Light your way... with Westinghouse

Design meets comfort in the Westinghouse Lighting 2011 luminaire and ceiling fan line. Our latest products include exciting elements that unite to create a more beautiful, relaxed, or energy-efficient home.

Our foundation is based on developing products that enhance lifestyles. Generations

**Westinghouse
has been a
trusted name for
generations.**

have trusted Westinghouse to make comfort and convenience a priority in product development. We're continuing that tradition today. Whether you're looking

for fashion-forward designs, Energy Star ratings, or reliable quality products, we have your lighting solutions right here.

Start with the DesignerYou mix-and-match program that lets consumers pick a lighting fixture, pair it with a glass shade, and add a light bulb which provides the light they want. Next, explore our latest ceiling fans, which now include ultra compact 24" styles, sleek designs, and new finishes. And don't forget our expansive line of luminaires, featuring everything from basic to decorative architecture as well as traditional and contemporary finishes.

While you enjoy our newest editions, we're already busy planning for the future by exploring innovative options and stylish designs that maximize form and function. In the meantime, if you need anything, our friendly customer relations team is here to help you find the perfect lighting solution.

It's the Westinghouse way to provide light your way.

The Oasis fan can be found on page 52.

Ceiling Fans

Low Ceilings

Install hugger ceiling fans or ceiling fans without a down rod in rooms with low ceilings.

Standard 8' Ceilings

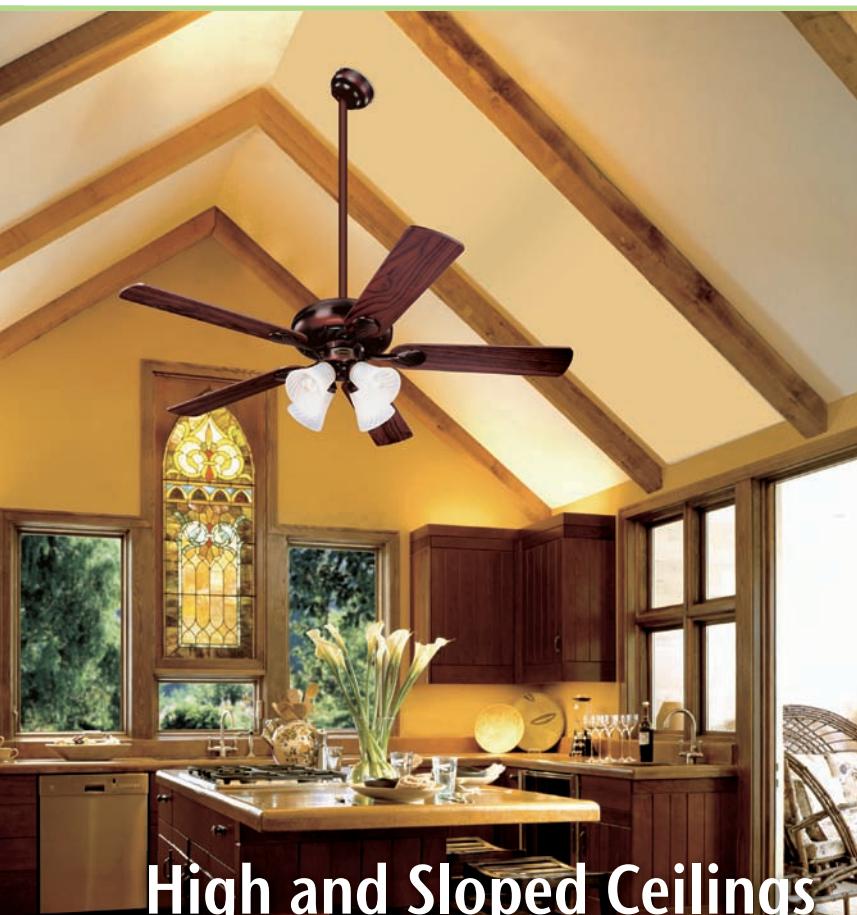

Install ceiling fans with or without a down rod in rooms with standard 8' ceilings. See pages 62-63 to view our full assortment of extension down rods.

SELECT THE RIGHT SIZE FOR EVERY ROOM

Maximize air flow by installing an appropriately sized ceiling fan for your room.

For rooms up to 8' x 10'	Use 24" - 42" ceiling fans.
For rooms up to 12' x 12'	Use 42" - 48" ceiling fans.
For rooms up to 18' x 20'	Use ceiling fans 50" and larger.

Fashionable, high quality ceiling fans and light kits add comfort, color, and complementary style to any room. A trusted name for over 120 years, Westinghouse guarantees the construction of its ceiling fans with limited and ultimate lifetime warranties. You can be sure...if it's Westinghouse.

High and Sloped Ceilings

Install ceiling fans with extension down rods in rooms with high and sloped ceilings. See pages 62-63 for a full assortment of extension down rods.

Indoor/Outdoor

In outdoor areas, install ceiling fans that are approved for use in damp or wet locations. See pages 50-53 to view our full assortment.

YEAR-ROUND COMFORT & EFFICIENCY

For year-round comfort and maximum energy savings, Westinghouse ceiling fans include a reversible switch that allows the ceiling fans to be used during cool or warm weather. In the summer, keep your home cool by running your ceiling fan counterclockwise. In the winter, run your ceiling fan clockwise to re-circulate warm air from the ceiling, eliminating cold spots and drafts.

Featuring a wide range of modern and transitional styles, the proprietary designs of our contemporary collection capture the essence of today's lifestyle trends through exemplary designs and chic finishes.

Commercial environments need durable, reliable ceiling fans. From the easy-to-install J-Hook system industrial styles to the fashionable finishes of the contractor series, our fans have the quality you want and expect from an international brand.

Industrial/ Contractor

WARNING: Industrial ceiling fans are not recommended for use in any household applications. Severe injury can result if any part of the body comes in contact with the sharp metal blades of these fans. Because the industrial ceiling fans operate at higher speeds than traditional ceiling fans, they are required to be hung at least 10 feet above the floor.

Extension Down Rods

For optimum performance, ceiling fan blades should be at least 7' from the floor but no higher than 8-9' in order to best cool a room.

For ceilings 9' and higher, an extension down rod is required to bring the ceiling fan down to the proper height above the floor.

Easy-To-Install Elegance

CEILING MEDALLIONS

Choosing a Medallion

Polyurethane resembles traditional plaster medallions

- Lightweight polyurethane medallions can be installed finished or unfinished.
- Available in well-known architectural styles to complement molding or other architectural details.
- Installation hardware is included in all Westinghouse ceiling medallions.
- For use with ceiling fans or lighting fixtures.
- Easily drilled or screwed.
- Will not warp, split or splinter.
- Easily caulked or spackled to hide installation hardware.

Selecting the Right Size

Consider three factors when selecting the appropriate size ceiling medallion.

Fan or Fixture Size

- Medallions should be smaller or larger than the diameter of your ceiling fan or lighting fixture. They should not be the same size.

Ceiling Height

- Higher ceilings can accommodate larger medallions.
- 28" or larger medallions complement a two-story foyer.

Room Size

- Large rooms accommodate large medallions.
- For a typical dining room with an 8' to 9' ceiling, an 18" to 26" diameter medallion works well.

Simply apply adhesive and screw or nail into any surface.

Use unpainted or paint with any latex or oil based paint to create a look that matches any décor.

Polyurethane Medallions

Includes mounting hardware:

- 1 - 3" 1/8"-IP nipple
- 2 - 2" 8/32 crossbar screws
- 3 - 1 1/2" drywall screws

Energy Saving LEDs

Choose LEDs for high performance, high quality lighting. LEDs maximize savings and offer long life in a traditionally-shaped lamp.

Replace Standard A19 Shape Lamps.

Halogen

Halogen lamps offer bright white light and quality output.

Incandescent

Traditional lamps provide the warm color light, familiar shapes, and variety of wattages that convey familiarity and comfort in any home.

Energy Saving CFLs

Energy-efficient CFLs now come in smaller sizes for a better fit in lighting fixtures and ceiling fan light kits.

Available in a variety of wattages, CFLs offer the perfect light output for any application.

Replace Standard A19 or Torpedo Shape Lamps.
