GREETINGS FROM YOUR FRIENDS AT NEBO®!

We are excited to introduce you to our latest line-up of new and innovative products! Each one is designed to wow your customers and grow your sales. We are sure, that together, this is going to be the most successful year that we have ever experienced. Thanks for your support of NEBO® products!

A FEW OF THE NEW PRODUCTS FOR 2014

- O² BEAM™ 1-2
- REDLINE® RC™ - 300 Lumen Rechargeable Flashlight 3-4
- REDLINE® OC™ - 200 Lumen Flashlight..... 5-6
- EDGE™ 200 Lumen Flashlight 7-8
- WEATHERRITE® Outfitter XXL Cot 66
- 17 New Quarrow® Products 69-72,75

ADDITIONAL TABLE OF CONTENTS

- NEBO® Lights and Tools 1-42
- iPROTEC™ Firearm Accessories 43-56
- NEBO® Sports Bicycle Accessories 57-60
- WEATHERRITE® Outdoor Products 61-66,42
- Quarrow® Fishing Products 67-75
- HOT BUYS & LAST CALLS 76
- Custom Printing Program 77
- MAP Policy 78
- Lighting Information 79-80
- FAQ's 81-82
- Price Sheet 83-84

We love creating great, quality products for our customers! Don't forget, no one ships faster than NEBO®! And we always guarantee your total satisfaction as expressed by our NEBO® "Guaranteed Buyback Program" that you will find on the back of this catalog. We appreciate your business and the support and feedback you give our products.

Thanks and best wishes for your success!

THE NEBO® FAMILY

NEW IN 2014

In 2014, we are redefining the standard of what a flashlight is supposed to be. The changes that we're making you literally have to see to believe.

We're taking everything that we expect a flashlight to be and we're making it better.

• O²™ Technology

We don't just want the light 15 feet in front of us; we want to shine it **fifteen hundred feet** ahead of us. Until we developed **O²™ Technology**, that was just a wild idea. Now it's a reality with the new **#6000 O² BEAM™** (pg.1-2).

• OC™ Technology

Eliminating inconsistencies in light, the OC™ (Optimized Clarity) Technology provides intense, clear, pristine light that is easier on the eyes. This technology allows the edge of the light beam to be just as bright as the center in flood mode. You will discover this exciting breakthrough in clarity with the new **#6092 REDLINE® OC™** (pg.5-6).

• RC™ RECHARGEABLE

Our customers asked us for a fully rechargeable flashlight. We created one with proven performance by combining all the features of our top-selling REDLINE® series. Introducing the new **#6007 REDLINE® RC™** (pg.3-4), NEBO's first fully rechargeable flashlight.

• EDGE™ TACTICAL

The EDGE™ series has a new, long-awaited addition...the **#6085 EDGE™200** (pg.7-8). Jumping 110 lumens ahead of its predecessor, the EDGE™200 now has the lumen capabilities of our REDLINE® & BLUELINE® series. Still small and compact, the new EDGE™ has a stealth, aggressive look, which proves the claim..."Small never looked so mean!"

There are two different schools of thought in the consumer product business:

1. Create a product and tell the public how much they need it.
2. Find out what the public wants and deliver it.

We've chosen to take the latter approach. No one knows what our customers want more than our customers. Most of our products are what they are today because of the feedback that we get from our customers. We pride ourselves in not only giving our customers exactly what they want, but also exceeding their expectations.

THAT'S OUR STORY; FIND US ONLINE AND TELL US YOURS

O² BEAM™

BY NEBO®

5 Lighting Modes

High - 420 Lumens Run Time: 20 Hours Viewing Distance: 500 Meters	
Med - 200 Lumens Run Time: 55 Hours Viewing Distance: 240 Meters	
Low - 85 Lumens Run Time: 100 Hours Viewing Distance: 60 Meters	
Beacon* - 420 Lumens Run Time: 200 Hours Viewing Distance: 500 Meters	
Strobe - 420 Lumens Run Time: 70 Hours Viewing Distance: 500 Meters	

*Beacon mode emits two flashes of light (420 lumens) every 5 seconds. Perfect for emergency situations and distress signaling, this setting provides 200 hours of continuous use.

SPOT LIGHT

FLOOD LIGHT

4. 4x ADJUSTABLE ZOOM

Turn the bezel clockwise for flood light, perfect for short range lighting. Turn the bezel counter-clockwise for spot light to focus light 500 meters away.

1. HIGH-POWER 420 LUMEN LED

2. AGGRESSIVE SELF-DEFENSE FACE

3. HEAT-SINK BEZEL DESIGN

Integrated heat-sinking rings are used to disperse heat from the bezel during extended periods of use.

5. CONVEX LENS

Evenly distributes the light for a highly-concentrated beam, without dull or dark spots.

6. LO-LIGHT™

An internal glow-in-the-dark component located behind the lens provides a secondary light source, without using any battery life. The LO-LIGHT™ recharges when the O² Beam™ is on and with natural light. A 10 second charge will provide 5 minutes of illumination from the LO-LIGHT™. This low signature light source ensures stealth and preserves night vision.

OPTIMIZED OPTICS (O²)

This new, international patent pending technology enhances the performance of the flashlight, causing the beam to project at a distance that is **COMPARABLE TO THE BEAM THROW OF A FLASHLIGHT THAT IS 800-1200 LUMENS!**

FL 1 STANDARD

Each flashlight includes a gift box, owner's guide and instruction manual.

4pc Display

The display is designed to showcase one open case with light positioned as in the image. Underneath the display, there is room for 3 products in their gift box for customers to purchase.

Display Dimensions

(H) 9.29" x (W) 10.82" x (D) 10.27"

7. ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT BODY

Actual Size: 8.625" x 1.5"
(1.5" - Barrel Diameter)

11. LANYARD INCLUDED

12. SERIALIZED

Each O² Beam™ is specially coded for quality assurance purposes.

8. USER INSTRUCTIONS

Each O² Beam™ flashlight has helpful information printed on the side: lighting modes, lumen ratings, run time and beam distance.

9. SMART SELECT DIAL

This smart select dial allows you to easily choose the mode you want without having to cycle through each setting. The dial can be used while the flash light is on or off.

10. GLOW-IN-THE-DARK BUTTON WITH BATTERY INDICATOR

Button will also glow red when battery life is less than 20%.

4 AA BATTERIES INCLUDED

With the O² technology™, the O² Beam™ outperforms flashlights with twice the lumen output, making it the most cost and energy efficient flashlight in its class with performance that you have to see to believe! The O² Beam™ – Industry standard redefined.

A beam of light that's so powerful, it reaches 500 meters!

Standard 420 lumen beam throw - 250 meters (273 yards)

O²™ Technology doubles the beam throw.

 (H) 14" x (W) 6" x (D) 2.75"

Freestanding package can be displayed on either a counter top or peg hook.

What could be better than a 300 lumen REDLINE® flashlight? The answer is a 300 lumen REDLINE® flashlight that you don't have to put batteries in! The REDLINE® RC™ is NEBO's® first fully-rechargeable flashlight. Integrated with a heat-sink design, anodized aluminum body and aggressive face, the RC™ has everything that you'd expect a REDLINE® to have. The RC™ comes with 2 adapters (AC & DC) to charge the light anytime, anywhere. The batteries do not need to be removed to charge, the RC™ is 100% internally rechargeable. Not only is the RC™ bright, 300 lumens to be exact, it also has an adjustable light output. Just press the button to turn the light on. To set desired brightness, hold down the button to dim the light from 100% to 10%.

REDLINE[®] α

1. HIGH-POWER 200 LUMEN LED

2. AGGRESSIVE SELF-DEFENSE FACE

3. RED RING

This signature red ring enhances each of the different lighting modes.

4. 6X ADJUSTABLE BEAM

Turn the bezel clockwise for flood light, perfect for short range lighting. Turn the bezel counter clockwise for spot light, perfect for focusing light over 45 yards.

5. ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT BODY

6. CONVEX LENS

The convex lens evenly distributes the light in flood mode for a highly concentrated beam without dull or dark spots.

7. DUAL-DIRECTION BELT/POCKET CLIP

8. GLOW-IN-THE-DARK BUTTON

Button uses hard/soft touch technology allowing settings to be changed in two different ways.

Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 20 seconds.

Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.

2 Lighting Modes

100% - 200 Lumens

Display holds 12 pieces in the display. 4 additional pieces are included as replenishments.

The newest member of the REDLINE® series is the REDLINE® OC™. This flashlight outputs 200 lumens of pristine white light. 200 lumens is bright, but what makes the OC™ so special is the OC™ (Optimized Clarity) Technology. Coupled with the convex lens, the OC™ Technology creates optimized clarity with a perfectly dispersed beam of light while in flood mode. This sophisticated technology provides the intensity of a 200 lumen light that is easier on the eyes. Even with the use of convex lenses, a flashlight will still have a hot center as well as some inconsistencies in the beam and/or halos outside of the light beam. The OC™ eliminates all of that. In flood mode, the exterior of the light beam is just as intense as the center. When a light beam has a hot center, your attention is drawn to it. The beam produced by the OC™ makes it easier for your eyes to focus on the entire illuminated area. The REDLINE® OC™...optimized clarity.

Taking the EDGE™ series to the next level is the EDGE™ 200. The EDGE™ 200 features 200 lumens of powerful white light. Crowning the top of the EDGE™ is the aggressive self-defense face. Much like the EDGE™90 the aggressive bezel can be removed to have a less aggressive, smooth face. The aggressive lines and angles of the aircraft grade aluminum body allow for proper heat dispersion as well as ensuring a steady grip. The dual-direction belt clip works well in the pocket or on a hat to serve as a cap light. Controlling the 2 light modes is the glow-in-the-dark button located at the base of the flashlight.

The NEBO® WORKBRITE™ adapts to your work environment, making it the handiest of work lights. The WORKBRITE™ features three different ways to provide you with hands-free lighting for the task at hand: a hanging hook, a 200° pivoting stand and a magnetic base. Aside from being handy, the WORKBRITE™ is...well, BRIGHT! 200 lumens of pure white light are outputted by the 20 LED face. And for standard flashlight use, another 6 LEDs are located in the head, providing 60 lumens of brightness. For handheld use, the WORKBRITE™ features an ergonomic, non-slip grip. For added durability, the body is also completely impact and water-resistant. Whether you are under the hood, under the sink, or just out in the dark, the WORKBRITE works great for any application. WORKBRITE™...It stands! It hooks! It sticks! It lights! It WORKS!

The REDLINE® Select combines maximum performance with extreme convenience. Our brightest flashlight to date, the Select features 310 lumens of intense white light which can be seen over 200 yards away (in spot light mode.) 310 Lumens is maximum performance, but what is extreme convenience? The convenience features of this flashlight prove one thing...that we listen to our customers. In addition to the steel belt clip, the Select also has a lanyard to make sure it is always within reach. The ergonomic body is suited with heat-sinks which are used to disperse heat from the flashlight during extended periods of time. The signature red ring is now coupled with a stealth ring. To go into stealth mode, simply turn the stealth ring clockwise to block light from shining through the red ring. The REDLINE® Select is named 'Select' for a reason. To improve functionality of the 5 lighting modes, a smart select dial has been added to quickly and conveniently choose your lighting mode while the light is on or off. This feature keeps you from having to cycle through each setting to get to the mode that you need. And that...is extreme convenience.

 - Recharge in 15min. Hold button down for 3sec to turn off for 15min.

More features...more lumens...same great quality. The SE REDLINE® has some user friendly improvements. Equipped with a steel belt clip, the SE REDLINE® can always be kept within reach. The ergonomic body is suited with heat-sinks which are used to disperse heat from the flashlight during extended periods of time. The lighting modes are now separated into two categories, primary and secondary. Turning the flashlight on and off gives you the primary lighting mode, which is 250 lumens of intense white light. The secondary lighting modes, 50%, 10%, S.O.S. and Defensive Strobe can be activated by holding down the power button for 3 seconds. Speaking of the power button, it's not just for operating the light. Built into the glow-in-the-dark button is a battery indicator. The button will glow red when the battery life is less than 20%. Adding to the style of the SE REDLINE® is the signature thin, translucent red ring which enhances each of the different lighting modes.

NEBO®

REDLINE®

CLASSIC

1. HIGH-POWER 220 LUMEN LED

2. AGGRESSIVE SELF-DEFENSE FACE

3. RED RING

This signature red ring enhances each of the different lighting modes.

4. 4X ADJUSTABLE BEAM

Turn the bezel clockwise for flood light, perfect for short range lighting. Turn the bezel counter clockwise for spot light, perfect for focusing light over 20 yards.

5. ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT BODY

6. CONVEX LENS

The convex lens evenly distributes the light for a highly concentrated beam without dull or dark spots.

7. USER INSTRUCTIONS

Each REDLINE® flashlight has helpful information printed on the side. Lighting modes, lumen ratings, run time and beam distance are listed.

8. GLOW-IN-THE-DARK BUTTON

Button uses hard/soft touch technology allowing settings to be changed in two different ways.

Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 20 seconds.

Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.

5 Lighting Modes

100% - 220 Lumens
Run Time: 4 Hours
Viewing Distance: 138 Meters

50% - 110 Lumens
Run Time: 8 Hours
Viewing Distance: 60 Meters

10% - 22 Lumens

REDLINE

TRY ME!

220 Lumens of Supreme Brightness - 150 Yards of Visibility **BY NEBO®**

- 4x Adjustable Beam (Flood-Spot) • High-Power LED • 5 Lighting Modes (100%-50%-10%-S.O.S.-Defensive Strobe)
- Water-Resistant / Shock-Proof Aircraft Grade Aluminum Body • Magnetic Base with Rear Tactical Hard/Soft Touch Glow Power Button

The ability to bring high-end technology to a compact, fully redesigned, extremely powerful light source is finally here. In automobiles, red-lining means reaching the peak of it's performance; with NEBO® REDLINE® we are harnessing the maximum power of this flashlight with 220 lumens of blinding bright light. (NOTE: Anything above 50 lumens within a 10 yard distance may cause temporary blindness when viewed directly.) The adjustable bezel allows you to turn the REDLINE® from a flood light to illuminate everything within a 20 yard distance, or to a spot light to focus up to 150 yards. The red ring of the NEBO® REDLINE® allows light to shine through to enhance all of the features of this flashlight.

Item#5950

- 1. 8 POWERFUL UV LEDs**
- 2. POWER BUTTON**
Allows you to easily turn on the light while maintaining constant control of the light.
- 3. GRIP**
The sides of the Larry™ are ribbed to ensure a strong grip and protect against those accidental drops.
- 4. ROTATING MAGNETIC CLIP**
The clip also rotates 180° to direct the light wherever you need it.
- 5. LED HOUSING**
The recessed LEDs are covered by a strong plastic lens which helps protect against drops. The recessed housing also directs the light into a strong concentrated beam of light.
- 6. WATER-RESISTANT REINFORCED PLASTIC BODY DESIGN**
- 7. YELLOW LENS SAFETY GLASSES**
These glasses provide wrap around protection that covers your peripheral vision. Substances that fluoresce under UV light will fluoresce more intensely when viewed through these glasses.

1 Lighting Mode

8 UV LEDs
Wavelength: 410-415nm
Run Time: 11 Hours

UV LEDs can reveal materials that are not seen through normal lighting and can be very useful in:

- Crime scene investigation to reveal certain bodily fluids
- Document analysis and currency verification
- Leak detection (i.e. Freon)
- Rodent and pet stain detection
- Gemstone verification

The UV Larry™ Kit by NEBO® helps shed some new light on your situation. The Larry™ features 8 UV LEDs that can reveal materials that are not seen through normal lighting. While the naked eye has a hard time seeing these substances, they fluoresce when illuminated with UV light. The yellow wrap-around glasses enhance the UVs fluorescence drastically, making the substances stand out even more.

Actual Size

Head Tilts 90° To Direct Light Wherever You Need It!

3 Lighting Modes	
White - 90 Lumens Run Time: 4 Hours Viewing Distance: 100 Meters	
2 Red LEDs - 8 Lumens Run Time: 150 Hours Viewing Distance: 3 Meters	
Red Flash - 8 Lumens Run Time: 120 Hours Viewing Distance: 3 Meters	

Red light is primarily used to preserve night vision. Best used for low-light or nighttime situations, this low-signature light provides great contrast, making it easy to read charts and maps. Red light cuts through smoke better than white light, does not interfere with night vision technology, ensures stealth in the dark and cannot be easily seen by the human eye over long distances.

6pc Case Pack

Each head lamp comes in its own clamshell style packaging that still allows the product to be tested by consumers.

NEBO® BENDBRITE™

HANDS-FREE LIGHT WITH BEND-RITE™ FLEXIBLE NECK

This light is essential to have when you need your hands to be free!

- Flexible BEND-RITE™ neck allows you to direct light anywhere
- 2 Lighting modes (3 White LEDs On or 1 Red LED in flash mode)
- Base clip can clip onto virtually anything or use the 3 strong magnets to stick to any metal surface
- Water-Proof body design
- CR2032 Batteries Included

• BEND-RITE™ neck gives this light the flexibility to direct light in virtually any direction

• 3 White LEDs provide 9 Lumens (36,000 MCD) brightness of Hands-Free Lighting (LEDs NEVER NEED TO BE REPLACED)

• 1 Red LED in Emergency Flash Mode (0.4 Lumens)

9.5" tall

16pc Full Color Acrylic Display

Display Dimensions (H) 8" x (W) 13" x (D) 7.75"

- Clip on anywhere or use the 3 strong magnets to attach this light anywhere and direct light where you need it

This is perfect for working around the house or on your car! Use it to light up an area that has poor lighting, such as under a sink or under the hood. Clip the **BENDBRITE™** onto any book spine and now you have a book light. You can even clip the **BENDBRITE™** to a cap and use it as a cap-light. Take this light anywhere you think you may need a light. Going camping? Take the **BENDBRITE™**. Road trip? Take the **BENDBRITE™**. Working anywhere? Take the **BENDBRITE™**.

CHAMELEON™

PATENTED ITEM

US 6,880,951 B2

- HIGH-POWER 100 LUMEN LED
- STEEL BELT/POCKET CLIP
- UNBREAKABLE SHATTER-PROOF POLYCARBONATE LENS
- AGGRESSIVE SELF-DEFENSE FACE
- ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT COMPACT BODY DESIGN
- GLOW-IN-THE-DARK BUTTON

This button allows you to easily switch settings* while maintaining constant control of the flashlight. The button also glows in the dark so that you can easily find this flashlight. (*Button uses hard/soft touch technology allowing settings to be changed in two different ways.)

Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 10 seconds.

Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.

Actual Size

4 Lighting Modes

White - 100 Lumens

Run Time: 4 Hours
Viewing Distance: 80 Meters

Green - 90 Lumens

Run Time: 5 Hours
Viewing Distance: 70 Meters

Because the human eye recognizes the color green faster than other colors, green light is best used for map reading or signaling, especially in low light conditions. Also perfect for hunting as some game cannot see green light.

Red - 85 Lumens

Run Time: 7 Hours
Viewing Distance: 50 Meters

Red light is primarily used to preserve night vision. Best used for low-light or nighttime situations, this low-signature light provides great contrast, making it easy to read charts and maps. Red light cuts through smoke better than white light, does not interfere with night vision technology, ensures stealth in the dark and cannot be easily seen by the human eye over long distances.

Strobe - 100 Lumens

Viewing Distance: 80 Meters

Color changes with just a single click of the button. No Lenses, No Attachments, and No Accessories needed.

Actual Size

2 Lighting Modes

White - 100 Lumens Run Time: 4 Hours Viewing Distance: 80 Meters	
Red/Green - 90 Lumens Run Time: 5 Hours Viewing Distance: 70 Meters	

The mixture of green and red light creates an amber-like color. Amber light causes materials that are truly red, like blood, to stand out from materials that have red in them, like leaves, brush, certain woods, etc.

Color changes with just a single click of the button.
No Lenses, No Attachments, and No Accessories needed.

iPROTEC™ ELITE HP230

ITEM # 5567

HIGH-POWERED FIREARM LIGHT
MOUNTS ON RAIL-EQUIPPED PISTOLS & LONG GUNS

3 Lighting Modes

High - 230 Lumens Run Time: 3 Hours Viewing Distance: 140 Meters	
Low - 40 Lumens Viewing Distance: 25 Meters	
Strobe - 230 Lumens Viewing Distance: 140 Meters	

- **HIGH-POWER 230 LUMEN LED**
- **ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT DESIGN**
- **ADJUSTABLE HINGE MOUNT**
Easily adjusts, tightens and locks...no tools needed!
Designed to fit most rail-equipped firearms. Not compatible with snub nose or subcompacts models.
- **ACCESSORY RAIL MOUNT**
For additional firearm accessories (12.5mm)
- **TWO CR123A BATTERIES INCLUDED**

The ELITE HP230 outputs 230 lumens of intense white light. Light of this magnitude is enough to dominate an aggressor's night-adapted vision, ideal for military, law enforcement, and self-defense. The reflector lens focuses the beam for long distance lighting while also producing enough light to support the user's peripheral vision. The HP230 features a front-positioned momentary/steady On-Off switch to provide one-finger operation. This switch allows you to select high mode, low mode or defensive strobe.

Laser can be used independently or with either of the lighting modes.

- **HIGH-POWER 190 LUMEN LED**
- **RED LASER SIGHT**
- **ANODIZED AIRCRAFT-GRADE ALUMINUM WATER-RESISTANT DESIGN**
- **ADJUSTABLE HINGE MOUNT**
Easily adjusts, tightens and locks...no tools needed!
Designed to fit most rail-equipped firearms. Not compatible with snub nose or subcompacts models.
- **BATTERIES INCLUDED**
One CR123A battery included for the light and three AG5 button cell batteries included for the red laser sight

The ELITE HP190LS combines a brilliant 190 lumen white light with a bright red sighting laser. Light of this magnitude is enough to dominate an aggressor's night-adapted vision, ideal for military, law enforcement, and self-defense. The reflector lens focuses the beam for long distance lighting while also producing enough light to support the user's peripheral vision. The HP190LS features a back-positioned toggle On-Off switch to provide simple, one-handed operation. This switch allows you to select between 100% white light or defensive strobe. A separate switch on the bottom is used to control the laser. A small screw driver is included to adjust the windage and elevation of the laser.

REDLINE®

220 LUMEN BRIGHT LIGHT

With a 180° Swivel Bar Mount

- **HIGH-POWER 220 LUMEN LED**
- **ANODIZED AIRCRAFT-GRADE ALUMINUM, WATER-RESISTANT COMPACT BODY DESIGN**
- **SWIVEL HEAD**
 The head of the mount rotates 180° to direct light wherever you need it.
- **QUICK-RELEASE TAB**
 The REDLINE® easily detaches from the mount to be used as a hand-held flashlight.
- **BAR MOUNT**
 Easily attaches to any bar, no tools needed.
- **REAR GLOW-IN-THE-DARK BUTTON**
 (Button uses hard/soft touch technology allowing settings to be changed in two different ways.)
Hard touch: Simply click through the functions (light will turn off in between settings.) NOTE: Light will reset to first setting (100% ON) after being off for 20 seconds.
Soft touch: Press button halfway with no click. This allows the user to cycle through the settings quickly without the light turning off between settings.

No Batteries to Replace...EVER!

ECOLANTERN™

RECHARGEABLE 24 LED LANTERN POWERED BY
(SOLAR • WIND UP • AC/DC ENERGY)

1. 24 POWERFUL ULTRA BRIGHT LEDs

Click the button 1 time for 157 Lumens of bright white light. (LED Bulbs 50,000 - plus hour life)

2. CARRY HANDLE

For convenience and mobility. Carry Handle also has a hook for hanging.

3. CHARGING INDICATOR

When lantern is fully charged, indicator light will change from **RED** to **GREEN**.

4. REFLECTORS

Reflectors are located at the top and bottom to reflect and emit a steady and consistent light output.

5. WIRE GUARD

Protects LED housing from damage.

6. SOLAR PANEL

ECO-LANTERN™ uses the solar panel to store then recycle the absorbed energy to power the super bright LEDs.

7. CRANK HANDLE

Located underneath lantern, the crank handle is used to wind up

8. AC/DC ADAPTERS INCLUDED

• NO BATTERIES

ECOLANTERN™ uses a 6V 2.5AH valve regulated rechargeable battery to give you supreme illumination every time without having to replace batteries.

• WIND UP

Wind up for 1 minute to produce 6 minutes of light. (Run time: 2.5 hours on a full charge)

• PRECAUTIONS

To prolong battery life, always turn lantern off when not in use. A constant drain on an uncharged battery will shorten the battery's life. It's best to use/charge the lantern at least once a month to avoid permanently draining the battery.

Quarrow® Lighting

Item #6059 - #6063

Submersible Fishing Light

- Underwater Fishing Green LED Light (12 LEDs, 36 LEDs, 90 LEDs & 180 LEDs available)
- Two 12V 0.02" x 15' Cable
- Submersible up to 16 Feet Under Water
- Impact Resistant
- Watertight Rubber Caps
- 15A Protection Fuse
- Red and Black Battery Clip
- 0.2" x 0.79" 15A Fuse

WHY GREEN LIGHT?

The Quarrow® Submersible Fishing Light shines a bright green light directly into the water. The green light starts a natural food-chain reaction by attracting a concentration of small microscopic animals called plankton. Bait fish such as shad and minnows are drawn to the light to feed on the plankton and larger game fish move in to feed on the bait fish.

ALLURE-LIGHT

The Quarrow® Allure-Light shines a bright green light directly into the water. The reason why this light helps catch more fish is very simple; the green light starts a natural food chain reaction by attracting a concentration of small microscopic animals called plankton. Bait fish, such as shad and minnows, are drawn to the light to feed on the plankton and larger game fish move in to feed on the bait fish.

- Fresh or salt water use
- Polycarbonate Water-Proof Body (up to 200 ft.)
- 1 Green LED (520-525nm) (110,000 plus hours of life)
- Three LR41 Button Cell Batteries Included
- Run Time: 48+ Hours
- Swivels on both ends
- Easy to install

UPC CODE	ITEM	DESCRIPTION	MSRP	CASE PACK
061317003443	5475	Quarrow® ALLURE-Light	4.99	24 PIECES

Quarrow® Fishing Accessories

Item #5502

Hook Remover

Helps remove those deep hooks

- Lightweight aluminum body designed for easy use
- Rust-Resistant
- The long-reach hook remover is ideal for releasing larger species
- Ergonomic handle ensures a good grip
- Easily removes hook and secures it for quick, clean removal
- Extends to reach deep hooks
- 9" length

UPC CODE	ITEM	DESCRIPTION	MSRP	CASE PACK
061317003719	5502	Quarrow® Hook Remover	5.99	12 PIECES

Item #5503

Telescopic Fishing Gaff

- 2 - Piece High Quality Aluminum Alloy Collapsible Frame/Handle
- Non-Slip Comfortable PVC Grip Handle With Wrist Strap
- Gaff Extends To 23.6 Inches & Contracts to 10.75 Inches
- High Quality Stainless Steel Hook With Protective Rubber Hook Cover
- Sharpened Tip To Perfection
- Great For Boating, Jetty Fishing To Land Fish

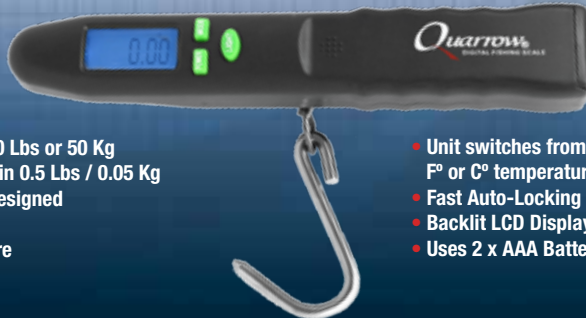

UPC CODE	ITEM	DESCRIPTION	MSRP	CASE PACK
061317003726	5503	Quarrow® Telescopic Fishing Gaff	19.99	6 PIECES

Item #5470

Digital Fishing Scale

- Weighs up to 110 Lbs or 50 Kg
- Accurate to within 0.5 Lbs / 0.05 Kg
- Ergonomically Designed
- 2 LED Flashlight
- 3 ft. tape measure

- Unit switches from Lb, Kg or Oz weights, F° or C° temperature
- Fast Auto-Locking weight feature
- Backlit LCD Display
- Uses 2 x AAA Batteries (Included)

UPC CODE	ITEM	DESCRIPTION	MSRP	CASE PACK
061317003399	5470	Quarrow® Portable Digital Scale	19.99	12 PIECES

FAQ

Frequently Asked Questions

Who is Alliance Sports Group?

Alliance Sports Group is the parent company of NEBO® Tools, NEBO® Sports, iPROTEC™ Firearm Accessories, Bollinger® Fitness, WeatherRite® Outdoor and Quarrow® Fishing.

What does NEBO® mean?

NEBO is mentioned in the Bible as the burial site of Moses. There is an excellent view of "The Promised Land" from Mt. NEBO. NEBO is also a mountain in Utah near where NEBO® Tools originated.

Can I order online?

Yes. Go to nebotools.com to purchase products at retail or sign up to become a dealer. Credit card orders only.

Are batteries included in your products?

All flashlights, cap-lights, head lamps and multi-tools that require batteries have batteries included.

Are lasers safe and legal?

Lasers of all types are regulated by the FDA. All lasers used in NEBO® flashlights meet the required standards and have the appropriate warnings to avoid direct eye contact with any laser.

Are NEBO® products waterproof?

Some NEBO® products are waterproof, however most are water-resistant. Please see product details for further information.

Do your holsters fit all your flashlights?

These holsters fit all of our flashlights except the HIGHBEAM™ Series, EDGE™ series, LUMA™ / LUMIERE™ series, BLUELINE® series, Larry™ & Larry™2 series, #5905 iPROTEC™ Pocket CHAMELEON™ and #5906 iPROTEC™ Blood Tracker.

Which iPROTEC™ product will fit my gun?

The dimension specs for each of our iPROTEC™ items is listed in our catalog and also on nebotools.com. Our rail mounted lights are now equipped with a hinge-mount design that provides a more universal fit.

Customized products with your logo?

The minimum order quantity is 100 pieces for most items. Lead time is 21 days. Contact your NEBO® sales representative for pricing and for more details.

Does NEBO® offer a warranty for its products?

Yes, NEBO® stands behind its products with a 1 year limited manufacturer's warranty. Any item that does not perform properly due to a manufacturer's defect can be returned for a warranty replacement. Warranty does not cover normal wear and tear or batteries. Contact warranty@nebotools.net or 800.255.6061.

LIGHTING 101

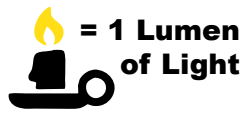

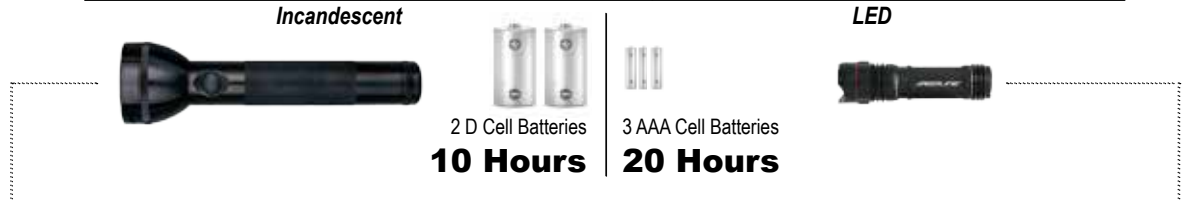

Understanding LED Flashlights

LEDs Run
2X
LONGER

LED Lights Explained

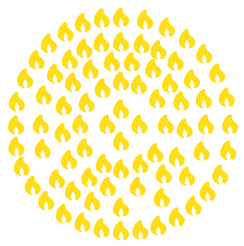

An LED is a Light Emitting Diode that uses a semiconductor, rather than a filament, to create light. Because of this, LED lights are much brighter, use a fraction of the energy and last thousands of times longer than other bulb types.

Runtime of Incandescent vs LED (using equal brightness settings)

Brightness

A good rule of thumb would be to consider a single lumen of light to be as bright as one burning candle. In the past, the brightness of any given light bulb was measured by the amount of watts it consumed. Most people understood about how bright a 60 watt bulb would be without needing a scientific explanation. Recently, the unit of measurement for brightness has graduated from Watts to Lumens. This is mostly because it no longer makes sense to try and determine the brightness of a bulb based on its power consumption.

LIGHT BEAM INTENSITY
IS AFFECTED BY THE OPTICS & LUMEN RATING

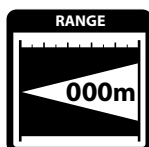

Measuring the Distance Light Travels

The distance that a beam of light can travel is often referred to as the “throw.” A flashlight’s throw is important because people typically buy flashlights to help them see at a distance. The throw is determined primarily by two things: the lumen rating (brightness of the light) and the flashlight’s optics (the lens and housing of the light source.) While a high lumen rating may produce a bright light, it doesn’t necessarily mean that it will project the light at a far distance. Think of a light bulb in a lamp for example – while the light may be bright (lumen), it doesn’t reach (“throw”) very far because it lacks the optics required to focus all of the light’s intensity in one direction.

ANSI (American National Standards Institute)

In 2009, the American National Standards Institute created standards for benchmarking a flashlight’s performance (ANSI/NEMA FL 1-2009, the Flashlight Basic Performance Standard, also known as “FL 1 Standard.”) This standard makes it easier for consumers to compare different flashlights. These benchmarks rate Beam Distance (throw), Impact-Resistance, Run Time, Light Output (Lumen), Water-Resistance, Water-Proof Depth Rating and Peak Beam Intensity. Our flashlights clearly state the ANSI ratings right on the package.

DEFINITIONS

High-Powered LEDs

These LEDs produce a more intense light that travels a further distance than cluster LEDs. Conversely, these also use more power than clusters do.

Cluster LEDs

These LEDs consume less power while still providing a bright light. They tend to produce a wide angle of light and are better used for short range lighting to illuminate your immediate area.

Adjustable Focus

The adjustable focus feature allows the user to change the focus of the light beam from a spot light (a sharply focused beam of light that illuminates more distant areas) to a flood light (a broad circular beam of light that illuminates larger, close-up areas.)

Convex Lens

The convex lens evenly distributes the light for a highly concentrated beam without dull or dark spots, as most traditional flashlights have.

Green LEDs

Because the human eye recognizes the color green faster than other colors, green light is used for map reading or signaling, especially in low light conditions. Also perfect for hunting as some game cannot see green light.

UV LEDs

These can reveal materials that are not seen through normal lighting and can be very useful in the following applications:

- Crime scene investigation to reveal certain bodily fluids
- Rodent and pet stain detection
- Document analysis and currency verification
- Gemstone verification
- Leak detection (i.e. Freon)

Red LEDs

Red light is primarily used to preserve night vision. Best used for low-light or nighttime situations, the low-signature red light provides great contrast making it easier to read charts and maps. Police and military units utilize the red LED for night operations because it will not interfere with night vision technology and cannot be seen by the human eye over long distances. Fire rescue units also use the red LED because it provides better visibility in smoky situations than white light.

Red Laser Pointer

Class IIIa lasers are used in all of our laser products. All red lasers have a maximum output of <5mW with a wavelength of 650nm +/- 10. Laser pointers work well in a variety of situations. Laser pointers can be used as a sighting tool for weapons, or more commonly used to point to an object that is out of reach.

Note: Directing laser at eyes can cause serious damage. (All laser pointers comply with 21 CFR 1040.10, 1040.11 & Ch. 1, Subchapter J)

Green Laser Pointer

Class IIIa lasers are used in all of our laser products. All green lasers have a maximum output of <5mW with a wavelength of 523nm. Green lasers are more sensitive to temperature, but they work better for day time applications.

Note: Directing laser at eyes can cause serious damage. (All laser pointers comply with 21 CFR 1040.10, 1040.11 & Ch. 1, Subchapter J.)

Hands-Free Lighting

Hands-Free lighting allows the user to illuminate a desired area while maintaining the use of both hands. We use clips, straps and magnets to give hands-free options with some of our products.

Head Lamps

Head Lamps are useful for any job that demands hands free light. Adjustable straps ensure that these lights can be worn comfortably and securely indoors, outdoors or anywhere.

Cap-Lights

Cap-lights attach to virtually all brimmed style caps for a practical, hands-free light source and offer a sleek, multi-directional lightweight design with an easy-to-activate ON/OFF button.

Lighting Modes

Our advanced circuitry allows for variable brightness control and lighting flash sequence with a simple touch of a switch that regulates the lighting mode. By decreasing brightness you can extend the run time of the battery.

Defensive Strobe Lighting Mode

Perfect for signaling, the defensive strobe mode can also be used to disorient an attacker or animal by shining it at them. Please use with caution when doing this.

S.O.S. Lighting Mode

S.O.S. is the commonly used description for the international Morse Code distress signal. The code for S.O.S. is 3 short, 3 long and 3 short signals. The S.O.S. sequence will repeat until the setting is changed or the light is turned off.
