Product name	Clarity™ ADVANCED Ceramic Brackets	mini embrace™	Empower Self Ligating Brackets	PolySapphire® plus	discovery® pearl
Bracket type	Standard ligation; Twin pre-adjusted	Standard ligation	Passive self-ligating; Interactive self-ligating	Standard ligation; Twin pre-adjusted	Standard ligation; Twin pre-adjusted
Material	Ceramic	Stainless steel	Stainless steel	Ceramic; PolySapphire® plus	Ceramic
Profile	Low	Low	Low	Low	Low
Number of wings	4	4	4	4	4
Cost per bracket	Contact company	Contact company	Contact company	Contact company	Contact company
Prescriptions available	Bi-dimensional, MBT, Roth, High Torque	MBT, Roth	Andrews, Bi-dimensional, Damon, MBT, Roncone, Roth	MBT, Roth	MBT, Roth
Type of base	Micro-crystalline, mechanical-locking bonding surface with proprietary stress concentrator	Mesh	Mesh	Fully mechanical "Triple-X" base	One-piece; laser structured bonding base
Type of construction	Ceramic injection molding	MIM	MIM	Ceramic injection molding	Ceramic injection molding
Country of manufacture	Switzerland	USA	USA	USA	Germany
Slot size(s)	.018 and .022	.018 and .022	.018 and .022	.018 and .022	.018 and .022
Recommended archwire	N/A	Any	Any	Any	N/A
Auxiliary slot	No	No	No	No	No
Auxiliary available	N/A	N/A	No	N/A	N/A
Special features	Clarity™ ADVANCED Ceramic Brackets have exceeded clinical expectations and fully meet the rising demand for aesthetics from teens and adults. Plus, they have shown to be best-in-class in stain resistance.	The reduced size delivers the maximum in patient comfort and aesthetics. Made from medical grade stainless steel and features a 80-gauge foil mesh base for maximum bond strength and predictable debonding.	Coordinated in/out on both interactive and passive designs allow use as part of a fully interactive system, fully passive, or combination Dual Activation™ System.	PolySapphire® plus delivers significant advantages over conventional ceramic and sapphire brackets, including lower, anatomically shaped profile design; triple bevel slot for optimized sliding mechanics; 41% less friction than conventional sapphire brackets.	Optimal shade adaptation; optimal bonding and debonding characteristics; 3D-contoured and laser-structured base.

Special features	Passive-to-active design for ideal control in all treatment stages; high quality cobalt-nickel alloy clip for resiliency and durability; and ample under tie-wing area for application of elastomeric chains.	Ultra low-profile rounded construction. Color quadrant identification. 80-gauge mesh base. Features mushroom-style hook and flared entry and chamfered facial lead-ins.	Brackets come in an individual tray with an identification chart; color coded to avoid identification mistakes. Cuspid and bicuspid brackets come with a gingival hook. Set includes molar tubes.	Available with Readi-Base®, featuring eXact® pre-applied adhesive. Ready to place right out of the package. Reduced risk of contamination. Brackets set easily without sliding. Minimal flash clean-up.	Placed within U3-3 only. Use for early treatment or integrate with any bracket system for comprehensive treatment.
