

Introduction to Programming ND

1:1 Appointment Instructions

Scheduling an Appointment

We offer video calls with mentors to help our students work through tough problems in the content as well as go over project requirements. We encourage all students to schedule appointments with our team of mentors. Getting help from a real human and being able to talk through a problem to solution is one of the best ways to learn our material.

Things to know before you book an appointment:

1. Appointments must be **canceled at least 24 hours in advance**. Failure to show up for an appointment without previous notice may result in a penalty.
2. Make sure the appointment slot you sign up for is the correct project or material relevant to the help you want. Our mentors are scheduled for specific topics, so if you book for the wrong topic, you might not get the help you need.
3. You **must** fill out the description section of the appointment so the mentors have time to prepare for the appointment.
4. Please be conscious of your fellow student and limit your appointments to **once a week**. Spend the time between appointments reflecting on what you have learned as well as relying on independent research/documentation to build your self-reliance as a programmer.

Scheduling Instructions

Fill out an appointment slot on the 1:1 Appointment Calendar [here](#).

We look forward to meeting with you!

Happy learning,
The Udacity Team
