covered with the broadest line of electrical outlet boxes in the industry.

*fiberglass* BOX™  
From Allied Moulded Products 

The premier line of “hard” fiberglass outlet boxes.

*flex* BOX®  
From Allied Moulded Products 

The basic line of “soft” thermoplastic outlet boxes.
