

# STC (Dongguan) Company Limited EC DECLARATION OF CONFORMITY

**Reference Number:** 

LVD-D151763DOC

Intracom Asia Co., Ltd.

4F., No.77, Sec.1, Xintai 5th Rd., Xizhi Dist., New Taipei City 221, Taiwan

declare the product

Description:

300N High-Power PoE Access Point

Brand Name:

Intellinet

Model:

525800

complies with the requirements of the EC Low Voltage Directive 2006/95/EC

# Applicable Standard(s) with amendments:

EN 60950-1:2006+A11:2009+A1:2010+A12:2011 +A2:2013

## General Remarks:

This declaration is only valid when used in conjunction with the technical file(s) refers to DE114090.

This declaration applies specifically to the sample(s) investigated in the technical report mentioned above and not to the bulk.

The CE mark as shown below can be used, under the responsibility of the manufacturer, after completion of an EC Declaration of Conformity and compliance with all relevant EC Directives.

#### **TEST REPORT**

# IEC/EN 60950-1 Information technology equipment – Safety – Part 1: General requirements

 Report Number......:
 DE114090

 Date of issue.....:
 2015-11-19

Total number of pages ...... Page 1 to 49 for test report

Appendix 1 to 3 for product photographs

Testing Laboratory .....: STC (Dongguan) Company Limited

Province, P.R.China

Applicant's name .....: Intracom Asia Co., Ltd.

Taiwan

Test specification:

**Standard.....:** IEC 60950-1:2005 (2nd Edition); Am 1:2009; Am 2: 2013

EN 60950-1:2006+A11:2009+A1:2010+A12: 2011+A2:2013

Test procedure .....: N/A

Non-standard test method.....: N/A

**Test Report Form No. ....:** IEC60950\_1B\_M2

Test Report Form(s) Originator ....: SGS Fimko Ltd

Master TRF .....: Dated 2010-04

Modified by .....: HKSTC

Modified Date .....: 2013-12

|        | Zx.1 General This sub-clause specifies requirements for protection against excessive sound pressure from personal music players that are closely coupled to the ear. It also specifies requirements for earphones and headphones intended for use with personal music players.                                                                                                                                                                           | No such equipment. | N       |  |
|        | A personal music player is a portable equipment for personal use, that: is designed to allow the user to listen to recorded or broadcast sound or video; and primarily uses headphones or earphones that can be worn in or on or around the ears; and allows the user to walk around while in use.  NOTE 1 Examples are hand-held or body-worn portable CD players, MP3 audio players, mobile phones with MP3 type features, PDA's or similar equipment. |                    |         |  |
|        | A personal music player and earphones or headphones intended to be used with personal music players shall comply with the requirements of this sub-clause.                                                                                                                                                                                                                                                                                               |                    |         |  |
|        | The requirements in this sub-clause are valid for music or video mode only.                                                                                                                                                                                                                                                                                                                                                                              |                    |         |  |
|        | The requirements do not apply: while the personal music player is connected to an external amplifier; or while the headphones or earphones are not used. NOTE 2 An external amplifier is an amplifier which is not part of the personal music player or the listening device, but which is intended to play the music as a standalone music player.                                                                                                      |                    |         |  |
|        | The requirements do not apply to: hearing aid equipment and professional equipment; NOTE 3 Professional equipment is equipment sold through special sales channels. All products sold through normal electronics stores are considered not to be professional equipment.                                                                                                                                                                                 |                    |         |  |
|        | analogue personal music players (personal music players without any kind of digital processing of the sound signal) that are brought to the market before the end of 2015.  NOTE 4 This exemption has been allowed because this technology is falling out of use and it is expected that within a few years it will no longer exist. This exemption will not be extended to other technologies.                                                          |                    | N       |  |
|        | For equipment which is clearly designed or intended for use by young children, the limits of EN 71-1 apply.                                                                                                                                                                                                                                                                                                                                              |                    |         |  |

|        | <ul> <li>c) provide a means to actively inform the user of the increased sound pressure when the equipment is operated with an acoustic output exceeding those mentioned above. Any means used shall be acknowledged by the user before activating a mode of operation which allows for an acoustic output exceeding those mentioned above. The acknowledgement does not need to be repeated more than once every 20 h of cumulative listening time; and</li> <li>NOTE 2 Examples of means include visual or audible signals. Action from the user is always required.</li> <li>NOTE 3 The 20 h listening time is the accumulative listening time, independent how often and how long the personal music player has been switched off.</li> <li>d) have a warning as specified in Zx.3; and</li> <li>e) not exceed the following: <ol> <li>equipment provided as a package (player with Its listening device), the acoustic output shall be ≤ 100 dBA measured while playing the fixed "programme simulation noise" described in EN 50332-1; and</li> <li>a personal music player provided with an analogue electrical output socket for a listening device, the electrical output socket for a listening device, the electrical output shall be ≤ 150 mV measured as described in EN 50332-2, while playing the fixed "programme simulation noise" described in EN 50332-1.</li> </ol> </li> </ul> |                 | N       |  |
|        | For music where the average sound pressure (long term LAeq,T) measured over the duration of the song is lower than the average produced by the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA. In this case T becomes the duration of the song.  NOTE 4 Classical music typically has an average sound pressure (long term LAeq,T) which is much lower than the average programme simulation noise. Therefore, if the player is capable to analyse the song and compare it with the programme simulation noise, the warning does not need to be given as long as the average sound pressure of the song is below the basic limit of 85 dBA.  For example, if the player is set with the programme simulation noise to 85 dBA, but the average music level of the song is only 65 dBA, there is no need to give a warning or ask an acknowledgement as long as the average sound level of the song is not above the basic limit of 85 dBA.                                                                                                                                                                                                                                                                                                                                                   |                 |         |  |

| 1.7.5<br>(A2:2013) | In <b>Denmark</b> , socket-outlets for providing power to other equipment shall be in accordance with the DS 60884-2-D1:2011.  For class I equipment the following Standard Sheets are applicable: DK 1-3a, DK 1-1c, DK 1-1d, DK 1-5a or DK 1-7a, with the exception for STATIONARY EQUIPMENT where the socket-outlets shall be in accordance with Standard Sheet DK 1-1b, DK 1-1c, DK 1-1d or DK 1-5a.  Socket outlets intended for providing power to Class II apparatus with a rated current of 2,5 A shall be in accordance with DS 60884-2-D1 standard sheet DKA 1-4a. Other current rating socket outlets shall be in compliance with by DS 60884-2-D1 Standard Sheet DKA 1-3a or DKA 1-3b. | In <b>Denmark</b> , supply cords of single-phase equipment having a rated current not exceeding13 A shall be provided with a plug according to the Heavy Current Regulations, Section 107-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to the wiring rules shall be provided with a plug in accordance with standard sheet DK 2-1a or DK 2-5a.                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | N                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| If poly-phase equipment and single-phase equipment having a RATED CURRENT exceeding 13 A is provided with a supply cord with a plug, this plug shall be in accordance with the Heavy Current Regulations, Section 107-2-D1 or EN 60309-2.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| In <b>Denmark</b> , supply cords of single-phase equipment having a rated current not exceeding 13 A shall be provided with a plug according to DS 60884-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to thewiring rules shall be provided with a plug in accordance with standard sheet DK 2-1a orDK 2-5a.  If a single-phase equipment having a RATED CURRENT exceeding 13 A or if a poly-phase equipment is provided with a supply cord with a plug, this plug shall be in accordance with the standard sheets DK 6-1a in DS 60884-2-D1 or EN 60309-2. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | N                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | provided with a plug complying with SEV 1011 or IEC 60884-1 and one of the following dimension sheets:  SEV 6532-2.1991 Plug Type 15 3P+N+PE 250 / 400 V, 10 A  SEV 6533-2.1991 Plug Type 11 L+N 250 V, 10 A  SEV 6533-2.1991 Plug Type 12 L+N+PE 250 V, 10 A  In general, EN 60309 applies for plugs for currents exceeding 10 A. However, a 16 A plug and socketoutlet system is being introduced in Switzerland, the plugs of which are according to the following dimension sheets, published in February 1998: SEV 5932-2.1998: Plug Type 25 , 3L+N+PE 230/400 V, 16 A  SEV 5933-2.1998: Plug Type 21, L+N, 250 V, 16A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  In Denmark, supply cords of single-phase equipment having a rated current not exceeding 13 A shall be provided with a plug according to the Heavy Current Regulations, Section 107-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to the wiring rules shall be provided with a plug in accordance with standard sheet DK 2-1a or DK 2-5a.  If poly-phase equipment and single-phase equipment having a RATED CURRENT exceeding 13 A is provided with a supply cord with a plug, this plug shall be in accordance with the Heavy Current Regulations, Section 107-2-D1 or EN 60309-2.  In Denmark, supply cords of single-phase equipment having a rated current not exceeding 13 A shall be provided with a plug according to DS 60884-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to thewiring rules shall be provided with a plug in accordance with standard sheet DK 2-1a orDK 2-5a.  If a single-phase equipment having a RATED CURRENT exceeding 13 A or if a poly-phase equipment is prov | provided with a plug complying with SEV 1011 or IEC 60884-1 and one of the following dimension sheets:  SEV 6532-2.1991 Plug Type 15 3P+N+PE 250/400 V, 10 A  SEV 6533-2.1991 Plug Type 11 L+N 250 V, 10 A  SEV 6533-2.1991 Plug Type 12 L+N+PE 250 V, 10 A  In general, EN 60309 applies for plugs for currents exceeding 10 A. However, a 16 A plug and socket-outlet system is being introduced in Switzerland, the plugs of which are according to the following dimension sheets, published in February 1998: SEV 5932-2.1998: Plug Type 25 , 3L+N+PE 230/400 V, 16 A  SEV 5933-2.1998: Plug Type 23, L+N, 250 V, 16A  SEV 5933-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 27, L+N, 250 V, 16 A  SEV 5934-2.1998: Plug Type 23, L+N+PE 250 V, 16 A  SEV 5934-2.1998: Plug Type 27, L+N, 250 V, 16 A  SEV 5934-2.1998: Plug Type 27, L+N, 250 V, 16 A  SEV 5934-2.1998: Plug Type 27, L+N, 250 V, 16 A  SEV 5934-2.1998: Plug Type 28, L+N+PE 250 V, 16 A  SEV 5934-2.10 F Developed With a plug according to the Heavy Current Regulations where protection against indirect contact is required according to the wiring rules shall be provided with a plug according to DS 60884-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which a plug according to DS 60884-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which a plug according to DS 60884-2-D1.  CLASS I EQUIPMENT provided with socket-outlets with earth contacts or which are intended to be used in locations where protection against indirect contact is required according to the wiring rules shall be provided with a plug according to SA 6000-20.  In Denmark, supply cord with a plug |

| 6.1.2.1<br>(A1:2010) | In <b>Finland</b> , <b>Norway</b> and <b>Sweden</b> , add the following text between the first and second paragraph of the compliance clause:                                                                                                                                                                                                       |                 | N       |  |  |
|                      | If this insulation is solid, including insulation forming part of a component, it shall at least consist of either                                                                                                                                                                                                                                  |                 |         |  |  |
|                      | <ul> <li>two layers of thin sheet material, each of<br/>which shall pass the electric strength test below, or</li> </ul>                                                                                                                                                                                                                            |                 |         |  |  |
|                      | - one layer having a distance through insulation of at least 0,4 mm, which shall pass the electric strength test below.                                                                                                                                                                                                                             |                 |         |  |  |
|                      | Alternatively for components, there is no distance through insulation requirements for the insulation consisting of an insulating compound completely filling the casing, so that CLEARANCES and CREEPAGE DISTANCES do not exist, if the component passes the electric strength test in accordance with the compliance clause below and in addition |                 |         |  |  |
|                      | <ul> <li>passes the tests and inspection criteria of 2.10.11 with an electric strength test of 1,5 kV multiplied by 1,6 (the electric strength test of 2.10.10 shall be performed using 1,5 kV), and</li> <li>is subject to ROUTINE TESTING for electric strength during manufacturing, using a test voltage</li> </ul>                             |                 |         |  |  |
|                      | of 1,5 kV.  It is permitted to bridge this insulation with an                                                                                                                                                                                                                                                                                       |                 | N       |  |  |
|                      | optocoupler complying with 2.10.5.4 b).                                                                                                                                                                                                                                                                                                             |                 | IN      |  |  |
|                      | It is permitted to bridge this insulation with a capacitor complying with EN 60384-14:2005, subclass Y2.                                                                                                                                                                                                                                            |                 |         |  |  |
|                      | A capacitor classified Y3 according to EN 60384-14:2005, may bridge this insulation under the following conditions:                                                                                                                                                                                                                                 |                 |         |  |  |
|                      | - the insulation requirements are satisfied by having a capacitor classified Y3 as defined by EN 60384-14, which in addition to the Y3 testing, is tested with an impulse test of 2,5 kV defined in EN 60950-1:2006, 6.2.2.1;                                                                                                                       |                 |         |  |  |
|                      | - the additional testing shall be performed on all the test specimens as described in EN 60384-14:                                                                                                                                                                                                                                                  |                 |         |  |  |
|                      | - the impulse test of 2,5 kV is to be performed before the endurance test in EN 60384-14, in the sequence of tests as described in EN 60384-14.                                                                                                                                                                                                     |                 |         |  |  |
