-	Red "Break Lens to Release Button" model (use normally closed contact to close circuit when button releases)
BP1	Red "Break Lens - Push Button" model, momentary operator
BP2	Red "Break Lens - Push Button" model, maintained operator
P1	"Break Lens - Operate Switch" two-position selector switch, maintained both positions, short lever
P3	"Break Lens - Operate Switch" three-position selector switch, maintained all positions, short lever
LEGENDS - See above	

ACCESSORIES

		PAGE
PILCLHCOV1	Clear hinged cover for push-pull model and ST120SN4XNM	90,92
PILCLHCOV5	Clear hinged cover for break-lens model except ST120SN4XNM	
PILENS	Replacement lens for break-lens model	
PILNCCB	N.C. stackable contact block for MST1 stations	90-92
PILNOCB	N.O. stackable contact block for MST1 Stations	90-92

Notes: Six contact blocks max (2 rows of 3) may be used on each break glass operator station and the -FN1 and -N1 models of push-button operation stations. The - model and F model push-button stations can only take three contact blocks (1 row of 3). All units use normally open contacts to close circuit or normally closed to open circuit (except "Break Glass of Release Button" model).
