The CE marking

The affixing of a CE marking (Conformité Européenne) to products is an essential part of all *New-Approach Directives*. If several directives apply, the CE marking may, as a rule, be affixed only to products that comply with the conditions of all these directives. In the case of R&TTE products, several directives always apply, including the *Low-Voltage Directive*.

The CE marking which must be affixed under the Low-Voltage Directive and the EMC Directive consists of the initials CE. The CE marking which must be affixed to R&TTE products under the R&TTE Directive (1999/5/EC, Annex IV) consists of the initials CE, followed by the identification number of the *Notified Body*.

Even if several Directives apply, the initials CE only need to be affixed to the product once.

Figure 1: CE marking for R&TTE (Annex IV) products by Telefication

The CE marking for terminal equipment must satisfy the following criteria:

- the CE marking consists of the initials CE in graphic form (see figure 2), followed by the identification number of Telefication.
- the identification number of Telefication is **0560**;
- if the CE marking is enlarged or reduced, the proportions shown in figures 2 should remain the same;
- the different parts of the CE marking must all be approximately the same height, which must be at least 5 mm.
