Home Runs  
For 50% of pulls  
on hard pipe jobs

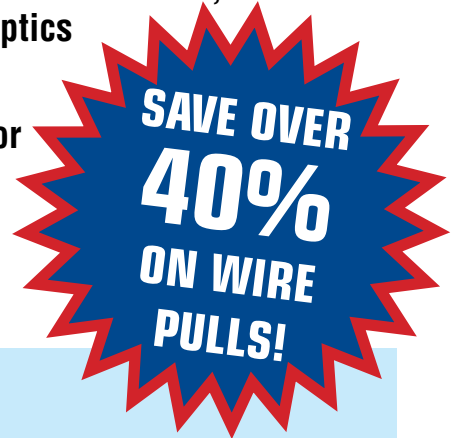

# EZ Pull-EZ Read Wiring Harnesses

For Power, Controls, Voice, Data, etc.

- ▶ Any type, size, length, number of conductors, wire or cable including Fibre Optics Enhanced Cat 5 or 6, etc.
- ▶ Every wire is carefully tested for continuity and quality
- ▶ Extra footage is provided to guarantee harness length

## ELIMINATES:

- Labor intensive and often injury causing loading several heavy reels on racks then tearing them down
- Time consuming ringing out, making and applying costly wire markers that can be incorrect plus fall off during handling and the pull
- Left over partial reels to handle and haul back to the shop and never use.

## NO WASTE!

Set up only one reel and pull only what you actually need.

**Trees 1983**  
Set up one reel and pull to hit several locations

**Controls**

**Low Voltage**  
Including Fibre Optic

**Large Cable**

  - Offices
  - Oil Refineries
  - Pipe Lines
  - Power Plants
  - Printing
  - Prisons
  - Schools
  - Steel Plants
  - Theaters
  - Water Treatment & Sewer
- ...and many more!

Any size wire, type of insulation, length, number of conductors, or combination of sizes and cable types in the same harness up to four thousand pounds per reel maximum. For greater weight requirements, consult factory.

- ▶ All conductors are same length or "Trees" with wires broken out and perhaps looped to hit several locations in one pull. Specify if "Trees" are pulled to or from panel.
- ▶ Each conductor UV laser cured for excellent adhesion and printed with any combination of numbers, letters, symbols repeated every 1/2 inch along its entire length.
- ▶ Wires bound by Cross Tape with easy to remove tabs or spiral laced. Cross Tape allows faster-easier pulls, adding or removing wires later and eliminates time lost and damage to wire if lacing breaks and balls up.
- ▶ Both inside flanges lined 360° with smooth fiberglass tape prevents wires being scraped or cut if pulled over edge of flanges.
- ▶ Reels shipped standing up or flat on skids for easier unloading and handling on jobsites.

**Save time, waste, reduce chance of injury, plus eliminate mistakes by using SP Wiring Harnesses on all your jobsites...  
one pull and your done!**

- Every conductor is carefully inspected to provide excellent quality plus reels are properly marked and shipped laying flat or standing upright on skids for easier unloading and handling on jobsite.
- Customer must be aware very often reels furnished by manufacturers run short therefore home runs and other harnesses may only be as long as the shortest reel of the conductors involved. Also a small amount of footage loss occurs when printing or striping each conductor.
- Extremely competitive pricing with firm price blanket orders offered.
- Labor only orders (customer supplies wire) or labor with material supplied by SP negotiated.
- **An unlimited variety of manufacturers' brands and other types of wire including low voltage (Cat 5 and 6, fibre optic, etc.) size, length, wire colors, number of conductors each either striped or printed with numbers, letters, common symbols flush harness in all types of flexible conduit – steel or aluminum, liquidite, ENT, etc.available.**

	Purple	Pod #3-Door 103
	Green	Pod #3-Door 103
D	Yellow	Pod #3-Door 104
	White	Pod #3-Door 104
	Blue	Pod #3-Door 104
	Purple	Pod #3-Door 104
	Green	Pod #3-Door 104

This was an actual layout diagram from the Door Locking System at the Cook County Jail, Div. 11 project. Approximately 1.4 million feet of #14 THHN was harnessed for this job by S-P Products. The harnesses were designed to feed 4 doors from each homerun. The printing of each wire saved the contractor enormously because the specifications for the job stated that all the wires had to be identified (tagged) at each and every junction and pull box used on the job.

NOTE: ALL WIRE TO BE #14 THHN STRANDED

# Pre-Wired Flexible Conduit Custom Assemblies

## Eliminate Expensive Conduit Installation and Wire Pulls

Ideal for Power, Controls, Low Voltage, Data, Surveillance, Security, Fire Alarm, Instrumentation etc., plus 480 Volt Temporary Power and other applications where extra protection for the wire is required.

Customer is responsible for compliance with the local and National Electrical Code, plus the owner's and specifying engineers' requirements. Customer must obey the National Electrical Code conduit fill and derating charts and all grounding requirements.

**PRE-WIRED FLEXIBLE CONDUIT ASSEMBLIES DO NOT MEET MC CABLE SPECIFICATIONS PER THE NATIONAL ELECTRIC CODE.**

- Available in long lengths with any number of conductors and types of wire or cable installed, including: fibre optic, in any type of flexible steel or aluminum, liquidtight, ENT, NMLT, etc. conduit up thru their maximum size. Various sizes and types of wire and cable can be combined, however low voltage and 300 volt or more cables cannot be in the same pre-wired flexible conduit assembly.
- Conductors can be printed with any combination of numbers, letters or common symbols up to 256 characters repeated every half inch along their length.
- Assemblies do not have fillers within or wrapping of mylar or any type material around conductors within the flexible conduit.
- A PVC jacket over aluminum or steel flexible conduit is available in a wide range of mil thicknesses and specified colors. Ideal for greater protection in wet locations, corrosive areas or embedding in concrete slabs.

**Ideal for Installation in difficult spaces where bends are needed - around columns, other obstructions, etc.**

# QwikDuct HDPE CUSTOM TEMPLATES

For PVC Schedule 40 and 80, EB, DB, Fiber Glass,  
PVC Coated or Plain Galvanized Rigid Conduit  
**Safer and Over 15 Times Faster**

Order by description with  
signed approved drawing.

Stake assembled conduit down **FROM ABOVE**  
with plastic rod or rebar to prevent floating  
during concrete pour

**When lifting wrap slings around conduit only – NOT TEMPLATES**

**CONTRACTOR EARNED \$950,000 ON \$1,800,000 BID...**

He assembled and lowered conduit from above and worked only in the manholes. He was able to dig a narrower trench which required less excavation, shoring, concrete, backfill...

**AND HELPED PREVENT**

**Also available with wheels to easily roll assembled conduit into caissons**

- Extremely Strong 3/8 Through 1" Thick Black Recycled High Density Polyethylene Approximately 4,000 lbs. PSI "May Qualify for LEED Credits"
- White virgin material also available for greater resistance to heat. Material does not qualify for LEED credits.
- Any Size, Shape, or Combination Different Conduit Size holes, Spacing, and Rebar Holes, Etc. available. Customer Must Furnish an Approved Drawing Before Production Begins.
- Non corrosive in sand, gravel, concrete, or dirt.
- Notch Provided on Top Left to Enable Proper Alignment of Conduit Openings When Assembling Above Trench.
- **WHEN LIFTING INSTALLER MUST WRAP WIDE NYLON STRAPS AROUND CONDUITS. NOT ATTACHED TO TEMPLATES.**
- When Many Configurations are Involved, Indicate Priorities.

# No Center Stop Slide On Couplings

## All Sizes EMT, IMC and Rigid Heavywall Conduit

Patent Pending

1. Slide coupling over end of pipe
2. Line up 2nd conduit and mark it to allow coupling to be centered over both conduits.
3. Slide coupling back to mark.
4. Tighten 3/8 hex head bolts and conduits are securely joined together at center of coupling.
5. Size 1/2 thru 2 inch = one bolt  
sizes 2 1/2 and larger = 2 bolts on each end

Size 1/2" thru 4" EMT, IMC plus 6"  
For Rigid Heavywall Conduit  
Order by size and type of conduit

Completely smooth inside diameter along entire length allows flexibility of movement for fast easy installation of conduit in tight difficult situations.

# Conduit & Box Support Plates

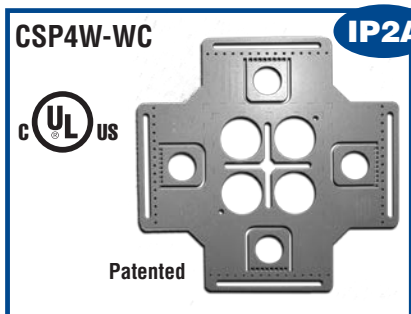

## Save More Than 20 Minutes

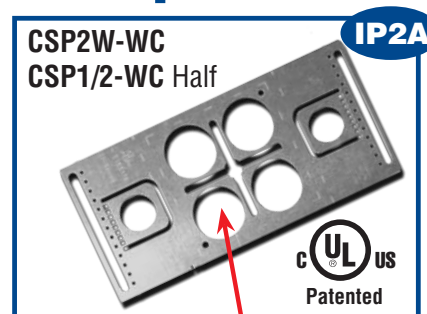

**NEW!**

## ... and Over 1 Hour per Installation

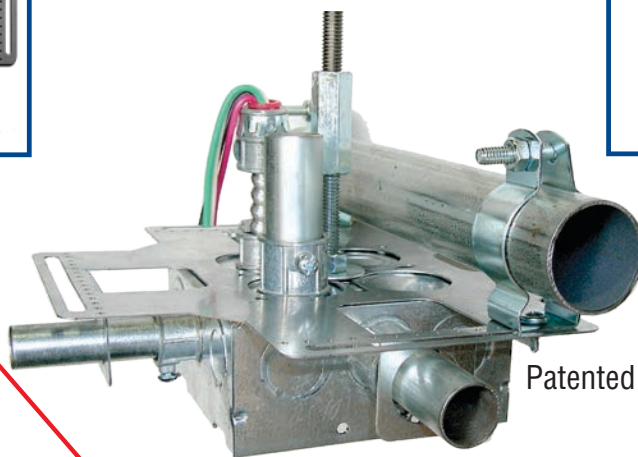

### 2 or 4 way eliminates conduit clamps

Enter any side or back and support conduit above the box – all from one support in less time and with less material.

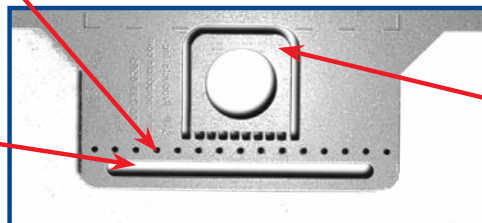

Support conduit for temperature, fire, data, security, etc. Systems ABOVE THE PLATE with clamps attached by TEK screws into closely spaced 3/32" holes provided in every wing.

Enter back with 1/2 or 3/4 inch EMT, MC Cable or Flexible Conduit whips thru 4 large open KO's in center of plate.

1/4" wide open slot located on every wing if specifications require clamps to be attached with 1/4" nuts & bolts.

Bend built in tabs down 90° (away from box) and slide conduit thru openings into connectors installed in center KO's oneach side of box.

# EZ Bar Hangers

For Down Lites, Speakers, Exit Signs, Fire Alarm Boxes, etc. in 2 and 4 foot T Bar Ceilings

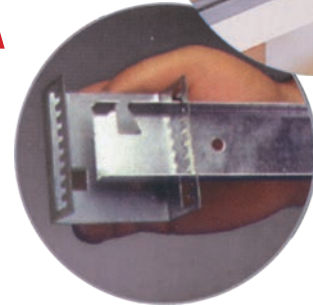

PATENTED

Save up to  
**20 MINUTES**  
with a perfectly aligned  
installation every time.

2 Foot T Bar = **2B1**    4 Foot T Bar = **4B1**

- ▶ Allows movement of fixtures and boxes in both directions to quickly ensure their proper alignment.
- ▶ Extremely strong with a 50 lb load rating and no extra parts to drop or lose during installation.
- ▶ Hangers have a center mark and 2 mounting holes each 1-1/2 inch from center to quickly mount speakers or other devices in center of tile plus one at each end for support independently of T Bar per NEC requirements.

**1** Snap hangers onto T Bar and bend tabs to lock in place.

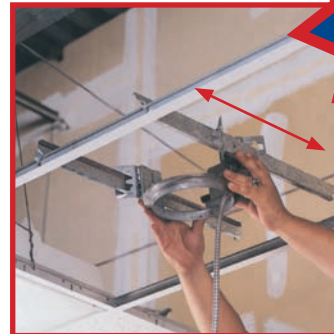

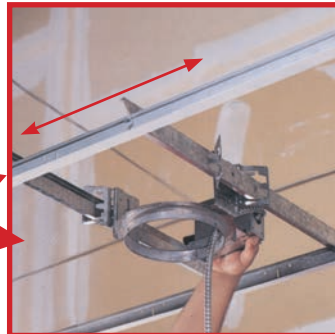

**2** Brackets for mounting boxes at various heights.

Box Brackets = **PB1**

**Perfect Alignment Every Time**

Slide 2 bar hangers and housing along T Bar Box ...

**Faster Installation**

... and fixture housing only along bar hangers to exact location desired and bend tabs down to lock housing in place.

**Eliminate labor intensive cutting and tying down lathers channel, black iron, conduit, etc.**

# Truss Hanger

## for Supporting Cable Tray, Conduit and other Heavy Equipment

### Safer and faster. Eliminates climbing and working above trusses. Install in seconds while standing on deck below.

Upper Chord  
**THUC 38** = 3/8"  
**THUC 50** = 1/2"

Lower Chord  
**THLC 38** = 3/8"  
**THLC 50** = 1/2"

Distributes load evenly over the center of the bar joint.  
Eliminates angle iron distribution.

**CAT 38** = 3/8"  
**CAT 50** = 1/2"

Use 3/8 or 1/2 inch threaded coupling to lengthen rod and install from deck with no ladder or lift.

Attach a KLEVIS or other types of readily available hardware

**THW 38** = 3/8"  
**THW 50** = 1/2"

**One piece KEPS® integrated nut/washer firmly locks into chord.**

**Provides rigid seismic restraint.**

**Seismic bracing not required when used in top chord applications (9.3.5.3.8 NFPA 13)**

## Also suitable for overhead structural attachment for electrical, fire suppression, plumbing, and HVAC applications in open web bar joists

# “Quick Pipe” Conduit Support Roof Block

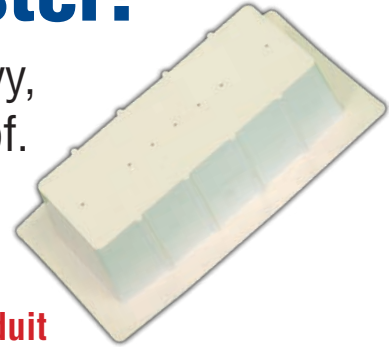

## Safer, Lighter and Faster!

QP2000BK

Eliminates cutting and hauling heavy, expensive treated lumber up to roof.

**Just set black block with yellow certiform foam base on tar and gravel and white one piece free floating block on membrane roofs then quickly secure conduit with an inexpensive one hole strap.**

QP2000WH

Patented

- Design allows stacking them together for easier handling
- Prevents costly damage to roof membrane. Moves slightly when conduit or pipe expands or contracts during temperature changes.
- Strong HDPE resin with a long life

## Suitable for electrical, plumbing, HVAC, etc. installations

# Prefabricated Assemblies

## Any Configuration For Repetitive Applications

**Machinery, Refrigeration, Drops, etc.**

*Any type, size, length and color of cord.  
Also available with Kellems™ Grips.*

**Data Center PDUs**

*MC Cable or any Liquidtite jacket color, size, length, UL Listed with any type of device and ID Labels under clear heat tubing.*

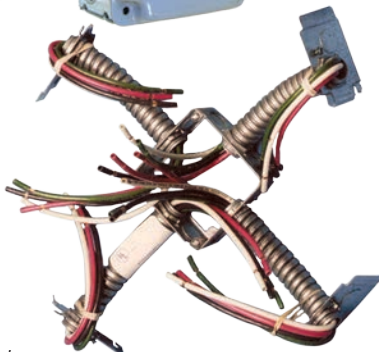

- Available for Plastic or Steel Boxes, Hard Pipe EMT, MC Cable, Romex and All Types of Flexible Conduit installations.
- Every unit has a UL label plus is tested for excellent quality
- Multi gang assemblies available
- Marked and packed per customer's specifications

**...and Other Applications**

*All types and configurations of flexible Conduit, Cord or Cable, "Econo-Whips" attached.*

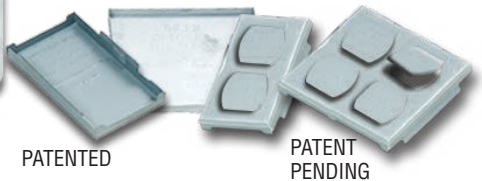

*"Octopus" for Ceiling Lighting Layouts*

### Snap On/Off Covers for Protection and Access to Temporary Power

1 Gang = **SOC-1G**  
2 Gang = **SOC-2G**

Bend tabs out to plug in for temporary power and back in to protect device

PATENTED

PATENT PENDING

*Strong steel, reusable and adjustable. Fit all manufacturers' mud rings. Snap on/off inside edges to allow router to cut a smaller opening. Eliminate labor intensive screws. Also suited when tucking wired in devices toward back of deep box.*

**Protective covers sold separately.**

## Quantity discounts and "Labor Only" orders (customer supplies material) available for greater Savings!

**Customer is responsible to determine assemblies comply with all applicable codes plus owner's and specifying engineers requirements**

# Prefabricated Assemblies

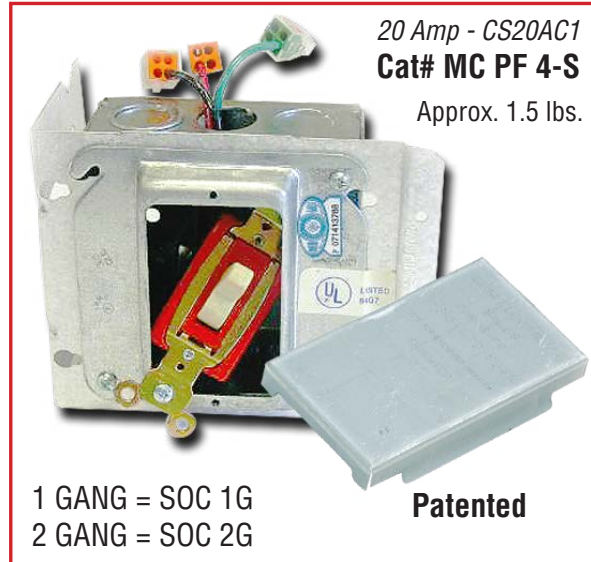

## For Typical Wall Outlets

*Keep a small quantity of commonly needed assemblies on hand for everyday jobs and order large quantities for projects.*

20 Amp - CRB5362  
Cat# MC PF 1-R

20 Amp - CS20AC1  
Cat# MC PF 4-S  
Approx. 1.5 lbs.

1 GANG = SOC 1G  
2 GANG = SOC 2G

Patented

## Complete with the following components

*If not specified manufacturers' equals in brands of our choice will be supplied.*

- 1- 4 square 1/2" - 3/4" KO x 2 1/8 deep box
- 1- 1 gang x 5/8" raised mud ring
- 1- 20 AMP specification grade back wired device tucked in back of box or attached to mud ring
- 1- #12 stranded 8 inch long pigtail grounded to box
- 1- Single side back box support for any stud depths.
- 3- #12 stranded 8" long any color wire leads each with a Wago push on quick connector or live spring wirenut attached. Looped devices have 6 leads – 3 in and 3 out of box, all on same circuit.
- 1- One or two gang snap on/off strong steel patented adjustable and reuseable protective cover attached to mud ring.

***Covers also available as a separate item.***

## An unlimited variety of other types, manufacturers brands and configuration of components available

# Anchor Bolt Templates

## For Poles, Beams, etc.

### Reusable for Many Jobs.

**Each Template  
Saves 100's of  
Dollars!**

- Extremely fast, accurate installations.
- Rulers on all 4 wings allow drilling same bolt diameter holes for 5-1/2 thru 25 inch four bolt circle patterns.
- Deep recess in back allows leveling nut to be free of concrete.
- Embedded divots ensure accuracy when drilling.
- Strong non-corrosive ABS plastic.
- User can color code templates – one color for each same bolt diameter and drill different circle patterns from job to job and order from the field by color.

## Eliminate constantly purchasing and fabricating expensive plywood.

# Wire Pulling Pal

Only One Electrician Needed to Pull Wire  
Pays for itself in ONE DAY!

Patented  
Cat# 100PP

## Closely Spaced Rollers Prevent Damage to Wires

- Unique closely spaced roller design allows building wire and low voltage cable to be pulled faster and easier without being nicked, scraped or cut. Eliminates costly on site problems, call backs and upset customers.
- Ideal for bundled Home Runs and all types of low voltage cable including, fiber optic, CAT 5 or 6, etc.
- Per-drilled holes allow fast mounting on 4" and 4-11/16" square or handy boxes, 1 and 2 gang mud rings, larger junction boxes, panels, studs, etc.
- Strong well machined steel construction. Built to last.

Every service truck should  
have at least one.
